Senator Porter moved that the President appoint a Committee of 5 on behalf of the Senate and the Speaker of the Honorable House appoint a Committee of 5 on behalf of the Honorable House to notify the Governor of the State of Oklahoma that the Joint Session is now ready to receive him and hear his Message, which motion prevailed, the President appointing Senators Cowden, Anderson, Wheeler, Jelks and Howell and the Honorable Speaker appointing Representatives Riggs, Dunn, Russell (Ottawa), Langley and Russell (Okmulgee), the Committee being instructed to immediately discharge its duty.

The Joint Session was declared at ease.

The Joint Session was called to order by the President of the Senate.

The Joint Committee, appointed to notify the Governor of the State of Oklahoma that the Joint Session is ready to receive him and hear his Message, reported the duty performed and escorted Governor Robert S. Kerr to the Speaker's desk, where he was introduced to the Joint Session by President Berry.

Governor Robert S. Kerr proceeded to read his Message, which, upon motion of Senator Paul is herewith incorporated:

To The Honorable

The Lieutenant Governor

The President Pro Tempore of the Senate

The Speaker of the House of Representatives

The Members of the Senate and House of Representatives

Ladies and Gentlemen:

In accordance with the provisions of the Constitution of Oklahoma, I bring you this message on the condition of the State.

The reports of state officers and commissions, as directed by the Constitution, have been received by my office and filed with each House of the Legislature.

Proposing specific legislation is the privilege and responsibility of the incoming administration and I shall not encroach upon that prerogative. I will discuss with you the condition of the State as I see it in view of some

of the work we have done together and, with your permission, briefly look ahead.

I take genuine pleasure in paying a tribute to the Nineteenth and Twentieth Oklahoma Legislatures. Their comprehensive, constructive and timely legislation, and the affirmative action of the people on constitutional amendments submitted by the Legislature to them, made possible and brought about the progress to which I shall refer in this report.

I am grateful for the privilege I have had of working with them on a cooperative basis in these matters. With the people we have come through the war together and into the opening years of the peacetime era.

We have seen the citizens of Oklahoma as soldiers in the armed forces and as civilian soldiers at home make a contribution towards the winning of the war, second to none in the nation.

More than 262,000 of our men and women achieved undying fame for themselves, their families, their nation and their state in World War II. Five thousand four hundred seventy-four made the supreme sacrifice with their lives to help defeat the forces of evil that sought to conquer and enslave the world. We, the nation and civilization, are eternally their debtors. We are likewise forever indebted to those who suffered injuries and who today bear upon their bodies the evidences of their sacrifices and of the nobility of their patriotism.

Our people at home did their full part and more in performing the tasks and duties assigned to them. The workers in the factories and mills, the men and women, boys and girls of our farm families, the plain citizens everywhere wrote a story which only heroic men and women, determined to preserve their sacred heritage of liberty and freedom, could write.

Our State Government and each local unit likewise did its job. It was our steadfast purpose as one of the states of the Federal Union to meet the responsibilities of a nation at war and to preserve and strengthen our State Government, awaiting the return of our fighting men and women.

STATE DEBT PAID

When the Nineteenth Legislature convened in January of 1943, the state debt exceeded Forty Million Dollars. Through legislation at the regular and special sessions, and the submission of a constitutional amendment which was approved by the people, the money was provided, set aside and dedicated, for the payment of the state debt to the last hard dollar. Thus, for the first time since Statehood, no indebtedness of any kind was outstanding against the State of Oklahoma for which funds were not available for full payment.

At the same time, the Nineteenth and Twentieth Legislatures were especially mindful of the greater needs of the people of Oklahoma in connection with education, public health, social security, public roads, public safety, and other matters vitally affecting the general welfare.

EDUCATION

Public education has received its most generous support in the history of the State, and the teachers in our public schools, both for white and negro children, are receiving their highest wage in the State's history.

Salaries of teachers, holding B. A. degrees, with four years' teaching experience, have been increased from \$110.00 per month in 1943 to \$186.00 per month at this time. Salaries of teachers, holding M. A. degrees, with four years' experience, have increased from \$120.00 in 1943 to \$211.00 per month in 1946. These are the minimum salaries in all public schools sharing in State Aid. Funds for maintenance, transportation, and other necessities, have been proportionately increased.

Proud as we are of this progress, we are aware, as we know you are, that salaries and other provisions are yet inadequate, and must be still further substantially increased.

The Nineteenth Legislature vitalized a constitutional amendment and created the Teachers' Retirement System of Oklahoma. It has grown until 17,819 teachers, educators, and other employees of the state colleges and public schools of Oklahoma are participating in this program.

Increased appropriations were made for administra-

tion and operation of our institutions of higher learning. Substantial appropriations were made for buildings and capital improvements. Due to shortages of critical materials and/or labor many of these appropriations for improvements are unexpended and will be before you for re-appropriation, together with such additional funds as you may see fit to provide.

The enrollment for the current term in all institutions of higher learning in Oklahoma, public and independent, has reached a total of 40,000 of which 30,000 students are now in the State Colleges and Universities. This is an all-time high. Many thousands of these students are returned veterans receiving the best possible service we can give them. I know that you will have an appropriate concern in assuring continued service of the highest quality to them and to our other youth.

Constitutional amendments submitted by the Legislature and approved by the people, have provided governing boards for the University of Oklahoma and for Oklahoma A. & M. College and seven other state colleges which insure the most stable operation and greatest freedom from political interference or control these institutions have ever known.

The Nineteenth and Twentieth Legislatures made available substantial additional appropriations for vocational training in many fields, especially vocational agriculture.

Due to shortage of trained vocational agriculture instructors many districts in the state, although local, state, and federal funds were available, were unable to include vocational agriculture in their courses of study. With the end of the war this trained personnel is available, and I would commend to your special consideration the making available of sufficient funds, not only to maintain and improve the high efficiency of this program where now in effect, but also to make provision for such program in every school district where the local desire and willingness to participate are present.

Oklahoma literally leads the nation in its farm youth program. Our Future Farmers of America and our 4-H Club boys and girls annually win more awards, trophies, and contests, in regional and national competition than

those from any other state. This program has been developed both for the white youth and the negro youth of Oklahoma. The annual appropriation by the State has not exceeded \$8.00 per year for each Oklahoma youth engaged in this program.

I remind you that I have been able to find not one boy or girl who has engaged in, and received, this training in the public schools of Oklahoma, who has ever become an inmate of any of our penal institutions.

PUBLIC WELFARE

I share the pride of the Legislature and the people generally in the fact that under the direction of the Oklahoma Public Welfare Commission great improvement has been made in the social security programs in our state.

As of December 1, 1942, approximately 78,099 of our aged citizens were on the Old Age Assistance rolls in Oklahoma and were receiving an average of \$21.92 per month. As of December 1, 1946, although there were 90,992 on the rolls, they were receiving an average of \$42.16 per month.

As of December 1, 1942 there were 17,531 dependent children families receiving aid with an average monthly payment per dependent family of \$22.60. In spite of the fact that by December of 1946 there were 23,611 such families, they were receiving an average monthly payment of \$45.19.

As of December 1, 1942, the average blind assistance payment per person was \$23.72. In December, 1946, the average monthly payment to each of 2,214 recipients was \$42.86.

After the December, 1946 payments, the balance in these funds, together with reimbursements due each from the Federal Government, were as follows: Old Age Assistance, \$4,715,379.86; Aid to Dependent Children, \$1,632,752.01; Blind Assistance, \$320,118.41.

As the month progressed sales tax collections augmented each of these balances until the next payment.

The State Board of Public Welfare, with reduced appropriations and with employees reduced more than two-thirds, has operated programs of real benefit and vital im-

portance. Prior to 1943 unemployable destitute persons not eligible for other forms of social security were receiving through this department an average monthly payment of from \$1.00 to \$3.00. Three thousand three hundred such recipients now receive average monthly payments of from \$7.00 to \$14.00.

Garden seed has been distributed annually to these clients and to recipients of Old Age Assistance who had a garden plot available for cultivation.

This department has operated the school lunch program in connection with the Federal Government. It has done a most creditable job in these capacities.

ROADS AND HIGHWAYS

Although during the previous State Administration equipment and materials were readily available and, although the over-all cost of maintenance and construction of highways was lower than during the administration that preceded it, and much lower than during this administration, Oklahoma's surface maintenance rating by The Public Roads Administration with reference to the upkeep of its public roads in 1942 was forty-seventh, or next to the last among the forty-eight states.

In the spring of 1943, Eastern Oklahoma, and especially Northeastern Oklahoma, suffered the worst flood damage in the State's history. Again in 1945 devastating floods occurred in Eastern Oklahoma. These floods caused many millions of dollars of damage to the State's roads, highways, and bridges, creating emergencies at a time when it was practically impossible to procure materials necessary for repair and rebuilding, when labor was very scarce, and when both materials and labor were exceedingly high. At the same time, and in fact, until June 30, 1945, the revenues allocated to the Oklahoma Highway Commission were the lowest since Oklahoma has had a statewide highway system. In spite of these adverse conditions your Highway Commission has repaired and improved and maintained the state highway system until today Oklahoma's surface maintenance rating by Public Roads Administration is exceeded by only seven of the forty-eight states.

Eight hundred forty-nine and five-tenths miles of roads have been added to the state highway system and

improved at a total cost, including maintenance, of nearly Three Million Dollars. During the past four years, improvements of all types, including gravel surfacing, asphalt surfacing, concrete paving, pavement patching, regrading, widening and construction of highways on new locations, have been made on a total of 9,580 miles. During this time nearly Eighteen Million Dollars have been spent on maintenance programs alone.

For the past 18 months, and at this time, the greatest program of highway construction, including primary roads, secondary roads, and farm-to-market roads, in the State's history is under way. This has been made possible with funds provided by House Bills No. 72 and No. 470 of the Twentieth Legislature.

HIGHWAY FUND SURPLUS

Certain units of the State Press have told the people that the present Highway Commission has spent or obligated all of the money it has received, and is therefore "leaving the cupboard bare" for the incoming administration. This statement is a glaring error.

As of today the total net current assets of the State Highway Commission available for road construction amount to approximately Eight and a Quarter Million Dollars.

In addition there is approximately One and a Quarter Million Dollars cash on hand now in the process of being allocated to the State Highway Commission to whom it will be paid in February.

In addition there is approximately \$4,719,000.00 cash farm-to-market road money on hand or in process of being allocated to the Highway Commission.

These amounts are over and above full provision for cost of all contracts made, or to be made, by the present Commission, including adequate estimate for the January 11th letting, and full provision for unfinished State Force account projects, including contract and regular engineering and administration costs.

This means that the incoming Highway Commission will start with a cash backlog of more than Fourteen Million Dollars available for building roads. This vast sum is

from highway taxes paid by the people before January 1, 1947. This amount just about equals the total state tax income from all sources and for all purposes received by the present Highway Commission during its first two full years.

In vivid contrast to this condition, I remind you that four years ago the new Highway Commission received less than \$38,000.00 and the total amount in process of being allocated to it was less than \$450,000.00.

GENERAL REVENUE FUND SURPLUS

Further attesting the outstanding position of the state's fiscal condition is the fact that the General Revenue Fund as of June 30 this year, after taking care of all appropriations made by the last Legislature, will have a surplus on hand of approximately \$14,000,000.00. This will exceed by many millions of dollars any General Revenue Fund surplus of any previous year.

Thus Oklahoma, which four years ago was a debt ridden state with more than \$40,000,000.00 outstanding obligations is today a debt free state with an over-all surplus in excess of \$40,000,000.00.

OKLAHOMA TAX COMMISSION

During the four years ending June 30, 1946, the total collections by the Oklahoma Tax Commission were the highest in history, yet their work was done with proportionately the lowest number of employees and with the lowest percentage of cost of administration, to the gross collections. The percentage of cost to the collections for the four fiscal years previous to 1943 was 2.545%. For the last four fiscal years this percentage of cost has been reduced to 1.497% and the current rate is only 1.26%, which is the lowest percentage of cost in the history of the Tax Commission.

As an example of the efficiency of your Tax Commission the Income Tax Division from July, 1945, to November, 1946, developed and made additional assessments in the amount of \$2,697,037.02. These additional assessments were made on incomes not reported by the taxpayers, or where erroneous methods of computation had been used. Most of this amount has been collected; the balance is either in the process of being collected or is in litigation.

OKLAHOMA PLANNING AND RESOURCES BOARD

The Oklahoma Planning and Resources Board has been greatly expanded. Its additional work in former and new fields of endeavor has been of the highest value.

It assisted in bringing about the reduction of workmen's compensation rates in Oklahoma.

It initiated and completed an industrial survey of Oklahoma. This survey dramatically portrays unbounded opportunities for industrial expansion. It is being made available not only to our own citizens but to those of other states as well.

The Board has labored diligently and effectively to ascertain, accumulate, and disseminate, pertinent and valuable information concerning Oklahoma, its resources, and its people.

The Board has participated in the preparation of a brief on the Arkansas River Development and in the presentation of that brief to the Corps of Army Engineers and to Congressional committees. This helped to bring about Federal authorization of the \$450,000,000.00 Multiple Purpose Arkansas River Development Program.

The Board cooperated with the Federal Bureau of Mines in the preparation and production of a motion picture film of Oklahoma's mineral resources. This film has been or will be distributed and shown in all the States in the Union.

It sponsored the production, without expense to the State, of a moving picture showing the damage of soil erosion and from floods to Oklahoma's soil and waterways. The picture, which is being shown throughout the State, also shows present and prospective soil conservation measures in and for Oklahoma. It also portrays present and prospective developments of Oklahoma waterways, including flood control, reclamation, irrigation, hydro-electric power production, recreation facilities, and navigation possibilities.

Oklahoma, in the past four years, has witnessed within its boundaries the most extensive and far reaching advances in the development and utilization of water resources of any of the forty-eight states. The program is just in its infancy but is well started. The Planning and

Resources Board generally, and in particular through its Division of Water Resources, has taken the lead and played a vital part in this program.

The Division of Forestry and State Parks' improvement program has resulted in a 400% increase in the number of days' use of the state parks. Total days' use for these parks in 1946 was one million.

The Forestry Division participated in four annual tree planting campaigns. The Planning and Resources Board helped initiate this program which has resulted in the planting in four years of more than twenty million trees and shrubs in Oklahoma. More than 50% of these were produced and made available through the Forestry Division.

The State Post War Planning Commission is a part of the State Planning and Resources Board. It has been very active in matters of veterans affairs which have been of great benefit to Oklahoma veterans. The Director of Veterans Assistance has cooperated in and helped direct the coordination of the various veterans' programs. It helped promote veterans service centers at the community level.

Time alone can fully disclose the outstanding value of the expanded efforts of the Oklahoma Planning and Resources Board. Its membership and officials are able men. They have served the State at personal sacrifice to themselves. They have been of great value in the over-all effort of this Administration to enlighten the people in and out of our state with reference to Oklahoma's abundant resources and opportunities.

SOIL CONSERVATION

The Twentieth Legislature added another chapter to the fine Soil Conservation program which has been developed in Oklahoma. Oklahoma today probably has a greater percentage of its tillable land in Soil Conservation districts than any other state in the nation.

STATE AND FEDERAL RELATIONS

It has been the purpose of this Administration to cooperate with the Federal Government in every possible

way that would result in benefit to the State of Oklahoma and its people. We have done this in conjunction with our representatives in the Congress, and the executive department and bureaus of the Federal Government.

