Representative Shoemake moved that the Presiding Officer appoint a committee of 3 members of the Senate and 3 members of the House, to notify Governor William H. Murray that the Fifteenth Legislature in Joint Session, is ready to receive him and hear his message.

The motion prevailed, the President appointing Senators Nance, Timmons and MacDonald and the Speaker appointing Representatives Speck, Billings and Skinner.

The Joint Session was declared at ease, awaiting the arrival of the Governor.

The Joint Committee, appointed to notify the Governor that the Joint Session awaits his presence, reported the duty performed, escorting the Governor to the Speaker's desk, where he was presented to the Joint Assembly by President Burns.

The Governor after addressing the Joint Session, read the following Message, which, upon motion of Senator Nance is herewith incorporated in the record:

GOVERNOR'S MESSAGE TO THE FIFTEENTH LEGISLATURE
TO THE HONORABLE SENATE AND HOUSE OF REPRESENTATIVES,
FIFTEENTH LEGISLATURE OF OKLAHOMA,

Gentlemen:

Under Section 9 of Article 6 of the Constitution, it is the duty of the Governor to submit to the Legislature at its convening the general condition of the State, and make recommendations as to laws and policies for change or modification.

While I avail myself of this duty and power, I shall confine myself to those things only that relate to the permanent policy of the State, leaving the immediate policies to my successor, for fear of making pronouncements in cross-purpose to those things that he may hereafter submit to you. But I do urge you to remit all tax penalties.

Probation—Paroles—Pardons

Under Section 10 of Article 6 of the Constitution, it is the duty of the Governor to submit at each Regular Session of the Legislature his exercise of clemency granted to him exclusively by the Constitution. I quote the section as follows:

"Section 10. The Governor shall have power to grant, after conviction, reprieves, commutations, paroles, and pardons for all offenses, except cases of impeachment, upon such conditions, and with such restrictions and limitations, as he may deem proper, subject to such regulations as may be prescribed by law. He shall communicate to the Legislature, at each regular session, each case of reprieve, commutation, parole, or pardon, granted, stating the name of the convict, the time of which he was convicted, the date and place of conviction and the date of commutation, pardon, parole, or reprieve."

This last clause has been overlooked too often in the past, but I shall attempt to follow its provisions in spirit and letter.

There is here filed with each House of Your Legislature, copies of each and all Acts of Clemency, and the reason in each case given in the copy filed with Your Body.

I may state also that all Acts of Clemency have been made of public record. The Parole Department knows where every convict is, and the condition of every Act of Clemency.

I call your attention to the fact that while I have liberated either on probation or parole and pardon some 1600 persons, yet my Acts of Clemency will aggregate nearly 2400, because of duplications of such Acts; first, by giving a probation of six months, or twelve months,

followed by a twelve months' period to ascertain from the monthly reports whether it is probable that the convict will obey the law; and, if it is believed that he will do so, he is then given a parole. I pardon no one unless he has been out four, five or more years, and been law abiding.

My predecessors have followed the policy of pardoning every person who served their entire term. These are called "Expiration Pardons." For instance, Governor Haskell executed some 500 of such cases; but I have never pursued that policy for the reason that because the convict took all the punishment is no reason that he would become a law-abiding and responsible voter.

I have executed a total of 48 pardons,—the lowest number of any Governor. I have paroled and placed on probation more than most Governors. But these probations, leaves and paroles have been given in such a way as to be revoked at any time—with few exceptions.

I have never pardoned anybody in the face of an election, so there could be a charge that the same grew out of political consideration. Up to the General Election, on the 6th day of November, 1934, I had executed but 20 pardons. These, for the most part, were persons who had obeyed the law, and had been relieved from imprisonment for from ten to twenty-one years. Immediately after the election, in keeping with my purpose, I pardoned more than during any other period; but, in all cases, where the convict had had four, five or more years trial.

It will be observed that I paroled more in 1931 and 1932 than any year since, for the reason that many persons without friends, unable to employ a lawyer, had been overlooked. I sought through the faithful and painstaking effort of Judge C. E. B. Cutler to ascertain such cases, and to give them an opportunity; and I yet believe there are between 300 and 400 of these cases. I have turned out few who ought not to be out; for lack of time there are more who ought to be out.

I have established the policy of not turning out any convict who had committed a crime more than once, with but few exceptions. I found quite a difference in the convict that could be trusted, depending upon the crime for which he was convicted. For instance, robbery with firearms, called sometimes, "Hi-Jackers," paroled in 1931 and 1932, proved untrustworthy to the amount of 20 per cent. In cases of chicken theft, they repeated the theft to the amount of 25 per cent; while statutory rape have proven law-abiding to the amount of 99 per cent; and other crimes, 98 per cent on all to date more than 93 per cent have proven worthy.

I have also found from the statements of the convicts themselves that the four or five first months was the trying period of the convict. They could not sleep; they continued constantly in dread of their terms; but, when left there for several years, they become calloused and adopt a feeling of "Don't Care" about themselves or society in general.

I have found that if a short-time convict, for his first offense,

is turned out after four or five months, for a year, and then put back in four or five months, it will do him more good than to have kept him there the entire time, and in a measure, repeats the months of dread and nervousness; and, therefore, he may safely be paroled.

If I could regulate the criminal jurisprudence, I should turn out every person at the end of four to six months where the term is less than three years, and the crime was his first offense. It is not safe either to turn a boy out without compelling him to take some punishment. Many times, such a boy, if saved from the Penitentiary entirely, will repeat a greater crime. They have been brought up without restraint, and they must needs have this restraint before they will learn to obey the law. The greatest mistake is to fail to punish a boy for first offense.

There should be some reform in the matter of short-term convicts. This may be done by writing into the criminal law a condition that will relieve him after a certain period of service in the Penitentiary, because the entire power of Clemency, under the Constitution, is with the Governor, and cannot be transferred by the Legislature to any Board, or Commission, or to any other authority whatsoever. It must be a part of the conviction, and decree.

Under our Constitution, the Legislature is the only power to enact a criminal law. The Courts possess the only power to try and convict him under the law thus enacted. After conviction and final judgment, the Governor alone may liberate him. The Legislature would be powerless to pass an Act to liberate him, and so also would the Court. It is beyond the jurisdiction of both; but a statute could be written providing for cases of conviction for a period of less than three years that, upon conviction, the Judge would write the final judgment under the law, whereby he would be liberated and thus avoid any conflict of power and authority.

The question of what to do with convicts is a vexatious one,—not only to society, but to enable the convict to reform. I find that a convict who has served for ten or more years comes out without any ability to compete with his fellowman and earn a livelihood; whereas, if they are paroled in care of some person of good judgment, they would never again violate the law. This grows out of the necessity of restraint and discipline, so necessary for the entire human race, and should never cease from childhood to old age,—some restraint either by training or by moral force, or both. With the exception of that class of Negroes in the Penitentiary who drink and are disposed to fight, even the life-termer may be paroled to some honest person who understands the Negro character; and, almost without exception, they would obey the law and maintain characters of steady, straightforward course. This method saves the State a great deal of expense, and, at the same time, gives that training and restraint so much needed by the convict. By reason of this fact, there ought to be some means whereby every convict, liberated after a long term of service, may procure employment until he breathes the air of freedom and learns social competition, which, during his long incarceration, he has forgotten.

Lakes and Ponds

In my opinion, and I so recommend, that the Legislature pass a law declaring it to be the "Policy of the State" for ten years to spend every year \$100,000.00 in the construction of dams to impound water. The State could stand this appropriation; and possibly \$200,000.00 a year for the next ten years, with a provision in the law that work shall begin in the extreme southwest corner of the State and go northward and eastward. These lakes could be constructed on School Land and on privately owned land, under a contract with the owner to preserve and permit the State to repair and preserve these dams, and they would serve all the purpose and benefit to the State that they would serve if the land should be owned by the State; and, by the expenditure of this money every year for ten years, would have a pond on practically every quarter-section in Western Oklahoma.

The provisions of the law should be that water at least 8 feet deep could be impounded for the reason that the evaporation in Western Oklahoma in ordinary years is 5 feet (last year much more); and an 8 foot depth would likely never go dry. Think what benefit there had been during the past summer with such ponds. There would have been some seepage below the dam, in the sub-soil, that could have produced gardens and feed-crops; there had been abundant of stockwater; there had been also breeding places for fish, particularly cat and perch.

The growth of fish is far greater than the ordinary person might believe. I know of one man who had such a pond of two acres in South Central Oklahoma. It had been constructed some seven or eight years. Last year, he desired to drain it and take the mud out; for it was so located that much silt and soil had washed into the lake. He arranged with a restaurant-keeper to sell all fish at a given sum of a certain weight; and, as they drained the lake, they decided it was a lot of trouble, and he agreed to sell the fish for \$350.00 but the purchaser continued to weigh, and found, had he paid for the fish at the original contract price, they would have cost him \$750.00.

Now, that amount of money on two acres of land, for eight years, is quite an earning, and, indeed, more than had it been planted in crops, and that, too, without the expenditure of labor. These constructions of ponds and small lakes would doubtless be aided through effort of our Congressmen and Senators for the Government to construct large lakes in the same section.

Let no man in Eastern Oklahoma think that the expenditure of this money in Western Oklahoma would be a favoritism for the evaporation from lakes on every quarter-section in Western Oklahoma would moisten the atmosphere in dry years and save the corn crops as well as the cotton crops in Eastern Oklahoma by producing dews; and a cotton crop can be produced alone on dews. It is not the heat that kills the corn in Eastern Oklahoma, but the dry air that destroys the silk, or female, portion of the corn, so that it will not pollenize; and, in the end, Eastern Oklahoma would get more benefit than Western Oklahoma; and, for that reason, every section of the State should be interested in the construction of such ponds.

There are also a number of places in Western Oklahoma where great reservoirs might be constructed, and doubtless the Federal Government would gladly furnish the funds, particularly while the Relief Money is used, if the State would obtain the title to the land.

Lake Murray

In this connection, it will be recalled that the Legislature in 1933 made appropriation of \$90,000.00 to purchase 18,000 acres of land, with the view of the use of the Federal Relief Money to construct a dam.

For two years before the time of the appropriation, a voluntary committee, headed by Fred Tucker, with George Giboney and Mike Gorman, all of Ardmore, had at my request, taken up options on this land, as the owners were scattered from Boston to Los Angeles. They had three-fourths of the land contracted for; the option calling for \$85,000.00. So soon as the appropriation was made, land agents, seeking to speculate on the State, began to acquire options on the other one-fourth, and it was discovered that it would take possibly \$150,000.00 to purchase all of it; so, under my direction, we abandoned all options, and went into the courts, and condemned the land for \$93,000.00. Then it was discovered that we would need several thousand acres more. This has also been condemned at a cost of some \$15,000.00.

The design of the Committee was to build a road entirely around the lake 200 miles long, but for the State to own the land for a quarter of a mile from the road, so that filling stations, restaurant-keepers, and other privileges might be on the State land, and the State reap all the benefits from the Lake. It was also planned that the space between this road and the outside limits of the parkage should be devoted to free campers, to all citizens and persons who desire to fish at the lake, and that the space between the road and the lake water-edge should be rented to persons desiring to place a cabin, on the same plan of Yellowstone Park, pursued by the United States Government. In this, there would be one portion segregated for the Negro Race, another for the wealthy, who would pay the greatest sum annually for the rental on their cabins; and another with a smaller charge for the average citizen. By this method, there would be a shore-line of 200 miles; ample room for all classes of our citizens, and for all people who desire some place for an outing.

And in this connection, let me warn that there will be an effort from clubs and other people to get control of this Lake, or a portion of it. This should never be permitted. The control should always be under the State Game Department so that the poorest family in the land may have a place to fish and the right for a free outing.

The revenues from this plan every two years ought to pay for the upkeep, for the policing and for the cost of the State for the land; for the amount of fishing is unlimited in a lake that will be some six and a half miles wide and nine miles long,—nearly as large as Lake Erie, and larger in size than the renowned Sea of Galilee, so often referred to in the New Testament.

In the main portion, this lake will be 80 feet deep, eight miles

from the dam. It will have all of the contours of an ocean,—straits, bays, promontories, harbors, islands, et cetera. It can scarcely be described. Go look at it and see.

While I controlled the Relief Money, I had from 3,000 to 4,000 men at all times working on the lake. I cut off all of the timber and into cord-wood, until there is wood to give away. In addition, many saw logs of walnut, oak, ash, etc., were cut. I purchased a second-hand sawmill for \$350.00 and that mill has cut since, more than \$25,000.00 worth of lumber.

One CCC camp was established more than a year ago. They constructed it out of the lumber sawed at this mill, and it is on State land; and, because of its great size, it will be a wonderful place to hold conventions. Recently, two CCC Camps were located there. Other buildings have been erected that may be rented out, including many offices, built of stone, ideal filling stations, and restaurants.

While I had the Relief Money, we built a granite mansion at a cost of \$17,000.00, wholly constructed from material on the ground. I am informed that since the relief was taken from me, there has been spent \$1,000,000.00. Undoubtedly, it was a lake hundreds of years ago, and the geologists can explain to you why it broke. The U. S. is doing a great work on it.

To give you an idea of the possible patronage of the lake, if you will but draw a circle with a radius 200 miles, with the Lake as a center, you will discover that Texarkana, Ft. Smith, Dallas, Fort Worth, Wichita Falls, etc., will be within that circle, and that within the 200 miles there are 3,500,000 people. We may safely predict that there will be a patronage of 100,000 people a year, which in turn, will cause the sale of a lot of gasoline, and thus give the State that much needed revenue.

Under the law, the land for the Lake was to be purchased by the State Board of Public Affairs; the work construction to be under the charge of the Governor; and, when completed, the control of the lake to be under the State Game Department; and, let me admonish you again, it should always stay there, and the laws governing its use should remain permanently so, that the poorest citizen may have this free outing.

Open Season Declared For Deer

Something more than twelve months ago, the farmers in several sections of the State complained that deer were eating their crops. In consultation with the State Game Department, they issued with my approval an order for an Open Season for a given period of time, and provided that local people should be guides to all hunters, and that they should pay the State a certain fee for the hunting privilege.

This pleased the people in the locality in that many, many persons earned money as guides. It also gave the State quite a sum of money; but the Attorney General ruled that the Game Department, even with the approval of the Governor, could not collect this fee from the

hunters; and while I think the Attorney General was wrong in that the Game Department certainly had the right under the law to declare an Open Season, and that carried with it their right to stipulate the conditions, and one of the conditions was the fee. In that sense, it is not a tax, but a charge under the police power, or a permit; however, it is no matter. This may be corrected by the passage of a law authorizing the State Game Department, with the approval of the Governor, to declare such Open Season, and to make collections of the permit fee charged; and an Act also should be passed authorizing the Game Department to use the money, then collected and impounded; and I recommend you do so. This will certainly not conflict with any policy of my successor.

Co-Ordinating Board

The Fourteenth Legislature passed an Act creating a Co-ordinating Board, in House Bill No. 626, composed of fifteen members appointed by the Governor, for four years, carrying out a policy for cooperation with private colleges, and for the advice of some of the tax-supported State institutions; with representatives from the taxpayers. I appointed five heads of private or church colleges; also Dr. Bizzell or Dr. Bennett to represent the State Institutions, making seven educators; then eight persons representing law, medicine, the business world, the banking interests, in order to give a composite view in the matter of wholesome, economical education.

Let me state that I had never met half of the members I appointed, and less than five of them could I call my friends; and, yet, to me, the Board was an ideal one, with the exception of two persons, whom I would not appoint, were I required to do so again.

In the beginning, the Rev. Hale V. Davis of the Baptist University was afraid of too much church influence, in which, if true, he was certainly sound and justified, but, after the Board had met, for several days, on several occasions, we adopted a form of constitution and by-laws that were highly approved by heads of all denominations, including the Rev. Mr. Davis, who ought in fact to be on the Board.

In my opinion, it would be a sad condition if there were no church colleges, and it would be equally unwholesome to have no State-supported institutions. In the one instance, education would reach a stage of stasis, so characteristic of theocratic movements, amply shown in theocratic governments of the past; on the other hand, without these church colleges, materialistic thought, bordering on paganism, would prevade the scholarship of the country.

It is also found that where there are many church and private colleges, it requires less expense for an institution supported by the State, as well as the cost, required to educate those attending both State and church colleges. That has proven particularly true in Tennessee where they have quite as many educational institutions of church and private colleges as State-supported. The reflex is shown in the cost of the State-supported institutions.

Remember, this Co-ordinating Board does not determine how many

schools nor how much appropriation should be made, for that is a question with the Legislature, beyond merely recommending; nor do they appoint the faculty of the State-supported schools, for that is a question of administration through the Regents of the State Colleges. The Board devises the proper course of study, the Code of Ethics, and of Morals; makes a study of floor space, fixes qualifications for graduates, and like matters and things. All colleges,—church, private, or State—become units of what is termed the "Greater University of Oklahoma of Co-ordinated Colleges." The Chancellor, selected by the Co-ordinating Board, would sign all diplomas, giving greater standing and prestige to the graduates, holding each school within the sphere upon the principle of graduation up to the capstone, as it were the University.

I explain the foregoing functions of the Board in view of recommending a Bill to be introduced later, which is made necessary because the Board had no money appropriated to it, and it was found, by charging at the present time 50 cents for each and all pupils attending, a member of the "Greater University," which would include not only those attending the State institutions, but those attending the private colleges and church colleges, that such an amount would give sufficient funds to operate without appropriation on the part of the Legislature; but, under the ruling of the Attorney General, a charter could not be granted under the present law, and it becomes necessary to pass a Public Charter by the Legislature authorizing the provision of the Constitution and by-laws, and to give them power to collect and use the 50 cents from each pupil.

I may state also that the educational directors of the Carnegie Foundation have made a full and complete analysis of the Boards' plans, and they approve with a promise that they will set aside an annual budget "without strings," beyond the purposes stated in the Constitution and By-Laws, for a program of five years, in the sum of \$20,000.00 a year.

I have had a committee of this Board at work for twelve months, studying the questions within the purview of their functions, and paying the expense of their clerical and statistical help out of a contingent fund of the Governor.

In August, I called in some of the friends or supporters of the Governor-elect, and told them that if he wanted this work continued that I would continue to pay the expense; otherwise, I would junk the whole proposition. After consultation with him, they reported to me that he approved the general purposes; and, therefore, I am not interfering with his plan by recommending the passage of the bill that will fix the purposes of the Board and give them the needed revenue without appropriation from the funds of the State. It is necessary to put into law in the form of a Public Charter the provisions of the Constitution so that it cannot be diverted from its purposes, to the end that there will be complete harmony between the church colleges among one another and with the State. When the Bill comes up, you will understand the complete purposes and provisions provided for in the Bill; and let me suggest that you remember that it should not have a

single amendment, for the Co-ordinating Board would be subject to the control of the Governor and the State, or any other law hereafter passed, and the Act authorizing the Public Charter would contain nothing except the matters and things named therein.

It ought to be apparent from the foregoing that I have no desire, as Governor, to interfere with the plans of my successor.

I have always believed that every Governor should be given free and full hand, subject only to the limitations of the Constitution. God knows that if he or any of them can administer this office better than I, the State should have such services.

If any successor can make the Government more economical, efficient, and preserve honesty; keeping crooks out of public funds; lowering the appropriation; and cutting the tax down 50 per cent, which is the greatest burden on private industry and the citizen, I, along with all the citizens of this State, will welcome such achievement, and applaud his efforts. The ad valorem tax is still too high.

New Textbook Adoption

All have some knowledge more or less of the adoption of new textbooks; but, in order to give you complete reasons therefor, it will be necessary to make this explanation:

The Twelfth Legislature passed a law providing for a Textbook Commission with the provision that one-fifth of the books should be adopted every year. Under this law, there was no adoption except in 1929; and thereafter no adoption of one-fifth of the books until 1933, when some 65 per cent of the books were adopted; and the remainder, recently in the year 1934. These last adoptions were made under an Act of the Regular Session of the Fourteenth Legislature.

Remember that the Act of the Twelfth Legislature provided that if the law should be "amended, or repealed," that the Textbook Commission would have authority to cancel the contracts of books adopted thereunder; and that provision was written into the contracts, as shown in the Office of the State Superintendent of Education. The Act of the subsequent Legislature, or the Fourteenth, (1933), provided for an entirely new Commission, with the same provision. It provided that the Governor, by Executive Order, might cancel the contract made under the Act of the Twelfth Legislature.

