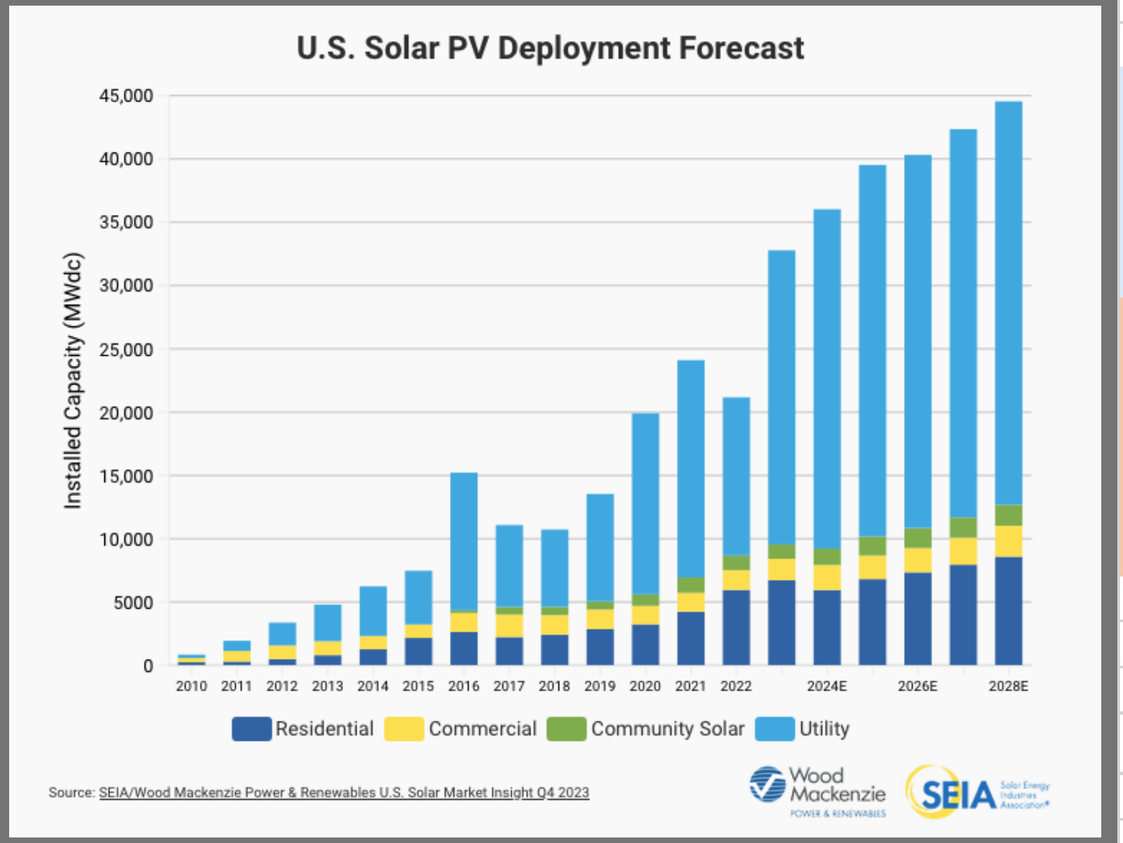
INCREASE OF RENEWABLE POWER DEMAND



Year	Amount (GW)	Amount (MW)	Acres needed	
2022	12.5	12500	75,000	
2023	23	23000	138,000	Likely already identified and secured
2024	27	27000	162,000	
2025	30	30000	180,000	
2026	30	30000	180,000	
2027	32	32000	192,000	Land that will have to be secured to meet projections.
2028	34	34000	204,000	
2029	35	35000	210,000	
2030	35	35000	210,000	
2031	35	35000	210,000	
2032	35	35000	210,000	
		TOTAL	1,971,000	acres
		SECURED	735,000	acres
		NEEDED	1,236,000	acres
ASSUMED ACRES PER MW =		*6*		