We had a part in securing the early building of the bridge on Highway 70 across the Washita arm of Lake Texoma instead of its building being delayed for years in accordance with the contract between the Federal Government and a previous State Administration; in the early completion of the Altus-Lugert Irrigation and Water Development Program in Southwestern Oklahoma; in securing the return to the State of the \$27,000,000.00 Grand River Dam Project, and in refinancing the \$14,000,000.00 revenue bonds against this project, at an interest rate of 2½% instead of the 4% at which they were written; in securing the approval by the Treasury Department and Internal Revenue Commission, without dispute or court contest, of Oklahoma's Community Property Law passed by the Twentieth Legislature; in securing from the Federal Government war-time installations for use by Oklahoma colleges, universities, institutions and agencies, which have been of great value to our state:

(a) The Lexington Gunnery School was acquired as an annex of the Central State Hospital at Norman. It was the first installation of its kind secured by any state.

(b) The Naval bases at Norman were secured in whole, or in part, to be used as annexes to Oklahoma University. The value of the property thus secured exceeded that of the entire physical properties of the University prior thereto.

(c) The great Glennan Veterans Hospital at Okmulgee has been secured as an annex to Oklahoma A. & M. College.

The development of Oklahoma's soil, rivers and streams in a great soil conservation, reclamation, irrigation, hydro-electric power, recreation and navigation program is years ahead of schedule because of cooperation by this Administration with the National Government.

In connection with these matters too much praise and credit cannot be given to our representatives in the Con-

gress. We give them full credit for the great work they have done, and are happy to have had the privilege of co-operating with them for and on behalf of the State.

WILL ROGERS MEMORIAL

It was our pleasure to cooperate with the Will Rogers Memorial Commission in the efforts that resulted in the bringing back to Oklahoma of the body of Will Rogers. It was deposited in the beautiful sarcophagus prepared for it on the grounds of the Will Rogers Memorial in Claremore on May 22, 1944. In keeping with his desire, Oklahoma's best loved and most distinguished son sleeps today beneath the soil that gave him birth. On June 21, 1944, Mrs. Rogers passed away and on November 11, 1944, her body was placed beside that of her distinguished husband.

I share your pride, and the pride of all Oklahomans, in the fact that more visitors annually come to the Will Rogers Memorial than to any other shrine in the Nation, save one. More come there than to Mount Vernon, or Monticello, or Lincoln's home in Illinois, or to Yellowstone National Park. The only shrine in the Nation visited annually by more Americans is the Washington Monument in the Nation's capitol.

INTERSTATE OIL COMPACT COMMISSION

The Interstate Oil Compact Commission is now composed of seventeen states. It has been one of the most effective forces in the Nation in the matter of conservation of oil and gas within each of the member states by the states themselves. It has been a bulwark against Federal control of the production of oil and gas.

Oklahoma played a leading part under Governor Marland in the creation of this compact and Oklahoma has played, and now plays, a leading part in the work and program of this compact. Its headquarters are located in this capitol. It has been, is, and will continue to be, of great value to Oklahoma. The notable success of this compact proves the practical value and workability of interstate cooperation in this manner. Likewise it points the way for similar procedure in many fields where the individual welfare of many states can be served by cooperative effort and action.

PARDON AND PAROLE BOARD

The Nineteenth Legislature submitted a constitutional amendment which was approved by the people on the 11th day of July, 1944. Under this amendment the Pardon and Parole Board was created, and under it the Governor's power to grant executive clemency, aside from a brief stay of execution or leave of absence, was limited to matters affirmatively recommended by a majority of this Board.

This Board has secured the organization and encouraged the development of ninety Parolee Supervisory and Welfare Councils within the State of Oklahoma. The persons comprising these councils have been selected at the local level through the cooperation of the American Legion and other civic organizations.

By this amendment and vitalizing legislation, an important and far reaching forward step has been taken with reference to one of the most vexing and difficult responsibilities of organized government.

The Legislature also enacted the Interstate Parole and Probation Compact Law.

STATE INSURANCE BOARD

One of the most valuable achievements during this Administration was brought about through the State Insurance Board. Workmen's compensation rates charged and collected in Oklahoma have been reduced by 45.3%. This has been accomplished even though the workers now get a maximum benefit of \$21.00 per week as against \$18.00 per week formerly. This reduction in workmen's compensation rates, based on conservative estimates, is now saving industrial employers in Oklahoma \$6,000,000.00 per year. Further reductions in these rates can and must be made.

Residence fire insurance rates have also been reduced in Oklahoma.

STATE INSURANCE FUND

Your State Insurance Fund has enjoyed a substantial increase in its business and is in a much improved condi-

tion as compared to four years ago. At the beginning of the period it had 321 policies in effect. As of August 1, 1946, it has 471 policies in effect. Your Insurance Fund management assisted in bringing about the reduction in workmen's compensation rates in Oklahoma, and through it policies are written 20% below the present reduced manual rates. Its net assets as of January 1, 1943, amounted to \$263,222.79 with a surplus as of that date of \$89,007.79. As of November 30, 1946, its net assets were \$593,436.88 and its surplus was \$435,358.93.

CORPORATION COMMISSION

I would like to make special mention of the Oklahoma Corporation Commission. Its Interstate Transportation Rate Department has rendered outstanding service to Oklahoma, and in cooperation with similar agencies of other states, to the South and to the West, in the matter of adjustment of freight rates.

Oklahoma, together with the Southern, and Southwestern states, has made great progress in the past four years in the matter of achieving equality of freight rates with the North and East.

The Interstate Commerce Commission on May 15, 1945, issued a certain order and report whereby it directed an interim 10% reduction in the rates in the Southwest, the Central West, and the South, and a 10% increase in the rates in the East. It further directed the subsequent filing of a uniform classification of class freight rates by the railroads, providing equality of class freight rates in all of the area East of the Rocky Mountains.

Certain phases of this decision were appealed by Northern and Eastern states and Western railroads. They lost their appeal in the Three-Judge Federal District Court of Northern New York State. An appeal was then carried by them to the Supreme Court of the United States where oral argument is to be heard February 10th and 11th.

Counsel for the Oklahoma Corporation Commission and for the Southern, Southwestern and Western States, are, with good reason, fully confident of success at an early date in this matter before the Supreme Court of the United States. With ample justification they hope for an early

realization of equal class freight rates as between our area and heretofore highly favored areas of the country. This will bring benefits of great proportions to Oklahoma.

PUBLIC HEALTH

Much progressive and beneficial legislation was passed by the Nineteenth and Twentieth Legislatures looking to a better health program for Oklahoma and its people, not only in the cities and towns but also to the most remote areas. Under the provisions of these laws Oklahoma today has one of the most progressive health programs of any state in the Nation.

It includes vast and valued additions to the State's facilities for training doctors, nurses, and health technicians.

It includes a statewide hospital plan.

It makes provision for sharing by our State and local Governments in Federal grants for construction of hospitals in the State. Presently existing Federal laws make \$8,200,000.00 available to Oklahoma for this purpose in the five year period beginning with 1946.

This program expands and extends County Health units.

It makes provision to insure better health for expectant mothers and infants.

It provides better means and methods for fighting venereal disease.

It makes better provision for the prevention and cure of tuberculosis. One item to illustrate—in 1942, there were 4463 chest films in connection with possible tuberculosis taken. In 1946, there were 87,375 such films taken. So effective has been the fight against tuberculosis that within the last four years Oklahoma has had a 16% decrease in known cases.

NEGRO CITIZENS

The Nineteenth and Twentieth Legislatures passed many laws recognizing and acknowledging our obligations to our negro citizens. These laws were principally in the field of public education and public health.

SURPLUS PROPERTY

The Twentieth Legislature created the office of State Surplus Property Agent. More than \$9,000,000.00 of surplus property equipment has been secured for the State, its various agencies, and more than 400 schools in Oklahoma. Of the amount of surplus property acquired, 95% was secured without cost to the State.

ADJUTANT GENERAL'S DEPARTMENT

During the war years Oklahoma's National Guard, consisting mainly of a majority of units of the world-famed 45th Division, was in combat service. The military Department was operated on a skeleton basis, but effectively and efficiently at all times.

Beginning early in June of 1946 the reorganization of the Oklahoma National Guard was started. Following acceptance by the state of troop allotments made by the National Guard Bureau, appointment of officers and organization of units was commenced. The State's allotment involved 117 Army Ground Force Units, and 10 Army Air Force Units, with an ultimate aggregate strength of 14,240 men and officers. The first units were presented their Federal recognition on September 5th and by December 20th, 1946, 87 of the 117 units had been inspected and recommended by the War Department Inspectors for federal recognition.

From the beginning, Oklahoma has led the entire Nation in National Guard units organized and federally recognized and for more than a month had more organized and recognized units than all of the other forty-seven states and the territories combined.

During the war years the State's fifty-seven armories were maintained on a basis that permitted their use by the local communities and at the same time kept them in a good state or repair available for the use of the Guard upon its reorganization.

STATE BOARD OF AFFAIRS

The State Board of Affairs has operated at a high degree of efficiency under difficult conditions and adverse

circumstances. It has constantly been compelled to buy in a seller's market. All materials and supplies, including food and clothing, for institutions under its charge, have been hard to buy due to scarcity and abnormal demand.

Under legislative enactment by the Nineteenth Legislature, authority was granted to the Governor and the State Board of Affairs to reorganize or consolidate certain of the State's institutions. Under this authority, a consolidation of the two State orphans' homes was made. The State Training School for White Boys was moved from Pauls Valley to the Orphans Home at Helena, which had been vacated. The institution at Pauls Valley thus released was utilized for an additional home for epileptics of the State. These were removed from other institutions.

Appropriations in the amount of \$1,111,367.01 were made by the Twentieth Legislature for necessary repairs, improvements and expansions at state institutions under the Board of Affairs. However, only a small part of this has been used due to high prices and scarcity of materials and labor, and most of this amount remains subject to re-appropriation by the Twenty-first Legislature.

JOINT LEGISLATIVE TAXATION COMMITTEE

The decentralization of industry in this nation is on. This not only applies to present industrial capacity but with a special force to further industrial growth. With the coming of equality of freight rates the age old dream of equality of opportunity for industrial growth will be a reality in Oklahoma.

The Twentieth Legislature had this goal in mind when it created the joint Legislative Taxation Committee for the purpose of studying the tax system of this and other states, and reporting back to the Governor and the Twenty-first Legislature its findings and recommendations.

This Committee has met numerous times during the past year, has virtually covered the field of state taxes, as well as the related field of state finances, and financial controls over same, workmen's compensation cost, improvement of ad valorem tax administration, and school finances in Oklahoma.

Members of the House and Senate who participated

in this work had the advice and counsel of dozens of the state's agricultural and business leaders, together with civic and trade organizations and associations. It has submitted recommendations for the amendment of certain of our tax laws.

It has also recommended a new budget control law providing a system of allotment of appropriations which will permit savings to be made within amounts appropriated under certain specified conditions.

I commend this Committee, and its report and recommendations to you. We realize the industrialization of Oklahoma cannot be accomplished overnight. Under the constructive programs of the Nineteenth and Twentieth Legislatures a substantial start has been made. I know its continuance and improvement will receive every possible consideration at your hands.

SCHOOL LAND COMMISSION

The Commissioners of the Land Office fill one of the most important positions in state government. They serve as trustees and managers of assets totaling \$82,936,057.19. Those assets consist of the following: Cash, \$2,580,558.29; bonds, \$31,085,871.40; loans, \$12,552,966.09; purchase contracts, \$6,145,822.77; land, \$18,004,962.93; deficiency judgments, \$6,120,205.51; producing oil and gas property, \$3,500,000.00; mineral interest separate from fee, \$2,895,670.20. The income from these funds and other assets are disbursed to the common schools and the institutions of higher education in Oklahoma.

From 1943 through 1946 the Commission purchased \$49,506,931.40 of United States Bonds. During this time it sold bonds in the amount of \$30,608,214.68. These bonds were sold because at the time they brought a premium above their par value. The total of such premiums, which was profit over and above the interest collected on said bonds, amount to \$1,043,305.52. This premium, along with the principal, was reinvested at the time of sales in other government bonds available, during the War Loan Drives, at their par value. The government bonds now held by the Commission are worth \$102.50 which means that if sold an additional \$795,275.00 profit could be realized for the trust account. Other acceptable investments not being available it has not been wise to sell the bonds presently

owned, but any part or all of them are available for sale at a profit should other comparable investments become available, or if the money is needed for mortgage loans in Oklahoma.

Of the lands owned by the state under this Commission, 302,688 acres are held by individual leasees under 2,078 preference rights leases. In 1941 this land was valued at \$6,620,574.52, producing an annual rental of \$199,772.95. In 1946 this same land was appraised at \$11,013,406.06. At an annual rental of 3% of this appraised value these lands will produce \$330,909.78 income per year or an increase of \$131,136.83 per annum.

These appraisals are not too high. As evidence of this fact, public land sold by the Commission in 1944, 1945 and 1946 brought an average of more than 17% above its appraised value. The appraisals of land sold, and the lands retained, were made on the same basis.

Foreclosed lands in the hands of the Commission in January, 1943, and thereafter acquired, were not offered for sale until the latter part of this Administration. By this delay in selling, these foreclosed lands were sold at approximately \$1,000,000.00 more than they would have brought at the beginning of this Administration.

The Commission sold oil and gas leases during the four years for a bonus of \$2,028,539.55. Income from oil and gas royalties during this time amount to \$1,165,006.63. Oil and gas lease rentals amounted to \$232,559.52 which, together with proceeds from the sale of oil and gas leases, and the income from royalties, were added to the permanent trust funds of the department.

The Commissioners of the Land Office intervened in an action pending before the Corporation Commission to fix the price of gas in the Hugoton-Guymon Field. On December 10, 1946, the Commission handed down its order fixing the price of gas in that area at a minimum of 7 cents per 1,000 cubic feet, an increase of 75% over the going price. This increase will mean additional millions of dollars of income to the department during the life of the affected leases.

As of January 1, 1943, there were 734 foreclosures of mortgages by the Commission pending in various courts in the state. These foreclosures had been in process for

periods of time ranging from one month to 22 years. On January 1, 1943, there were 3,983 mortgages and purchase agreements owned by the Commission delinquent for period of time up to 9½ years.

As of January 1, 1947, there were only 75 foreclosures pending and these are on a current basis. As of the same date there were only 21 purchase contracts and 163 mortgages delinquent as much as six months.

Much has been said about the 213,000 acres of ranch country in Cimarron County, Oklahoma, owned by the State and under this Commission. This land was leased in 1941 for five years at 8 cents per acre with provision to reduce the rental in the event of hard times. During the same time the Federal Government was paying the leasees at least 8 cents per acre for compliance with soil conservation practices. In 1946 the land was appraised for releasing at a figure which will bring approximately 45 cents per acre, or an increase in the annual rentals from \$17,040.00 to about \$100,000.00 each year for five years.

All lands belonging to the State under this Commission were appraised during 1946. There are 823,603.82 acres of such land and the appraised value is \$18,004,962.93.

School land grants and resulting trust funds in most states have long since evaporated or been dissipated. In Oklahoma at the present time the total value and annual income are at an all time high, and the greatest increase in both have been realized during the past four years.

CONCLUSION

I bring this report to you in all humility, with deep and undying gratitude to the Nineteenth and Twentieth Legislatures, to the other branches and divisions of our state government, to the departments within, and appointees of the executive branch, to many civic groups, and to the rank and file of our people whose cooperation, individual and collective labors, and generous support have made it possible.