The new Textbook Commission, in keeping with these provisions, in its meeting in 1933, by regular form cancelled all contracts; and, to be doubly sure of the legality, the Governor issued an Executive Order cancelling the same. The Commission, under the law, had as members three educators. Seeking to secure the viewpoint of the various elements of society, since the adoption of textbooks is more than scholastic, and primarily a business proposition, as Governor, I appointed the following:

R. H. Stanley, Chairman, Lawyer, Hugo, Okla.

John Vaughan, Ex-Officio Secretary, State Superintendent, Oklahoma City.

Professor Charlie Forbes, Superintendent of City Schools, Thomas, Okla.

Professor Ernest Miller, Superintendent of Schools, Gypsy, Okla.

Dr. D. E. Cantrell, Physician, Healdton, Okla.

W. N. Barry, Banker, Okemah, Okla.

Fred C. Tracy, Farmer-Business, Beaver, Okla.

The foregoing gentlemen entered upon their functions; opened up for bids, and adopted nearly 65 per cent of the books prescribed by the State Board of Education, many of which were re-adoptions, for a period of five years, making a saving of more than 45 per cent on the price of the books, as disclosed by the price list appended hereto.

The Commission again assembled on the 15th day of October, 1934, to complete the adoption. There being two resignations, I appointed Judge Wm. L. Cheatham, lawyer, Bristow, Oklahoma, as Chairman, in lieu of Judge Stanley, resigned; and Superintendent Ben Hatcher, Superintendent of Schools at Moore, Oklahoma, in lieu of Fred C. Tracy, resigned.

The Board advertised for bids, after John Vaughan, State Superintendent and Ex-Officio Secretary, declined to do so; and completed the adoption.

In this last (1934) adoption, on the last named date, it was provided that no book should be used until the beginning of the school year in the fall of 1935, except the re-adopted books, which should begin at once with the reductions in prices, thereby making quite a saving this year upon the re-adopted books.

Approximately one-third of the new adoptions were such re-adopted books. In the case of the History of Oklahoma, the old text was re-adopted, but the book was brought down to date and contained the Constitution of the State together with a "Glossary," of legal definitions of the law terms found in the Constitution, using the definitions from the Standard Law Dictionary by Bouvier. This added some 150 pages to the old text, but the price was the same as the old price of the adoption of 1929. In the re-adoption of all other texts, there was a substantial reduction in the price. All of the foregoing named adoptions will expire by July 1, 1939, which will enable our successors to provide for a new adoption if they so desire, to begin on that date in the last of the year 1938.

REASON AND NECESSITY FOR COMPLETE ADOPTION was made necessary because new books could be installed at less cost than the adoption of 1929 and prior thereto, and for the further reason that some of the books were not up to standard of scholarship; for the further reason that thousands of school children were unable to purchase books.

I had at my command a given sum of money—approximately

\$260,000.00—with which to purchase books for the poor. I was enabled to supply the new books at the beginning of the school year of 1933-34 for practically all of the needy children of the State with this amount of money by making new adoptions; whereas, had no adoption been made that year, they would have cost \$500,000.00. In some counties, there were as high as 3,000 and 4,000 children without school books the two previous years. Now, by completing the adoption, it will enable you gentlemen of the Fifteenth Legislature to make provision for completion for supplying the poor children of the State; and I recommend that you make an appropriation of \$150,000.00, with such provision for the distribution as you may choose to provide, to every poor child in the State unable to buy a book with the books needed.

It is an absurdity to think of spending large sums of tax money for school houses, teachers, and supplies, and have thousands of children without textbooks, and many children could not attend school at all if not provided with a free textbook.

The foregoing candid statement is for the purpose of informing you and warning you against gossips which in late years seem to pervade society on all public questions.

Had we not made an adoption last year and this year, and had waited until next year, the textbooks would cost 30 to 35 per cent more than the price secured in the adoption. To illustrate: One book company bid on a book last year, 96 cents. It was the only bid. The Textbook Commission thought it was not enough. This year, that company and others bid, and that company bid \$1.14 on the same book. They were asked why they did not bid at the same price this year as last. The reply of the agent was that "Had we received the contract last year, the company had purchased all the material required for the life of the contract." He further stated that books would be 18 to 20 per cent higher next year; that by bidding this year, they would make purchase of material for the entire life of the contract. Therefore, if adoptions were not made until next year, you would pay from 18 to 20 per cent on the recent adoption; and 30 to 35 per cent more on the adoption made last year. Moreover, it was essential to settle the question of adoption in advance of the convening of you gentlemen, that you might provide for the necessary additional books for those unable to buy them, and I can conceive of no greater relief-expenditure than the expenditure for books so that the poor child may attend school.

THE DIFFERENCE IN COST OF THE NEWLY ADOPTED AND THE OLD BOOKS is given in the following tables:

I wish to call attention to the Legislature to the fact that not only was the Constitution of the United States and of the State excluded from the history of the State and the United States, but Civil Government as well, through the influence of the North Central Association, and backed by the State Superintendent's Office. Neither Constitution could be found in any textbook.

This continued until the Act of 1933, creating the Textbook Com-

mission, in which Act we followed a like course in Texas, by declaring that the Constitution of the State should be a part of the history of the State, and that of the United States a part of the history of the United States, and both Constitutions should be included in any textbook on Civil Government.

It is little wonder that those under the influence of the Communist Russian professors of the United States have discarded the Constitution and have practically taught a generation that there existed no such thing as a Constitution.

I say to you deliberately that a Republic cannot be conceived without a written Constitution, nor can Democracy in monarchy, without some form of a Constitution. In England, the whole Constitution is unwritten because it is made up of the written portion known as the Magna Charta, the Acts of Settlement, and the sundry other charters of English liberty, combined with the decisions of the Courts and the Acts of Parliament—these together constitute the English Constitution. With us, each State and the Federal Government has a complete, written Constitution, which is the only safeguard in moments of anarchy and strife, and passion, and mental intemperance among the people, for a Constitution is made to bind the people in such moments as well as to bind the official at all times.

The crying need of our times is to return both State and Nation to Constitutional Government in its purity, and that means not only the Executive Branch but above everything else that the Courts of the land do not exceed their powers, and this is particularly true of the Oklahoma Courts.

Permit me to call your attention to another course pursued by the State Department of Education. Appropriation is made from time to time to print the school laws, and they were printed in 1933, which assumed to contain all of the laws, but John Vaughan, the State Superintendent, left out an Act of the Fourteenth Legislature (House Bill No. 194), which provided for disorganization of school districts.

I wish it understood that this was no particularly favored law of mine; I did not even know it was under consideration until it reached my desk; but I realized that it was a wholesome Bill, for, often, in these oil sections, a town is built up and great improvements are established, to be followed by the scattering of the town by reason of the failure of oil, and that is true in some of the coal districts, and the necessity arises just as greatly to disorganize both the independent school and municipal districts as originally to organize them; and I therefore approved the Bill; but John Vaughan seems to think that because he does not like the Bill, it should not go into the school laws. He is as bold in excluding the law and the Constitution as these Communists, German, and Russian professors, called "Brain Trust."

Therefore I recommend that in every appropriation bill, when money is appropriated for the printing of the laws governing any department, that the law include a provision prohibiting the payment for the printing until the Attorney General, or some Judge, or some power independent of that department, certifies that the law, and ALL

THE LAW governing the department, is printed in the pamphlet. In short, if Mr. Vaughan wants to circulate John Vaughan laws, let him pay the bill out of his own pocket.

John Vaughan told the Agent of one of the Textbook companies, whose books were recently adopted that he (Vaughan) intended to try to have the Legislature nullify the recent contract of adoption; and, failing, he would appeal to the courts; and, if he failed there, he would instruct the teachers to throw books out of the Schools. You gentlemen should find some way to compel such officials to obey the Law.

THE WM. H. MURRAY EDUCATIONAL FOUNDATION was organized by a group of friends of higher education, which included practically all of the faculties of the higher institutions. Its design was the collection of a fund to be loaned to poor boys and girls ready to attend college, to the end that they might secure a higher education, otherwise impossible.

Life memberships of \$100.00 each were provided in the charter of organization, which was sufficient to aggregate a sum of \$18,000.00; with provisions for "Bequests" by any person desiring to make to said Foundation.

I secured, beginning in 1931, the writing of a textbook on "Agriculture" in the grades, and another one for colleges by the faculty of the A. & M. College. Their copyrights were transferred to this Foundation. Textbook companies were authorized to bid for the printing of this books with the understanding that unless their bid was the lowest, the book would not be adopted, they to pay 10 per cent royalty on all books sold in the United States to the Foundation. The old book, which was replaced by it, was but a compilation of articles, sold to schools for 89 cents. Three companies bid lower, the lowest being by the American Book Company for 69 cents, and that book was adopted. It has more recently been adopted in Arkansas for a period of six years, and will likely be adopted in four or five other States this coming season. A 10 per cent royalty in every case is to be paid to the Murray Educational Foundation.

A set of Arithmetics, written by Conger, Bennett and Conger (Dr. Bennett is President of A. & M. College) was also bid upon, and was the lowest bid and the best book offered to the Textbook Commission. It also pays 10 per cent, to Foundation; as does a work on Anthology, which is sold for the purpose of Literature and Anthology, 4 Volumes, at \$1.14 each; whereas the Anthologies heretofore used have cost from \$1.75 to \$2.25 a copy,—quite a saving there; and, yet, this fund goes to the Foundation; and the particular merit of this Anthology is that while it includes the literary productions recognized as standard in the past; also includes those of some fifty Oklahoma authors, and others of our Western country.

It is proper for me to explain that I have no control over; this fund; that the members selected a Board of Trustees of Nine Members who will administer the fund without compensation and that the fund is handled through Hugh Harrell, the State Treasurer, through the

Trust Department of the State Treasury; and the loans are authorized by a Committee of Three selected by the Board of Directors. That Board consists of:

Clive Murray of Tishomingo, Oklahoma,

Clint Strong of Clinton, Oklahoma, and

Dr. Henry G. Bennett of Stillwater, Oklahoma.

This Loan Committee has approved a number of loans this year totaling \$10,000.00, their design being to hold back sufficient funds to put the person to whom it is loaned through a four years' course before they are expected to return the money. The notes bear 5 per cent interest.

To give you an idea of what may be expected of this Foundation in the future years, I call your attention to the organization of a foundation by Benjamin Franklin in Philadelphia, and another in Boston, beginning with \$5,000.00 each, with provision that neither should be used until the end of 100 years interest accumulation. At the end of 100 years, each of these foundations had to their credit more than \$700,000.00. They now each amount to more than \$1,000,000.00.

Governor Brown of Georgia, fifty years ago, created such a foundation, with \$50,000.00. At the end of fifty years, (1934), the foundation had educated more than 1,000 men, some of them prominent judges in this State; had assets amounting to \$275,000.00, notwithstanding a loss of \$29,000.00.

We estimate, through royalties and additional memberships, that the MURRAY FOUNDATION will have assets aggregating \$100,000.00 within twelve months; and, in the event of no additional funds, the interest on that will pay the operating cost and make the usual allowance for losses, and result in a fund in a hundred years of \$10,000,000.00.

With the present tendency of compelling every person who desires to practice dentistry, medicine, law, the profession of teaching, most of the rest, to go to college, without regard to what they may learn at home, and secure a given number of "credits,"—this tendency will finally end where no person can enter a profession unless he or she attends a college, and that would result in the professions being filled only from the families of the wealthy. That would prove disastrous to society, because brains of the poor have shown their merit on the whole to surpass those of the wealthy; and we cannot afford not to avail ourselves of the brains and scholarship of the poor, for the Creator did not put brains on the "Free List." No university ever made a brain—they merely give refinement and method to this product of the Creator.

New Obligations Contracted Requiring Payment

When I went into office, there were contracts aggregating \$275,-

000.00, or debts created by the heads of sundry institutions; and there were Deficiency Certificates in excess of appropriations issued by my predecessor, aggregating \$250,000.00. They were paid from the appropriations of the Legislature of 1931. In order to check unwarranted contracts, an Act was passed in the Legislature of 1931 prohibiting any Department or Institution of the State to contract an obligation in excess of the appropriation without approval by the Governor. The result is that you will not have the necessity of paying a very large sum of outstanding obligations not provided for in the appropriation. There are a few, however, that could not be avoided.

The Thirteenth Legislature appropriated, (counting the excess of contracts and deficiencies), nearly \$35,000,000.00. The Legislature of 1931, including the \$525,000.00 excess, and including \$600,000.00 for free seed and relief of the people, made an appropriation of \$31,000,000.00 round numbers. During the first fiscal year beginning July 1, 1931, the various heads of the Institutions and Departments, under the direction and control of the Governor, returned to the Treasury \$1,500,000.00. During the second fiscal year, out of the same appropriation, there was returned to the Treasury on July 1, 1932, \$2,300,000.00, making an aggregate sum saved from the Legislative appropriation of 1931, the sum of \$3,800,000.00.

The Fourteenth Legislature of 1933 made an aggregate appropriation of \$21,642,000.00 for the two fiscal years beginning July 1, 1933, making \$10,000,000.00 less than the Legislature of 1931, and nearly \$14,000,000.00 less than of the Legislature of 1929, and of the Departments and Institutions for the fiscal year ending July 1, 1934, operating within the appropriation, and a bit of saving was in addition made out of the appropriation, except for a Supreme Court decision.

During the present fiscal year, beginning July 1, 1934, the heads of the Institutions began a demand in excess of the appropriation; however, in consequence of the law of the Legislature of 1933, authorizing the Governor to audit every quarter, I have held them down to within the appropriation up to this January 1st.

There are some obligations that could have been paid but, under the ruling of the Attorney General, were not allowed to be paid, that your Legislature should appropriate by Special Bills, which, under the Constitution, requires a two-third vote:

First. The sum due Ed Andruss, and not provided for prior to July 1, 1931, because of the exhaustion of the appropriation by his predecessor.

Second. Mrs. Andruss, who has done quite as much work in the Institution for the Feeble Minded at Enid as any one else, was not permitted to receive her salary, due to the fact that the law governing that Institution provided for the selection of the help by the Superintendent, whereas other Institutions provided for such selection by the Board of Public Affairs; and, therefore, it was ruled that Mrs. Andruss came within the Nepotism Law. Had she been selected by the terms of the law as the other Institutions were selected by the Board of Public Affairs, this objection could not arise. A bit of thought on this

point will convince any sensible man that the head of an institution like that one, or an Orphans' Home, should provide for a married man with a wife to assist,—not some outside woman which, was in the case referred to, leads to immorality. That recommendation was the advice of such experienced men as Dr. Griffin; and if you will but visit that institution at Enid, you will understand the truth of what I have said. Now, it appears from the records that Wm. Alexander, the predecessor of Ed Andruss, had his wife on the payroll, and she was paid for her salary, while Mrs. Andruss has never been paid. I submit, in all justice and equity, an appropriation should be made to pay her salary by a special act. No other woman could be used for that work.

Third: The Legislature of 1931 provided for the construction of an additional dormitory at Stillwater and for the sale of bonds, to be paid out of rentals. The money was secured from the Federal Government and the building is practically completed; but there is no provision for a heating plant. Certainly it was not the intention of the Legislature that that building be constructed and lie idle for a year for the lack of a heating plant. Taking that view, I therefore directed the Board of Agriculture to take bids for such a plant. When these bids were made, I told the lowest bidder that I would execute a contract for the installation of the heating plant, and let it bear interest until it was paid, the same as non-payable State warrants, at 6 per cent. He accepted the contract, aggregating the sum of \$18,000.00, and the heating plant was supplied, and installed.

I urge your Legislature to pass a Special Appropriation Bill to make that payment.

Fourth: Colonel Sneed, Secretary of State, informed me that the Legislature had made it incumbent upon him to submit to the voters certain Constitutional Amendments, without providing for the additional fund. I therefore approved a contract on the same terms as before mentioned to make the payment. That also should be paid.

Fifth: The Textbook Commission has had no appropriation since their first meeting. I sought to pay them out of my contingent fund (Extraordinary Protection of the State), which has heretofore been regarded as wholly within the discretion of the Governor, to be used for any lawful purposes that the Governor might choose; but the Auditor refused to make the payment, although I had sufficient funds with which to do so. It therefore becomes necessary for the Fifteenth Legislature to make an appropriation for this purpose. The account sworn to will be submitted to your appropriation Committee.

Sixth: When the Federal Relief Bureau assigned to Oklahoma the sum of \$500,000.00, on the 15th day of December, 1933, and then took the control of said funds away from the Governor in January, 1934, I was compelled to administer the appropriations for the fiscal year, made for the indigent and sick, and for the distribution of free seed, et cetera, which I did. There were outstanding a number of food orders and accounts held by merchants left unpaid and due, to be paid by the Federal Government. A representative of the Government in the past spring came to Oklahoma and proposed to make such payments, aggregating some \$200,000.00 or more; but he insisted that my County

Superintendents of Relief should personally take up these accounts, and promised to make payment of their salary of \$62.50 a month for their services, but declined at length to make the payment on these salaries; and, although they have promised to do so from time to time, these men have not as yet received that money; and, while I had the funds in the indigent appropriation sufficient to make the payment, the law limiting the per cent that could be used for that purpose would not permit me to make the payment, although I have the money now to the credit of that fund.

It therefore is your duty to make appropriation to pay for these men for that month's salary in each of the 77 counties. And there are a few outstanding orders that for some reason,—negligence or otherwise,—that merchants did not send in that should be paid also; but in these particular orders, I warn you that claims will be set up not authorized. No claim for relief should be made for supplies or for any purpose not authorized and signed by the Governor,—a rule that I adhered to through the entire relief set-up, to prevent frauds and fraudulent claims being made against the State; however, the auditor of these State funds, as well as the Federal Funds, Sam M. Bounds, can identify every one of them. They are not many, but should be paid.

I know of no other legitimate claims against the State. I have recited them in detail to prevent fraudulent claims being presented for your consideration, which surely will be done, but the aggregate amount of all foregoing claims will not exceed \$80,000.00.

School Land Commission and Public School Lands

All are somewhat acquainted at least with publication of questions arising out of the administration of the school funds and public lands of the State. It seems difficult to arrive at the exact truth and to eliminate gossip and secure exact facts.

The Legislature of 1931 passed an Act for the appropriation of \$25,000.00 to audit "all State Departments." The School Land Department had not been audited since Statehood. I sought to make that audit only. Bids were made ranging from \$100,000.00 and up to make a complete audit of the Department and the field work. I therefore made a contract with Wilson and Garnett, auditing firm, to make a partial office audit, which, in consequence of the mixing of the records incident to the removal of the State Capitol, exhausted the \$25,000.00 by the year 1917. I authorized them to continue with a limited audit, which cost the State some \$12,000.00 more, and thus discovered the theft of \$48,000.00. This audit of Wilson and Garnett was made up to July, 1932, and the Legislature passed a law directing the employment of an auditor every two years to audit, beginning on July 1, 1933, the contract for such audit to be made by the Commission, composed of the Governor, Speaker of the House, and President Pro Tempore of the Senate, but made no appropriation therefor.

This Commission, composed of Wm. H. Murray, Governor; Tom Anglin, Speaker of the House; and Paul Stewart, President Pro Tempore of the Senate, contracted with Sam M. Bounds, in July, 1934, to make an audit for the two previous fiscal years, (July 1, 1932 to July 1, 1934);

and stipulated as directed by the law, that a copy of said audit be filed with each House of the Fifteenth Legislature, and a copy be delivered to the Governor, and a copy to the School Land Department.

During this audit, Mr. Bounds has found that certain lines of assets were not audited. He was therefore authorized by me to go back through the previous years, to assist him in an accurate audit. It is also found that it is impossible to make a complete, accurate audit in the office of the School Land Department. In other words, the audit should extend to the field and to each tract of land; and you gentlemen will have to determine whether to cut off all bad transactions and just assume that it is accurate, or provide for a field audit.

