Doctors without Boarders

Available Diagnostics Tools for the Management of Advance Disease

Cryptococcal meningitis: CrAg LFA [CSF, plasma, serum, blood]

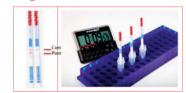

- Rapid and inexpensive test;
- Allows large-scale screening;
- Allows decentralization of CrAg testing at the PHC level;
- Allows earlier detection of CM for prophylaxis with fluconazole;
- 28% reduction in mortality in one study in Tanzania and Zambia.

WHO 2011

National Guideline

Challenges:

- Slow implementation of CrAg screening programmes
- Symptomatic CrAg+ patients need referral for lumbar puncture
- Higher prices due to mark up of local distributors
- Stock-outs of fluconazole
- Lack of access to better drugs

COVID-19 Response for Oklahoma