We have labored sincerely to help make this an Administration of good will and cooperation, an Administration of integrity, efficiency, and economy in every branch of government.

We have a profound confidence in the unlimited possibilities of Oklahoma's future.

We have seen expanding progress and pride as all Oklahomans have increased their knowledge of all of Oklahoma.

We have witnessed, with joy, as the people of other states have enlarged their respect and increased their esteem for Oklahoma and her magnificent people.

We have so much for which to be grateful, so much of which to be proud.

We extend our congratulations to the incoming administration—to the judicial, the legislative, and the executive branches.

I extend best wishes to my successor. I urge you to give him the full measure of your cooperation. The greatest blessing that can come to him is to receive at your hands the same intelligent, unselfish, and enlightened cooperation which your predecessors have given to me, and I hope with all my heart he may have this in full and abundant measure.

The Golden Age of Oklahoma is not in the past, nor is it present with us today. The Golden Age of Oklahoma is in her tomorrows, in the development of her resources, and the growth of her people—in the hearts and souls of her sons and daughters!

Upon motion of Senator Porter the Joint Session was ordered dissolved.

The Senate, in its Chambers, was called to order by President Pro Tempore Nance.

The Regular Order of Business was called for.

Very truly yours,
C. C. CHILDERS, STATE AUDITOR,
Ex Officio Secretary, State Board of Equalization.

Proceedings Had This The 27th Day of November, 1946:

Thereafter, Mr. Williamson introduced and moved the adoption of the following Resolution. The motion was duly seconded by Mr. Shaw. The Resolution is as follows:

RESOLUTION OF THE STATE BOARD OF
EQUALIZATION

Whereas, by the provisions of Section 23, Article 10, Constitution of Oklahoma, as amended, the State Board of Equalization, among its other official duties, is directed and required to make:

" . . . an itemized estimate of the revenues to be received by the State under the laws in effect at the time such estimate is made for each year of the next biennium showing separately the revenues to accrue to the credit of the General Revenue Fund and of each special fund of the State, and the total amount of such estimate for each fiscal year shall not exceed the average total revenue which accrued to each such fund for the three (3) last preceding fiscal years, to which amount shall be added the cash surplus, if any, from the preceding fiscal year in the hands of the State Treasurer to the credit of any such fund and not previously appropriated by the State Legislature at the time such estimate is made. Such estimate shall be filed with the Governor, the President of the Senate and the Speaker of the House of Representatives . . . " and

Whereas, this Board acting in pursuance of the duty and authority thus conferred upon it by law has caused to be presented to it all of the data, figures and relevant information from various State Departments concerning the income of the General Revenue Fund and of the various Special Funds of the State and has, after careful study of same, determined the figures which properly represent such itemized estimate of the revenues of the said funds for the ensuing biennium; and, in addition thereto has determined the cash surpluses now existing and in the hands

of the State Treasurer as provided in said Amendment to Section 23, Article 10, Constitution of Oklahoma:

Now, therefore, Be It Resolved, by the State Board of Equalization of the State of Oklahoma that the following figures be, and they are hereby adopted, approved and fixed as the sums reasonably estimated to accrue to the General Revenue Fund and to the several Special Funds therein set forth for and during the fiscal years 1947-48 and 1948-49, as follows:

Mr. President: I move to amend Senate Bill No. 2, line 9, page 2, by striking after the word, "shall," and before the word, "be" the word "not" and in line 10, page 2, make the comma a period after the word "Governor" and strike the balance of the line and all of lines 11, 12, 13 and 14.

Mr. Lieutenant Governor,
Mr. President of the Senate,
Mr. Speaker of the House of Representatives and
Members of the Joint Session:

We have been chosen by the people of Oklahoma to formulate and enact a governmental program. In electing us to places of leadership, the people of Oklahoma have honored us with an expression of their confidence, and they have conferred upon us responsibilities commensurate with those honors.

To those of you who were members of the Nineteenth and Twentieth legislatures, I wish to extend my compliments and my sincere commendation for the enactment of sound legislation, which has been of benefit to our state. We have now come to our Twenty-first legislature, and our opportunities to act in behalf of the welfare of Oklahoma are even greater than they were two years ago or four years ago.

We are facing a period of transition from war to peace, a period which calls for courageous leadership and forthright action. Legislative and executive unity is needed for the achievement of objectives that will further the advancement of Oklahoma. The people of Oklahoma look to us for courageous leadership, sound decisions, and definite action, which will achieve our governmental objectives.

Under our constitution responsibility for enactment of legislation rests entirely with you. More than eight months ago, I stood on a platform in Sulphur and said:

(Quote) "I would like to call attention to a pertinent fact. Most changes advocated by candidates for governor will call for changes in our laws. Please permit me to be the first to recognize the law-given right of our duly elected legislature to pass upon the greater part of any program submitted by any governor." (End quote)

Today, as governor, I stand before our duly elected legislature, the legislature which will pass upon a program that has been carried to our people through the press, on the radio and on the stump during three of the most vigorous campaigns in the history of our state. It is my belief that because of the vigor with which these campaigns

were conducted, our people are better informed on my objectives than upon any other program ever advocated by an incoming governor. They are also informed of my responsibility to recommend this program to you, the lawmakers of our state. And they are also informed of your responsibility to enact, reject or compromise this program.

Accordingly, full credit for the achievements of this administration will accrue to you as members of the legislature. Yours will be the responsibility, yours will be the actual work, and to you should go, and will go, the credit.

In considering this program, I ask only that you consider the welfare of Oklahoma as a whole. There is nothing personal, or nothing sectional, in what I am about to propose. Oklahoma cannot go forward by sections, counties or small districts. There are no boundary lines for progress and prosperity. We all know that this is true, and because it is true, it is our duty to produce unity of purpose and action that will transcend small considerations.

We are fortunate in having at hand the report and recommendations of the joint legislative taxation committee of the Twentieth Oklahoma legislature. In this report, we have for the first time, a factual analysis of our tax structure. This report shows us where we are, and it makes definite recommendations as to which way we should go.

I recommend this report for your most earnest study and consideration.

The revision of our tax laws, ably and effectively started by preceding legislatures, must be continued. The community property law of 1945 was, in effect, a tax measure. Upon continued revision depends the ultimate success of any program designed to produce full benefits for agriculture and industry in Oklahoma.

Specifically, I ask enactment of legislation effecting income tax reductions recommended by the committee.

I also recommend specifically the enactment of legislation providing for uniform tax exemptions both in agriculture and industry.

The legislative committee on taxation has recommended the enactment of a comprehensive state budget law,

which provides for establishment of a state fiscal control board. I concur in this recommendation and ask that the budget law be enacted promptly as a means of placing state government on a sounder business basis.

In urging tax legislation, I am mindful of the fact that we must have revenues sufficient to meet functional obligations.

However, I take the position that stimulation of industry and agriculture through tax adjustments ultimately will produce tax revenues, which will more than offset losses incurred by reason of revisions and reductions.

If our present industry and agriculture are to prosper, and if we are to obtain new industrial and agricultural opportunities for our state, we must create an attractive tax climate that invites investment and production. Oklahoma business men, farmers and ranchers must be in a position to compete with business and agriculture of neighboring states. A tax system, which destroys our ability to meet competition is a governmental luxury we cannot afford. The penalties of such a system far outweigh the benefits we can buy with the tax revenue it produces.

In drafting tax legislation, I ask that you consider its long range effect on business, agriculture and revenues, rather than its immediate possibilities as a producer of revenue.

It is my duty as governor to make recommendations on state expenditures and it is also my duty to state the sources of revenue from which these expenditures are to be made. We are fortunate in having a surplus which should reach Fourteen Million Dollars by the end of this fiscal year.

Demands for additional appropriations, if granted, promiscuously, would more than wipe out this surplus. I urge that this legislature use the greatest discretion and prudence in considering appropriations based upon the use of any of our surplus funds. To carry out a program of tax reduction, it will be necessary to use a very large part of our surplus in compensating for reduced tax revenues. Therefore I can not emphasize too strongly the necessity for judicious use of our surplus funds.

As the basic industry of Oklahoma, agriculture is en-

titled to full consideration in the preparation of any legislation, which directly or indirectly affects our rural families. Your action on legislation affecting taxation will be vital to agriculture. Although the immediate effect of lower tax rates may appear to be solely a bid for new industry, it is far more than that. It is a bid for the establishment of farm markets, which, in other states have proved to be a boon to the economic stability and welfare of farmers and stockmen.

The welfare of our rural families is bound with roads and highways, public education, electrification, and improved production methods. Our state agencies will be charged with responsibility for improving production. Electrification of farms can move forward under our present laws.

This legislature is immediately concerned with roads and highways and with public education—not only as they affect rural communities—but also as they affect towns and cities.

Foremost on your agenda is a reorganization bill affecting the state highway department. This bill is designed to give Oklahoma long-range highway program. It calls for an eight member highway commission, with one member to be named from each congressional district. The purpose of this provision is to give every section of our state representation in the formulation and execution of a long-range road and highway maintenance and construction program.

The bill also calls for long staggered terms for commissioners. The purpose of this provision is to eliminate the handicaps that result from a complete turnover in highway department personnel and policy, which has been occurring at least every four years, and I am informed that turnovers have been occurring on an average of 27 months.

Under provisions of the bill, commissioners will serve without salary. This makes it mandatory for the governor to appoint members who are willing to serve on the commission as a matter of public service. Commissioners will employ a Director of Highways, who must be a competent engineer and executive. It will be the duty of the Director of Highways to draft a state highway and road program, which will be subject to approval by the commission.

I am not blind to the facts of life. I know that mem-

bers of this legislature, as members of other legislatures, will be under constant pressure from constituents to obtain road and highway improvements for their districts. One purpose of the highway reorganization bill is to free senators and representatives, as much as possible, from this pressure. The proper place for this pressure to fall is upon commissioners, and these men will be charged with building roads on a basis of need rather than upon a basis of political expediency.

Now is the time for senators and house members to transfer this burden, once and for all to the highway commission. We shall have hit or miss highway and road construction just as long as projects are approved on a basis of which particular part of the state can raise the most hob with the highway department.

We need a long-range program, and, having drafted one, we need to see it carried forward without the delay and confusion that results from interference.

We must have a highway department that will emphasize business administration. Through a highway director and through highway commissioners who are thoroughly versed in sound business methods, we can more nearly obtain a dollar's worth of highway construction for every highway dollar we spend.

Under provisions of the highway department reorganization bill, we have an opportunity to achieve the results we need. We must not muff this opportunity.

Recent publicity has left the impression with the public—and perhaps with this legislature, that we are entering the year 1947 with approximately \$14,000,000 available for highway construction.

The cold, hard facts are these:

Nearly all of our highway funds are already obligated or must be counted as anticipated recoverable funds for the coming year.

The estimated unencumbered cash balance in our state highway construction and maintenance fund as of January 31, 1947, is a little more than \$600,000.

The estimated unencumbered cash balance in our

farm-to-market fund as of January 31, 1947, is approximately \$3,300,000.

However, the highway department has ready for immediate construction 83 farm-to-market projects in 42 counties, totaling approximately \$3,000,000. This leaves us a little more than \$300,000, which will be available as of January 31, for allocation to other farm-to-market projects.

Therefore, unobligated funds available to this administration as of January 31, 1947, will include only \$600,000 in our state highway construction and maintenance fund and \$300,000 in our farm-to-market fund—a total of approximately \$900,000—which falls far short of the widely publicized figure of \$14,000,000.

I wish to make it clear that in submitting these figures, I recognize the fact that during the next twelve months, our estimated recovery of federal aid funds advanced by the state is estimated at \$6,122,000.

However, this money is not now at hand, and we must realize that if we are to continue our highway program on its present basis, we must have money on hand to complete and pay for all projects before we can recover federal participation. Therefore, on this basis, federal funds, on which we anticipate recovery, in reality constitute a revolving fund, not now available for use.

In order to match all federal funds available to Oklahoma during the next two years, and in order to continue operations of the highway department on the same basis as during the last two years, we shall need a net total of approximately \$39,000,000.

This brings us face to face with a crucial highway financing problem. Those of you who were members of the Twentieth legislature will recall that diversion was a most serious problem during that session and that you overcame it by agreement with the Public Roads Administration, whereby you enacted House Bill No. 72, providing for the total surplus from the general fund as of June 30, 1946—estimated at \$10,000,000—to be appropriated for highway construction and maintenance. This was designed to offset—and did more than offset—the total diversion of highway user revenue during 1946.

The problem of diversion is still with us, and I wish to quote the following from a recent letter to the highway department from the federal commissioner of public roads:

(Quote) "Consequently, the provision made by the legislature with respect to meeting the diversion issue is only temporary and will not extend beyond December 31, 1946. Thereafter, the State, on the basis of its present laws, will revert to the status of diverting its road user revenues to non-highway purposes, and unless the legislature at its 1947 session shall enact further legislation which will adequately meet the situation it will be necessary to consider the question of reducing the State's apportionment of Federal-aid road funds as required by section 12 of the act of June 18, 1934. In the meantime and until proper measures are adopted to stop the diversion of road user revenues, it will not be permissible under the Federal statutes after December 31, 1946, to make any advance to the State for any purpose, not even for a revolving fund under section 6 of the Federal-aid Highway Act of 1944." (Unquote).

Section 12 of the Federal Highway Act provides that the administrator of the federal works agency may reduce the total annual allocation of any of the several states permitting diversion by one-third. In the case of Oklahoma, this would mean a loss of federal aid road funds of approximately \$3,400,000 annually.

In view of the fact that \$4,600,000 of our diversion went to common schools, and the remainder to the general fund, you can see the financial problem posed.

As governor, I shall work with you in the solution of this problem. I am confident that we can solve it without penalizing our schools or highway department. In due time I shall place information before you, which, I believe will enable you to enact legislation that will place us in a sound position.

The attention of this legislature also is immediately required in the field of public education. It is now the responsibility of our senators and representatives to vitalize the free textbook and school financing amendments adopted by our people at the last general election.

In regard to textbooks it is my wish to see this amendment made completely operative within the shortest possible time consistent with legal ramifications and finan-

cial considerations. It is my hope that free text books can be furnished, in whole, or in part, by next September.

It is imperative that textbook legislation be carefully drawn to eliminate any possibility of waste, favoritism or political manipulation.

From the Twentieth legislature's committee on taxation we have received some timely recommendations pertaining to school legislation. I urge that these recommendations be given full and earnest consideration, especially as they refer to reorganization of school districts, annexation of "all transfer" districts, central purchasing of school transportation equipment, inclusion of the 15-mill ad valorem tax levy in the minimum program income in computing state aid, and the use of net enrollment figures in determining appropriations under provisions of the \$42 per pupil amendment.

We have an opportunity to improve our public schools and to provide a measure of economic security and stability for our educators. By acting wisely now, we shall be able to assure the children of Oklahoma competent instruction and full school terms.

Upon enactment of proper state legislation, a part of the responsibility of adequate school financing will be shifted to local school districts where school levies will be optional with voters. I favor incentive state legislation, which will encourage local districts to do their part in supporting their schools.

In the field of public education we have a very definite obligation to our Negro citizens. By every mandate of justice they are entitled to a fully accredited college institution. The establishment of a fully accredited Negro college was favored without reservation in the Democratic party platform. I herewith make a direct appeal to this legislature to carry out this party pledge. I favor expansion of our vocational educational program in both Negro and white schools.