FARM INSTABILITY

Global Exports Add Vulnerability

Feed Cost Volatility

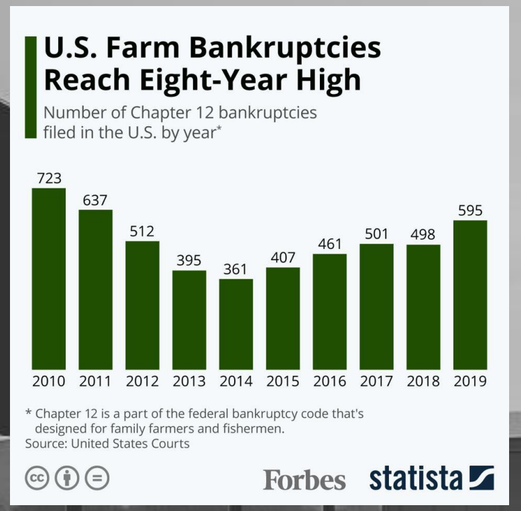
Extreme Heat Events

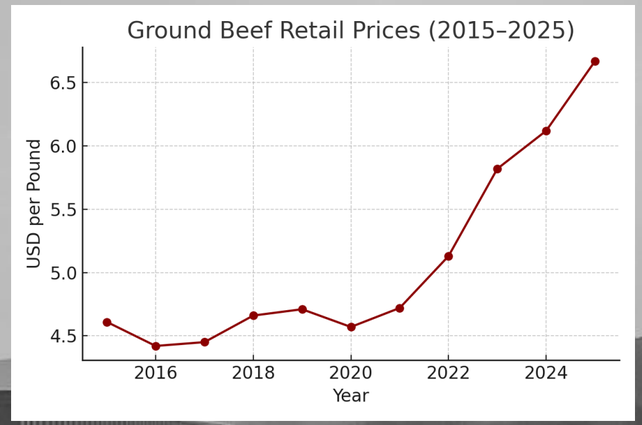
Aging Out (~58+)

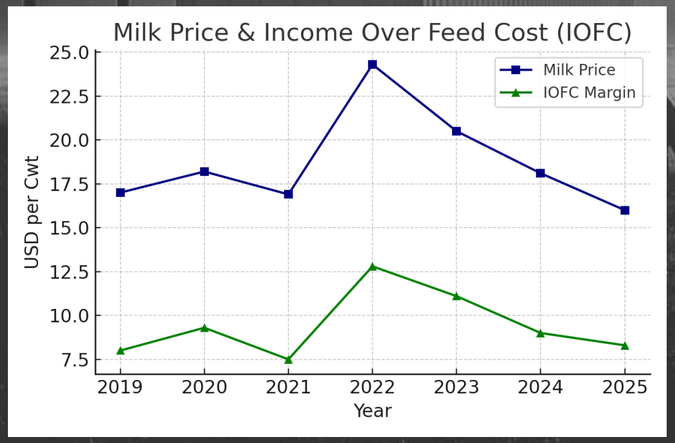
Increasingly Work 2nd Jobs

Limited Health Care Access

Increased Mental Health Risk







Farm milk prices declined ~11.7% YoY by June 2025
IOFC margins shifted ~$12/cwt between 2023–2024

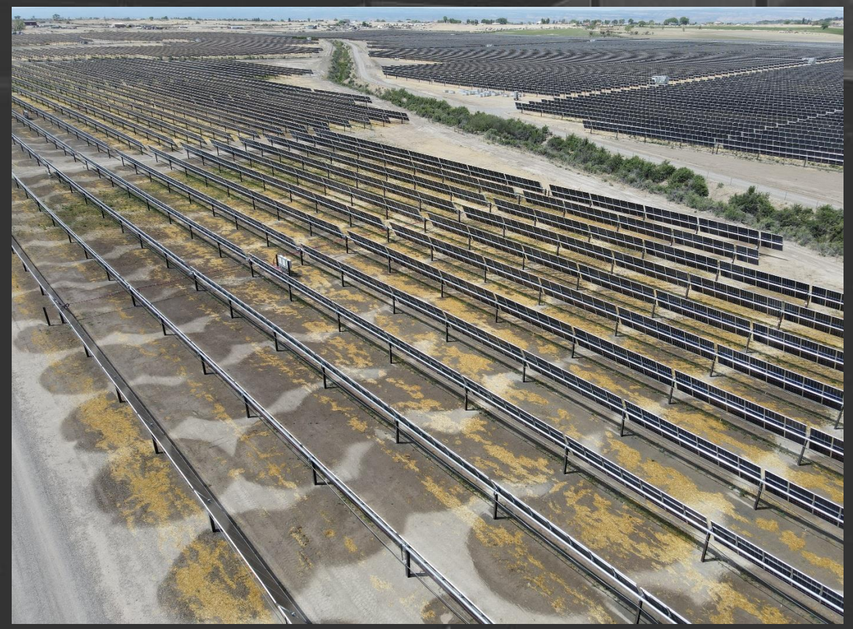
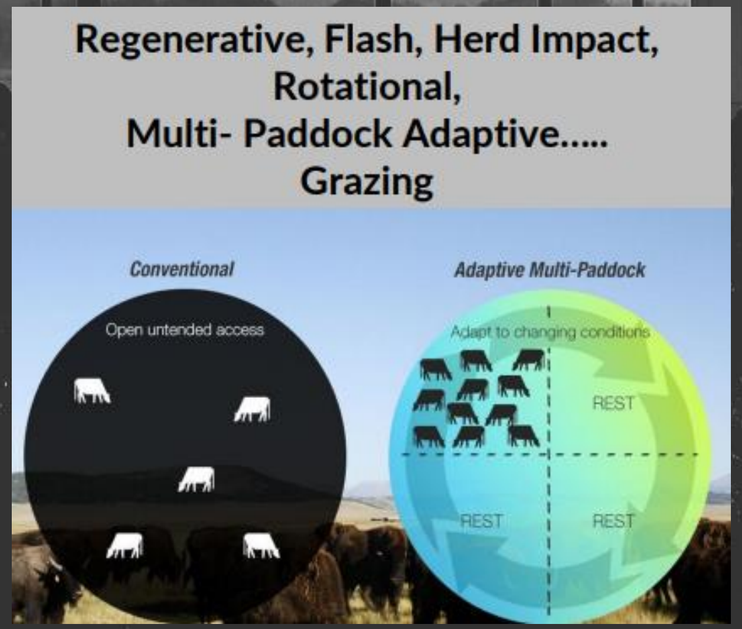
AGRIMATION