A gentleman here in the city came to me two months ago and requested that I make a contract with him to audit the School Land Department completely. I called his attention to the fact that I could not do that for the lack of funds. He replied that he would contract to audit from the beginning for nothing, provided I would make a contract to give him one-half of all funds he collected and lost to the Department, saying that he could make it pay him. My reply was that I could not constitutionally do that for the Constitution provides these funds to be a sacred fund for the common schools, and that where a loss occurs, it is the duty of the Legislature to return the funds by appropriation; that the School Land Department is one that could not even dispense charity, but must at all times husband these resources strictly for the common school children of this State; that the Legislature alone could make a contract with him by an Act, but, even in that case, they must needs pay him out of an appropriation of the General Revenues, and not from the School Funds. He may possibly make overture for such contract. If he does, the whole question I submit to your judgment without recommendation.

When I have pointed out these matters, I shall have performed by functions and duty, notwithstanding the amount of cursing I have received because of my endeavor in the past four years to protect these funds. However, I will make this observation that may assist you:

It has come to me from sundry sources that lands where loans were foreclosed in the east half of the State, some of which lands were covered by bois d'arc, walnut, and pine timber, have been authorized to be cut off; and that the men who cut the timber paid for privileges, but the records of the School Land Department will not disclose that that department ever received any money for such purposes; and, therefore, the truth or falsity of these statements cannot be ascertained by an office audit. It will be necessary to go into the field to discover the facts.

Numerous oil companies have with or without permission, (and the records of the School Land Department do not show any permission), nor the payment of any money therefor, constructed, under the school lands, pipe lines amounting to a vast sum, if collected. These too cannot be determined by an audit of the office.

As stated before, the whole question is yours. I have exhausted my duty and obligation as Governor of the State in these transactions;

borne the abuse and slander of politicians and their newspaper friends; but I call your attention that in the speech made and printed at the time at Altus, Oklahoma, in 1910, I pointed out that if the people of the State permitted the "swapping of offices," that just such losses as have been disclosed would eventually result.

Co-Operating With Or Surrendering To Federal Authorities

Knowing from experience I warn you gentlemen in advance that you will be asked to destroy the State laws and even the Constitution itself, under the plea of "co-operating with the Federal Government." To do so would also destroy the spirit and intent of the Constitution of the United States. Every governor and most public officials are sworn to uphold not only the Constitution of his State but the Constitution of the United States.

I make these observations because I have been beset with the demand that I recommend to the Legislature, and even to call a Special Session for that purpose, that we "repeal our anti-trust laws;" repeal the law requiring a textbook company to sell a textbook in this State as cheaply as sold in any other State; to make it a criminal offense under the laws of this State for any citizen of the State to violate one of these "alphabetical orders" now operating in Washington. That, I have steadfastly refused to do, for, to do so, is no "co-operation," but a surrender to Bureaus and extra legal boards seeking to enact laws not made by the Constituted Law-making Body of Congress, regularly assembled, and, therefore, such so-called codes are but private wills as distinguished from public judgment, which is the only basis of law.

You have the duty incumbent upon you under your oath to maintain your own powers; to maintain the powers of the Governor; to maintain the powers of the State; and to maintain the powers authorized by the United States, under the Constitutions of the two Governments, which at once becomes veritable "Blue Prints" of State and National Governments, and you can no more depart with safety from the "Blue Print" of Government in the construction of the edifice of Government than you can depart from the "Blue Print" of a skyscraper; for, to do so would cause the skyscraper to topple over and fall; and just so with Government,—not that the "Blue Print" of either is at all sacred; or that either is the best possible to be made; but, in either case, they are the "Blue Print" of the two structures. It is unsafe not to follow them.

We are passing through a painful experience, never before sought to be done in American life; but history will disclose to us such efforts in the past and the success of these experiments in Government as distinguished from Government made from the experience of man, have invariably proven disastrous. The geologists and mechanics arrive at discoveries by experiment, but it will not do in Government. All the evils that have destroyed democracies in the past; that have done injury to our American society have not been because of adhering to the Constitution, but by departing from its spirit, through legislation in the interest of the speculator; through banking and currency laws, violative of the spirit of the Constitution; through the creation of

monopolies and decisions of courts that permit a corporation chartered in New Jersey to have citizenship in Oklahoma, or other States, with powers greater than a corporation chartered in the home State, ultimately resulting in a "twilight zone," in which they escape both the State and Federal laws and defeat their taxes.—This is the mother of all monopoly that has crushed labor and the citizen. When you lose your State Government you will cry to have it back again, but in vain.

We are now at the "Cross Roads" to determine whether the old Republic shall survive; whether this last effort of democracy shall survive, or whether it shall go the way of the democracies of the Ancients,—always resulting in destruction of government of the people. for the people, by the people.

Pari-Mutuel Gambling

The Fourteenth Legislature, very speedily and silently, passed a Bill known as the "Pari-Mutuel," which was supposed to be a mere right of betting on a horse race; but, in truth, it was a legalized form of a slot machine for gambling purposes, that would not prove as fair as loaded dice in a crap game, in which, in every instance, according to the bets of the operators of the game would know which horse would win.

When I discovered this, I promptly vetoed it. They got a bill through the Legislature of Texas, and now the business people of Dallas and other places want it repealed.

I warn you that that Bill will be introduced at this session, and, by all means, it should be defeated. It will prove to be the most corrupting and debasing thing that could be imagined—as baneful as the old saloon. I learned the fact that it will be introduced through an incident of an attorney's urging me to permit two convicts to return to the State, in which they themselves said that they expected this Bill to pass, and that they wanted to "reap up" on it. They were convicted for conducting "high-powered" gambling dens; and, therefore, have connection with men who invest their money in gambling paraphernalia to be operated by some poor fellow who can take the "rap," if caught.

When this Bill is introduced, don't let them tell you that it is a "Race Horse Bill," for it proved to be one where everything will be known as soon as the bet is over, and the "managers" reap the money, and the "poor dupes" put their money on what they think will win, but never have a chance to win.

The State of Oklahoma cannot afford to enter upon the policy of legalized gambling. In truth, this form of gambling not hid from the general public and the children, is the worst possible.

The Tax Commission, Or Tax Dodging

You will likely be confronted with propositions to amend the law creating the "Oklahoma Tax Commission," under the plea that it will make it better.

Unless you are absolutely sure, do not vote for any such proposed amendment. This law was written by men who knew how to write the law, under my supervision; and six months' time was spent upon it. It is as nearly perfect as a law can be written under our Constitution, if the purpose of the law be to collect all of the taxes due, and let no one escape his taxes; and, indeed, this is the virtue of the law.

If amendments are introduced, in the end, they will prove as fatal as the Glasser Amendment, enacted in 1922 to the Income Tax Law. It will prove worse than a joker, and permit the selfish to escape.

It has been proposed by some that it ought to be a "One-Man Commission." I do not agree with them on that because one man may be angered at a tax-payer, or have undue friendship with some big tax-payer, and, in either case, be disposed to "lean" from the "plumb-line of justice." In such cases, the other two Commissioners can aid him to escape his relationship with the tax-payer, and more nearly do justice; and, even in that particular, it would be unwise to make a change. Indeed, the Tax Commission should be made up, as it is now, of one Executive, who keeps track of the departments and of the general affairs of the Commission, like Melven Cornish; one a great lawyer, like W. D. Humphrey, whose sympathies are in the interest of the public, because some member of the Commission must watch the testimony when larger tax-payers contest the findings of the Commission before the Tax Equalization Board; and be enabled to match shrewdness and keenness of mind with these big tax-payers' attorneys and experts; in fact, none of the laws governing the collection of taxes by the Commission, under Section 12 of Article 10 of the Constitution need amendment, except those few recommended by the Tax Commission in their latest report.

Remember, the laws for the collecting of taxes and for the control and regulation of the Commission is one thing; and the tax laws themselves is another; that is, the rate of tax; the form of tax; the principle involved in the tax. These last are the things upon which men disagree, and which are most likely not to be written as public policy may demand; and there is room for amendments thereto; but, if you want to collect the tax; if you want to be certain to have the power to collect it; if you want to be certain to find out whether the tax is due, you had better let the Tax Commission Law stand, without a change in any particular.

It provides all powers needed, if placed under the control of honest, competent men.

State Bond—Fire—Indemnity Insurance

The Fourteenth Legislature, (in 1933), passed an Act providing for an Indemnity Insurance Policy by the State to the end that all laboring men engaged in any hazardous occupation may be insured. This law has proven satisfactory, and should not be amended; at least, until it has some two or more years further trial; and then we shall be enabled to know what defects, if any, exist in the law. The amount of reserve has accumulated beyond our expectations. Up to January 1 last, or during a period of operation of one and one-half years, there was an accumulation of \$356,658.36. Under the law, this money should

be invested by the Governor; but, to date, I have found little in which to invest the fund that might, in my opinion, prove beyond a doubt safe.

I have sought to purchase non-payable State Warrants because they bore a good rate of interest and were certainly safe; but these warrants are in such demand that we can get them only in "dribbles," for the banks canvass all of the institutions for these warrants.

The law, as now written, provides for its management under the Industrial Commission. This only should be amended, and that only in the event you adopt the recommendations hereinafter proposed:

RECOMMENDATIONS—I recommend that you pass a like law to bond all public officials in the State, (Let it be confined only to public officials, and not extend to private bonding enterprises). It should provide that every officer of the State, from School District to State officials requiring a bond, to be made under the law, should be insured by the State Bonding Policy. This would leave the State independent of the bond companies; and, would create a great earning and more certainty; at the same time, cause the people to realize that the loss of the bond was their loss. They would not, as they now feel, that when a public official forfeits his bond, that there is no loss, because some private bonding company paid the loss. I have had any number of people to propose to me clemency for county officers, saying the county lost nothing, which is tantamount to saying that "if we can skin the company, it is all right." Such a provision of law would save the State, and subdivisions therein, \$1,000,000.00 a year. Moreover, there would not be required by law so many bonds to be written.

We have a number of officials required by law to be bonded that are unnecessary. The requirements of the law was put in at the instance of bonding companies to sell more of their bonds.

FIRE INSURANCE POLICIES—I recommend that a similar law be written providing for a State Insurance Policy to insure every public building,—State, County, Municipality, and School District, by the State; but not to extend to private property in any case; and then place in the law a mandatory provision that the same is automatically insured to the amount of three-fourths of the cost of the building. This, in turn, will greatly aid the State and relieve the public officials from the connivance and "skulduggery" of fire insurance agents, and will, at the same time, cause a saving of from \$1,000,000.00 to \$2,000,000.00 now charged against the taxpayers.

With these three laws written with the same care as the indemnity Law passed in the Fourteenth Legislature, and placed under a regular commissioner appointed by the Governor, said Commission to be supervised by a Board for Bond-Fire-Indemnity Insurance, to consist of the Chairman of the Industrial Commission, the State Treasurer, and the State Insurance Commissioner; if then there be invested the accumulated surpluses of each, the interest accumulating thereon will more than pay the cost of the office from the very beginning, while providing less rates for all policies on Bonds-Fire- and Indemnity. In

fact, in my opinion, after two years, there will be an annual saving sufficient to provide every needy school child in the State with free textbooks.

I strenuously urge the passage of these two additional laws.

Diversion of Gasoline Tax and Public Credit

It will be recalled that the Fourteenth Legislature (in 1933), diverted Forty Per Cent of the gasoline tax to the outstanding Non-Payable Warrants that had accumulated for many years, authorizing at the time the issuance of serial Treasury notes, payable in six months, twelve months, eighteen months, etc., with authority to call and stop interest on a note at any time, with provision that they might all be called within three years. Experience in the collection of this tax since has proven that all of these warrants can be paid within three years from now, and that sufficient revenue will have been collected to extinguish these notes.

In writing the Bill, I insisted that not only this gas tax, but the entire credit of the State, be pledged to the payment of these notes. As a result, they are sold in Wall Street at \$1.03 to \$1.05, or a premium of three to five per cent, and this is a higher rate than the United States Bonds or other State securities.

We feel that we have a right "to pat ourselves on the back," as it were, in thus providing for the financial integrity of the State.

You may be curious to know how came these outstanding warrants. I shall explain:

When I went into office, it was variously stated that there were outstanding \$5,000,000.00 of Non-Payable Warrants, and the warrants were sold at a discount from Ten to Fifteen Per Cent, and sometimes more; and, then, in an effort to force the issue of long-time bonds, the banks announced within two weeks after I went into office that they would not purchase the current warrants at all; but that difficulty was soon overcome.

I called in the late Robert Brewer, a native Oklahoman, who was Vice-President of one of the larger banking institutions of New York City, and proposed to him a plan of financing the State, and acting as the State Fiscal Agency. I submitted to him that although it had been the custom to compel the Fiscal Agency to have a local agent at a salary of from \$6,000.00 to \$10,000.00 a year, who was some friend of the Governor's that he need not select any such agent except and when he needed him, and that out of consideration for this benefit and others, he should undertake to purchase at par at least \$5,000,000.00 of the outstanding Non-Payable Warrants; and, within less than sixty days, he had purchased \$6,000,000.00 up to May; and, as the outstanding obligations were running at the rate of more than \$2,000,000.00 a month, it was reasonable to conclude, although we have not the figures definitely to state, there were outstanding \$8,000,000.00 of these warrants on July 1, 1931, and possibly more, at which last date, the expenses and appropriation under my administration began. This

purchase in New York also relieved \$6,000,000.00 to be loaned by the banks tied up in warrants.

Then came the reduction in the price of oil to twenty cents a barrel, and the subsequent closing of the wells. That in turn produced some \$2,000,000.00 or more of outstanding Non-Payable Warrants. Then followed the abolition of the ad valorem tax by a Constitutional Amendment adopted in 1933, which would produce approximately \$4,500,000.00 a year. These transactions produced this accumulation of warrants now outstanding.

The cutting down of appropriations from nearly \$35,000,000.00 in 1929 to \$31,000,000.00 in 1931, and then to \$21,642,000.00 in 1933, coupled with the saving of \$4,000,000.00 out of the Appropriation Bills, it can be readily seen that but for this economy in appropriation and expenditures, there would be outstanding today in Treasury Notes and Non-Payable Warrants the sum of nearly \$40,000,000.00 instead of nearly \$18,000,000.00, July next.

Now, the question arises how best to liquidate and finance these outstanding obligations?

Some have proposed that the law diverting the gasoline tax be repealed. If you do that, it will leave nearly \$18,000,000.00 outstanding, and that will result in necessarily having not only these, but all, current warrants cancelled at a heavy rate of reduction, the amount of which cannot be foreseen of all future warrants of the State; because the public will lose confidence in the integrity of the State.

If I were financing the State, I should extend this diversion for eighteen months longer, and the figures in the State Treasurer's office will show you that all of the outstanding public debt can be paid within that time, and then you would only have to take care of your current operating expenses; but, by such transactions, you would show the public your good faith and integrity of purpose; and then you could issue a greater amount than that sum in Non-Payable Warrants and maintain them at par.

If it is thought that more money is needed for roads (I do not think it is half so important to provide for more roads as it is to support the schools or to pay off the public debt). In such eventuality, the Legislature could appropriate \$1,000,000.00 or so annually for public roads out of the General Revenue; and even though they were Non-Payable, your credit would be established because of the integrity of your purpose,—the basis of all credit,—and then you would only be called upon to provide revenue for the future current operations of the State Government.

This course would tend to hold your taxes down; and, in but a few years, by paying the public debt, to reduce materially the tax upon the people,—the greatest bane to private enterprise,—for no private enterprise can operate, taxed out of existence, or burdened by a heavy tax.

I call your attention to the fact that public credit is just the same

as private credit; and, if you leave your old notes and other financial obligations without provision for certain payment, your current obligations will be a drag on the market, and will be discounted heavily in order to dispose of them.

In these suggestions, I am merely pointing out from abundant of experience, what may be accomplished with this vexatious question; and this method is sound and workable; however, the responsibility is not on me as an official for the future, and I do not want to trespass on the views of others upon whom the responsibility falls; but point out one way of doing it—an honest way.

There is a view in the world that because the National Government has gone "hay-wire" on public debt, without fear, and because the surrounding States have done the same thing, some of them being obliged to repudiate their obligations, that Oklahoma might as well do the same.

I do not agree with them; and I insist that even though the United States Government and our neighboring States contract debts to such an extent that it will require repudiation, Oklahoma and Oklahoma people should face the world and say: "We have kept our financial obligations, and we have kept faith with all of our creditors." Let me urge you, do not fall into such a faulty policy.

Integrity of purpose, public credit, public honor, just as with individuals, is the basis upon which we judge State and Nations; and let Oklahoma be one State Government whose credit is always sound and whose outstanding obligations are always at par. It can be done; in fact, it has been done for more than three and one-half years of my administration, and the method is clear in my mind as to what we should do, facing the future.

Had I the power, I'd pay the debt and then thereafter use 25 per cent of the gasoline tax in support of common schools, and further reduce the ad valorem tax for it is yet too high and should be again reduced fifty per cent.

Business Advice To Young Men

I observe quite a number of young men in this Legislature,—indeed, more, I believe, than in any other Legislature; and, while I realize few people will take advice — indeed they will take a cold or a cussing, or a rail off of your fence before advice—nevertheless, I am going to give you some; and, if you do not realize it now, you will perhaps later. That advice is:

Remember that the basis of all business, private and public, consists of:

First: Integrity.

Second: A knowledge and comprehension of the value of time; the value of money; and the value of interest on money.

Third: That while any man can make money, it requires much more brains to save money; and, in public business, just as in private business, integrity of purpose is the basis of all credit, and good credit is the basis of all progress and enterprise.

Fourth: Few men can handle credit; few men ought to be extended credit, because they do not know what to do with it. Credit is the basis upon which a sound financial structure, private or public, must be based; and, therefore, the person who possesses integrity, comprehends the value of money, time, and interest, and understands how to handle credit, and not abuse it, will prove successful in financial transactions. Just so with Government.

Speaking of "credit," the best illustration I know is a statement by J. P. Morgan before a Congressional Committee, when asked:

Question: "To what class of people do you extend credit?"

Morgan: "I base all credit in my loans on two things,—character and collateral."

Question: "Which is the more important?"

Morgan: "Character."

Question: "What do you mean by character?"

Morgan: "Integrity and ability,—both in the highest degree. That is character."

Question: "But do you not always consider collateral or property?"

Morgan: "No, not to the exclusion of character, for property, in the hands of fools or thieves, even with a mortgage on it, is unsafe."

Question: "Did you ever extend a loan on character alone?"

Morgan: "Yes, I loaned one man a million dollars on character alone, and did not lose a dime. We both made money."

Observation of Questioner:

"Well that is a strange case."

Morgan: "Yes, because he had a million dollar character, which few men possess."

Remember the time to economize and save is when you are prospering—when your earnings are low economy is self-operating.

If you earn \$20 a week and save nothing, you will save nothing if you get \$100 a week. If you are smart enough, shrewd enough to make \$10,000 a year by unscrupulous means, you will make ten times that in your life time, by being scrupulously honest. Moreover, if at any time you go broke your honesty will bring you credit for new enter-

prise to recoup your fortune; while no person will lend aid to the crook. He will remain "down and out."

All men should be selfish toward themselves and reasonably generous toward others—selfish toward their own appetites and vanity and to such in others; but reasonably generous toward the real necessities of their worthy friends and strangers who may prove to be "angels in disguise."

And I admonish you young men that in every transaction, and in every proposed piece of legislation submitted to your consideration, consider first the integrity of purpose, for you will hear men, before your Session is over, say, "We do not care about paying these bankers,—we want money for roads or the school teacher, or for some one else for the present year;" but, remember, the banker is the fellow that buys the warrant; and if you do not make good the old paper and provide for certain payment of the old paper, the current paper will not be solvent either; but, if you will secure and make certain payment of the old paper, you can "float," without discount, ten times as much current paper as you can without providing for your old or outstanding. That is true in financing a private business; it is true in financing a Government.

You will have men tell you that this thing or that thing ought to be done, and among them will be included bankers, for the reason that the speculators do not want outstanding public warrants and notes that are always at par, because there is no room for speculation. The greater fluctuation, the greater the speculation; and, remember, the people and the Government, and particularly those to whom the State owes money, pays his earnings on his speculation. Indeed, I never could have brought the State Warrants to par value in the market if I had followed the advice of a group of speculating bankers.

There are two ways to write financial legislation,—one in the interest of the people and the other in the interest of the speculator; and the legislator must needs discover that fact. The foundation of all our economic trouble is that, for more than fifty years, all of the financial legislation of this Government has been dictated by the great speculators in Wall Street; and, as yet, no effort to shake them loose.