In considering appropriations for our institutions of higher learning, I ask this legislature to view institutional requests and recommendations of the state budget officer from the standpoint of maintaining or improving the standards of our university and colleges.

Some of our colleges have lost their accredited ratings. We need all of our colleges now to care for unprecedented enrolments, and in fairness to students who must attend our smaller colleges, we must seek to regain lost accreditations. We must consider it one of our duties to bring our colleges up to standards prescribed by the North Central Association and the American Association of Teachers' Colleges.

During this session we shall receive requests from Veterans' organizations, seeking special legislation for veterans. I believe there are enough veterans of both wars in this legislature to assure the fullest consideration of these requests. I further believe that senators and representatives who are not veterans will be sympathetic and in full accord with every practical measure that will enable our veterans to recover the educational and economic advantages they lost while in service.

Our two largest veterans organizations, the American Legion and the Veterans of Foreign Wars, have prepared comprehensive legislative programs for submission to this legislature. I ask that these proposals be referred immediately to appropriate legislative committees together with any proposals that may be submitted by other veterans organizations. I ask that our legislative committees work closely with representatives of veterans organizations in drafting laws that will vitalize every practical and reasonable request designed to improve the position of our veterans.

I do not wish to recommend that this legislature place the party program ahead of requests made by veterans organizations. Therefore, my specific recommendations for veterans legislation will await the joint recommendations of our legislative committees and veterans' representatives.

I ask this legislature to consider quickly and favorably the request of the Veterans Administration for permission to buy four and a half acres of state land in Oklahoma City on which to construct a general hospital for veterans.

Federal law now authorizes maximum old age assistance payments of \$50 per month. We have not reached this maximum, and it is a goal toward which we should work. I do not favor higher tax rates or new forms of taxation to accomplish this purpose.

It is my belief that administrative economy is the key to liberalizing our treatment of aged citizens.

It is appropriate that I quote the recommendations of our committee on taxation bearing upon this problem:

(Quote) "It is therefore recommended by the committee that the legislature act to consolidate all public welfare activities under the Oklahoma Public Welfare Commission, thereby relieving the general revenue fund of demands totaling approximately two million dollars for each of the next two years.

"It is further recommended that the appropriations committees of the house and senate study carefully the possibilities of further economies through functional consolidations in other governmental activities as they consider budget requests during the legislative session." (End Quote).

I am definitely opposed at this time to the diversion of any portion of our sales tax now ear-marked for old age assistance. Adequate financing of this function of government depends upon a sustained volume of sales tax revenue.

This revenue will fluctuate with business conditions. Therefore, it is urgent that this legislature give full and earnest consideration to every possible measure that will effect administrative economies.

I urge that this consideration be directed toward consolidation of all public welfare activities. Once again, I wish to invite the attention of legislature to the fact that a well devised tax program will encourage investment and employment in Oklahoma. This investment and this employment will be reflected in sales tax revenue ear-marked for old age assistance.

Recommendations pertaining to gravely needed improvements in state mental hospitals will be submitted to this legislature. I ask that budget requests of these institutions be given careful and liberal consideration to the full limit of the state's ability to bear the expense without seriously crippling other governmental functions.

I shall recommend changes in commitment laws designed to relieve these institutions of unnecessary and unfair burdens.

My position in regard to these institutions is that they are hospitals for the care and treatment of persons who are afflicted by genuine mental illness. I hold that they were never meant to be institutions for the imprisonment of the non-criminal unwanted.

I shall ask for legislation to prevent selfish individuals or families from making the state a party to such unwarranted imprisonment.

Machinery for the development of a tremendous state resource can be set in motion by this legislature. Within a short time, simple, but far-reaching, proposals for improvement and development of our recreational facilities, will be submitted for your consideration and action.

With our great natural recreation facilities, and with our new dams, which have backed up very sizeable lakes in nearly every section of the state, we have almost unlimited opportunities to foster — not only a vast recreational program — but also a vast new industry for Oklahoma.

Our sportsmen and our business men are vitally concerned with the action the state takes in encouraging these enterprises. Very small appropriations may be needed to vitalize this program on a national basis at the outset. However, within two years, the entire program should be on a completely self-sustaining basis and should be producing a huge volume of business and tax revenue.

It is my duty at this time to invite this legislature's attention to Article 24, Section 2, of the State Constitution, which provides that each 20 years the legislature will permit the people to decide whether they wish a constitutional convention. It has been 40 years since a constitutional convention was held.

It is also my duty to invite the attention of this legislature to Public Law No. 15, which, in the opinion of many insurance men and attorneys, drastically affects our state insurance department. In order to insure our control of the state insurance department and to preserve our insurance revenue, it is imperative that this legislature take full cognizance of all legal aspects involved.

In presenting these matters to you, it has been my

purpose to suggest only what I consider to be the most pressing phases of our legislative program. There are other matters, which will require your consideration and I shall deem it my duty to place them before you from time to time.

It is appropriate that I set forth a brief summary of the legislation I have just requested.

On taxation: Reduction of individual and corporation income taxes, establishment of uniform tax exemptions for industry and agriculture, and enactment of a state budget law.

On highways: I have outlined our financial position and problems and have asked enactment of a highway department reorganization bill.

On public education: Vitalization of constitutional amendments on school finances and free text books and establishment of a fully accredited college institution for Negroes. Support of tax committee recommendations on school district annexations and consolidations and for central purchasing of transportation equipment. Expansion of vocational education. Maintenance and improvement of our college standards.

On veterans: Enactment of a legislative program based upon joint recommendations of veterans' organizations and members of our legislative committees.

On old age assistance: Protection of revenues now ear-marked for old age assistance plus economies in administration, through which this program can be liberalized.

On mental hospitals: Sufficient appropriations to start a greatly needed improvement program and revision of our commitment laws.

On development of recreational facilities: I shall submit to you proposals designed to improve these facilities for enjoyment of our citizenry, together with a development program through which a new tourist industry can be established.

On a constitutional convention: I have cited the provisions of the State Constitution.

On insurance legislation: Any necessary revision of our insurance laws to insure state control of our insurance department and to preserve our insurance revenue.

A great deal of very hard work will be entailed in considering the legislation just summarized. We know that there are many other matters, which will claim your attention during this session. With so much work at hand, it is obvious that we must immediately establish unity of purpose and action if we are to succeed in the achievement of our objectives.

In closing, I wish to say that it is my desire to establish a close and productive relationship with the members of this legislature. I know that it is within the power of this legislature to make history — good history — for Oklahoma. As representatives of the people of Oklahoma you are entitled to — and you will have — the full service and complete cooperation of the man our people have elected governor.

The governor happens to be a man of simple tastes, who has lived his entire life close to the soil, resources and people of Oklahoma. So I ask that there be a minimum of formality and protocol. I shall be deeply grateful for your views and recommendations on every subject bearing upon the welfare and progress of our state and of your particular districts.

I want you to feel that your districts are also my districts. I know and respect each of your districts. We have mutual friends there. It is my duty, and it will be my pleasure, to serve the people of your districts just as you desire to serve them. Therefore, the governor's office will be open to you and the people you represent at all time.

As governmental leaders, elected by our people, the destiny of Oklahoma is in our hands. Let us proceed now to underwrite that destiny. Let us write the record expected of us — a record bright with progress and achievement. Together we can, and we will, do a good job for Oklahoma!

Upon motion of Senator Porter, the Inaugural Address of Governor Roy J. Turner delivered on January 13, 1947, was ordered incorporated in the Journals of the respective Houses, the Address being as follows:

INAUGURAL ADDRESS — JANUARY 13, 1947

ROY J. TURNER, GOVERNOR OF OKLAHOMA

My Fellow Oklahomans:

The gratitude that I hold in my heart today transcends everything except my deep sense of obligation to the people of my native state.

We, the people of Oklahoma, stand on the threshold of a new era — a transitional era — during which our advancement will be measured by our ability to recover from the wounds of war and to move forward into a fruitful and progressive peace.

Each of us has our individual and our family problems, and these problems are bound, directly or indirectly, to the performance of our government. It is important, therefore, that we regard our government as a necessity — not as a luxury. Government must seek a maximum of well-being for the people and a minimum of burden to the people.

Any loss of integrity by a public official can only add to the peoples' burden.

Therefore, it shall be my purpose to fill the appointive offices at my command with men and women of proved integrity and ability — men and women who will place the welfare of our state above all personal ambition or avarice. The honest and faithful performance of public duty will be required of every state employee.

We have cause to face the future with high hope and full confidence. The members of our legislature have come to this session fired with a sincere desire for progress and accomplishment. Our legislature is well-balanced. Among its members are young and vigorous veterans, whose zeal and hope for the future have been tempered in the crucible of battle. Serving shoulder to shoulder with them are legislators whose wisdom has been acquired during long years of experience and public service. These are the law makers to whom we shall look for progressive legislation and for sound legislation. We have every reason to look to them with confidence.

The legislation, which I shall propose, will be designed to vitalize the program of governmental advancements,

which I advocated as a candidate for this office. This program was placed before our people through the press, on the radio, and on the stump in three vigorously contested campaigns. Once it received a plurality of votes and twice it received majorities. In view of these events, I believe we can reasonably assume that our people want these improvements.

The revision of our tax structure is the keystone of our entire program. Oklahoma is a young state and has not amassed a huge cash surplus or reserve. However, due to the accomplishments of past administrations, Oklahoma is debt free and is operating on a cash basis, and we do have a small surplus. We are now in a position to move forward under a lighter burden of taxation.

The complete report of our interim legislative committee on taxation is now in the hands of our legislature.

This report represents a comprehensive and factual presentation of our actual tax situation.

It makes specific recommendations for revision of our tax structure. I commend the members of the committee upon completion of an arduous task, and I urge that every member of the legislature and every state official be fully prepared to give earnest consideration to the committee's recommendations.

The community property law of 1945 is, in effect, a tax measure and a good one. We are now ready for other measures. I shall support tax reductions, revisions and adjustments, which will not jeopardize necessary functions of state government.

Chief among the reductions, which I shall recommend, will be a cut in our income tax rates as they affect both individuals and businesses. Reduction of taxes and enactment of laws providing for uniform tax exemptions — both in industry and agriculture — will do much toward attracting new industry — industry to employ our labor in manufacturing enterprises as well as industry that will provide cash markets for our farm and ranch products.

Agriculture is the basic industry of our state, and any program bearing upon the welfare of Oklahoma must place

heavy emphasis on agriculture. As our farms and ranches prosper, so prosper our towns and cities.

The principal needs of our rural communities are embodied in roads, schools, markets, electrification, and improved production methods. Each of these needs is on the agenda of this administration.

I regard the maintenance and construction of rural roads as a vital factor in the attainment of agricultural prosperity. I shall not favor any highway program which ignores, or slights, our farmers in the matter of rural roads.

During this administration, our system of public education is due for considerable improvement. These improvements definitely must include our rural schools.

Through privately owned utilities and the rural electrification administration, electricity has been brought to nearly half the farm homes of Oklahoma. The Grand River and Denison dams have added to our sources of electrical power. The expansion and development of our rural electrification program is a matter of prime importance to our farm families and will be whole-heartedly and enthusiastically supported by this administration during the next four years.

State agencies will foster soil conservation and soil research as a means of increasing production of present crops and as a means of developing new income crops.

Taxation, farm-to-market roads, and soil conservation and research have a definite bearing upon the establishment of year around cash markets for farm and ranch products.

Processors are building plants near the sources of the raw products they need.

These plants provide cash markets for farmers and stockmen, and they produce local payrolls and steady employment in our towns and cities.

Our climate and our products lend themselves to the purposes of farm processing plants. We have not had our share of these plants in the past.

But with a more favorable tax climate, with a depend-

able and adequate road system, with assured production, and with the application of the enterprise and perseverance that has built Oklahoma, we shall be in a position to obtain this very profitable business.

The development of this program will depend to a large extent upon our farmers. They must be able to guarantee enough products to stock the plants continuously. Our state agencies will give every possible assistance to farmers and stockmen in helping them to increase present production and to develop new products.

I feel that the markets can depend upon our farmers — now and in the future. No better criterion of our future in agriculture can be cited than the achievements of our 4-H members, our Future Farmers and our Future Home Makers. Every year, they bring national honor and acclaim to Oklahoma. These programs will receive my personal and official support.

Oklahoma has many natural assets which have not been exploited. In this inauguration audience are representatives of California's great motion picture industry. They are here to make a study of Oklahoma's possibilities as a motion picture producing state. New techniques in color picture production, require direct sunlight, unobscured by haze. Oklahoma is blessed with that kind of sunlight. Pictorial effects require colorful spring and autumn landscapes and fleecy white clouds. Oklahoma is blessed with these, too. The motion picture industry wants a wealth of natural scenery, and we have that.

But we haven't been selling these natural assets. We are going to start selling them now.

We have another great undeveloped asset, which I have mentioned frequently during the last nine months. It is our new system of man-made lakes. Now that we have them, we must make them fit not only for our own pleasure and enjoyment, but also for the pleasure and enjoyment of the many thousands of out-of-state visitors who will find a vacation paradise in Oklahoma. The development of these facilities will be high on the agenda of this administration, and here again private enterprise will have an opportunity to pioneer a new frontier of industry in Oklahoma.

Other states are already profiting from industrial

decentralization, and we have every reason to believe that this decentralization will continue at an accelerated pace. If Oklahoma is to share in the prosperity that comes with the establishment of new industries, we must strike, and we must strike now.

In bringing new industry to Oklahoma we have a two-fold job. First, we must establish a favorable tax climate. Second, we must sell our natural resources and economic advantages.

Our suits, seeking equalization of freight rates, are set for hearing before the United States Supreme Court in February.

New sources of cheap electric power have been developed and within our borders. We are rich in minerals and other raw products of many varieties. We have an abundance of labor, and much of it is highly skilled. It is significant that there was no work stoppage in Oklahoma during the recent coal strike, which paralyzed so many sections of the country.

Our fires still burned with oil and gas. Our climate is conducive to good living conditions, good working conditions, and good flying conditions.

In view of all these factors, Oklahoma is entitled to an industrial future, and we shall have only ourselves to blame if we fail to realize such development. Through tax revision and through a sound selling job we can obtain factories, refineries, aviation investments, textile mills, glass plants and other forms of industry that will produce employment and new wealth for our people.

Tax revision is a legislative matter. Part of the selling job may require nominal state appropriations. Another part of the selling job will depend upon the enterprise and activity of local communities. Good teamwork is required, and I shall do my utmost to produce that teamwork.

During the Democratic primaries and the general election campaign, it was my privilege to visit and talk with the people of every county in the state.

Wherever I went, it was made very clear to me that our state highway and road program was foremost in the

thinking of our people. The highway and road program I advocated then is the same highway and road program I advocate now.

Accordingly, I shall ask for an immediate reorganization of the state highway department. I shall not attempt to change or interfere with the completion of the many millions of dollars worth of highway projects undertaken by the present highway commission.

In advocating reorganization of the highway department, it will be my purpose to give Oklahoma the benefit of a long range highway program, a program based on actual need rather than upon political expediency. In the past, we have seen our highway department personnel and policies change at least every four years. I am convinced that we can never have a continuous and coordinated highway program over a long period of years until this situation is changed. Every section of our state should be represented in the formulation of a statewide road and highway program.