THE FUSION OF LAND & AGRICULTURE WITHIN ENERGY

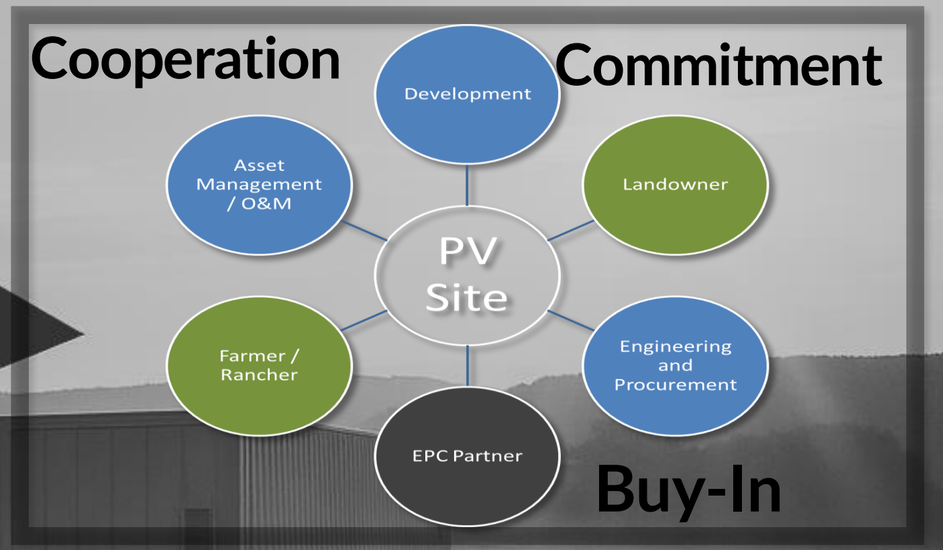
It’s a holistic, comprehensive data driven, and project lifecycle approach to large scale energy development where every phase is driven by agricultural intent.