For fear that somebody will discover that fact, they are now ballyhooing the return of good times. Indeed, they can bring panic when they are ready, and they are afraid of the present Congress, and will aid in restoration, and such cannot permanently last.

The Regional Reserve Bank Law that permits bankers to be on the Board have in their hands, to use the language of President Wilson to me: "The entire weal and woe of this Republic."

Perhaps, some time,—let us hope at least—the American people will be wise enough to select another Andrew Jackson that will choke the life out of the speculators and "hang" them on the "sour apple tree."

Sub-Penitentiary and Its Possibilities

You are more or less acquainted with more or less information due to the misrepresentation of the Press of the purchase of approximately 8,000 acres of land one mile south of Limestone Gap on Highway No. 73 and the M. K. & T. Ry. for the construction of a sub-prison. This land was purchased at \$9.18 an acre. That price was secured and made possible only because it was originally owned by a man by the name of "Kuykendahl," who died with mortgage upon it, and the heirs were obliged to sell it.

Prior to its purchase, we undertook to purchase land at Limestone Gap, which is the same situation and practically the same condition, with less water however than the land purchased, and that land ranged from \$10.00 to \$75.00 an acre through options secured through a private individual, without the owner's knowing that the State wanted to buy it.

I directed the Board of Affairs to refuse the offer, and secured in a few montwhs the offer of the tract that we finally purchased. Immediately, there began a howl of these owners, who wanted to sell at Limestone Gap, and their friends.

After the purchase was made, opposition to the construction of the sub-prison arose from every imaginable quarter. The City of McAlester was hostile; the packing plants and supply houses threw in their quiet opposition and politicians objected; and finally the Attorney General made a ruling refusing the construction, obliging us to submit the matter again to the Legislature of 1933. They again made the appropriation. We began work, and the Attorney General again made one of his notorious rulings. We then went to the Court, and received a favorable judgment from the Supreme Court of the State, but this no whit stopped the opposition from all the other sources.

A very competent man (Joe L. Neely), was secured to superintend the construction, about the only one I knew who knew every detail of the work, such as clearing new land, cultivating crops, handling cattle, building fence (woven wire and otherwise), and knew men. He began the work some 18 months ago. He has completed a page-woven wire fence of approximately twenty miles around the pasture and meadow, lying just east of the "Katy" Railway, along which also runs the highway from McAlester to Durant, No. 73. Through the east part of the pasture flows the largest creek in the county,—Chickasaw Creek; in the center is another large creek of ever-flowing water. In the west part was constructed a lake with a depth of 35 feet, and nearly a mile in length. Pipe was put through the dam to irrigate 40 acres of land for vegetables. Immediately west of the railroad and highway is the location of the buildings, including the tubercular ward; and there is nearby a hill a half-mile deep and nearly a mile long of solid limestone within a quarter of a mile of the railroad track,—stone in abundance with which the State may make cement, crushed stone, et cetera. A cement plant made an overture to me to purchase this hill alone, for a price amounting to ten per cent of the total cost of the 8,000 acres.

There are some three hundred acres of fine limestone meadow land

for hay, sufficient to winter cattle, with grass enough in the pasture to feed 2,000 head of cattle. The superintendent has bought steers and fattened them on the grass and furnished during 1934 all the fresh meat used by the sub-pen and the Penitentiary at McAlester, charging 6 cents a pound for the meat, and has sold three cars of steers and two carloads of hogs, because he had no packing plant to cure the meat. With a packing plant at a cost of \$20,000.00 to \$25,000.00, under the present management of the Sub-Penitentiary, every institution in the State could be furnished with all of the fresh and cured meat at a cost of six cents a pound. The Superintendent, Mr. Joe Neely, informs me that he has furnished the fresh meat during the year and made a profit of \$16.00 on each steer; in fact, with a favorable State administration, this Sub-Penitentiary is capable of paying every cent of cost of these two institutions; whereas, heretofore, the McAlester Penitentiary alone purchased \$65,000.00 worth of meat a year, and they consume 1½ barrels of molasses a day, besides vegetables. All of this can be produced at the Sub-Penitentiary.

Also there is a high hill on top of which is constructed the buildings surrounded by a wall, running down the slope, permitting the south and east winds to blow over the walls and around the buildings so that it would be just as cool inside the wall as on the outside of the wall,—the only prison in the United States where such condition of air can be had.

A visit to this Sub-Penitentiary will convince any man of the truth of the foregoing statement; and yet, through an unsympathetic management, it could be made just as expensive as in the years past; however, even then it would give the T. B. convicts room for treatment and separate them from the others, preventing the spread of the malady.

Aside from the saving in dollars, the segregation of the T. B. convicts is worth the expenditure. Also the segregation of the short-time convicts from the high-powered criminals, who would make them worse criminals by filling these fruitful sources of mind of the convicts, imprisoned with additional criminal thought, will alone save the cost in criminal courts and expense for criminals in this State; and in addition, their treatment will be more humane and more like human beings should be treated, even though convicts, as enjoined by the Master. But I warn you there is room under a sympathetic administration for five years of hard work to complete the plan outlined; and it would not be a bad idea for the committee or committees, or indeed for the entire Legislature, to visit that institution, and learn at first hand what ought to be done and its great possibilities. Such a visit would convince the Legislature of its wisdom, and they would not need to rely upon the gossip of opposition to its construction, ballyhooed through a portion of the daily press.

The Sterilization Law

For the first year in many years, there has been no increase of inmates of the Penitentiary, and I have turned out fewer men during the years of 1933 and 1934 than in the years of 1931 and 1932, when

there was an increase of nine per cent. This is due to a number of reasons:

First: The Sterilization Law, which caused the "repeating" convict, the habitual criminal, to avoid the Oklahoma field for his operation. Some seven months ago, an escaped convict went to Georgia; committed a crime, and plead guilty, stating to the Court that he wanted the highest penalty possible to avoid being carried back to Oklahoma where he would be sterilized.

Second: The second contributory cause is that I have been very careful about hi-jackers, or robbery with fire arms, not to grant them paroles except where double precaution indicated they could be risked.

Third: A cause which contributes to lessening the number is due to the management and the policy of clemency I have pursued in this office.

Fourth: Another cause, in a less way however, is the vigorous effort of the Federal Government. The Sterilization Law is most important because of the habitual criminal who commits most of the crimes; and, in this connection, I urge upon you gentlemen to study carefully and adopt a practical, wise, and effective Sterilization Law, or rather to amend the present law in the light of such purpose.

The Ancient Greek, under the Spartan System, left the imbecile, cripple, and so on upon a cold mountain to freeze to death, which made of the Greek a strong hearty race, with a high degree of intellectuality. That, however, was cruel. The Roman Government treated the helpless and weak as we treat them, and you can observe the difference between the strength of the Latin mind and the Greek. The Greek mind is strong whether found mixed with the Saracens, the Balkans, or the Assyrian. In other words, there is a greater proportion of mental strength, and self-sufficiency due to that fact.

Perhaps you recall the "Jukes Sisters" of New York. An accurate record of that family, descendants of the Jute Sisters, known as the "Jukes Family," costs the State of New York in one hundred years in criminal prosecutions; in cost of alm houses, poor houses, and otherwise, a total of \$1,500,000.00. What a blessing it had been to the State of New York, if they had been originally sterilized!

The "Killikuk Family" is another illustration. As stated by one genealogist, these classes become morons, breed faster, and cannot be improved materially by breeding or education.

A soldier in the Revolution, stopping at an inn-keeper's caused his half-witted daughter to give birth to an illegitimate child; and, some three years afterwards, he married a worthy girl; and after fifty years, and again one hundred years, a trace was made of all the descendants of both. It was found that from this half-wit, there were 189 descendants. All were sub-normal mentally except five. From his marriage, there were 169—20 less. They were all prosperous, and land-owners, and substantial citizens, while the others were, for the most part, wards of the State, or subjects of charity on their relatives

and friends. What a pity sterilization had not been in vogue at that first birth.

I call your attention further to the fact that out of the 3,800,000 persons first called to arms by the United States in the World War, 41 per cent were mentally or physically Defectives; 24 per cent were thrown into the discard. These last may safely be said to be drones on society and upon the earnings of the other 76 per cent of our people.

As a result of the war, with the increase of venereal diseases, at the end of one hundred years, there will be 80 per cent defective, and close on to 50 per cent absolutely dependents, and the Nation will fall by the inherent weakness of its own citizenship, coupled with the tax burden on the worthy to feed the imbecilic.

To illustrate further: at Enid, there are nine children of one woman, all idiots, due to syphilitic blood.

The most honorable lawyer I ever knew, able and upright, with whom I once practiced, has two sons, and they are both in the Institution at Enid, because he, at sixteen years of age, contracted syphilis. Infection was prevented, but it did not purify the blood. I am sure he had rather been sterilized.

While I know you would not do so, yet, in my opinion, the law ought to be such; and, if we save ourselves from our own follies, it will have to be done,—every habitual criminal, every imbecile in every institution, and all persons of syphilitic blood in private life, should be sterilized.

Let me remind you that there are 6,000 children with syphilitic blood in the public schools of this State treated by the Health Department.

Some people say that we ought not thus to interfere with the decrees of the Creator, but the Creator did not bring man to this condition,—he brought himself, and he will have to correct and restore the race and blood to its purity as given to the world by the hand of the Creator.

Somebody has to be bold enough and courageous enough to propose all of the reforms for the better of humanity, and bear the opposition and abuse of the ignorant and all opposition to any change; and I therefore devote at length this discussion to a growing evil that if left unchecked will eventually destroy the American race—so let the ignorant rave at me. Perhaps some day the warning will be heeded.

The principle of Sterilization adopts both the Roman and the Greek method. It is not so harsh or cruel as the Greek method, but just as effectually checks the blood of both the criminal and imbecile.

Remember also that the weak mentally and physically in humanity cannot be bred out; and, at the same time, they increase in birth rate over the pure blood of our citizenship, for, alas, you cannot make brains in the human head with all the Universities in the land; and 25 or 50 per cent are drones on society that eat up the substance

of the other citizens and cause the difference between living in ease and squalid poverty because of necessity through humane feeling of dividing their earnings with the incapacitated. We have reached that period where the struggle for existence and for living will increase as the population further increases. You hear, because of this, much talk of Birth Control. The method which I suggest of sterilizing will not only solve that question of Birth Control and over population, but give to society a citizenship of pure blood and strong, law-abiding minds.

Of course you will not go this far. Of course the American people will not go this far, for they are prone, as it were, to "shut the door of the stable when the horse is stolen"; to ignore an impending evil until it is on them; but the real statesman is always looking towards the future, and makes an endeavor to increase the tendencies toward good and wholesome society, and to retard the bad; and whether I may be accredited with the title of a statesman, that at least has always been my effort and is my excuse for this discussion of the most potent evil of our society.

Should Inaugural Ceremonies Be Charged To the State?

I have been approached by numerous persons to lend my support to an appropriation to pay the expenses of the inauguration of our successors. I have steadfastly refused.

Finally, it was proposed that the Legislature should make an appropriation of \$500.00 to decorate the Capitol. I refused that; and, for fear that some Bill will be introduced, I make these observations:

I know that precedents have been established for such purposes, but not justifiable, at any time. A Bill was even introduced just before I was inaugurated to appropriate \$3,000.00 for my inaugural and I sent word to the organized forces of both Houses that I should veto the Bill, if it did not pass before I went into office; and if it passed before I went into office, I would not permit the expenditure of money for that purpose.

The urging of the expenditure of \$500.00, or even \$50.00, to decorate the Capitol, at State expense, is inexcusable, and should not be done. There is no more difference paying out money to decorate the Capitol than there would be to decorate the cars in the parade, or to buy talcum powders for "The Merry Wives of Windsor" who may infest the Capitol at the Ceremonials.

The inaugurations of C. N. Haskell, Robert L. Williams and Wm. H. Murray were not at State expense, and that did not subtract from the service of either to the State, nor did those inaugurations at the expense of the State add to their service to the State. The fact that John Quincy Adams took the oath, with grandiloquence and gusto, drawn by "coach and six," did not make him any better President; nor did the fact that Jefferson, without such display, riding his own horse, hitching him at the post, and walking in and taking the oath, detract one whit from his great service to the country and to the world.

Of course there are some men, I realize, who ought to have a

great display in their inaugurals, for such inaugurals would be the most eventful thing in their administration, and they are in great need of such a magnificent start. They also must add all of the frills, bibs and bustles, and decorated Don Quixotes and Lords Fauntleroyes and Pompadours, with a touch of Shakespeare, having in the receiving line the "Merry Wives of Windsors;" and to add further, with a Shakespearean touch, they must be trained to understand that other play of his, "She Stoops To Conquer." Nor overlook that strident Pompous Ponderosity, that the ignorant mistake for brains.

All of which reminds me of a friend of mine who died an atheist. On his death-bed, he requested that I deliver the final oration. He was a noted lawyer and an able man. His widow wired to his brother, a sturdy old farmer, uneducated, but very devout in religion. When all had gathered, ready, at the graveyard, the visiting brother from a distant State asked my friend's widow: "Where is the preacher?" She replied: "The Judge did not want a preacher; Mr. Murray will deliver the address." Whereupon, the old farmer took me to one side, and said: "Are you going to deliver an address over my dead brother?" I replied: "Yes." He said: "I wish you would make it strong; he shore needs it." And just as in the case of these Governors above spoken of,—a display of this kind is very appropriate, for they need it; but it ought not to be at State expense, for usually, the State has to pay enough on them before they "get over."

I trust the policy has been established definitely and for good against paying out money for inaugural "shows;" and I urge your Legislature not to "fall" for the ballyhoo that is for the purpose of decorating the Capitol. For ask yourself: "What if I had told the people I'd cast such a vote."

Exemption of Homesteads From Taxation

There has been filed with the Secretary of State a proposed amendment to the Constitution authorizing the Legislature to provide for exemption of Homesteads from Taxation.

Exemptions of any property from taxation is fundamentally unsound and undesirable, because any exemptions, except on the person, makes the dodging of taxes (the greatest evil in tax laws) possible and easier; and it is more objectionable when left to the Legislature or any group of individuals. Such exemptions should be fixed and certain.

All exemptions from taxation and the amount of the exemption should be specifically written into a constitutional provision, and not left to the caprice of politics and political movements.

I would therefore recommend the writing of a provision to carry that principle out in a proposed amendment. To leave uncertain what the exemption should be and the amount and the class of property would result oftentimes in the defeat of the exemption; because it would be a Legislative Act, which must be strictly construed; while, if the exemption be a constitutional provision, the Constitution must be liberally construed in favor of the right.

Moreover, the cause of the loss of homesteads does not rise out of taxes so much as subjecting them to attachment, or execution, and the mortgaging of the homestead; and undoubtedly the homestead should be exempted from mortgage, attachment, or execution; and, if you will use the wording of the Texas Constitution on these points, and our Courts will "follow the Texas Courts in the construction," the ingenuity of man cannot defeat the exemption.

The only wrong in the Texas provision is too much property is exempt, which is 200 acres, together with all improvements thereon.

My suggestion is that the Constitutional provision should read something like this:

"There is hereby exempt from taxation, execution, or attachment, the homesteads of the people; nor shall they be mortgaged except for purchase money."

(Then quote the language of the Texas Constitution); and continue as follows:

"The homestead shall consist of acres of land, if in the country (say 40 acres); and, if in the city square feet, (say 10,000 square feet), together with all improvements thereon, provided houses and buildings do not exceed in value \$1,500.00; and, in the event there are houses or buildings, or both on such homestead, in excess of \$1,500.00 in value, the same may be sold and removed by the purchaser of such improvements; but \$1,500.00 of the purchase money shall be paid to the homesteader, that he may construct a home not to exceed such value."

The foregoing is merely a tentative statement in order to give the viewpoint here recommended.

I find in the Press statements, promoted by certain gentlemen, that the Constitution does not need amending to give the power to the Legislature. They base that upon a clause contained in Section 22 of Article 10 of the Constitution, which authorizes the Legislature to make "classification of property for purposes of taxation."

Their contention is that you may thus "classify" and leave out for taxation; but observe the language just quoted: The Constitution provides for "classification FOR PURPOSES OF TAXATION." It does not say "for the purpose of EXEMPTION FOR TAXATION." Language could not be plainer. Moreover, we should read all clauses of the Constitution together to get its intent and meaning. Therefore, let us look at Section 5, and we will find in the last paragraph the following:

"Taxes shall be uniform upon the same class of subjects."

Then let us turn to Section 50 of Article 5 of the Constitution, and we find the following language:

"Section 50. The Legislature shall pass no law exempting any property within this State from taxation except as otherwise provided in this Constitution."

Reading the foregoing section in connection with Article 10, Section 6 of the Constitution, you will find just such property as is "otherwise provided" for exemption.

The property named in said Section 6 of Article 10 is the only property that can be exempted by the Legislature, or otherwise except through an amendment of the Constitution.

At any rate, and whatever form of amendment is submitted to the people, you should not fail to write it specifically into the Constitution, for the initiated provision filed in the Secretary of State's Department is fundamentally, from many viewpoints, faulty, and should not be ratified by the people; and, therefore, the Legislature should submit a substituted provision.

Supreme Court Nullifying Legislative Power

You are more or less acquainted with a recent decision of the Supreme Court, holding that the salaries of the Judges and of all officers where the salary is fixed by law could not be reduced by the Legislature during the term for which they were elected or appointed.

So far, the Supreme Court's decision was sound; but the Court should have overruled itself where it once ruled its salaries could be raised; but further ruled that it was not necessary to make an appropriation to pay these classes of salaries, which nullifies an important constitutional provision, providing that "no money shall ever be paid out of the Treasury of the State, nor any of its funds * * * except in pursuance of an appropriation * * *." I quote the entire section, which is as follows:

"Article 5. Section 55. No money shall ever be paid out of the treasury of this State, nor any of its funds, nor any of the funds under its management, except in pursuance of an appropriation by law, nor unless such payments be made within two and one-half years after the passage of such appropriation act, and every such law making a new appropriation, or continuing or reviving an appropriation shall distinctly specify the sum appropriated and the object to which it is to be applied, and it shall not be sufficient for such law to refer to any other law to fix such sum."

No plainer language could be written into a Constitution than that contained in the foregoing section; but the decision nullifies that section of the Constitution by quoting a Maryland decision, whose State Constitution does not contain that provision. The court could with the same logic assess and collect taxes to pay these salaries.

Heretofore, it has been held, and assumed, and believed, as an established truth that the Legislative Branch, to the exclusion of the Judicial and Executive Branches, has complete control over levying revenue and taxes, and providing for the expenditure of money; that, without an appropriation, no expenditure can be had unless the same is authorized by a general law like that providing for a per cent of the money collected, given to the Tax Commission. There is no general law, or special law that authorizes anybody to spend money from the

Treasury of this State in payment of these salaries, without an appropriation provided therefor.

It is my hope yet that this clause shall not be destroyed by the IPSE DIXIT of a self-serving judiciary, but that some way, some how, some time, we shall have a Supreme Court that will uphold all provisions of the Constitution.

When the Legislature, in 1933, reduced these salaries, nearly every person, including some members of the Supreme Court, came before the Appropriation Committee and agreed to the reductions. Acting upon these statements, the Legislature believed that the appropriation would be accepted.

In 1932, at the State Bar Association, the then Chief Justice of the Supreme Court, departing from the ethics of the Bench, began to lay out a policy of State Government, and, among other things, said: "Salaries should be reduced and expenses cut to the bone;" and that was hurled all over the State; but, when they were "cut to the bone," the same Judge connived to secure the appointment of a Special Court, while I was in Washington City, endeavoring to aid the State in certain public matters, and this Special Court made the ruling at the suit of this same Judge. This conduct and connivance is contemptible in the extreme, inexcusable, and unpardonable on the part of a righteous citizenship.

If there had been any discrimination, there had been some reason, but the same per cent was used against all, beginning with the Governor, by cutting off \$1,500.00 a year of his salary. All had their remedy, because they could have gone into Court and sued for their salaries; and if judgment were obtained, this Legislature would be under duty bound to make an appropriation, because it was upheld by the Supreme Court of the United States in the suit of *Young Custis* for General Lee's home that a citizen could sue the Government without the Government's permission, when the governing authority was pursuing a course directly in conflict with the words of the Constitution; and, hence the decision nullifying the clause requiring "an appropriation by the Legislature" was unnecessary to have been made by these PISALLERS of the Supreme Court.