Therefore, I shall ask the legislature for very early action in authorizing the appointment of an eight-member highway commission, one member to be appointed from each congressional district, with all members serving staggered terms, so that members ultimately will serve eight years. In appointing these commissioners, I shall seek the services of men who are willing to serve their state without compensation as a matter of public service. We have such men in Oklahoma, and we should make use of their ability and leadership in the conduct of our government.

Under the plan I advocate, the commission will employ a full-time Director of Highways, who must be a fully qualified executive and highway engineer. The Director of Highways will be responsible for the planning, maintenance and construction of roads and highways subject to the approval of the commission.

No highway and road program will find complete fulfillment within the life of a single state administration, but a program, which will survive changes of administration, will ultimately give us the results we need. Such a program will attain the balance necessary to assure maintenance and construction of our rural roads and will provide safely for our inter-city traffic.

Last November our people approved four public school financing amendments. Although these amendments do not completely solve our school problem, they should assist us in meeting some of our most pressing requirements. If local school districts will now exercise the options given them, every school child in Oklahoma should have a full nine months of education every year.

Our teachers, many of whom have left their profession because of niggardly salary scales, will now see the turning of the tide, a tide that will sweep the teaching profession toward stability and security.

We shall be able to see our way toward keeping our competent educators, and our teacher scarcity ultimately will be overcome.

Operation of our free textbook amendment may be retarded to some extent by legal ramifications and existing contracts. However, it is my wish to see this amendment vitalized within the shortest possible time. Legislation, which will make this program operative, must preclude waste and political manipulation. This legislation must guarantee the people of Oklahoma a square deal on textbooks.

In the field of education, we have a pressing obligation to our Negroes, who are legally and morally entitled to a fully accredited college institution. It is the duty of our state government, and it shall be my objective to see that there is minimum delay in this matter.

I shall also support a broader program of vocational education for Negroes.

The preceding administration has done much to improve our old age assistance program. It is my desire to continue this improvement.

When I became a candidate for governor, I stated that payments to our aged could be increased without additional taxation. The accuracy of this statement has been borne out by recent events. I also stated that administration of this department could be conducted without infringing upon the personal dignity of those receiving old age assistance. I expect to see the accuracy of this statement proved in the very near future.

Although the number of persons eligible for this aid will increase during the next four years, it is my belief that our maximum monthly payments can be increased to \$50, and I shall work toward that objective.

Veterans organizations are now at work on proposals for submission to the legislature. Some of these proposals are in line with the program adopted by the Democratic party in its platform. Other proposals go beyond party pledges.

I shall consider it a duty and an honor to see that every proposal submitted by veterans is given the fullest and most earnest consideration. Every reasonable preference legally at the command of the state government should be given veterans. The state should seek to implement the federal program of the Veterans Administration wherever possible and practical.

We, who stayed at home during the war just past, will never fully realize the magnitude of the sacrifices and hardships endured by our fighting men. We must not permit ourselves to forget that we enjoy our present well being because our armed services risked—and sometimes gave—everything for us.

I do not feel that we shall have done enough for our veterans if we merely provide for them to resume the civilian lives they were living when they entered service. Our country has moved ahead during the years they have been away. Our veterans are entitled to move ahead without being penalized for the years they were in service.

At this time, the Veterans Administration is seeking a site near our University Hospital on which to construct a general hospital for our war casualties. The City of Oklahoma City has agreed to sacrifice an urgently needed park in providing part of the land required.

The state government will be asked to sell the Veterans Administration four and a half acres of land now being held for development of a state medical center. I shall recommend most strongly that the state sell this land as requested.

To refuse, or to quibble about it, would delay the construction of this veterans' hospital for months and

perhaps years. The veterans who will occupy its wards did not refuse or quibble in the face of danger and horror most of us have never known. Whatever we do for them now is still too little.

Our farmers, our teachers, our veterans, our laborers, our businessmen, and our people who receive old age assistance can look toward the future confidently and hopefully. And there are others who should share in our program of advancement. I refer to the mentally ill in our state hospitals.

The state-wide demand for improvement of conditions at these hospitals undoubtedly will receive full consideration and early and sympathetic action by our legislature. We cannot expect to accomplish everything that is needed this year or perhaps within the span of this administration.

Our mental hospitals have not kept pace with demands and advanced scientific methods. It will take some time to make up our lost ground.

In considering the requests for appropriations, that will be presented to our legislature, we must be fair enough to realize that our senators and representatives are law makers—not magicians. The total amount of appropriations they can make will be limited by the amount of money available, and the amount of money available is limited, and in some cases, ear-marked, by measures, which have been directly ratified in state-wide elections.

There are certain to be sincere and honest differences of opinion as to which functions of government should receive preferential consideration.

But we can be very sure that the men and women we have elected to make our laws have a very genuine desire to do the things that will be best for our state.

They must weigh the needs of the state, consider the means of meeting these needs, and make their decisions accordingly. I have confidence in their motives, their judgment and their ability.

Wherever there is a difference of opinion there is certain to be criticism. I expect to be subjected to criticism, and I expect that our legislature and our other elected officials will receive their share of it. I believe that I can

speak for every state official when I say that we shall welcome constructive criticism—criticism that is given in a spirit of helpfulness—but we shall not be taken in, nor will the people of Oklahoma be taken in, by carping criticism made in a spirit of malice and designed only to destroy public confidence in honest officials.

It is appropriate that I announce at this time that this administration will report its conduct of the people's business directly to the people, not only through the press, but also by radio. A network of fourteen Oklahoma radio stations has graciously offered this administration regular use of its facilities for making these reports.

This radio time has been placed at the disposal of the governor as a matter of public service, and, as governor, I shall be most pleased to accept it.

Twice each month the administration will make reports to the people. These reports will be factual and will reflect the progress that is being made on legislation and in the administration of our state departments.

The topics I have discussed today are the same topics I discussed when I asked our people to elect me governor.

The program on which I stood for election has not been changed or forgotten. Contrary to some rather dire predictions, I stand for the same things since election that I stood for before election.

The program I advocate may seem contradictory in respect to the fact that I stand for certain tax reductions while asking improvements in governmental services. I can assure you that I have not advocated this program without taking this factor into consideration.

In many respects, the program I advocate is interlocking. A reduction in tax rates is an investment which will pay dividends in the form of new business in Oklahoma.

In attracting new business our ultimate gains will more than offset our immediate losses in tax revenue, and will otherwise contribute to the general prosperity of our state.

I advocate a thorough-going soil research program which will enable us to sustain new farm markets.

I advocate a long-range road and highway program, with special emphasis on rural roads, so farm products will have a means of reaching their markets, thus contributing to the prosperity of our farms and our towns and cities. I advocate an improved system of public education with improvements in both urban and rural districts. And it follows that the best rural schools in the world would be useless to our farm children, if they were mud-bound and could not reach the schools. Therefore, our educational and road programs are interlocking.

I advocate development of our new lake system, and this program interlocks with our program to bring new business to Oklahoma, business that will patronize our gasoline stations, our hotels, our tourist courts, our restaurants, our drug stores, our department stores, our sporting goods dealers, our garages and our theaters.

This program for development of our lake facilities also interlocks to some extent with promotion of public health and with reduction of juvenile delinquency. It definitely interlocks with our highway program because we must have highway facilities if we are to build and hold a tourist industry.

Yes, this administration does have a program. It is a sound program, a practical program—and it ties together. The people of Oklahoma can be very sure that we have definite objectives and very real opportunities.

We must depend upon our legislature for the attainment of these objectives and for the realization of these opportunities—and to the legislature will go full and deserved credit for everything we accomplish.

I ask the full support of our legislature. I ask the full support of our state governmental departments. And, I ask the full support of our earnest and progressive people in achieving a program of enduring benefit to the state we love.

I ask the guidance of God in fulfilling the public trust that has come to me.

Upon the motion of Senator Porter, the Joint Session was ordered dissolved.

The Senate, in its Chambers, was called to order by the President.

COMMUNICATION

Senator Ritzhaupt asked unanimous consent, which was granted, to have the following Communication read, following which he discussed the conditions referred to therein:

Fort Supply, Oklahoma
January 18, 1947.

Senator L. H. Ritzhaupt,
Box 968,
Oklahoma City, Oklahoma.

Dear Senator Ritzhaupt:

In response to your telephone request, the following is offered:

During the past 10 years we have averaged admitting 499 patients per year. An average of 337, or 66%, were discharged as recovered or improved each year. You will note, however, that an average of 337 were returned to their homes each year out of 499 patients admitted each year. During the same 10-year period we had an average of 150 deaths per year. This death rate is slightly higher than

the death rate among state mental hospitals in the United States but this slight discrepancy can be accounted for by the fact that approximately 70% of all deaths in the hospital occurred among patients who were more than 60 years of age.

The hospital is not merely a hospital for custodial cases although a very large number of custodial cases of necessity are cared for. We are equipped for thorough treatment of acute cases. Much has been said about shock treatment. We have given insulin, metrazol, and electro-shock treatment but recently we have not been giving insulin treatment due to the fact; first, we have been short of personnel; second, we have not seen so much indication for insulin treatment. Many of our state hospitals are concentrating on electro-shock and metrazol shock. During the 12 months ending October 31, 1946, only 63 patients suffering from Manic Depressive Psychoses and Dementia Praecox were admitted. More than one-half of these were readmissions and practically all of them were treated by some form of shock. We have good x-ray equipment and it is used. We have an Occupational Therapy Department for women.

Much has been said about mental hospital equipment in Colorado. The population in Colorado, according to the 1940 census, is less than one-half the population of Oklahoma yet Colorado has 445 patients in their mental hospital per 100,000 population while Oklahoma has 385 patients per 100,000. Colorado has one state hospital in which they care for all classes of patients. The figure for Oklahoma includes all the patients in six institutions; namely, state hospitals in Norman, Vinita, Supply, Enid, Taft and Pauls Valley. According to the 1943 United States Department of Commerce figures, Oklahoma discharged 60% of patients admitted during that year while Colorado discharged 48% of their admission for the same period.

We expended for all purposes for the year ending October 31, 1946, \$389,060.59. The average per capita cost for the year was \$22.69 per month but during the month of October 1946, the per capita cost was \$31.76. Our per capita cost is low but this is not the only criterion by which the quality of service may be judged. We would

like to do much more for our patients than we are able to do now. But I resent the implication that nothing is being done for the acute and recoverable patients for such is not the case. Our greatest needs, as I see them, are; first, additional space; second, additional personnel; third, increased number of physicians on our staff; fourth, an increase in salary appropriation; fifth, more adequate provision for the aged mentally sick.

I am enclosing herewith a marked copy of our latest annual report which covers the period of November 1, 1945 to October 31, 1946.

Very truly yours,

(Signed) John L. Day,
John L. Day, M. D.,
Medical Superintendent.

The Senate was declared at ease.

The Senate reassembled, with Senator Burns presiding.

Senators Lowery and Logan who were delegates from the State Senate to the assembly of states sponsored by the Counsel of State Governments, reported upon the assembly which they attended in Chicago on January 16, 17 and 18th, 1947.

Senator Lowery who was a member of the Resolutions Committee at the assembly, discussed the resolutions which were adopted there and advised the Senate that copies of the resolutions would be available for members of the Senate and the various committees of the Senate. In addition to a general discussion of the resolutions, Senator Lowery called attention to reports from other states which indicated that their legislative system is inflexible because of large membership in the House and Senate, and large memberships of the committees. He called particular attention to the fact that Illinois House of Representatives has 69 members of the Appropriations Committee and the Massachusetts House of Representatives is made up of 359 members.

Senator Logan reported that considerable information

beneficial to the Senate and its Committees would be made available, and that the representatives from Oklahoma at the assembly would be available to advise and counsel with various committees, including the committees on Revenue and Taxation, Constitutional Amendments, Insurance, Appropriations, Education, Water Resources, Veterans Affairs, Rules, and many others.

Senator Logan reported that Oklahoma's fiscal problems were not as serious as the problems confronting many other states. He called attention to the fact that California is considering a biennial budget of one billion dollars and that in Illinois the proposed appropriation for aid to common schools amounts to three hundred million dollars, and that many states were now studying tax increases instead of tax reductions, as is the case of Oklahoma. He also stated that Oklahoma's status as a "debt free" state is in contrast to most of the states which are burdened with debts. He further called attention to information secured at the assembly regarding the growth of governmental functions, reporting that from 1903 to 1940 the expenditures of states and localities has increased 736 per cent, and that the increased costs have resulted from a growth in the educational activities, costs of construction of highways, expansion of welfare activities, and the development and increase of functions of common schools, etc.

Senators Lowery and Logan reported upon the summary of recommendations made in resolutions at the assembly regarding legislative procedure. They stated that Oklahoma was ahead of most state legislatures in legislative procedure, but that Oklahoma was backward in its method of employing technical assistants, and in failure to provide appropriate legislative compensation and a legislative counsel and interim committee. The summary of the recommendations which were read to the Senate, follows:

Summary of Recommendations made in Resolutions at the Council of State Government, Chicago, Ill., January 18, 1947.

1. *Legislative Sessions.* Restrictions upon the length of regular sessions should be removed. If legislatures may be called into special session by governors or by a majority of their members without undue restrictions upon the

measures to be considered, the question of annual versus biennial sessions is largely resolved.

2. *Legislators—Compensation.* From the viewpoint of good public service the compensation of state legislators is now too low. Annual salaries sufficient to permit competent persons to serve in legislatures without financial sacrifice should be provided by statute. Salaries should not be fixed by constitutional provision.

3. *Legislators—Terms.* In order to strengthen legislatures by increasing continuity of membership the lengthening and staggering of legislative terms should be considered. In representative government frequent elections are necessary. Experienced legislative leadership and smoothly operating legislative machinery likewise contribute to the attainment of democratic objectives.

4. *Legislative Employees.* Skilled and essential full-time legislative employees should be appointed on the basis of merit and competence. The tenure of key legislative personnel should be unaffected by changes in party control, and as far as circumstances permit, the working conditions of legislative employees generally should not be less advantageous than those of employees in the executive and judicial departments.

5. *Legislative Committees—Organization and Procedure.* Committees should be reduced in number wherever practicable and organized with regard to related subject matter, equalization of work, and cooperation between legislative houses.

Committee meetings should be scheduled and announced so as to prevent conflicting duties for committee members, and a permanent and public record of committee action should be kept.

6. *Legislative Committees—Public Hearings.* Provision should be made for public hearings on all major bills and advance notice of hearings should be published and made readily available, giving time and place of hearing and subject matter of legislation to be heard and, wherever possible, indicating the number and title of bills. Rules of procedure by committees governing hearings should likewise be published and made readily available.

7. *Legislative Councils and Interim Committees.* Pro-

vision for legislative councils or interim committees with adequate clerical and research facilities deserves serious consideration. These facilities can be provided most readily and effectively through a legislative reference bureau.

8. *Reference, Research, Bill Drafting, and Statutory Revision Services.* Legislative reference, research, bill drafting, and statutory revision services should be reviewed in each state, and strengthened wherever necessary by improved organization and more adequate staffing and appropriations.

9. *Introduction of Legislation.* Consideration should be given to limiting by rule the period during a legislative session when new bills may be introduced. Provision should be made for the drafting, filing, and printing of bills before the opening of the session. All bills and important amendments introduced during a session should be printed promptly after introduction and whenever possible they should be inspected before printing by bill drafters or revision clerks.

Publication of manuals covering the form, style, and grammatical construction of bills is suggested.

