EDUCATION REFORM ACT — HB 1017
Schedule 1-A

Section 41.29a of Title 62 subsection A states: "In order that the Legislature may guarantee that the increased revenue generated as a result of the tax changes contained in this act shall be appropriated to fund the education reforms provided for in this act, the Office of State Finance shall present as part of the official certification process for each fiscal year an estimate of all revenues which shall accrue to the General Revenue Fund as a result of the tax changes contained in this act. The estimate shall show the increased revenue from personal income taxes, corporate income taxes and sales and use taxes as a result of the provisions of this act separately. The estimate shall further account for changes to such revenue which result from growth or decline in said tax sources due to economic circumstances."

The method of determining the percentage of each source attributable to HB 1017 was set by the State Board of Equalization at its April 26, 1990 meeting. The ratios were established originally by dividing the estimate of revenue to be raised as a result of HB 1017 by the total estimate of revenue of each source at the time of passage of HB 1017. These ratios were updated at the February 19, 1991 meeting to reflect the annualization of what were partial year estimates at the April 26, 1990 meeting of the State Board of Equalization.

SB 826 of the Second Regular Session of the Forty-fifth Legislature amended Section 41.29a of Title 62 to require that the Office of Accountability to account for and report monthly revenues which accrue to the Education Reform Revolving Fund. The Education Reform Revolving Fund on June 1, 1996 began receiving revenue attributable to the revenue provisions of HB 1017 rather than these revenues first being apportioned to the General Revenue Fund.