What I Saw and Was

When I retrace the steps of the past forty years of experience in Oklahoma, coming to the Chickasaw Nation when the Indian Territory had but 275,000 people, and Oklahoma Territory less; and watched it grow to a population of approximately 2,700,000; when, at the beginning of Government in the east half of the State, consisting only of the Five Civilized Tribes of Indians, with complete control over themselves, and no government for the white man except the Federal Courts, many of them arbitrary, harsh, and cruel; the citizens' rights not always respected; when it would have been intolerable to have lived as a white man in the Indian country because of the rule of these Federal Courts, had it not been the people made up the juries.

When I remember these Indian Tribes were faced with the propo-

sition of settling their estates and preparing to enter into State Government; my own effort to assist and get for them the best possible security by aiding in the framing and in the adoption by the Indians, Treaties looking towards Statehood;

When I look back over that scene and remember that forty years ago there were neither millionaires nor paupers in the whole of the Indian Territory; that you could travel from Duncan to the Arkansas line; never miss a meal nor a horse feed, nor experience any inconvenience in loss of time except you would need to tell your host the news in the communities through which you had traveled—all were neighbors and friends, with now and then a refugee criminal from some other State;

When I remember the Sequoyah Constitutional Convention of which I was one of the Vice Presidents, in 1905, through the authority of the Indians, and their honest white neighbors, to give them some schooling and knowledge of the competition they must needs meet in their changed political status;

When I recall the Constitutional Convention that followed which honored me as its President, and the Constitution constructed by the Convention that has met all of the sundry divergent interests of the State—strong enough to stand up against all anarchy and storm, preserving at all times stability and orderly society; of the Legislature that set up State Government;

When I recall the numerous contests since the ratification of the Constitution; my service in Congress wherein a certain justice due to the Tribes I was enabled to assist;

When I recall the bitter campaign of 1930; slandered by all the daily papers; lied about in the campaign, with not even my family exempt;

When I recall the continuation of that abuse for four long years, my constant effort to use the power of the office of Governor to prevent abuses and frauds, and to protect the weak against the strong, met on every side by other elective hostile officers, including the Supreme Court in an attempt to hamper and to thwart every effort I undertook in the interest of public justice; but I call attention to that with that exercise of Supreme Executive and Military Power I have never once used it to oppress the citizen; never once used it to oppress labor, although experiencing three strikes in the coal mines, but always to protect the interests and liberty of the citizens and to secure public justice;

When I recall, in the first month of my administration the liberating of more than one hundred and fifty men from the jails, charged with the crime of having no money or no jobs;

When I recall the expenditure for Government in this State to such a cost greater than the worth of the Government;

When I recall my constant effort to reduce expenditures and taxes, resulting in 1933 of an actual accomplishment in such expendi-

ture and reduction of taxes throughout the State of approximately fifty per cent; when one railroad in the State was saved \$400,000.00 a year in taxes, although it was the highest valued road in the State, and all other taxpayers in like proportion;

When I recall the effort of a selfish corporation to extract from the State \$1,000,000.00 for a supposed perpetual franchise on a bridge at Denison, Texas; of my opening of the State Bridge against an arbitrary injunction of an inferior Federal Court, and ultimately, through my own attorney, being sustained in the Supreme Court of the United States, wiping out \$165,000 judgments erroneously, selfishly levied against this State;

When I recall that oil went down to 20 cents a barrel in Oklahoma and 6 cents a barrel in Texas, caused by a three-judge Federal Court tying up the Corporation Commission, and my taking charge with a Military Order and bringing oil to \$1.00 a barrel;

When I recall the creation of the Oklahoma Tax Commission and the re-writing of the Code of Laws for the collection of taxes, that prevented the escape from paying the tax due the State, and the collection under this code of nearly \$2,000,000.00 and more of taxes that had been dodged for years, but met in all of these transactions by continuous, unrelenting opposition of other public officials, including the Courts, backed, ballyhooed by the Metropolitan Press;

It almost causes me to exclaim: "Is it any use?" "Is it worth while to serve the public?"

We at once wonder the reason for that Divine economy that causes the sincere man to fight to serve the people and then be required to double his fight to carry out his promise.

When I review all of these forty years with painful experiences in the development of great educational institutions; with the system of law under which business of every kind has prospered, and labor tolerably protected; the citizen's life and liberty made secure; and review my own experiences through this period, I am reminded of the story in Vergil when he recounts the return of Aeneas from the Siege of Troy, to Carthage in search of homes for his followers. He, the old experienced statesman and constructive force of Carthage, met Queen Dido, who sought his story of the great achievements in the past in the little, miniature city Republic of Carthage; and, after relating to Queen Dido the story, with a swing of his arm, he exclaimed:

"Queaque ipso miserrima vidi et quorum pars magna fui," meaning,

"All I saw and a part of which I was."

As truly as Aeneas said to Queen Dido, I can say to you gentlemen, of the past forty years of Oklahoma: "ALL THAT I SAW AND PART OF WHICH I WAS."

This and much more—You have seen during the past four years the credit of the State restored, and all State and County Warrants,

for more than three and a half years, at par; there has been no serious mob violence, and no one lynched; public justice has been maintained, and the laws tolerably enforced; the poor, needy, and indigent have been cared for, and the Governor has not been impeached.

The Office of Governor, at all times, has been where the Constitution placed it—in the State Capitol—and all knew where to locate it; and no one has ever doubted who was

THE Governor

MESSAGE

The following Message was received from the Governor, which was read and ordered referred to the Committee on School Lands:

SPECIAL MESSAGE

TO THE SENATE OF THE LEGISLATURE IN SESSION:

The Auditor contracted under the law to audit the School Land Department from July 1, 1932, to July 1, 1934. He found that it was necessary for him to audit the leasing of oil lands back to 1912, since this portion of the School Land Department had not been audited by the former audit.

He has found quite a number of oil companies that had leases on School Land, and, later, the same expired, or was cancelled, but the total amount due the State was not collected, and there was an aggregate sum of \$151,397.10 due the State from these numerous companies due small amounts from \$20.00 up to several hundred dollars each.

I got this report too late to make demand on the companies for the balance due the State School Land Department, and have therefore submitted the information in the form of a table from said audit, giving the name of each person, or company, with the postoffice address; the county where the land was located; date of lease; date when the lease was re-leased by the Commission; the amount due the State for the lease; the amount collected; and the balance of rental due the State in each case, which is attached to the Message, and made a part hereof, for your consideration and action.

I recommend that the Attorney General be instructed by the Legislature to make demands on these several companies for the amount due; and, then, if they fail to pay, to bring suit to recover these funds for the School Land Department.

Respectfully submitted,

Wm. H. MURRAY, Governor

SPECIAL COMMITTEE REPORT

Senator Duffy submitted the following Special Committee Report, which was received and ordered filed:

Mr. President: We, your Senate Inaugural Committee beg leave to submit the following report:

Your Committee met with the House Committee and with Adjutant General Barrett and is advised that a block of seats have been reserved in which the Senate will sit as a body at the ceremonies. Since the Senate convenes at 10 A. M. in order that we may receive full instructions as to the line of march from Senator Wilbanks, who will be the military officer in charge of us. The Senate will march in a column of twos, through the rotunda down the steps and into our seats, and will be followed by the members of the House of Representatives. The President and President Pro Tempore will head our column of twos, but there will be no seniority among the remaining Senators as to their place in the column of twos.

Your Committee also arranged for sufficient seats to accommodate the wives of the Senators who desire to attend the ceremonies, and will be seated in a group prior to the time the Senators march to their seats. The committee also arranged for sufficient additional seats for each Senator to be entitled to a reserved seat for one distinguished guest each. No Senator will be allowed more than one distinguished guest reserved seat, and no unmarried Senator, nor Senator whose wife does not wish a reserved seat, will be allowed an additional guest by reason of that fact. Each Senator is respectfully urged to adhere to this rule. The Sergeant-at-Arms has prepared a roster of the Senate and each Senator is requested to advise the Sergeant-at-Arms not later than 3 P. M. today as to whether he wishes a seat reserved for his wife, and also the name of the distinguished guest for whom he wishes a reserved seat. The Sergeant-At-Arms will furnish this list to Adjutant General Barrett today at 3 P. M. and will receive tickets for the reserved seats to be delivered to the members of the Senate between that time and Monday morning.

No one will be permitted to sit with the members of the Senate, except the Sergeant-at-Arms and Chief Clerk of the Senate.

All other Senate employees will be seated in the space reserved for Capitol Employees.

MESSAGES

The following Messages from the Governor were received, read and ordered filed:

To the Honorable, The Senate:

I herewith transmit the audit of the School Land Department as made by Sam M. Bounds, according to contract heretofore entered into for the audit beginning July 1, 1932 and ending June 30, 1934, which includes also therein an extra audit of the Oil and Gas Division since

1912 which is respectfully submitted by Mr. Bounds, the auditor, and the undersigned in obedience to the law.

Done on this fourteenth day of January, 1935.

BY THE GOVERNOR: WM. H. MURRAY.

To the Honorable, The Senate
of the Fifteenth Legislature.

Gentlemen:

Herewith sundry papers and things to be considered:

1. Claim of the Adjutant General's Department for back salaries.
2. Explanation of the claims due Ed Andruss, and matters and things relating to the Feeble Minded Institute.
3. Letter from His Excellency, Franklin D. Roosevelt, President of the United States, together with certain papers relating to the Banking Laws, and my reply there, for your consideration.
4. Letter from a gentleman of Baltimore, Maryland, desiring to be appointed Commissioner of Deeds.

With reference to this matter, I have to say that a number of States have such a position, and Oklahoma, on account of her oil interests, should create such a position, to facilitate the transfer and the execution of oil leases, and the sale of real estate, where the owner lives in another State, or country.

Texas has an ideal law on this subject. I recall that a gentleman living in North Argentine wanted to execute a lease for oil on ten acres of land in Oklahoma. He came to me and I informed him that there was no way except to go to the American Consul who lives 1000 miles away, and it was not worth while for him to go to such expense to facilitate the lease, which was important both to him and the company in Oklahoma desiring to make the law.

You should draw the law along the lines of the law governing a Notary Public, but should allow them double the fee of that allowed a Notary Public in Oklahoma, and you should provide in the law for the appointment by the Governor instead of the ordinary way of appointing a Notary Public. Texas has fairly a good law on this subject, with slight modifications; in fact, I acted as Commissioner of Deeds when I practiced law in the Chickasaw Nation for those who owned lands and had moved to the Indian Territory.

Senator Henry S. Johnston will recall that I wrote him a letter about this when I lived in El Gran Chaco; and he submitted the same to the Legislature.

I am making this recommendation because it is of tremendous importance to facilitate the transfer of real estate, leases on oil lands,

and other real estate transactions, by persons who own Oklahoma real estate, and living in other States.

Respectfully submitted, on this the 14th day of January, A. D., 1935.

BY THE GOVERNOR: WM. H. MURRAY.

Senator Briggs moved that, when the Senate adjourns today, it adjourn to meet under the rules on Tuesday, January 15, 1935, which motion prevailed.

Gentlemen of the Senate:

May I say that it is with keen delight that I assume the duties as your Presiding Officer.

My hope is that I may succeed only as such. The Constitution prescribes, defines and limits the powers and prerogatives of the Lieutenant Governor.

It says in relation to the Senate that the Lieutenant Governor shall be the Presiding Officer of this Body. That, I hope to be in a fair, friendly but fearless fashion.

It does not say that as such the Lieutenant Governor shall throw his influence for or against any measure before this body.

It confers upon your Lieutenant Governor no legislative functions save and except in case of a tie vote. Then, and only then, should my voice be raised for or against legislation pending before you. When,

if ever, that time should come I shall speak my part in no uncertain terms. Then, and only then, do I desire to legislate. It shall never at any time be my purpose, my aim or my ambition to invade the sanctity of your senatorial prerogatives. You are the Senators—I am your Presiding Officer.

In conclusion, I want your friendship and help in order that I may make a presiding officer worthy of this Honorable Body.

I thank you!

The Joint Session was called to order by President Berry, who announced the arrival of the Governor.

President Berry presented to the Joint Session Governor E. W. Marland, who delivered the following Message:

✓ Mr. President, Mr. Speaker, Members of the Senate and the House of Representatives of the State of Oklahoma:

My first message to you will be brief and deal chiefly with emergency measures which I shall propose.

From time to time as your session of the Legislature progresses I shall consult you concerning other measures of importance to our State—and avail myself of frequent opportunity to make suggestions of needed legislation.

Last month I organized a number of Citizens Committees to make studies of the functioning and problems of administration of the various activities of government in Oklahoma.

- A Committee on
- (1) Education.
 - (2) Financial Administration.
 - (3) Public Welfare.
 - (4) Revenue and Taxation.
 - (5) Highways.
 - (6) Natural Resources.
 - (7) Conservation.
 - (8) Law Enforcement.

I have contracted with the Brookings Institution—an Institution for Governmental Research—to furnish technical advisers to each of these Committees and to furnish a complete report of the findings of these Committees.

This report will contain recommendations regarding each field of administration, designed to point out commendable features, to remove existing defects, to increase efficiency, and to reduce expenditure.

The full report is to be completed in written form by July 1, 1935.

One copy is to be delivered to the President of the Senate—one copy is to be delivered to the Speaker of the House—another copy is to be delivered to the Chairman of the Citizens Committee on Good Government.

This report will, I believe, recommend changes in our eleemosynary and penal institutions—our educational system—our administrative departments—our law enforcement agencies—and our financial administration. All looking toward economies in government.

No such survey has ever been made in Oklahoma and because of its complete character cannot be finished in time for use in our study of the needed appropriations for the next fiscal year (1935-1936), or the revenue measures needed to meet the appropriations.

For this reason, I propose to you that you consider revenue measures for one year only, or until the end of the next fiscal year, and appropriations for departments and institutions only to the end of the next fiscal year—and in addition to these such emergency appropriation measures as may be necessary.

* * * *

In just two weeks from today we must meet the emergency arising from the decision of the President to drop from the Federal Relief rolls all but the able-bodied destitute unemployed.

Federal aid in Oklahoma will be continued by furnishing public works employment to approximately 115,000 able-bodied family heads.

Approximatly 35,000 cases of the 150,000 cases now on the relief rolls, will need the immediate care of the State. FERA authorities estimate for me that these cases represent approximately 150,000 individuals.

This will throw upon us the burden of supporting at least that number of our fellow citizens who, on account of their age or infirmities, are unable to maintain themselves.

I propose to you that in order to meet this emergency we pass a new general sales and service tax law, broadening its base and increasing the amount to three per cent—one per cent for schools as now; two per cent for relief of destitute unemployable persons.

The greatest task before our Nation and our State today is the permanent solution of our unemployment problem.

This administration stands pledged to the people of Oklahoma to co-operate to the fullest possible extent with the National administration in this undertaking.

The President in his message to Congress on January 4th said:

"This new program of emergency public employment should be governed by a number of practical principles.

"(1) All work undertaken should be useful—not for just a day, or a year, but useful in the sense that it affords permanent improvement in living conditions or that it creates future new wealth for the nation.

"(2) Compensation on emergency public projects should be in the form of security payments which should be larger than the amount now received as a relief dole, but at the same time not so large as to encourage the rejection of opportunities for private employment or the leaving of private employment to engage in government work.

"(3) Projects should be undertaken on which a large percentage of direct labor can be used.

"(4) Preference should be given to those projects which will be self-liquidating in the sense that there is a reasonable expectation that the government will get its money back at some future time.

"(5) The projects undertaken should be selected and planned so as to compete as little as possible with private enterprises. This suggests that if it were not for the necessity of giving useful work to the unemployed now on relief, these projects in most instances would not now be undertaken.

"(6) The planning of projects would seek to assure work during the coming fiscal year to the individuals now on relief, or until such time as private employment is available. In order to make adjustment to increasing private employment, work should be planned with a view to tapering it off in proportion to the speed with which the emergency workers are offered positions with private employers.

"(7) Efforts should be made to locate projects where they will serve the greatest unemployment needs as shown by present relief rolls, and the broad program of the national resources board should be freely used for guidance in selection. Our ultimate objective being the enrichment of human lives, the government has the primary duty to use its emergency expenditures as much as possible to serve those who cannot secure the advantages of private capital."

In order that we may be prepared to co-operate with the National administration and receive the full benefits of its public works program, and furnish the greatest amount of useful employment to our people,

I propose that you enact laws creating, establishing and financing certain State Boards:

ONE: *Oklahoma Planning Board, of fifteen members,*

With power and authority to establish and maintain a survey of the natural, agricultural, industrial and human resources of the State—and develop plans and programs for the conservation and better utilization of these resources.

Long-term co-ordinated planning and programming of Public Works should be its objective—with the general purpose of guiding

and accomplishing a co-ordinated, adjusted, efficient and economic development of the State, which will, in accordance with the present and future needs and resources, best promote the health, safety, comfort, convenience, prosperity and welfare of the people of the State of Oklahoma.

I suggest that you appropriate for the uses and purposes of this Board for the period ending June 30, 1936, the sum of \$500,000.00.

TWO: Oklahoma Flood Control Board, of three members,

With power and authority in connection with flood control, soil erosion, irrigation and reforestation—with authority to acquire, lease, hold and sell land—with the power of eminent domain—and with other powers necessary and incident to conservation of our natural resources of land and water.

With authority to co-operate with the National Government in its flood control program.

I suggest that you appropriate for the uses and purposes of this Board for the period ending June 30, 1936, the sum of \$1,000,000.00.

THREE: Oklahoma Housing Board, of three members,

With power and authority to acquire, buy, lease, hold and sell land—

To acquire, buy, build, own, maintain and sell houses, barns and outbuildings—

To create homesteads, farm and-or city, and sell the same on the installment plan—

To do and perform any and all acts necessary to promote home ownership and rural rehabilitation.

With power to borrow money, mortgage its assets, issue bonds and finance its operations.

I suggest you appropriate for the uses and purposes of this Board for the period ending June 30, 1936, the sum of \$2,500,000.00.

FOUR: Oklahoma New Industries Board, of three members,

With the power and authority to acquire, buy, lease, own, hold and sell land—

To erect, maintain, operate, lease and sell buildings, factories, mills and manufacturies.

With all necessary power incidental to the promotion of new industries in Oklahoma.

With power to mortgage its assets, issue bonds, borrow and loan money to aid in the building and operation of industries.

I suggest that you appropriate for the uses and purposes of this Board for the period ending June 30, 1936, the sum of \$1,000,000.00.

FIVE: Oklahoma Highway Board, of three members,

With all the power and authority vested by law in the present highway commission.

I suggest that you appropriate for the uses and purposes of this Board for the period ending June 30, 1936, the sum of \$2,500,000.00 out of general revenues of the State, for the purpose of matching the Federal appropriation available for our highway use.

I suggest that all members of the four last named boards shall be ex-officio members of the planning Board.

* * * *

In order that the operations of these new Boards shall be properly financed, I propose that you enact emergency revenue measures for the period ending Jun 30, 1936, imposing a severance tax of two cents per barrel on all crude petroleum produced in the State.

And two cents per thousand cubic feet on all natural gas produced in the State.

And an additional one cent per gallon on gasoline sold in the State.

The revenue derived from the new tax on crude oil and natural gas will, I believe, be more than sufficient to provide the amount needed for the Housing, Flood-Control, New Industries and Planning Boards.

The additional revenue from gasoline sales will, I believe, be sufficient to provide the amount needed for the use of the Highway Board.

Since oil and gas are irreplaceable natural resources of Oklahoma, it seems to be quite fitting that the revenues derived from such taxes can appropriately be used in the prevention of waste of another natural resource—our soil.

Flood-control and prevention of soil erosion are of paramount importance in all planning for the present and future generations of our State.

* * * *

Another emergency existing which must be met by special revenue measures is the depleted condition of our Treasury and the outstanding deficiency warrants.

I ask your authority to issue short time notes (not over four years) to retire these warrants.

I propose passage of emergency tax laws to raise revenues for the general revenue fund of the State from the following sources:

Incomes, insurance premiums, inheritances, cigarettes, salaries, and income from rents.

The income that can be derived from these sources will, I believe, be sufficient, with the other general revenues, to meet the ordinary expense of our government and retire outstanding warrants.