10. *Legislative Rules.* The rules of legislative houses should be reviewed and revised wherever necessary to expedite legislative procedure, with due regard for adequate deliberation on measures and fairness to minority parties.

Permanent standing committees or a joint committee on legislative organization, rules, and procedure should be established in some form by each legislature.

11. *Legislative Finance.* The legislature should provide for a budget adequate to meet all probable expenditures during a fiscal period. Provision for a fiscal officer responsible for the centralized custody of legislative personnel, payroll, and expenditure records of each house, and the supervision of legislative expenditures should be considered.

12. *Local and Special Legislation.* Consideration and settlement of claims against the state should be delegated to judicial or administrative agencies, and general, optional, or home rule legislation should provide positive substitutes for special legislation affecting cities, counties, and other

political subdivisions of the states, particularly in matters of purely local concern.

President Pro Tempore Nance presiding.

Senator Porter moved that a Committee of 3 be appointed to draft a Constitutional Amendment for introduction in the Senate, incorporating therein such recommendations, as they may see fit, of the Report of the Resolutions Committee of the Council of State Governments, submitted by Senators Logan and Lowery, which motion prevailed, the President Pro Tempore appointing as such Committee Senators Burns, Chairman, Logan and Lowery.

Upon motion of Senator Porter, the Senate extended a vote of thanks to Senators Logan and Lowery for their representing the State Senate, in Chicago, at the 8th Annual Joint Assembly of the Council of State Governments, on January 16, 17 and 18, 1947, and for their Report incident to said Assembly.

Senator Logan asked unanimous consent, which was granted, that the Secretary of the Senate be instructed to request the Speaker of the Honorable House to appoint a Special Committee of 3 to work with a like Committee of the Senate, previously appointed, in attempting to work out necessary legislation, conforming with the recommendations of the Assembly of State Governments.

Upon request of Senator Porter, 350 copies of SENATE BILL NO. 36, by Porter, et al, were ordered printed.

Upon request of President Pro Tempore Nance, SENATE BILL NO. 35, by Nance of the Senate and Smalley of the House, was ordered printed.

BE IT ENACTED BY THE PEOPLE OF THE STATE OF OKLAHOMA:

SECTION 1. In compliance with Section 23-a, Article 10, Oklahoma Constitution, whenever a surplus accrues to the credit of the Sinking Fund, in the State Treasury

in excess of the amount required to fully pay the State's bonded indebtedness plus interest to maturity (represented by State funding bonds and coupons outstanding), the Governor, State Treasurer and Attorney General shall order such surplus transferred to the Emergency Appropriation Fund in the State Treasury. The amount of the surplus shall be determined by figuring the value of United States Government securities in the hands of the State Treasurer which constitute assets of the Sinking Fund at par value.

SECTION 2. Immediately after the passage of this Act, the State Examiner and Inspector shall make an audit of the Sinking Fund authorized by Section 23-a, Article 10, Oklahoma Constitution, and file such audit with the Governor, State Treasurer and Attorney General, which audit shall determine the amount of surplus, if any, figuring the value of United States Government securities at par to the credit of the Sinking Fund. Within ten (10) days after the filing of such audit, the Governor, State Treasurer and Attorney General, shall cause the surplus determined by them as a result of the audit, to be transferred to the Emergency Appropriation Fund where it shall be available to finance appropriations made by the Legislature from the Emergency Appropriation Fund. SECTION 4. The Governor, State Treasurer and Attorney General are further authorized to exchange securities held in said fund for the surrender and payment of an equal amount of said State funded indebtedness; provided further, said officials may agree to pay from the Sinking Fund account to the holders of State bonds any difference in interest which the State bonds earn in excess of the amount the United States Government securities would earn during the life of the State bonds; provided, that if the United States Government securities earn interest in excess of the interest earned by the State bonds, no such exchange of securities shall be authorized or made unless the State receives in the exchange an amount of money equivalent to the excess interest earned by the United States Government securities.

SECTION 5. The State Treasurer is hereby designated as the custodian of the moneys and securities to the credit of the Sinking Fund authorized by Section 23-a, Article 10, Oklahoma Constitution, and he shall be liable on his official bond for the safekeeping of the same.

SECTION 6. House Bill No. 1, Extraordinary Session of the Nineteenth Legislature, same being Title 62, Chapter 1, Oklahoma Session Laws 1944, is hereby repealed.

The Committee further recommends, to the Senate that it suspend its rules relative to the number of days in which nominations are required to be considered by the

Committee and that these nominations be confirmed on Thursday, January 30th, 1947, for the following reasons:

1. The Legislature will not be in session on Friday, January 31st, which is the fifth day since the nominations were made and, therefore, an unnecessary delay until the following Monday would occur if the nominations are not confirmed, and

for the further reason, that it is considered advisable by this Committee and recommended to the Senate that these nominees be serving in their official capacity under the appointments by the first day of February, 1947, which is Saturday.

2. For the further reason, that one of the nominations, the Honorable JOE M. WHITAKER is a former Member of this Senate and his qualifications and character and high purpose in all of his endeavors are well known to the Members of the Senate, and

The other two nominees, the Honorable J. D. DUNN and the Honorable M. C. SENATE BILL NO. 91—By Gary—Referred to the Committee on Public Welfare and Social Security.

Senator Ritzhaupt asked unanimous consent, which was granted, that SENATE BILL NO. 85, by Ritzhaupt, be ordered printed.

Senator Worthington presiding.

Senator Ritzhaupt asked unanimous consent, which was granted, that an Article appearing in the December, 1946, issue of FRIENDS OF THE PUBLIC SCHOOLS OF AMERICA, Inc., Headquarters 20 West Jackson Blv'd., Chicago, Illinois, be read and incorporated in the Senate Journal, which was as follows:

"STRIKES BY PUBLIC SCHOOL TEACHERS

"The first strike by public school teachers which came to our notice was in Connecticut. We received notice of that strike with utter astonishment, not to say consternation. It is opposed to all the ideals of American education, of the high standard of citizenship, patriotism and regard for law and lawful procedure in all matters, which had been our ideal of the teacher from our earliest school days.

"We believe, as we stated in our November issue, that these teachers' strikes should be and must be condemned by every lover of our public school system. Teachers are public servants just as much as army officers, as are civil service employees whether of the United States or of a state or lesser civil government unit. There is no authority in law of any kind of which we have ever heard that justifies teachers in striking.

"As we said in the November issue, the teacher teaches character more by his life and personal actions than by his admonitions and words of advise. Already we are hearing more and more of children's strikes. THIS IS MOB RULE AND NOTHING ELSE.

"Also we had read of picketing of schools in St. Paul. Now what is picketing for—simply to stop anyone else from teaching in the school or children attending that school.

"It is an exhibit of lawlessness in preventing Americans from enjoying the fundamental American right of a man to work and of another to employ. It is fundamentally right for a man to quit a job when he has fulfilled his contract and not before, unless the employer breaks it, but that gives him no license under the American Constitution and American ideals to prevent any other man taking up that job and working at it as he chooses.

"We have strayed far from that fundamental right. Somehow we have got to get back to it or the liberties which we have so proudly hailed in the past, and still give utterance to on every occasion, will be gone forever.

"The final answer to strikes with picketing and rioting and bloodshed is dictatorship as it was in Germany, Italy, Japan, and is in Russia and other communist countries today. With a government owning everything and operating everything, a strike for any cause is a strike against the government, and in a total dictatorship that means a striker will meet any punishment the dictator decides to impose. That may be slave labor, banishment, or death.

"We cannot conceive of inalienable rights in anything when a man cannot work at a job where his employer wants him to work. All progress has arisen because

men felt that they could work where they wished, do with what they earned as they wished, so far as they did not interfere with others exercising the same rights, rear a family, build a home and transmit to their children any property they had left when they passed on.

"This we conceive to be fundamental, and when teachers begin to break down this fundamental they begin to teach children to continue the process until all liberty vanishes in a dictatorship."

BE IT ENACTED BY THE PEOPLE OF THE STATE OF OKLAHOMA:

SECTION 1. This act shall be known as the Oklahoma Budget Law of 1947; an act vitalizing the Constitutional Amendment to Section 23, Article 10 of the Constitution of the State of Oklahoma, adopted by a vote of the people on March 11, 1941; prescribing the duties of the State Auditor in compliance with Article 6, Section 1, Constitution of the State of Oklahoma.

SECTION 2. The Governor shall appoint a Budget Director who shall hold office at the pleasure of the Governor and whose salary shall be Six Thousand Dollars (\$6,000.00) per annum, payable monthly.

SECTION 3. There is hereby created in the Executive Department, a Division of the Budget and a Division of Central Accounting and Reporting, under the administrative control of the Budget Director and directly responsible to him.

SECTION 4. The Budget Director shall have the power, and it shall be his duty under the direction of the Governor, to; (1) prepare the budget document and draft legislation to make it effective, (2) to make field surveys and studies of governmental agencies, looking toward economy and greater efficiency; (3) to make allotments to control expenditures, (4) to authorize transfers of appropriations authorized by law, (5) to study accounting and other reports rendered by the Central Accounting Office and Departmental Services, and (6) to aid the Governor in the economical management of State affairs.

SECTION 5. On July 1, 1947, the Division of Central

Accounting and Reporting shall take over the accounting and auditing duties now performed by the claim auditing and bookkeeping sections of the State Board of Public Affairs; the auditing and settlement of purchase orders, contracts, claims, payrolls and other obligations now performed by the Pre-Audit Division and the Bookkeeping and Accounting Division of the present State Auditor's Office.

Effective with the passage of this act, the Division of Central Accounting and Reporting shall prepare uniform budget and accounting classifications for all State departments, boards, commissions, institutions and agencies now delegated to the Governor and there shall also be transferred to this Division the work of installing modern accounting methods in the State departments and institutions now delegated to the State Examiner and Inspector. The positions now authorized for this work in the several offices and the equipment now used by the personnel of these offices, shall on July 1, 1947, be transferred to the Division of Central Accounting and Reporting within the Executive Department. The functions of the Division of Central Accounting and Reporting shall be: (1) to settle all claims payable by the State, (2) to verify distribution of all taxes and other dues collected for local governments, (3) to superintend the recovery of all debts due State Government, (4) to keep the central budget and proprietary accounts of the State Government, (5) to prepare and issue financial and accounting reports periodically, at least quarterly, (6) to prescribe all forms, systems and procedure for administering accounting for the several departments and establishments, (7) to certify to the Budget Director for his approval, each and every requisition by duly accredited disbursing officer for an advance of funds from the Treasury, and (8) to establish a Pre-Audit System of settling claims, either for the entire State Government, or for any bureau, or bureaus, of departments thereof, under which system vouchers supporting proposed payments shall be submitted to the Budget Director for audit and settlement.

SECTION 6. Appropriations made by the Legislature for the fiscal year beginning July 1, 1947 and thereafter, shall not be available for contractual or expenditure purposes until allotted as provided in this act. Appropriations made by the Legislature to each State department, board, commission, institution or agency, are hereby declared

to be maximum, conditional and proportionate appropriations, the purpose being to make appropriations payable in full in the amounts named only in the event that the estimated budget resources within each State fund during each fiscal year are sufficient to pay all the appropriations for such fiscal year in full. The purpose of this provision is to insure that there shall be no overdraft or deficit in the several funds of the State at the end of any fiscal year, and the Budget Director is directed and required so to administer this act to prevent such overdraft or deficit.

SECTION 7. On or before the first day of June in each year, each State department, board, commission, institution or agency, hereinafter referred to collectively as "spending agencies", which has received an appropriation for its operation, maintenance or other purpose or purposes, which appropriation will be available for the ensuing fiscal year, shall file with the Budget Director, on forms provided by him, a work program for the ensuing fiscal year, such program to include all appropriations made available to the spending agency and setting out allotments requested by such spending agency, by quarters, for the entire fiscal year. Such program and allotment requests shall be signed by the executive officer of the spending agency and may be made by the officer hereinafter called "request officer", who shall be designated by each spending agency for that purpose. All acts of the Legislature appropriating money to any department, board, commission, institution or agency, beginning with the appropriations which become available for the fiscal year beginning July 1, 1947, including non-fiscal appropriations which are to be financed from the revenue for the fiscal year beginning July 1, 1947, and for each succeeding fiscal year thereafter, shall not be available for expenditure until the request officer of such spending agencies has complied with the provisions of this act relative to allotting appropriations and has received an approval of such request from the Budget Director.

SECTION 8. Federal funds received by any agency of the State shall be deposited in the State Treasury and disbursed upon warrants issued by the State Auditor and shall be subject to the other fiscal controls imposed by this act, except where federal laws and/or regulations of the federal agency which makes such funds available to

the State requires federal funds to be granted, deposited, allocated or expended through channels other than those required by the provisions of this act.

SECTION 9. Effective July 1, 1947 and thereafter, appropriations and/or federal funds, shall be allotted for each spending agency by the use of a method which shall be known as the Line Item method of allotting appropriations whereby items requested may be allotted on either a monthly, quarterly, semi-annual or annual basis upon the written request of the agency concerned and the approval of the Budget Director. The request officer for each spending agency shall show on the forms provided, how he proposes to classify the expenditures for that spending agency. The Budget Director shall review the requested allotments with respect to the work program with each spending agency and shall, if he deems it necessary, require said spending agency to revise, alter or change such allotments before approving the same, reserving a sufficient balance in the appropriation to finance the operations of the spending agency for the remainder of any fiscal year. At the end of any fiscal year, the entire amount appropriated to any spending agency must be allotted by the Budget Director, except where the estimated budget resources during any fiscal year are insufficient to pay all of the appropriations for such year in full. The Budget Director shall not allot to any spending agency during any fiscal year, an amount which will be in excess of the amount of revenue collected and allocated to appropriations made to such spending agency. In the event of a failure of revenue, the Budget Director shall control the allotment authorizations to prevent obligations being incurred in excess of the revenue to be collected. However, the Budget Director shall make all reductions within each State fund where a revenue failure occurs apply to each department, institution, board, commission or special appropriation made by the State Legislature, in the ratio that its total appropriation for that fiscal year bears to the total of all appropriations for that fiscal year, as provided in Section 23, Article 10, of the Constitution of Oklahoma. Appropriation allotments may be approved for any item for the entire year or may be approved on a monthly, quarterly, or semi-annual basis, but in no case shall the aggregate of such

allotments for any spending agency exceed the total appropriation made available to such spending agency for the fiscal year to which they apply. Each spending agency's request for appropriation allotments shall show the amount required to finance each item of the request for the entire year and for each quarter beginning July 1st, October 1st, January 1st and April 1st, within each fiscal year. The Budget Director shall consider the allotment request for the purpose of making a determination of: (1) That such itemized requests are in accordance with the budget plan approved by the Legislature; (2) that the accounting classification is sufficient to reflect the purposes for which expenditures are to be made; (3) that the current financial requirements of the spending agency concerned, justifies the allotment to be made for each quarter, reserving a sufficient balance in the appropriation to finance the remaining quarters; (4) that the realization of the estimated revenues is sufficient to allow the commitments to be made. The Legislature shall be exempt from submitting any program of work or quarterly allotment request.