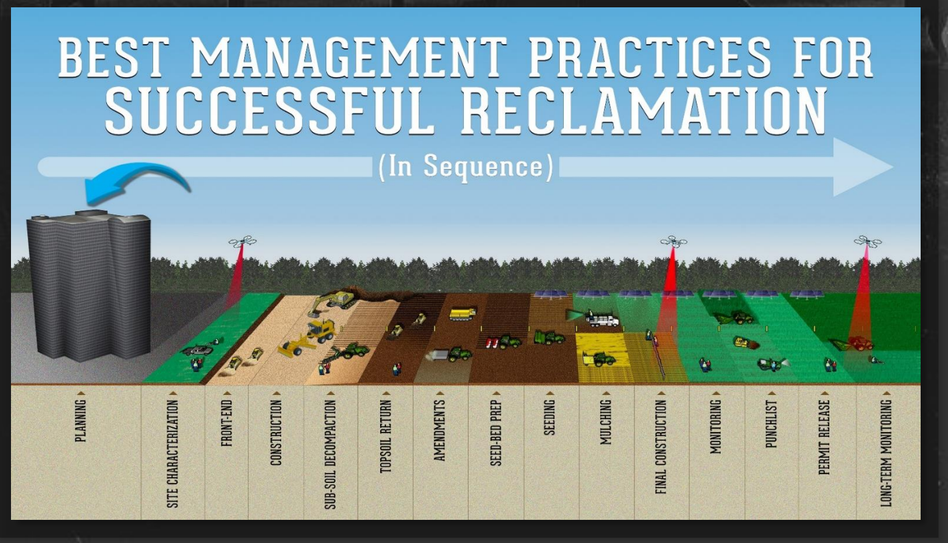


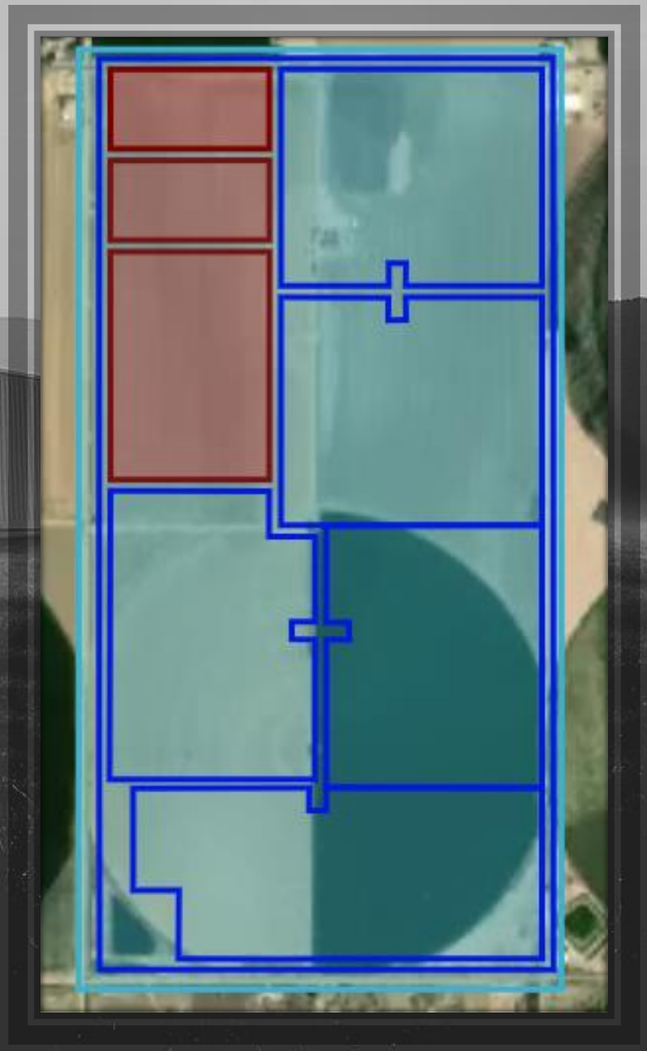


AGRICULTURAL INTENT

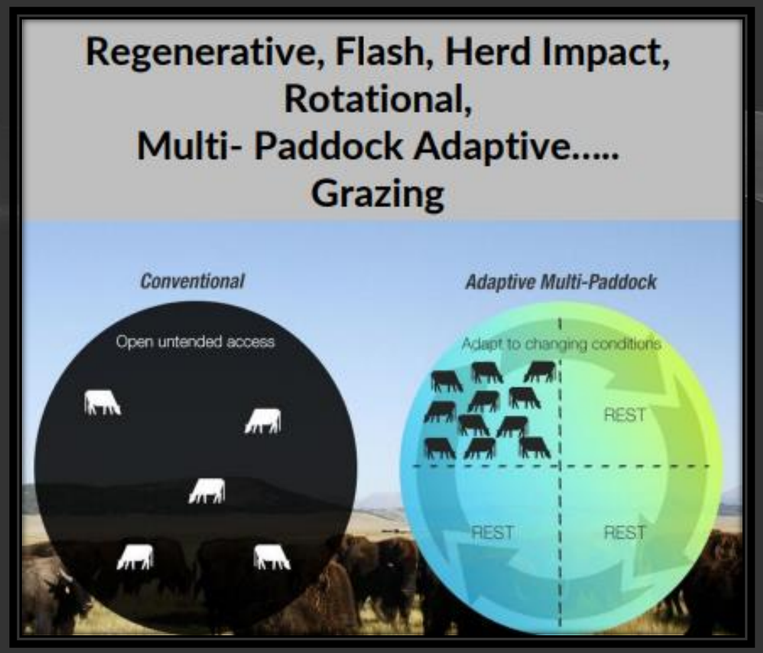
- Site Selection
- Project Economics – Solar & Ag
- Site Design
- Community Engagement
- Civil
- Construction
- Long Term Management







NO MAJOR CHANGES TO SOLAR DESIGN



VALUE STREAM IS CLEAR

New Opportunities for Developers

Higher Quality of Life For Ranchers and Cattle

Maintain Character of Rural Agricultural Community