I suggest for your *immediate* consideration legislation to appropriate funds to be made available for the care of our unemployables beginning February 1st, and funds to meet the requirements of the Federal government of our participation in the work relief program.

I suggest the appropriation of the sum of \$5,000,000.00 for relief purposes.

A new general sales and service tax law of three per cent (3%)—one-third for schools, two-thirds for relief—will, I believe, raise the revenue necessary for this purpose.

Mr. President, Mr. Speaker, Gentlemen of the Senate and House of Representatives,

I urge, in the name of suffering humanity, prompt action on these emergency measures.

THE GOVERNOR OF OKLAHOMA: E. W. MARLAND.

Upon motion of Representative Shoemaker, the Message of the Governor was ordered printed in the Journals for the Honorable House and Senate.

Upon motion of Senator Nance, the Joint Session was dissolved.

Upon request of Senator Burns, HOUSE JOINT RESOLUTION NO. 9, by Corson of the House and Thomas and Burns of the Senate, was ordered referred to the Committee on Legal Advisory for further consideration.

Senator Stewart was recognized on a question of personal privilege and made the following remarks:

Gentlemen of the Senate:

Going back to the aged worn pages of the patriarchs of the past who gave birth to our present form of government upon the powers that the Senate of the United States should have, upon "advice and consent of the Senate," it is my humble opinion from the discussion which I shall relate, that it is a mutual duty and authority.

In reading from the words of the great givers of the laws down through the ages, we often read of what the various legislative bodies had in mind in the passing of a statute. In this case, the original arguments have been preserved in the Libraries of Congress, excerpts from which I shall submit to you merely as a research of my perusal since the major portion of our assent and advice in the matter of appointments for the next four years has been given, feeling that my few remarks upon this subject will not be entirely a bore.

I wish to quote from the remarks of our forefathers whom we so proudly revere for their most excellent capacity in their vision of forming the greatest government known to mankind.

Birth was given to the phrase "advice and consent of the Senate" from a triangular contention. One group proposed that all appointments be made by the Senate. Another group sponsored the appointments by the Chief Executive, by and with the advice and consent of the Senate, and the third group proposed to appoint an Executive Council, of which the President would be a member, consisting of a small number in making appointments. The final result was the adoption of the clause, "Advice and consent" which was handed down to us and which was believed by the members to be a mutual duty imposed upon the Chief Executive and upper Legislative branch of government. Alexander Hamilton, the father of the Republican Party, was a proponent of the words written in the Constitution of the United States in this respect.

In the Constitutional Convention of 1787, held for the purpose of revising the federal system of government, Delegate Charles Pinckney, of South Carolina, laid before the Convention a draft of a federal government which he had prepared to be agreed upon between the Free and Independent States of America. Article 8 of this draft after reciting the various duties of the President, etc., provided, "He shall commission all the officers of the United States and, except as to Ambassadors, Ministers and Judges of the Supreme Court, he shall nominate, and with the consent of the Senate, appoint all other officers of the United States.

On Monday, July 18, 1787, Mr. Hamilton, in addressing himself to amendments of Mr. Randolph, of Virginia, offered a paper or sketch as a proposition to the Committee to give a more correct view of his ideas, to suggest amendments that he should probably offer to the plan of Mr. Randolph. From his sketch, I quote, "Section 4. The authority and function of the Executive to be as follows: To have a negative on all laws about to be passed and the execution of laws passed, to have the direction of War when authorized and begun, to have, with the advice and approbation of the Senate, the power of making all treaties, to have the sole appointment of the heads or chief officers of the Departments of Finance, War and Foreign Affairs, to have the nomination of all other officers (ambassadors to foreign nations included) subject to the approbation or rejection of the Senate." Quoting further from Section 5 of said sketch "The Senate to have the sole power of declaring war, the power of advising and approving all treaties, the power of approving or rejecting of all officers except the heads or chief of the Departments of Finance, War and Foreign Affairs."

On July 18, 1787, in Convention, in discussing the national judiciary and the clause regarding the appointment of the Judges by the Second Branch of the National Legislature, Mr. Nathaniel Garham, of Massachusetts, suggested that the Judges be appointed by the Executive, with the advice and consent of the Second Branch as prescribed by the Constitution of Massachusetts, in which State this mode had been long in practice and found to answer perfectly well. In carrying the discussion further, Mr. Rogers Sherman, of Connecticut added, "*That the Judges ought to be diffused, which would more likely be attended to by the Second Branch than by the Executive.*" Further discussing this subject, Mr. George Mason, of Virginia, suggested that the Executive would insensibly form local and personal attachments within localities that would deprive equal merit elsewhere of an equal chance of promotion. Quoting Mr. Garham further as to the responsibilities of the Executive, he said, "At least he will be careful to look through all the States for proper characters." Mr. James Madison, of Virginia, carrying the discussion further on this subject, said, "The Judges might be appointed by the Executive with the concurrence of one-third of the Second Branch. This would unite the advantage of responsibility in the Executive with the security afforded in the Second Branch against any incautious or corrupt nomination by the Executive." Mr. Sherman, of Connecticut, was clearly for confirmation by the Senate, saying, "It would be composed by men nearly equal to the Executive and would, of course, on the whole, have more wisdom. They would bring into their deliberations a more diffusive knowledge of character. It would be less easy for candidates to intrigue with them than with the Executive Magistrate." For these reasons he thought it would be a better security for the proper choice in the Senate than in the Executive. Mr. Pinckney, in supporting this idea, further advanced the placing of the appointments in the Second Branch of the Legislature exclusively, saying, "*The Executive will possess neither the requisite knowledge of character nor confidence of the people for so high a trust.*" Mr. Gunning Redford, Jr., of Delaware thought there were solid reasons against leaving the appointments to the Executive, saying, "He must trust more to information than the Senate. It would put it in his power to gain over the larger centers by gratifying them with a preference of their citizens." Saying, "The Executive could not be punished for mistakes in these appointments. In quoting Mr. Garham further, he said, "The Executive would be answerable under no other penalty than that of public censure."

On September 7, 1787, on the subject of the mode of constituting the Executive and the clause pertaining to nominations and appointments, Mr. Gouveneur Morris, of Pennsylvania, said, "That if the President was to nominate, there would be responsibility, and if the Senate was to concur, there would be security."

You can see, gentlemen, that from all these proceedings and arguments, that it was the consensus of opinion that all appointments should be vested solely with the Second Branch of the Legislature, but after due consideration and deliberations, it was agreed that such appointments should be made by the Chief Executive, by and with the consent of the Senate.

The older members of this Body will agree that even though we

have not dictated any appointments, our confirmation has had a powerful, yet silent operation. Using the words of Mr. Hamilton, I say, "it would be an excellent check upon a spirit of favoritism in the Executive, and would tend greatly to prevent the appointment of *unfit characters from State prejudice, from family connection, from personal attachment, or from a view to popularity.*" In addition to this, it would be an efficacious source of stability in the administration. It will readily be comprehended, that a man who had himself the sole disposition of offices, would be governed much more by his private inclinations and interests, than when he was bound to submit the propriety of his choice to the discussion and determination of a different and independent body; and that body an entire branch of the Legislature. The possibility of rejection would be a strong motive to care in proposing. The danger to his own reputation, and, in this case, his political existence, from betraying a spirit of favoritism, or an unbecoming pursuit of popularity, to the observation of a body whose opinion would have great weight in forming that of the public, could not fail to operate as a barrier to the one and to the other.

Then, gentlemen, it is easy to see through all these deliberations by the founders that their main purpose was to have and preserve representative government by guarding against the concentration of appointments and authority to local or more populated centers. I do not wish to now particularly question the ability and integrity of any men that we have confirmed, but I do say that inasmuch as we are held responsible for the success of the administration to a large degree, we should forever retain the right to pass on all appointments in an administrative capacity. There are others what we might call major appointments under the Chief Executive that do not require the confirmation of the Senate, but I think these should be included. It is quite evident that a parallel situation has developed in this session of the Legislature which the founders were so studiously trying to avoid when they adopted the principle that appointments should be made by and with the consent of the Senate.

All this is said, gentlemen, in my humble way, for the purpose of bringing before you the fact that it is our duty to protect the interest of this State from the possibility of unnecessary further burdens. It is, of course, argued that the unfortunate and needy of this State must be cared for. This we shall and must do but I warn you, gentlemen, that this is as far as this Legislature would be justified in going in the creation of new burdens on the people of this State at this time. After we have created these new burdens on the people for the purpose of relief, do you not think it our duty to see that this money which has been taken from the already over-burdened people should be properly used and distributed to those who need it most and as intended by the Legislature. I would have you know, gentlemen, that any new additional burdens in the way of taxes placed upon the people of my section of the State will be as if you were extracting from their veins the life blood itself. The only way that we can guard and protect this money and the people for whom it is intended is to insist and demand that we advise and consent to the appointment of the administrators who are to distribute the same.

It is my desire, gentlemen, as I am sure it is yours, to represent the

best interest of the people of the State of Oklahoma, but if we should depart so far from the course of good government by enslaving our people with unnecessary extra burdens, then what will your answer be when you know the citizenship of this State is asking and demanding relief from the actions of this Legislature. Therefore, I declare to you that I think it is our duty to protect the interest of the citizenship of this State FIRST, and I, like the fathers of old, believe this can best be done by requiring that all major appointments and authority not be concentrated but be widely distributed and this can best be had by and with the consent of the Senate. I know the needs of my people and I believe I know what they want, and, gentlemen, it is this knowledge that prompts me to take the stand I am taking here today. I want it to be said of men when I return to my distressed constituents that I, for one, stood up for their interest in this Body.

I assure you, gentlemen, that this is the earnest desire of my heart.

I thank you.

"OKLAHOMA

(A Toast)

Harriet Parker Camden

I give you a land of sun and flow'rs,
And summer a whole year long;
I give you a land where the golden hours
Roll by to the mocking bird's song;
Where the cotton blooms 'neath the southern sun,
Where the vintage hangs thick on the vine;
A land whose story has just begun,
This wonderful land of mine.

Chorus:

Oklahoma, Oklahoma, Fairest daughter of the West,
Oklahoma, Oklahoma, 'Tis the land I love the best.
We have often sung her praises,
But we have not told the half,
So I give you "Oklahoma,"
'Tis a toast we all can quaff.
A land where the fields of golden grain,
Like waves on a sunlit sea,
Bend low to the breezes that sweep the plain,
With a welcome to you and me;
Where the corn grows high 'neath the smiling sky,
Where the quail whistles low in the grass;
And fruit trees great with a burden sweet,
And perfume the winds that pass."

And WHEREAS, it is fitting and proper that the words and music of this song should be adopted as the official song of the State;

NOW THEREFORE BE IT RESOLVED BY THE SENATE OF THE FIFTEENTH LEGISLATURE, THE HOUSE OF REPRESENTATIVES CONCURRING THEREIN:

The emergency having received the constitutional two-thirds majority of the votes of all members elected to and constituting the Senate was declared passed.

The President, in open session, signed the engrossed copy of House Bill No. 45, and ordered the same transmitted to the Honorable House.

The following explanations of votes were sent up:

Mr. President: In voting for House Bill No. 45, I do so for the reason that some provision must be made for caring for our unemployables and to raise revenue for the current expenses of government.

CURNUTT.

Mr. President: In voting for House Bill No. 45, I do so to help the unemployables during the present emergency.

FIDLER.

Mr. President: I vote for and support this illy prepared Act in spite of its iniquities:

1st. Because of the great extremity in which the State is placed financially and its dire need for funds.

2nd. Because of the beneficent purpose for which the funds derived therefrom are to be devoted.

3rd. Because I believe that those who indulge in luxuries should not object to contributing a pittance toward a conscience fund for the use of the needy.

4th. Because, in so far as the tax may tend to lessen the use of these noxious needs, it co-ordinates with the teachings of the medical profession that in cases of severe sickness a tobacco heart has often thrown the balance of vital chances against the patient.

5th. My additional and consummate reason is that in the year 1927, the President of the National Medical Society solemnly stated to his own colleges, the surgeons and physicians of America, that of the children born of cigarette smoking mothers more than fifty percent either died or became defectives with 18 months.

JOHNSTON.

RESOLUTIONS

President Pro Tempore Briggs presiding.

Senator Nichols asked unanimous consent, which was granted, to introduce and consider the following resolution, which was read at length:

SENATE RESOLUTION NO. 5—By NICHOLS, COMMONS, SOWARDS and CHAMBERLIN.

A RESOLUTION EXPRESSING FAITH IN THE FINANCIAL POLICY OF HONORABLE E. W. MARLAND, GOVERNOR OF THE STATE OF OKLAHOMA, AND CONDEMNING THE CONDUCT OF CERTAIN BANKERS AND THE OKLAHOMA CITY CLEARING HOUSE ASSOCIATION OF THE STATE OF OKLAHOMA.

WHEREAS, certain Oklahoma City and Tulsa Bankers, and the Oklahoma City Clearing House Association are at this time refusing to cash state warrants, and

WHEREAS, by their conduct the credit of the State of Oklahoma is being seriously impaired, and

WHEREAS, the said State of Oklahoma is at this time in sound financial condition and, as compared to other States of the Union, is in far better shape financially, and

WHEREAS, it is openly charged that certain Oklahoma City and Tulsa Bankers, and the Oklahoma City Clearing House Association are engaging in said conduct for the sole and express purpose of embarrassing, hindering and hampering the program of the present administration in its effort to relieve the people, and that they, the said Bankers and the Oklahoma City Clearing House Association, well know that said state is in sound financial condition, but that said conduct is but a challenge and a threat to the Governor and to the Legislature, in an attempt to force them to recede from their efforts to adopt the program, and

WHEREAS, the said conduct upon the part of certain Oklahoma City and Tulsa Bankers and the Oklahoma City Clearing House Association, is reprehensible and unpatriotic and has been brought about through ulterior motives, and if said Bankers and the Oklahoma City Clearing House Association persists in said conduct, the State Government will be seriously impaired, schools will be forced to close, the

tubercular and orphan institutions will cease to operate, the hospitals for the blind and the crippled children will be forced to close, and general chaos will result, and

WHEREAS, the program outlined by the Governor, E. W. Marland, is but a continuation of the great humanitarian policies of the Honorable Franklin D. Roosevelt, and is but an honest effort to carry into effect the purposes, promises and planks in the Democratic State Platform adopted last September, and

WHEREAS, it is the intention of this Resolution to ask said Bankers and the Oklahoma City Clearing House Association to co-operate with the State and National Administration to the end that, and so that, State Government can continue to function in the interest of the needy masses of people.

NOW, THEREFORE, BE IT RESOLVED BY THE SENATE OF THE STATE OF OKLAHOMA:

That we express our faith in and our loyalty to the Honorable E. W. Marland, Governor of the State of Oklahoma, and pledge ourselves to assist him in every way possible to preserve the State and its institutions, its credit, its honor, and we further pledge ourselves to assist and support him in his great humanitarian policy and that we expressly endorse the policies of our great leader and champion, the Honorable Franklin D. Roosevelt, as they are being carried forward in Oklahoma by the said E. W. Marland, Governor.

BE IT FURTHER RESOLVED, that we censure, condemn and deprecate the acts and conduct upon the part of certain Bankers and the Oklahoma City Clearing House Association, wherein they have refused to cash state warrants, and by their reprehensible and unjustified conduct, have injured and slandered the credit of said State.

BE IT FURTHER RESOLVED, that we call upon the Bankers of the State, as the Honorable Franklin D. Roosevelt called upon them several months ago, to co-operate fully with the State and Nation, with the Governor and the President, and with the Legislature, and with other state agencies of Government, to the end that a humanitarian program may be worked out for the benefit of all of the people of Oklahoma, and to the end that suffering humanity may be alleviated.

BE IT FURTHER RESOLVED, that said certain Bankers and the Oklahoma City Clearing House Association be admonished and requested to refrain from further impugning, hampering or injuring the credit of the State of Oklahoma, to the end that Government may properly function.

BE IT FURTHER RESOLVED, that we commend the small country bankers over the State, who have by their patriotic conduct, come to the rescue of the State and are at this time offering to furnish money to the State and are buying and offering to buy said state warrants, and

BE IT FURTHER RESOLVED, that the conduct of said country bankers be publicly praised and that the said Oklahoma City and Tulsa Bankers and the Oklahoma City Clearing House Association be requested to follow the courageous and patriotic leadership of the small country bankers.

BE IT FURTHER RESOLVED, that if said Bankers and the Oklahoma City Clearing House Association have, as is being publicly charged, brought about this condition for the purpose of hampering or retarding the program of the Governor and the National Administration, that they shall stand publicly reproved, censured and criticized for such reprehensible and unpatriotic conduct.

Senator Curnutt raised a point of order against consideration of Senate Resolution No. 5, stating the hour had arrived for the consideration of ENGROSSED HOUSE BILL NO. 15, under special order.

COMMUNICATIONS

A communication, addressed to Senator Nichols, from Ema Warmack, Secretary-Treasurer, Pontotoc National Farm Loan Association, Ada, Oklahoma, was read, urging the passage of a bill remitting tax penalties.

Senator Stewart submitted the following "Statement of Facts," which, by unanimous consent, was ordered incorporated herewith:

STATEMENT OF FACTS AND RESOLUTIONS UNANIMOUSLY
ADOPTED IN JOINT ASSEMBLY OF THE OLD AGE
NONAGE SECURITY LEAGUE AND THE NATIONAL
LEAGUE OF WORKERS AND FARMERS

Sunday, February 3, 1935

STATEMENT OF FACTS

A democracy is based upon the philosophy that citizenship is of and an intrigal part of that form of government and our Founding Father's inculcated this theory into the Declaration of Independence and the preamble and bill of rights of our Constitution. A democracy must stand or fall upon this theory.

Early in our history our government was taken over by the landed aristocracy and from then to the present time special privileged interests have dictated our policies until they have now dispossessed our citizens and reduced the masses to poverty and insecurity.

The national administration has said that no one in America shall go hungry. The political campaign was made in Oklahoma on these broad principles, with specific emphases placed upon old age pension and legislation in the interest of the farmer, worker and small business interests, resulting in the election of Governor Marland and an overwhelming majority of Democrats in the House and Senate.

Our Governor is more responsible than any other person for the fulfillment of platform pronouncements. He has outlined a broad program of activity to fulfill campaign pledges. The organizations above mentioned are voicing the sentiment of the masses of this state in demanding that these pledges be kept.

Along with the enactment of an adequate old age pension these organizations are especially interested in relief programs as a temporary means of protecting our citizens until such time as governmental activities accept the challenge of the machine age in this era of abundance.

After five years of mass poverty, we find that social service, under the direction of private organizations, using federal funds, has proven inadequate to serve mass misery. We also know that these groups of irresponsible are dictating the policy of relief to our governmental agencies.

STARVATION IS ACTUAL IN OKLAHOMA, and without giving specific cases, either of the above mentioned organizations is ready to meet a committee from the Governor, House or Senate in substantiation of the fact. We are prepared to prove that social service as now administrated is incompetent, inadequate and a "racket" based upon common misery and insecurity. The proof is at hand and we challenge you to an investigation under our direction.

Either make relief actual and responsible to elected authority or cut it off entirely and let the masses be decimated by starvation and the ravages of diseases. It were better that the miserable starve at once than to prolong a hopeless miserable existence.

We know that there is no such thing as a scientific system of taxation and we also know who in the last analysis pays the tax. We also know how and by whom values are produced.

Regardless of what may be said about indebtedness, taxes and budget balancing, the physical equipment, intelligence and man power remain to bring about a state of security. Our President has said that human rights must be placed above property rights. If this mandate is not followed neither human rights nor property rights will be secure.

We ask that this legislature enact into law the relief program outlined by Governor Marland and that they divorce irresponsible private charity from Governmental activities.

Whereas, The above statements of facts meets the approval of these organizations.

And Whereas, It is incumbent on the legislators of Oklahoma to enact into law legislation that means economic security for our citizens.

Be It Resolved, That this statement of facts and demands be presented to Governor E. W. Marland and both branches of the legislative body for their consideration and execution.

(Signed) :

C. W. HOLLOWAY, President.

Old Age Nonage Security League,
714 N. W. 17th St., Oklahoma City.

FRANK E. WELKER, President,

National League of Workers and Farmers,
1417 N. W. First Street.