SECTION 10. The Budget Director shall, if he approves the requested allotments, transmit a copy as approved to the request officer of the spending agency concerned and also a copy to the Division of Central Accounting and Reporting. Legislative appropriations which serve as the legal basis for expending the State's moneys, and against which allotments shall be made, shall be set up on the records of the Division of Central Accounting and Reporting. The allotments approved by the Budget Director against such appropriations, shall be the portion of the appropriation set aside to cover encumbrances and expenditures for a designated purpose during a monthly, quarterly, semi-annual or annual period. The allotments authorized by the Budget Director shall be filed with the Division of Central Accounting and Reporting and shall be set up on the records of the Division of Central Accounting and Reporting in such accounts as may be required by the Budget Director. The Division of Central Accounting and Reporting shall not approve claims for payment in excess of the amount allotted for each account approved by the Budget Director. After the first allotments have been authorized by the Budget Director for each agency of the State, subsequent allotments may be authorized upon the request of the agency con-

cerned and with the approval of the Budget Director. The Budget Director may authorize new accounts in addition to those requested in the original allotment request, or may increase the amount allotted for a monthly, quarterly, semi-annual or annual period. A balance remaining in any of the allotment accounts at the end of any monthly, quarterly or semi-annual period, shall be available for expenditure the subsequent period; however, subsequent allotment requests and the Budget Director's approval should take into consideration any unencumbered or unexpended balance remaining at the time such subsequent requests are approved.

SECTION 11. Segregation of Lump Sum Appropriations. When, in any act, lump sum appropriations are made for personal service, or for maintenance and operation, or for maintenance and operation including personal service, other than such appropriations for the legislature, judiciary, or for expenses of holding elections, no moneys so appropriated shall be available for payments for personal service, or maintenance and operation, or maintenance and operation including personal service, except specified appropriations for temporary services or day labor, until a schedule of positions and salaries and the amounts to be available for the expenses of maintenance and operation shall have been approved by the Director of the Budget and a certificate of such approval filed with the request officer of the spending agency concerned and the Division of Central Accounting and Reporting. Any such approved schedule may be amended, however, with the approval of the Director of the Budget and the filing of a certificate thereof as provided above. The request officer for each spending agency shall show on the forms provided, how he proposes to classify the expenditures for that spending agency, and such classification shall follow, (except for items peculiar to certain departments or institutions), the uniform budget and accounting classifications adopted for similar spending agencies. The Budget Director shall not have authority to fix the amount of salary or eliminate any position listed on such schedule. However, he shall not approve said segregation schedule in the event the total requested to be allotted fails to reserve a sufficient balance of the lump sum appropriation to finance the operations of the spending agency concerned for the remainder of that fiscal year, considering any

possible failure in the revenue estimated to be collected for that fiscal year. The Budget Director shall not have the authority to curtail the operation of any particular part of the program, but shall order a reduction in the total program only where insufficient revenues are anticipated to carry on the program for the period concerned.

SECTION 12. Upon request of the administrative head of any department, institution, or agency, or by the designated member or employee of any board or commission, who has been authorized by said board or commission to make such requests; any item of the current appropriation, or appropriation allotment, for said department, institution, board, commission, or agency, may be transferred to any other item within the same department, institution, board, commission, or agency, with the written approval of the Budget Director. Transfers may be made from funds appropriated by one act, to funds appropriated by another act as long as the total appropriation for the spending agency concerned does not change.

SECTION 13. All departments, institutions, or agencies of the State which are operating either partially or entirely from revenues derived from sources other than legislative appropriations, shall file requests for allotments under the same provisions herein stated as are required for direct legislative appropriations which distinctly specify the amount appropriated. The Budget Director shall approve such requests for allotments on a Line Item basis, if the estimated revenues accruing to such fund are sufficient to finance such allotments within the period for which the items are approved, and if the account classification is sufficient to show the purposes for which the money is to be expended, except that obligations as they are incurred may not exceed the unencumbered balance of surplus cash on hand in accordance with Section 23, Article 10, Constitution of the State of Oklahoma. The Budget Director may require a more detailed breakdown of accounts before he approves such requests if the request fails to show sufficient information for the Division of Central Accounting and Reporting. This section shall apply to such spending agencies as the State Highway Department, Fish and Game Department, Oklahoma employment Security Commission and other spending agencies

operating under similar financial arrangements, including federal funds received by any spending agency of the State, but shall not apply to donated funds, trust funds or funds of an agency relationship.

SECTION 14. The Oklahoma State System of Higher Education, established by Article XIII-A of the Constitution of this State, shall operate an allotment system similar to the procedure set out in this act for other agencies of the State, except that the Oklahoma State Regents of Higher Education shall be substituted for the State Budget Director in connection with approving allotment requests of the constituent institutions comprising the Oklahoma State System of Higher Education. The account classification for the State System of Higher Education shall conform as nearly as possible with the classification of accounts recommended by the National Committee on Standard Reports for Institutions of Higher Education. The Board of Regents shall allocate to each institution under its control from the consolidated, or lump sum appropriation made by the Legislature, an amount sufficient to meet the needs and functions of each institution for the entire year as is now provided by law, or may hereafter be provided by law. The amount allocated to each institution for each fiscal year in accordance with Article XIII-A, Oklahoma Constitution, shall be made in a lump sum without regard to uniform budget or accounting classifications, but shall not be available for expenditure until subsequently allotted by the Regents in accordance with the uniform budget and accounting classifications recommended by the National Committee on Standard Reports. The Regents, with the approval of the Budget Director, may allot money to any constituent institution under said Regents to set up and operate a petty cash fund at said institution, said fund to be reimbursed upon the filing of claims showing the purposes for which the funds were expended. The Division of Central Accounting and Reporting shall make cash allocations of revenue in accordance with Section 23, Article 10, Constitution of Oklahoma, to each of the constituent institutions, considering the total allocation made by the Regents from the lump sum legislative appropriations as the total appropriation for each institution, in lieu of legislative appropriations. All institutional income available for educational and general purposes, as defined in the uniform budget and ac-

counting classifications recommended by the National Committee on Standard Reports, and including income defined by law as revolving fund income, shall operate as a continuing non-fiscal appropriation which may be spent for any educational and general purposes for which appropriated funds may be spent, if allocated and allotted as provided in this section; provided that the obligations as they are incurred may not exceed the unencumbered balance of cash on hand in accordance with Section 23, Article 10, Constitution of the State of Oklahoma. At least thirty (30) days prior to the beginning of each fiscal year, each of the constituent institutions shall file with the Regents its request for appropriation allotments for each of the purposes for which expenditures are to be made. Such requests shall be broken down to conform to the uniform budget or accounting classifications recommended by the National Committee on Standard Reports. Each institution's request for appropriation allotments shall show the amount required to finance each item of the request for the entire year and for each quarter or each six-months period within the fiscal year, as required by the budget director. The Regents, or their designated official or employee who has been authorized to approve itemized allotment requests, shall consider the allotment requests for the purpose of making a determination of: (1) That the current financial requirements of the institution concerned justify the allotment to be made; (2) that the accounting classification is sufficient to reflect the purpose for which expenditures are to be made and that such classification is in accordance with the budget classifications adopted by the Budget Director and the Regents, which shall conform as nearly as possible to the account classification recommended by the National Committee on Standard Reports for Institutions of Higher Education; (3) that the realization of estimated revenues determined by the Budget Director is sufficient to allow the commitments to be made. In allotting appropriations and other funds, and approving subsequent allotments which may be required by each institution, the Regents shall follow the same general procedure set forth in this act for other agencies of the State not under the control of said Regents, except as otherwise provided in this section. All forms and account classifications shall be mutually agreed upon by the Budget Director and the State Regents. The Regents

shall file approved requests of constituent institutions with the Division of Central Accounting and Reporting and such approved requests shall be entered on the records of the State in the same manner as is provided in this act for other agencies of the State. The State Regents and the Budget Director shall approve any request from the administrative head of a constituent institution for amendment of the approved schedule of positions and salaries, or transfers between items, so long as the currently approved allotment for such purposes is not exceeded; and each such amendment shall be filed with the Budget Director, in such detail as he may require, prior to the date on which the first payroll or other disbursement affected by such amendment is submitted for payment. In the event that the realization of estimated revenues at any time during the fiscal year indicates that the total revenue for that fiscal year to any State fund will be insufficient at the end of the fiscal year to meet the total appropriations from that fund, the State Budget Director shall notify the Oklahoma State Regents of Higher Education as to the amount of reduction necessary against the consolidated, or lump sum appropriations, made to the Regents. The Regents in making itemized allotments during the fiscal year, may reserve an amount sufficient to meet a reasonable failure of revenue until receipt of notice from the Budget Director that the realization of estimated revenues indicates that the total appropriation may be allotted for expenditure. Upon receipt of notice from the Budget Director of a necessary reduction in the consolidated, or lump sum appropriation, to meet a failure in revenue, the Regents of Higher Education shall immediately take action to control the approval of subsequent allotment requests sufficient to make the aggregate reduction in allotments of all constituent institutions under their control equal the amount of reduction ordered against the lump sum appropriation made by the Legislature. Such reductions against the lump sum appropriation shall not exceed the percentage reduction ordered against other agencies of the State in accordance with Section 23, Article 10, Oklahoma Constitution.

SECTION 15. Effective July 1, 1947 and thereafter, the Division of Central Accounting and Reporting shall allocate all revenues thereafter deposited to the credit of any fund in the State Treasury except the Public Building

Fund, in accordance with the provisions of Section 23, Article 10, of the Constitution of Oklahoma, as amended on March 11, 1941, and House Bill No. 30, Regular Session of the Twenty-First Legislature.

The Budget Director may require that appropriations for capital outlay be financed by a separate cash account so that allocations of cash to any agency for purposes of constructing buildings, making improvements, purchasing equipment, etc., may not be used to finance the current operations of the institution, department, or agency.

Appropriations which are non-fiscal for contractual and expenditure purposes, shall be considered fiscal for revenue purposes, but may be allotted for expenditure at any time within thirty (30) months from date such acts are passed. Revenue which accrues to the credit of the Public Building Fund in the State Treasury which derives its revenue under the provisions of Title 74, Section 98, O. S. 1941, shall be allocated to the appropriations from the Public Building Fund in consecutive order. The Governor shall designate the order of payment of the appropriations from the Public Building Fund. The Budget Director shall allocate the collections sufficient to pay the first appropriation designated by the Governor, before he allocates any amount to the second and so on, until all appropriations are provided for. The contracting agency receiving such appropriation shall not contract the same until revenue has been allocated as provided in this act.

SECTION 16. Whenever departments, institutions, boards, commissions or agencies of this State enter into contracts for, or on behalf of the State for the purchase of goods, wares, or merchandise, or for construction of buildings, roads, bridges, or any other thing for which labor and materials must be furnished by outside vendors, such agreement shall be evidenced by written contracts or purchase orders, and must be transmitted to the Budget Director immediately upon execution of such agreement. The Budget Director shall charge such contracts, purchase orders or agreements, against the proper appropriation allotment account as an outstanding order until it is liquidated by payment of a claim, or claims, against said contracts or purchase orders, or by cancellation. The State Board of Public Affairs may grant authority orders to institutions under its control, or to agencies of the State

which are required to make purchases through said Board, to make emergency purchases without issuing departmental or institutional purchase orders, provided the amount of such authority does not exceed the amount of emergencies ordinarily incurred by such agency during a period of thirty-one (31) days. Only one authority order may be issued to each agency during each month. Authority orders for emergency purchases issued under this section, shall be issued for a period not to exceed thirty-one (31) days, and shall be cancelled by the Budget Director without notice from the agency concerned within sixty (60) days from the date of issue. In the event the authority to contract for any period is exceeded by any agency of the State, it shall be unlawful for the State Board of Public Affairs to authorize payment from an authority order issued in a subsequent period. The administrative head of any agency shall be personally liable for obligations incurred in excess of the authority granted for any period. The Budget Director shall never authorize payment of claims for the purchase of goods, wares and merchandise, or claims for contractual services, for any agency of the State unless it is supported by; (1) contracts or purchase orders of the State Board of Public Affairs, or (2) institutional purchase orders or contracts, or (3) departmental purchase orders or contracts, or (4) authority orders. The Budget Director shall record all contracts, purchase orders, institutional purchase orders, departmental purchase orders and authority orders against the proper appropriation allotment account as an outstanding order until it is liquidated by payment of a claim, or by cancellation. Any agency of the State which has entered into a contract for, or on behalf of the State, may enter into a supplemental agreement the evidence of which shall be shown by a change order against the original contract or purchase order and filed with the Budget Director. Whenever any agency of the State is authorized by law or by the State Board of Public Affairs, to make purchases for, or on behalf of the State, said agency shall have the authority to issue departmental or institutional purchase orders therefor. In the event a claim is not filed by the vendor for emergency purchases made under an authority order before such order is cancelled, the agency concerned may issue a departmental or institutional purchase order to authorize payment of the amount due.

SECTION 17. The State Budget Director is hereby authorized to revise and prescribe the blank claim forms and payroll forms to be used by the various agencies of the State. Any agency of the State may file a claim against more than one item of the current appropriation allotments within the same fund by indicating on the claim or payroll in the space provided, the allotment account, or accounts, to be charged and the State Budget Director shall charge the same to the account, or accounts, indicated after proper audit and approval. Payroll forms are hereby authorized for use in claiming amounts due individually to all employees within a department, board, commission, institution or agency of the State when the bonded executive head or bonded employee of such spending agency certifies on the payroll form that the amount shown after each named employee is the amount due for the period of time shown on the payroll form. Each payroll form shall show in separate columns the total earnings, the amount of each type of withholding and the net amount due each employee. Withholdings may be reserved by the Budget Director to be paid to the proper governmental agency by subsequent lump sum payments.

SECTION 18. The State Auditor shall be the disbursing agency of the State and shall draw either checks or warrants payable at the State Treasury, in payment of all claims, including payrolls, against the State which shall be by law directed to be paid out of the Treasury. Each check or warrant shall be numbered consecutively within each State fund authorized by law, and shall specify the date of its issue and the name of the person to whom payable. Each check, or warrant, issued by the State Auditor, shall specify on its face the gross amount, the amount of withholding if any, and net amount payable to the payee. At the end of each month the State Auditor shall report to the Budget Director, all warrants or checks issued during the month, showing the beginning and ending number and the total amount issued by funds.

SECTION 19. Effective July 1, 1947, and thereafter, all warrants, checks, bonds and interest coupons redeemed by the State Treasurer and a duplicate of each and every receipt issued by him for moneys received into the State Treasury, shall be delivered immediately to, and receipted for, by the Budget Director who shall maintain such docu-

ments as a permanent record of his office. It shall be the duty of the State Budget Director to audit such redeemed documents and to apportion and distribute the collections as indicated by the State Treasury receipts to the respective funds and accounts to which the same shall have accrued, or may belong. In the event that non-payable warrants are issued pursuant to the provisions of Section 23, Article 10, of the Constitution of the State of Oklahoma, it shall be the duty of the Budget Director to issue and publish the official call for payment for any warrants that may be outstanding and registered as "non-payable." Notice of such call shall be published in some newspaper of general circulation, published at the State Capitol and interest on all warrants so called for payment shall cease on or after ten days from the date of the first publication of such notice. The State Auditor shall be responsible for the custody of claims certified to him for payment which call for the disbursement of money from the Treasury. Such claims shall be maintained in files accessible to the Division of Central Accounting and Reporting and the employees of the Division of Central Accounting and Reporting shall have authority to inspect such claims for the purpose of making accounting adjustments on the records maintained by the Budget Director.