E. C. WALLACE, Joint Secretary,

612 S. W. 11th Street.

Senator Carmack moved that a Committee of three lawyer members of the Senate be appointed, with instructions to prepare a bill for introduction and consideration, looking to the remission of tax penalties by the several County Treasurers of Oklahoma, payments of which have been forced during the past year, which motion, by unanimous consent, he withdrew.

Senator Pugh, having served notice on the last legislative day that he would move to reconsider the vote by which SENATE BILL NO. 32, by Curnutt, was passed, asked unanimous consent, which was granted, to withdraw that notice.

members from the House and three from the Senate. They shall meet at a convenient time, to be agreed upon by their chairman, and having conferred each shall report to its respective house the result of this conference. In case of agreement, the report shall be first made, with the papers referred, accompanying it, to the house which refused to concur, and there acted upon; and such action shall be immediately reported to the Secretary or Clerk to the other house, the papers referred accompanying the message.

In case of disagreement of a conference committee, the papers shall remain with the house which insisted on the amendment. The agreeing report of a conference committee shall be made, read and signed, in duplicate by all members of the committee, or by a majority of those of each house. Should either house disagree to the report of the committee such house shall appoint a second committee and request a further conference, which shall be acceded to by the other house before adhering. The motion for a committee conference and the report of such committee shall be in order at any time. When both houses shall have adhered to their disagreement a bill or resolution is lost. Provided, that when a report of a conference committee is being considered in either house, it shall not be subject to amendment.

JOINT COMMITTEE ON ENROLLED BILLS

Rule 16. There shall be appointed a Joint Committee on Enrolled Bills, to be composed of three Senators and four Representatives.

ANNOUNCEMENT OF MESSAGES

Rule 17. When the Secretary of the Senate or the Clerk of the House, or either of the assistants shall wait upon the other house, notice thereof shall be given to the President or Speaker by the Sergeant-at-Arms who shall declare the same, and a copy of the message be laid on the table of the Clerk or Secretary.

DISPENSING WITH RULES

Rule 18. No joint rule shall be dispensed with, except by a majority vote of the membership of each house, and if either shall violate a joint rule, the question of order may be raised in the other house, and decided in the same manner as in case of violation of the rules of such house.

APPROPRIATION BILLS PRIVILEGED

Rule 19. The general appropriation bill and bills for the support of the charitable institutions of the State shall be privileged bills advanced upon the Calendar, and take precedence over all other bills. At any time after the reading of the Journal, it shall be in order by the direction of the appropriation committee, to move that the House or

Senate, as the case may be, resolve itself into a Committee of the Whole, for the purpose of considering the general appropriation bill or bills of the Senate or House, and no dilatory motion will be entertained by the Presiding Officer.

AMENDMENTS TO BILLS

Rule 20. Bills or resolutions under consideration must not be interlined or defaced, but all amendments offered must be in writing upon a separate sheet of paper, showing whether House or Senate bill, the number and section, line and page, or word, where the amendment begins shall be particularly noted, also the part stricken out if any, and the line, section or parts of section shall then be written as it would appear if amended. A typewritten copy of each amendment shall be numbered in its order by the Secretary or Clerk, and the same attached to the original bill and transmitted to the other house.

Senator Nance asked unanimous consent, which was granted, to have incorporated herewith the Democratic Platform, adopted at the State Convention, held September 10, 1934:

DEMOCRATIC PLATFORM
ADOPTED BY DEMOCRATIC CONVENTION

September 10, 1934

1. We, the representatives of the Democratic Party of the State of Oklahoma, in State Convention assembled, declare our unflinching trust in the fairness, trustworthiness and probity of the American people, and re-affirm our confidence in their capacity to govern themselves.

2. We declare our adherence to the living principles of government stated by Thomas Jefferson and other founders of this Democratic nation in such immortal and hope-restoring documents as the Declaration of Independence and carried into the fibre of our political and social institutions by a distinguished succession of Democratic presidents and other national Democratic leaders.

3. We believe in the Constitution of the United States, in the institutions which it has brought into being for the amelioration of mankind, the diffusion of intelligence, the safe-guarding of personal liberty, the promotion of the general welfare and the continuous re-adjustment of government to the needs of the people.

4. We believe that the first duty of organized government is to secure the welfare of its citizens, whether that welfare be in jeopardy from the menace of personal violence, foreign invasion, the operation of unrestrained and unenlightened selfishness or the entrenched lawlessness of predatory interests.

5. We are proud of the vigorous action by which the national democratic administration stirred the people of the country from the lethargy of defeat and despair engendered by a decade of misrule during which the nation was turned over to ruthless exploitation and unbridled speculation. We endorse that staunch humanitarian and wise leader, Franklin D. Roosevelt, and we believe that under his inspiring guidance and discerning leadership, the American Commonwealth will pursue the path that leads away from revolution of which Woodrow Wilson counseled and warned in his latter days.

6. This period of crisis has clearly defined one large central problem. It is the problem of formulating policies and plans of action which will bring out of the existing situation a condition affording reasonable guarantee of material security and happiness for all the people of the nation. Responsibility for finding a way toward a new era of security is laid directly upon each individual citizen and upon all units of government. Government is nothing more nor less than an agency of all the people whereby the people collectively get things done which individually they can not do. Government, in a higher sense, is the protector both of individual rights and the general welfare.

7. We are on our way toward better days and we go forward under the courageous leadership of President Franklin D. Roosevelt. His is a leadership which is guided by a firm faith that government in a democracy can be effective as an agency for promoting the common interests of all the people. The Democratic Party of Oklahoma takes pride in its contribution in bringing new hope to a troubled people. Our State delegation in the Congress has given the President faithful support. We feel assured that our citizenship desires that President Roosevelt and his policies shall continue to be supported and sustained by a co-operative Congress. The Democratic Party, therefore, solicits a majority vote from the people for the entire Democratic Congressional Ticket which can be construed as an approval of the national administration.

8. That a great unprecedented national depression developed under the administration of the Republican Party, which that party was unable or refused to see, is now admitted by all. That extraordinary crises demand extraordinary measures is one of the admitted lessons of human experience. Driven by overpowering necessity and unexampled human suffering, President Roosevelt has had the courage to initiate a series of emergency measures to mend and to end the present emergency. He has had the candor to declare that certain of these measures are experiments and that he would be the first to amend or end them in the light of experience. We pledge this State to a policy, intelligent and sympathetic co-operation to further the benevolent and approved purposes and objects of the New Deal and all other measures designed and calculated to end existing misery, to promote recovery, to restore prosperity, to insure equal rights and opportunity, in order to secure the well-being of our citizenship, both collectively and individually.

9. As an indispensable aid to recovery we declare it essential that the 1926 general price level be restored at the earliest practicable date and as an effective means of accomplishing this result we endorse the monetary policies promulgated by the Roosevelt Administration. We endorse the policy of the nationalization of gold and the devaluation of the content of the gold dollar by which the dollar has been cheapened and the price of commodities thereby raised, and in addition thereto a profit of almost three billion dollars has accrued to the Federal Treasury. We endorse the policy of the nationalization of silver and the proposed enlargement of our metallic monetary stocks by the addition thereto of at least a twenty-five percentum of silver.

10. The program of farm relief legislation enacted by a Democratic Congress and sponsored by a Democratic President has materially advanced the prices of all farm products. Cotton today is selling for 13c and during the last year of the Republican Administration sold for 5c. Wheat is now selling for \$1.00 while in the closing year of the Republican Administration it sold for 30c, and other farm commodities have advanced in like proportion. We recommend that the administration of the agricultural legislation should be simplified so as to expedite all settlements and payments to the farmer.

11. We believe that adequate provision should be made by the State and Nation for the relief of the destitute and to that end pledge

the Democratic Administration to full co-operation with the Federal Relief Administration in aiding the destitute, indigent, old and infirm. In this connection we call upon the citizenship of the State to cooperate to the fullest extent in patriotic endeavor to assist in seeing that the government as well as the destitute, indigent, old and infirm secure a fair deal. We further pledge that as soon as the responsibility of administering Federal Relief funds be turned over to the State that the State Administration will exhaust every effort to the end that relief funds shall be equitable and expeditiously distributed to those in need of relief, and administered by local people at the least possible expense.

12. We endorse all progressive and constructive accomplishments of the Democratic Administration since Statehood and stand like President Roosevelt, first in sincere commitment and pledge to correct mistakes or errors, if any, wherever and whenever found.

13. To the end that the State Government of Oklahoma shall become a more effective agency in the building of the State and in procuring the well-being of all its people, the Democratic Party pledges its earnest support of the following policies and plans of action:

14. To aid in the economic recovery of the State and Nation.

15. To guard against encroachment upon the authority of one branch of government by another branch.

16. To balance the State's budget of income and expense.

17. To lighten and distribute equitable the burden of taxation in accordance with ability to pay, and as one of the means of accomplishing this result to practice strict economy in the administration of State Government, to encourage similar administrations in its municipal governments.

18. To develop our natural resources including coal, oil, timber, lead, zinc, and other minerals in the interest of this and future generations, with the further objective of establishing and developing industrial enterprises in this State that will manufacture and process our raw agricultural products.

19. To help in every way practical to raise the value of farm products so that the farmer may receive cost of production plus a reasonable profit for all staple agricultural products consumed in the United States.

20. To improve economic conditions so as to raise the scale of wages for industrial workers in order that they may earn a decent living for their wives and children.

21. To promote unemployment insurance.

22. To provide old age pensions in co-operation with the Federal Government, and in the event the Federal Government fails to enact at the coming session of Congress adequate legislation then we pledge the Democratic Party to submit to a vote of the people a suitable meas-

are providing a system of old age pensions within the capacity of the people to pay.

23. We pledge the assumption by the State of its responsibility for financing a uniform educational program in our public schools which will guarantee equality of educational opportunity. We favor a further reduction of ad valorem taxes by use of excise taxes for current expense, thereby eliminating non-payable interest bearing warrants and placing the fiscal policies of our educational system on a cash basis. In view of the fact that the Federal Government has seen the necessity of keeping the school doors open, we recommend to our President that Federal aid be continued until our State can assume its responsibility for adequately financing the schools. We favor amending the State Constitution to provide for non-political boards of control for the State's institutions of higher learning.

24. We favor a sound and progressive policy which will substitute home ownership for tenantry and make provision that a reasonable homestead shall be tax free and debt proof, thereby creating "storm cellar" homesteads which will protect the women and children of this State against the fury of financial tempests for which they are in no sense responsible and which they are powerless to prevent.

25. We solemnly warn the people of this State that the attitude and spirit of the Republican nominee for Governor was proven by his vote in the United States Senate to reduce the income tax on his own vast fortune or income and by his vote against the Norris amendment to exempt the family homestead from forced sale in satisfaction of Federal income tax.

26. To aid in the development of both national and state subsistence homestead projects, and encourage the development of natural resources industries in the State to supplement of such subsistence homestead projects.

27. We denounce as deadly to our free institutions the corrupt and excessive use of money in the election of public officials. We charge that the Republican nominee for governor favors the illicit and excessive use of money, as proven by his vote in the Senate to seat Vare of Pennsylvania and Smith of Illinois, who were unseated by the united vote of liberty loving Democratic and Republican senators. We charge that he not only favors but practices the excessive use of money, as proven by his excessive expenditures in his effort to return to the United States Senate in 1930. We charge that he is now expending money in excess and in defiance of the very laws, which as governor, he would be sworn to execute. The public highways of this State are today lined with conspicuous and expensive signs, every one of which proclaim with trumpet tongue that he is now attempting to buy the governorship as he sought to buy the senatorship in 1930.

28. We favor the reorganization and the simplification of State and local government, and the abolition of all unnecessary boards, commissions and offices to the end that public business may be dispatched with the utmost efficiency and economy; and hereby pledge

unqualified support to legislation directed to the accomplishment of these results.

29. To provide that women shall be equally eligible with men to hold all public offices.

30. Until private industry can and does provide employment for the unemployed we favor a constructive program of necessary public improvements embracing such projects as roads, flood control, drainage, dam and reservoir construction, soil erosion control and land terracing. In any program of necessary public improvements initiated by the Federal Government we promise co-operation of the State of Oklahoma to the fullest practical extent.

31. We favor the adjustment or abatement of delinquent tax penalties.

32. We pledge the Democratic Party to the fullest measure of fairness in dealing with ex-soldiers and the widows and dependents of ex-soldiers.

33. We are opposed to the return of the saloon in Oklahoma. The constitutional provision abolishing the saloon was adopted by a direct vote of the people; the law authorizing the sale of 3.2 beer was likewise adopted by the people. Neither the said constitutional provision nor said statute should be repealed except by measures voted upon by the people.

34. We pledge that gasoline used in farm tractors and stationary engines remain exempt from tax.

35. We recommend additional facilities and adequate finance for the Department of Charities and Corrections so that the department will be able to properly function and carry out a broad constructive program of social welfare.

36. We favor the submission of an amendment to the Constitution that will permit or enable incorporated towns and cities, without a levy of additional taxes, to provide a system of pension for meritorious disabled police officers.

37. We rejoice in the splendid personnel of Democratic nominees for the several congressional, state, district and county offices in the recent primaries. These nominees were selected by no individual, clique, or faction, and we can in good conscience recommend them all, and urge the progressive citizens of Oklahoma to give each and all of them their loyal support on November 6th from the Honorable E. W. Marland, nominee for governor, down to the constable of the smallest district. We believe in the acquiescence to the will of the majority a long established Democratic rule, as a sound principle for democratic people to follow in order to preserve the blessings of popular government.

38. On the principles enunciated in this platform we solicit the support of all the citizens of this State, to the end that we may move

forward in harmony with the national administration and the present day trend of affairs to a realization of the highest there is in government for our entire population.

Upon motion of Senator Nance, 250 copies were ordered printed of the above Democratic Platform.

All appointed members of the Board shall receive their actual and necessary traveling expenses incident to their duties as members of the Board.

The salary of the Secretary shall be fixed by the Board.

Section III. Rules, Staff and Finances. The Board shall adopt its own rules for the transaction of its business and shall keep a record of its resolutions, transactions, findings and determination, which record shall be a public record. The Board may appoint such employees as it may deem necessary for its work, whose appointment, promotion, demotion and removal shall be subject to the same provisions of the law as govern other corresponding employees of the State. The Board may also contract with planners and other consultants or assistants for such services as it may require. The expenditures of the Board, exclusive of gifts or Federal aid, shall be within the amount appropriated for the purpose by the legislative assembly of the State. The Board shall be supplied with the necessary office space and accommodations in the State Capitol or other office building and with the necessary equipment. Upon request of the Board, the Governor may, from time to time, for the purpose of special surveys under the direction of the Board, assign or detail to the Board, members of the staffs or personnel of any State administrative department, bureau, or agency, or may

Such an official plan with the accompanying maps, plats, charts and descriptive matter shall show the Board's recommendation for the development of the State, and may include amongst other things, the general location, character and extent of highways, bridges, waterways, waterfront developments, railroad and motor vehicle routes, aviation fields, power transmission facilities, flood prevention work, drainage and sanitary systems, works for the prevention of stream pollution, forests, reservations, parks, wild life refuges, conservation projects, land utilization program for agricultural, mineral, forestry, industrial and other purposes, public buildings, and other public ways, grounds, spaces, utilities, facilities, structures, buildings and works which by reason of their functions, size, extent, location, legal status or other reason, fall within the province or jurisdiction of State bodies or State officials or which for any other reasons are appropriate subjects of, or fall appropriately within, the scope of a State, as distinguished from a more local program or plan.

Section V. Purposes in View. The State plan shall be made with the general purpose of guiding and accomplishing a co-ordinated, adjusted, efficient and economic development of the State, which will, in accordance with present and future needs and resources, best promote the health, safety, comfort, convenience, prosperity and welfare of the people of the State of Oklahoma, and should recommend amongst other things, the conservation of natural resources, distribution of population, efficient and economic transportation facilities and such uses of land within the State as will tend to create conditions more favorable to economic security, with greater opportunities for recreational, educational and cultural advancement. Further, such State plan should serve to reduce the wastes of physical, financial, or human resources which result from an uneconomic distribution of population, haphazard development and the lack of long-term co-ordinated physical and financial planning.

Section VI. Adoption of Official Plan. The Board may adopt the Official State Plan as a whole, or as the work of preparing the plan progresses, may from time to time adopt a part or parts thereof, any such part or parts to cover one or more of the functional subject matter which may be included in the plan. The resolution shall refer expressly to the maps, charts and descriptive matter by the identifying signature of the Chairman of the Board.

and may employ such other means of publicity and education as it may determine. It may confer and co-operate with the executive, legislative or planning authorities of neighboring states and of the counties and municipalities of such states, for the purpose of bringing about a co-ordination between the development of such neighboring states, counties or municipalities and the development of the State of Oklahoma.

The Board shall advise and co-operate with municipal, county, regional and other local planning commissions within the State for the purpose of promoting co-ordination between the State and local plans and development. The Board shall, upon the request of any appropriate municipal, county, or other local board or official, transmit information possessed by it which bears upon such co-ordination. The Board may, upon the request of the Board of County Commissioners of any county, the council of any municipality or the chief legislative body of any political subdivision, make a study of and report upon any planning problem of such county, municipality or subdivision submitted to it, and the Board may agree with any such board for any such service. The Board shall also prepare and keep to date a long-term co-ordinated program of public improvement projects. Upon the request of the Board, the various State officials shall prepare and submit to the State Planning Board a program of public improvements, including estimates of cost, for their departments and said Planning Board, shall co-ordinate such plans and proposals with each other and with the Official State Plan and, from this and other information and plans, the Board shall prepare and submit to the Governor and Legislature a comprehensive public works program for the State at least once every two (2) years.

The Board, its members, officers and employees, in the performance of their functions may enter upon any land and make examinations and surveys and place and maintain necessary monuments and marks thereon. SUPREME COURT POWER—WHO STARTED IT?—JOHN
MARSHALL, PERHAPS?

By ARTHUR BRISBANE

(Copyright, 1935, for the Daily Oklahoman)

One question may surprise you concerning supreme court decisions setting aside laws passed by the congress and signed by the president, on the ground that congress, in passing the law had exceeded its constitutional authority. This is the question: Are those supreme court decisions in themselves, unconstitutional?

When the supreme court, sometimes by a narrow margin of five to four, declares a law unconstitutional and void, *is it exceeding its constitutional authority?*

Where in the Constitution of the United States do you find authority for the supreme court power to overrule congress and the president in the making of laws—this absence of authority is no accident. Those that wrote the constitution, after long arguing, disputing and many concessions knew, presumably, what they wanted the constitution to say. And they *did not want it to give the supreme court the power to veto laws, that it now assumes and exercises.*

A resolution actually was introduced in the constitutional convention that would have given to the court that veto power. That resolution represented the conservative and aristocratic ideas of Alexander Hamilton. But the constitutional convention *which made the constitution*, rejected that suggestion, voted it down, declared that the convention *did not intend the supreme court to have such overwhelming power.*

* * *

The supreme court's supreme *power* over legislation was a matter of slow growth, and perhaps a deliberate, well-meant planning, to rewrite the constitution, in such a way as to make it recognize the supreme court's supreme wisdom.

The learned Chief Justice Marshall wrote one decision after another, declaring certain actions of congress unconstitutional, and gradually the supreme court, independently of the constitution and in defiance and defeat of constitutional history and the wishes of the writers of the constitution, assumed on its own authority, the right to nullify any decision arrived at by the *elected* congress, and approved by the *elected* president. In other words, he construed the first

three lines of section 2, article 3 of the constitution in such a way as to give to the supreme court an authority that the constitutional convention, itself, writing the constitution, had categorically refused to give.

In other words, if the supreme court should not render a decision to the effect that abrogation of the "gold clause" by congress is unconstitutional, the supreme court, itself, might be acting unconstitutionally, for it has no power, under the constitution, to declare that action by congress and the president "null and void."

This is rather an important matter that might be settled while other things are being settled.

* * *

A REPUBLICAN form of government would imply that laws made, and approved by *elected* representatives of the people should take precedence over decisions of judges *appointed* by an individual, especially as that individual has the legal power (President Roosevelt, of course, would not exercise it) to get any supreme court decision that might suit him, by "packing" the supreme court, adding enough members sharing his views.

The average American will agree that if the supreme court is allowed to retain its self-attributed power to overrule congress and the president, it should be required to do so by, at least a two-thirds majority, that is to say, six out of the nine Judges. When the court reports "five of us think yes, four of us think no," it would seem reasonable to revert to the decision of the elected congress and president.

Senator Nance moved that the President Pro Tempore be authorized and directed to confer with the Speaker of the Honorable House, relative to an extraordinary arrangement to be made between the two branches of the legislature, in the matter of considering legislation in the respective Houses and that the Speaker be advised that it is the request of the Senate that authors of Senate Bills be granted the courtesy of appearing before Committees of the Honorable House and that the Senate extend a like courtesy to members of the Honorable House, having bills before Senate Committees, which motion prevailed.

SPECIAL COMMITTEE REPORT

Senator Spencer submitted the following Committee Report, which, upon his motion, is herewith incorporated:

Oklahoma City, Oklahoma

March 1, 1935

TO THE OKLAHOMA STATE SENATE:

We, your Special Committee appointed to investigate the affairs and general conditions of the Oklahoma State Reformatory at Granite, Oklahoma, beg leave to report the following facts and findings:

That on the 20th day of February, 1935, a committee composed of Gerald Spencer, S. W. Carmack, and DeRoy Burns, met at the Oklahoma State Reformatory at Granite, and after making an examination of the properties, industries and assets of the Institution, proceeded to examine witnesses duly sworn to testify as to matters pertaining to the fiscal management and moral and health conditions of said Institution. The inquiry was further directed toward an investigation of certain charges of cruelty and misconduct on the part of prison officials, as well as a determination of the causes incident to the escape of 32 prisoners on February 17, 1935.

A transcription of such testimony together with numerous affidavits are hereto attached and made a part of this report.

FISCAL MANAGEMENT

Financial statements reflecting the condition of the Institution for the past 5 years were examined, said statements and audits being identified by A. D. Martin, auditor for the State Board of Affairs. After due consideration, the Committee finds that the Oklahoma State Reformatory has been operated for the past 5 years at a minimum of expense under the capable and efficient management of Mrs. Geo. A. Waters, warden of said Institution for such period.

During such period of time, at the close of each fiscal year an unexpended surplus was reverted to general funds of the State of Oklahoma. The total appropriations of the Institution for the fiscal year ending June 30, 1931, was \$220,000.00, and for such fiscal year there remained an unexpended balance of \$9,379.00; but during such fiscal year the average daily prison population was 627, and was maintained at a per capita per monthly cost of \$26.68.

The total appropriation for the Institution for the fiscal year ending June 30, 1932, was \$211,790.00, and for such fiscal year there remained an unexpended balance of \$16,284.12; during such fiscal year the average daily prison population was 843, and was maintained at a per capita per monthly cost of \$19.36.

The total appropriation for the Institution for the fiscal year

ending June 30, 1933, was \$179,635.00, and for such fiscal year there remained an unexpended balance of \$13,996.56; during such fiscal year the average daily prison population was 756, and was maintained at a per capita per monthly cost of \$19.02.

The total appropriation for the Institution for the fiscal year ending June 30, 1934, was \$162,000.00, and for such fiscal year there remained an unexpended balance of \$2,751.81; during such fiscal year the average daily prison population was 737, and was maintained at a per capita per monthly cost of \$18.25.

The total appropriation for the Institution for the fiscal year ending June 30, 1935, was \$164,351.30, and as of February 1, 1935, the sum of \$94,971.95 has been expended; during the present fiscal year the average daily prison population is 698, and has been maintained at a per capita per monthly cost of \$20.69.

The industries owned and operated by the Oklahoma State Reformatory, which include the quarry, the tannery, the farm and the administrative agencies, made gross earnings as follows, to-wit:

1931	\$65,852.47
1932	39,182.75
1933	40,604.98
1934	24,273.58
1935	12,201.40 (first 7 months)

The operation and management of said Institution during the periods of time above enumerated has been economically and efficiently administered as compared, for example, with the operation of the Institution during the fiscal year ending June 30, 1925, in which the per capita cost was computed at \$34.32.

As of February 1, 1935, assets of the Oklahoma State Reformatory as revealed by financial statements were as follows, to-wit:

INVENTORIES:

General Stores	\$ 20,408.09
Farm, Feed and Grain	4,391.03
Tannery and Shoe Shop	10,275.38
	<hr/>
	\$ 35,074.50

LIVE STOCK:

59 Head of Horses and Mules	\$ 3,650.00
Hogs	478.50
105 Dairy Cattle	4,325.23
	<hr/>
	\$ 8,453.73
Poultry	\$ 300.00
Bloodhounds	350.00

EQUIPMENT H-1:	\$ 44,151.87
Equipment H-2	218,701.69
Equipment H-3	6,148.50
Total General Equipment	\$268,721.66

CONSTRUCTION ACCOUNT:

Officers' Cottages	\$ 810.81
Trusty Building and Other Equipment	1,316.72
	\$ 2,127.53
Lands and Improvements	\$ 84,400.77
Buildings	793,144.63
Total Capital Assets	\$1,192,372.92

The Committee further finds that contrary to the opinion of the general public the expenses of recreational and educational activities are paid wholly with the earnings and profits of the prison canteen, which is entirely operated by the prisoners.

MORAL AND HEALTH CONDITIONS

The Committee finds that among the 700 prisoners incarcerated in the Oklahoma State Reformatory there are approximately 15 prisoners who are sexual perverts, that the number of such perverts is relatively small as compared with other correctional institutions, that such prisoners are entirely segregated from other prisoners and are under the constant supervision of the prison physician. Mrs. Geo. A. Waters, during her administration as warden of such institution for a period of 8 years, has recognized the problem of sexual perverts as a problem confronting all correctional institutions, that such perverts are mentally deranged, and in truth and in fact should be confined to the State Hospital at Norman, Oklahoma; that under her supervision and direction prison officials have kept such perverts segregated from other prisoners and under the constant care of the prison physician.

The Committee further finds that the general health of the prison population is good and there has not been a general epidemic in the Reformatory for the past several years, that during the past 4 years only 14 deaths have occurred, none of which could be attributed to any lack of medical care and attention. The Committee further finds that the prison hospital is adequately equipped to take care of any situation arising in which the health of any prisoner is involved; that the number of drug addicts in the Institution is indeed small, and on account of the geographical location of the prison, the vigilance of the prison officials, and the segregation of addicts, the smuggling of narcotics into the Institution is reduced to a minimum.

The Committee further finds that the inmates of said Institution have the general appearance of a healthy, robust condition, and that

they are furnished with sufficient, adequate food and clothing; that the buildings, cells, kitchen and dining room of the prison are kept and maintained in a clean and sanitary manner.

The Committee further finds that it has been the objective of Mrs. Geo. A. Waters, as warden of the Oklahoma State Reformatory, to furnish daily employment to all prison inmates in the prison industries consisting of the farm, the quarry, the tannery, and the various administrative agencies.

The Committee finds, after due deliberation, that it is possible for the prisoners confined in said Institution to learn some useful trade within the prison, and thus prepare themselves for useful citizenship upon their release.

CRUELTY CHARGES

In conducting the inquiry as to certain charges of alleged cruelty on the part of the prison officials, the Committee summoned numerous witnesses, among which were various prisoners who had no notice that they were to be called as witnesses, and were not acquainted with any member of the Investigating Committee. After hearing the testimony of such witnesses, the Committee finds that there had been at no time of the administration of Mrs. Geo. A. Waters, any misconduct on the part of the warden or prison officials, that at no time has any cruel, unusual, or inhuman punishment been inflicted upon the prisoners of said Institution, that the prison officials have at all times been instructed to refrain from striking any prisoner unless in self-defense.

The Committee finds that in the operation and administration of the Reformatory, due to the character of the inmates, it has at times been necessary to impose disciplinary measures, which include: First, the taking away of good times; second, solitary confinement; and third, strapping the prisoners to the bars; that a merit system issued in which the prisoner is promoted or demoted on his merits and on conduct service.

The Committee further finds that the disciplinary measures above referred to have always received careful and personal attention of Mrs. Geo. A. Waters, who has had comparatively little trouble in maintaining discipline within the prison.

With reference to charges of one George Matlage, a convict, that cruel punishment was inflicted upon him in that his wrists were broken, and he was otherwise grossly mistreated, the Committee finds that during the confinement of said convict in the Reformatory he was at all times a very troublesome prisoner and from a prison record of his conduct, which was duly examined by said Committee, the Committee finds that said convict was guilty of 4 serious offenses against the rules of said prison. The Committee finds that the said convict was placed in solitary confinement as a punishment for said

offenses, and that at no time was he struck or beaten by any prison official. The Committee further finds that the said George Matlage was treated by the prison physician for a dislocated wrist, and that in the opinion of the prison physician said dislocation was the result of probability dislocated by the convict himself through his own improvi- a previous fracture sustained before entering the prison, and was in all dence and folly thrashing about when he was strapped to his prison cell.

None of the prisoners examined by the Committee could testify to any cruel or unusual punishment inflicted by prison officials upon the prisoners, and with the exception of a few complaints from the prisoners as to the frequent appearance of beans of the menu no objections were offered by any of the prisoners as to their treatment, care, and maintenance.

PRISON BREAK

The Committee finds that on the afternoon of February 17, 1935, 32 inmates of said Institution escaped; that contrary to certain newspaper reports to the effect that the Reformatory guards were not furnished with adequate and sufficient guns and ammunition on the date of the escape, and further to the effect that the tower guard, Pete Jones, who was killed by the escaping prisoners, had in his possession only one gun and one cartridge; the Committee finds that such reports are wholly false; that numerous witnesses, including the tower guard which the deceased Pete Jones relieved and the tower guard which assumed the duties of the deceased after he was killed, were examined, and the Committee finds after due deliberation that at the time the said Pete Jones was killed he had in the front tower 19 guns and more than a dozen boxes of ammunition; that relatives of inmates were visiting in the prison there during the escape, and these visitors were forced out of the prison and used as shields so that the tower guard was prevented in some measure in capturing the escaping prisoners. The Committee further finds that the escaping of said prisoners was not the result of any carelessness or negligence on the part of Mrs. Geo. A. Waters or any prison official, but was in all probability indirectly caused by the excitement and general unrest occasioned by numerous official investigation, which undoubtedly incited and aroused such prisoners.

GERALD SPENCER, Chairman.

DeROY BURNS, Member.

S. W. CARMACK, Member.

Senator Johnston asked unanimous consent, which was granted, to have printed 50 additional copies of the Journal, containing the report of the Special Committee, relative to the State Reformatory at Granite.

Upon motion of Senator Nance, the report of the Committee on Rules and Procedure, submitted on the last legislative day, was declared approved.

SENATE CONCURRENT RESOLUTION NO. 11—By JOHNSTON.

MEMORIAL TO THE CONGRESS TO REMEDY THE INEQUITOUS, SHARP PRACTICES OF COMMERCIAL CORPORATIONS IN THEIR BUSINESS METHODS AS TO INTERSTATE RELATIONSHIPS, AND TO RE-WRITE THE LAW AS TO REMOVAL OF CAUSES TO ACCORD TO THE SPIRIT OF THE UNITED STATES CONSTITUTION.

WHEREAS, At the adoption of the United States Constitution, the citizens and inhabitants of the 13 colonies were of varying habits and customs, different in religious views, and attachments, and many of them in a high degree, fanatical and intolerant, and a majority different in race and lineage from each other, and into the mass of which was constantly pouring a copious stream of immigration resulting in a polyglot of ideas and ideals and that and as between these dissimilar and widely separated types, suspicion and oft-times aversion, and even deprecation were wont to be held each toward the other, and that even in courts of justice, the parties, the witnesses, and sometimes jurors and judges were apt to yield to such prejudicial influences, and

WHEREAS, To meet this well-known condition and in an effort to maintain peace between the inhabitants of the different states, as well as to provide a forum for the settlement of issues arising between the several states, and to assure the domestic tranquility of the people, the framers of the constitution embodied in the judicial article, to-wit:

ARTICLE III

SECTION 2. "That, among other things, the judicial power shall extend to all cases in law and equity * * * *, to controversies between two or more states; between a state and citizen of another state; BETWEEN CITIZENS OF DIFFERENT STATES; * * * *"

And, WHEREAS, Beginning with the Federal Judiciary Act of September 24th, 1789, the Federal Jurisdiction was specified as to causes in the United States Courts, and by a system of amendments, the right has been further extended until collateral to the right, there has grown up a system of removal of causes on matters involving merely monetary and commercial transactions and on matters involving the torts and wrong doings upon the citizens of the several states.

And, WHEREAS, The United States statute now in force fixes an arbitrary statutory right of removal on actions or causes wherein the sum of \$3000.00 or more is in issue between the parties.

And, WHEREAS, By a weighty line of decisions, this right of removal as to transactions and as to such torts, has been adjudged as not a constitutional right, but as a permissible statutory right under the United States Constitution and subject to regulation and restriction, by act of Congress.

And, WHEREAS, At the adoption of the United States Constitution, the modern business and commercial corporation and its methods and practices were comparatively unknown to the American people and even to the framers of the constitution and there has grown up in the United States the modern commercial corporation which, under the management of skilled attorneys, with the connivance of political parties, and under the manipulation of a nation-wide corporation lobby, the subterfuge and device of doing business in one state and incorporating in a foreign state, for the purpose of artificially creating corporate diversity of citizenship for such organized commercial entities.

And, WHEREAS, By virtue of this devise, buses, bus lines, trucks, truck lines, geo-logical and geo-physical corporations, pipe lines and pipe line companies, electrical lines and electric companies, oil companies and oil corporations and refineries, and public utilities of every sort, incorporated in foreign states, come into Oklahoma, and exercise all of the rights and powers, prerequisites, and privileges of citizenship, and invade the premises of our home owners, trespass upon private and public lands, invade the rights of property, wreck our homes, mangle, maim and destroy our citizenship, break their contracts, pollute the water of creeks and rivers across entire counties, destroy city reservoirs, wipe out entire stock ranges, destroy dairy herds and work stock, and have become a menace to every community in which they transact business.

And, WHEREAS, Each and all of these corporations, when called upon to account for infractions of the laws of this state, the desecration of natural resources, the destruction of property, the taking of life, and the maiming of our citizenship, immediately claim, that by reason of diversity of citizenship, they can not have fair trials before the courts of this state, nor among the people whom they are outraging, and that their causes should be removed to the United States courts, and do secure such removals thereto.

And, WHEREAS, This practice is a glaring outrage committed against the people of Oklahoma, an injustice to every litigant therein, is an unconscionable and corrupt imposition upon the federal courts and upon the United States laws and the constitution and is a using of the Federal Courts as a house of refuge and a scapegoat for their corruptions and their malafications, and that the same is no longer tolerable and that our citizenship is entitled to better treatment at the hands of the American Congress.

Now, Therefore, *Be it Resolved* that by the Senate of the 15th Legislature of Oklahoma, the House concurring therein, that *we* ^{Pe-}*petition* and Memorialize the CONGRESS of the United States to reenact the statute on federal jurisdiction and on removal of causes to effect limitations thereon including the following:

First: To genuine cases of diversity of citizenship.

Second: To inhibit such jurisdiction as to corporations organized under one State and transacting business in other states.

Third: As to all torts committed by corporations, its agents, and employees, no removal may be taken from the courts of the state wherein such torts were committed.

Fourth: That no removal shall be permitted by and person or to all corporations claiming or exercising the right of eminent domain, or the right to use the roads and highways, or the right to use high explosives upon any lands or premises within any state.

Fifth: And that even in cases where authorized, the right of removal shall not be allowed except in cases wherein the amount in issue as set out in the plaintiff's petition amounts to a sum of more than \$15,000.00.

WHEREAS, on November 1, 1924, a federal prohibition officer (Wylie Lynn) shot and killed Wm. (Bill) Tilghman, a State peace officer who had arrested the said Wylie Lynn for creating a disturbance; and,

WHEREAS, the House of Representatives of the United States, after a full investigation, reported that "the facts and circumstances point to a wanton and deliberate murder" (Congressional Record, February 16, 1933); and,

SECTION 3. In the event any such paving or street improvement assessment, or installments thereof, paid by endorsement upon such bonds, as provided in Section 2, hereof, are delinquent and in the hands of the County Treasurer of the county in which such City or Town is located, for collection, then said receipt issued by the Clerk of such City or Town, as herein provided for, may be presented by the holder thereof to the County Treasurer of such county, who shall thereupon endorse upon his records the satisfaction and discharge of the paving or improvement taxes upon the property for the installments described in such receipt, and thereafter such property shall

Be It Enacted by the People of the State of Oklahoma:

SECTION 1. Definitions.

(a) The term "teacher," as hereinafter used, shall include every

person for whom proper teaching certification is required by the laws of the State of Oklahoma before said person may be employed by a Board of Education for services in the public schools of said State.

(b) The words "Board of Education," as hereinafter used, shall include that board of official body, provided for by law, which shall have the management and control of the public school or schools within a given school district.

(c) The words "school term," as hereinafter used, shall designate those months within any fiscal year during which months school is maintained by a given district.

(d) The words "substitute teacher," as hereinafter used, shall include those teachers employed to fill the position of teachers under contract who are temporarily absent.

SECTION 3.

(a) If said notice to a teacher be a notice of the intention of the Board of Education not to employ said teacher for the ensuing school term, such notice shall include a statement of the causes for not employing said teacher which statement of causes for not employing said teacher shall be based upon any or all of the following causes, namely: incompetency, cruelty, negligence, immorality, disloyalty to the United States Government, failure to qualify under standards annually prescribed by the Board of Education, or conviction of a felony.

WHEREAS, the words of this song are as follows, to-wit:

OKLAHOMA (A TOAST)

Harriet Parker Camden

I give you a land of sun and flow'rs,
And summer a whole year long;
I give you a land where the golden hours
Roll by to the mocking bird's song;
Where the cotton blooms 'neath the southern sun,
Where the vintage hangs thick on the vine;
A land whose story has just begun,
This wonderful land of mine.

CHORUS:

Oklahoma, Oklahoma, 'Tis the land I love the best.
We have often sung her praises,
But we have not told the half,
So I give you 'Oklahoma',
'Tis a toast we all can quaff.

A land where the fields of golden grain,
Like waves on a sunlit sea,
Bend low to the breezes that sweep the plain,
With a welcome to you and me;
Where the corn grows high 'neath the smiling sky,
Where the quail whistles low in the grass;
And fruit trees greet with a burden sweet,
And perfume the winds that pass."

AND, WHEREAS, it is fitting and proper that the words and music of this song should be adopted as the official song of the State;

NOW, THEREFORE, BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES OF THE FIFTEENTH LEGISLATURE OF THE STATE OF OKLAHOMA, THE SENATE CONCURRING THEREIN:

Enrolled Senate Bill No. 219 was ordered referred to the Governor, for consideration.

The following Message from the Governor was received and read:

To the President and Members
of the Honorable Senate
Gentlemen:

I desire to inform you that I have permitted Enrolled Senate Bill No. 92, entitled:

"An Act making an appropriation for the fiscal year ending June 30, 1935, for the purpose of insuring and equalizing at least eight months of school in all of the Public Schools of this State for the school year 1934-35; prescribing how it shall be expended, providing rules and regulations therefor, and declaring an emergency,"

to become a law without my approval or disapproval, by remaining in my possession more than five days after receipt of same, and have transmitted same to the Secretary of State.

I did not deem it advisable to approve this bill for the reason that revenue measures have not been passed sufficient to provide funds with which to pay the warrants under the appropriation therein contained. On the other hand, I did not feel justified in disapproving this bill for the reason that the Legislature, before it adjourns, may provide adequate funds to care for the appropriation.

Respectfully submitted,

E. W. MARLAND,

Governor of the State of Oklahoma.

Honorable Jim Nance,

State Senate,
Building.

Dear Senator Nance:

In connection with my veto of the bill repealing the run-off primary, you are authorized to state to the Members of the Senate that if a bill were passed, providing for a pre-convention primary that would effectively prevent minority rule, I would gladly sign a bill repealing the run-off primary. I would also be willing to approve a bill that would provide that 40% of the votes in the first primary would be sufficient to nominate a candidate.

In other words, I am as anxious as anyone to eliminate some of the objectionable features of our present run-off primary law. There is still ample time to pass such legislation at this session and I hope that this can be accomplished.

Very truly yours,

E. W. MARLAND, Governor.