All warrants, checks or orders issued by the State Auditor in payment of obligations of the State which shall for any cause remain outstanding or unpaid for a period of one year after funds are available for their payment shall be revoked and cancelled, and the State Budget Director shall forthwith make proper entry thereof on the records of his office and shall notify the State Treasurer and State Auditor of the fact of such entry of cancellation and thereafter no such warrants shall be paid except that the holder of any warrant or order that may be cancelled pursuant to the provisions of this section, may file the same with the Budget Director by whom it shall be retained and reported to the next session of the Legislature for payment out of such funds as it may provide therefor by appropriation.

SECTION 20. The State Auditor shall execute a bond payable to the State in the sum of Fifty Thousand Dollars (\$50,000.00) conditioned for the faithful performance of his duties with some surety company authorized

to do business in this State, as surety, which bond shall be approved by the Governor and filed in the office of the Secretary of State. Each of the employees in the office of the State Auditor shall execute a like bond in the sum of Five Thousand Dollars (\$5,000.00) to be approved and filed in like manner as the bond of the State Auditor.

SECTION 21. Effective July 1, 1947, and thereafter, all claims and payrolls which are to be used to authorize the payment of money from the State Treasury, shall be filed with the State Budget Director for audit and settlement prior to being filed for payment with the State Auditor. The Division of Central Accounting and Reporting shall pre-audit all claims against contracts, purchase orders and other commitments which have been previously approved by the Budget Division before entering such claims against the appropriation allotment accounts. After claims and/or payrolls have been properly audited and recorded against the respective appropriation allotment accounts, the Division of Central Accounting and Reporting shall certify such claims and/or payrolls to the State Auditor for payment. It shall be the responsibility of the Division of Central Accounting and Reporting to determine, (1) that all legal requirements concerning the expenditure of moneys involved in each claim or payroll have been complied with, (2) that funds have been properly and legally allotted for the payment of the claim or payroll and that a sufficient balance exists for the payment of same. Sufficient space shall be provided on each claim and/or payroll for the Budget Director to indicate that the claim or payroll has been approved for payment by the Division of Central Accounting and Reporting. The Budget Director shall authorize bonded employees in the Department of Central Accounting and Reporting to execute the signed approval of each claim or payroll which shall be certified to the State Auditor for payment. The State Auditor shall write checks or warrants in payment of claims and payrolls certified to him for payment by the Division of Central Accounting and Reporting. All such checks or warrants shall be countersigned by the State Treasurer before being released to the payee. Warrants and checks shall be registered in consecutive order within each fund by the State Auditor and State Treasurer. The Division of Central Accounting and Reporting shall show

on each claim or payroll the warrant or check number, or numbers, to be used by the State Auditor in making payment of claims or payrolls so that the records of both offices will reflect the correct warrant or check number, or numbers, used to pay each claim or payroll.

SECTION 22. The Budget Director shall execute a bond payable to the State in the sum of Fifty Thousand Dollars (\$50,000.00), conditioned for the faithful performance of his duties, with some surety company authorized to do business in this State, as surety, which bond shall be approved by the Governor and filed in the office of the Secretary of State. Each of the assistants under the Budget Director who are required to certify claims to the State Auditor for payment, shall execute a bond payable to the State in the sum of Ten Thousand Dollars (\$10,000.00), conditioned for the faithful performance of their duties, with some surety company authorized to do business in this State, as surety, which bond shall be approved by the Budget Director and filed in the office of the Secretary of State.

SECTION 23. The Budget Director, with the approval of the Governor, shall employ and make the appointment of such experts and assistants as may be necessary to execute the purposes of this act. No appointments to positions shall be made in excess of the position authorized by act of the Legislature for the Division of the Budget and the Division of Central Accounting and Reporting.

SECTION 24. The State Auditor shall employ, and make the appointment of such assistants as may be necessary to execute the purposes of this act. No appointments to positions shall be made in excess of the positions authorized by act of the Legislature for the State Auditor's Office.

SECTION 25. Nothing contained in this act shall be interpreted to change the purchasing functions of the State Board of Public Affairs, or said Board's control over penal and eleemosynary institutions. The bookkeeping and auditing functions pertaining to the approval of claims against the State, effective July 1, 1947, shall be transferred to the Division of Central Accounting and Reporting and thereafter the State Board of Public Affairs shall not be required to approve claims calling for the payment of money from the State Treasury. This section shall not be

construed as abolishing or transferring the position, duties or functions of the institutional auditor or the employees engaged in purchasing or institutional control functions for the State Board of Public Affairs.

SECTION 26. Individual claims and/or payrolls listing amounts claimed by more than one person which are used as the basis for the payment of money from the State Treasury from any fund, shall be approved only by the elected or appointed head of any State department, or by the appointed head of any State institution. State boards or commissions may designate an administrative employee to approve claims and payrolls for said boards or commissions. All officials and employees authorized to approve claims or payrolls if not already under bond for such purpose, shall execute a bond payable to the State in the amount required by the Budget Director, but not to exceed Twenty-Five Thousand Dollars (\$25,000.00), unless otherwise provided by law, conditioned for the faithful performance of their duties, with some surety company authorized to do business in this State, as surety, which bond shall be approved by the Budget Director and filed in the office of the Secretary of State. After state claims and/or payrolls have been approved by the above officials and employees, they shall be filed with the Budget Director for auditing and settlement.

SECTION 27. The Governor may, in his discretion, issue a deficiency certificate or certificates, for the benefit of any department, institution, or agency of the State, if the amount of such deficiency certificate, or certificates, be within the limit of the current appropriation for that department, institution, or agency, whereupon the State Auditor shall issue warrants to the extent of such certificate or certificates for the payment of such claims as may be authorized by the Governor, and such warrants shall become a part of the public debt and shall be paid out of any money appropriated by the Legislature and made lawfully available therefor; provided further, that in no event shall said deficiency certificate, or certificates, exceed in the aggregate the sum of Five Hundred Thousand Dollars (\$500,000.00) in any fiscal year.

SECTION 28. The warrants issued under the authority of any deficiency certificate shall bear interest at a rate

to be fixed by the State Depository Board not to exceed four percent (4%) per annum.

SECTION 29. On the first day of September biennially in the even numbered years and prior to each regular session of the Legislature, each of the several State departments, bureaus, divisions, officers, commissions, institutions and other agencies and undertakings which receive or ask financial aid from the State of Oklahoma, shall report to the Budget Director on official estimate blanks furnished for such purpose, an estimate in itemized form showing the amount needed for each year of the ensuing biennial period beginning with the first day of July thereafter. The official estimate blanks which must be used in making these reports, shall be furnished by the Budget Director, shall be uniform, and shall clearly designate the kind of information to be given thereon. Departments, institutions or agencies which receive all, or part of the revenue to finance the budget operations of said agencies from laws allocating revenue to such agency without specific legislative appropriations being made therefor, shall make an itemized estimate of needs for each year of the ensuing biennium and an estimate of the revenues and appropriations to be received by said agency during each year of the same biennium.

SECTION 30. The departments, institutions, boards, commissions and agencies of the State, upon request shall immediately furnish the Budget Director in such form as he may require, any information desired by him in his relation with their respective affairs or activities.

SECTION 31. It shall be the duty of the Budget Director after making a complete detailed study of each department, institution, board, commission and agency, to prepare the budget under the supervision and direction of the Governor.

SECTION 32. In any year in which a Governor-elect assumes office, the budget shall be the budget of the new Governor and shall be submitted to the Legislature by him. The Division of the Budget shall render to the Governor-elect all possible assistance in the preparation of the budget. The Governor and the departments, institutions or agencies of the State shall furnish the Governor-elect estimates and other budget information, in order that the

Governor-elect may discharge effectively his budget responsibilities upon assuming office.

SECTION 33. The budget shall be submitted to the Legislature in printed form. Such budget shall be in two parts: (1) a budget message outlining the fiscal policy of the State for the biennium and describing the important features of the budget plan; giving a summary of the budget setting forth aggregate figures of proposed revenues and expenditures and the balanced relations between the proposed revenues and expenditures and the total expected income and other means of financing the budget compared with the corresponding figures for the preceding biennium; including explanatory schedules classifying proposed expenditures by organization units, objects and funds; giving estimated statements of assets and liabilities as of the close of the preceding biennium and of the budget biennium; explaining any proposed major increases in revenue from any existing source or any new source of revenue proposed and giving any further information or making any suggestions; (2) the detailed budget estimates of revenues and expenditures for each fund as provided for in this act showing the recommendations of the Governor on each, compared with the figures for each of the fiscal years of the preceding biennium and giving an explanation of each major change in the recommendations from the revenues and expenditures in the previous biennium.

SECTION 34. Immediately after the beginning of each regular session of the Legislature, the Governor shall submit to the presiding officer of each House, printed copies of the budget based upon the investigations and conclusions of the Division of the Budget. Such budget document shall contain a complete and itemized plan of all proposed expenditures for each agency or undertaking classified by function, character and object, and in the event such proposed expenditures exceed the estimate made by the State Board of Equalization, the Governor shall accompany the budget document with a proposal of new revenue raising measures sufficient to effect a balanced budget for each year in the ensuing biennium.

SECTION 35. The Governor shall submit to the presiding officer of each House of the Legislature at the same time he submits his budget document, copies of a tentative

bill for all proposed appropriations of the budget, itemized to show current operating expenses of each agency, separate from proposed capital outlay for each year in the ensuing biennial appropriation period which shall be known as the Budget Bill.

SECTION 36. The standing committee of the House of Representatives and of the Senate being in charge of appropriation measures, shall sit jointly in open sessions while considering the budget, and shall begin such joint meetings within five (5) days after the budget has been submitted to the Legislature by the Governor. This joint committee may cause the attendance of heads or responsible representatives of the departments, institutions, and all other agencies of the State to furnish such information and answer such questions as the joint committee shall require, and to these sessions shall be admitted with the right to be heard all persons interested in the budget estimate under consideration. The Governor, or his representative, shall have the right to sit at these public hearings and be heard on all matters coming before the joint committee.

SECTION 37—The Legislature may increase or decrease items in the budget bill or bills, as it may deem to be in the interest of greater economy and efficiency in any department, institution, board or commission and may appropriate for any additional special State function not set out in the budget bill or bills, as shall seem proper to the Legislature. Such appropriation specifically designated by the Legislature as a Special State function, shall be exempt from the allotment provisions of this act under the control of the Budget Director, when the act appropriating money for such special State function specifically provides that the appropriation is exempt from allotment procedure under the control of the Budget Director.

SECTION 38. There is hereby appropriated from any moneys in the Emergency Appropriation Fund in the State Treasury, not otherwise appropriated, the sum of Two Thousand Dollars (\$2,000.00) to pay the salary of the Budget Director from the effective date of this act to June 30, 1947; and there is hereby appropriated the sum of Thirty-five Thousand Dollars (\$35,000.00) to be expended by the Budget Director to employ temporary help, and to make purchases of supplies and equipment and for pay-

The amount of Thirty-five Thousand Dollars (\$35,000.00) appropriated herein shall be non-fiscal and shall be available for contractual or expenditure purposes for thirty (30) months from the date this act is passed.

SECTION 39. The Legislature hereby declares that it intended to enact every sentence, part, clause, or section of this act and if any part thereof shall be held invalid for any reason, the invalidity thereof shall not effect the validity of any other parts, clauses, sentences or sections of this act, but the same shall be and remain in force and effect to the same extent as if such invalid parts, clauses, sentences, or sections had been omitted.

SECTION 40. All acts, or parts of acts, in conflict with the provisions of this act are hereby superseded by the provisions of this act and effective July 1, 1947, the following Titles and Sections of Oklahoma Statutes 1941, are hereby specifically repealed:

ENROLLED SENATE BILL NO. 22—By Anglin.

Upon motion of Senator Porter, the Senate recessed to meet at 3:30 p. m., this day.

AFTERNOON SESSION

The Senate reassembled, at 3:30 p. m., and was called to order by the President Pro Tempore.

FIRST READING

By unanimous consent, the following Bill was introduced and read for the first time:

SENATE BILL NO. 131—By Gary—An Act making

appropriations from the public building fund in the State Treasury for the construction of buildings, improvements, and the purchase of equipment for and at certain state institutions; providing that said appropriations shall be non-fiscal for contractual and expenditure purposes; and declaring an emergency.

RESOLUTION

By unanimous consent, the following Resolution was introduced and ordered referred to the Committee on Agriculture:

SENATE RESOLUTION NO. 6—By Worthington—A Resolution requesting the Congress of the United States to enact Legislation regulating trading in farm products on commodity Exchanges and Boards of Trade, and to establish a uniform system of grading of farm products.

Senator Worthington asked unanimous consent, which was granted, that SENATE RESOLUTION NO. 6, by Worthington, be ordered withdrawn from the Committee on Agriculture and placed upon the Calendar.

By unanimous consent, upon request of Senator Worthington, SENATE RESOLUTION NO. 6 was taken up for immediate consideration, read at length, as follows, and adopted upon his motion:

SENATE RESOLUTION NO. 6—By Worthington.

A RESOLUTION REQUESTING THE CONGRESS OF THE UNITED STATES TO ENACT LEGISLATION REGULATING TRADING IN FARM PRODUCTS ON COMMODITY EXCHANGES AND BOARDS OF TRADE, AND TO ESTABLISH A UNIFORM SYSTEM OF GRADING OF FARM PRODUCTS.

WHEREAS, there was wide and unusual fluctuations in the price of cotton and other farm products on the commodity exchanges and boards of trade during the period between July 1, 1946 and January 1, 1947; and,

WHEREAS, there is no apparent reason for the break in the cotton market and the wide variation in the price of other commodities during this period except speculation and possible manipulation of prices which is

made possible because of lack of regulation of trading in such commodities on such exchanges and boards of trade; and,

WHEREAS, speculation and manipulation is encouraged by the fact that sales of such commodities may be, and are frequently made without delivery of the commodity sold by persons who do not have or own the commodity which they purport to sell; and,

WHEREAS, this speculative trading in such commodities has resulted in serious losses to the producers of such commodities who must sell same at or near the time when produced and has further resulted in increased cost to consumers,

NOW, THEREFORE, BE IT RESOLVED BY THE SENATE OF THE TWENTY-FIRST LEGISLATURE OF THE STATE OF OKLAHOMA:

SECTION 1. The Congress of the United States is requested to enact legislation placing the control of commodity exchanges and boards of trade directly under the supervision of the State Department of Agriculture and to enact laws to regulate the sale of farm products on such exchanges and boards of trade, to protect producers and processors of cotton, grains and other commodities.

SECTION 2. The Congress of the United States is further requested to cause a complete investigation to be made of the cotton exchanges and boards of trade throughout the United States by the Department of Agriculture and The Department of Justice working in conjunction with each other for the purpose of making findings of fact, and recommendation as to legislation needed, to correct and eliminate the evils of speculative trade in farm commodities.

SECTION 3. The Congress of the United States is further requested to immediately enact legislation which will prohibit the sale of cotton and grain on exchanges and boards of trade by any person who does not have actual possession of a warehouse receipt or certificate covering evidence of ownership of the amount of cotton or amount of grain sold by such person; and requiring that every such sale shall be accompanied by the transfer of a warehouse receipt or certificate evidencing title to

the commodity sold or transferred, and that the number of bales of cotton or bushels of grain that may be sold by any one person, firm or corporation during any one day, be limited. "In our judgment this question may be eliminated, if desired, by limiting the act to property now owned by a veteran or his wife or orphan, the title to which was vested in any one of such persons on January 1, 1946, and if the act were so limited it would appear that it would still accomplish the result intended.

"You are therefore advised that it is my opinion:

"1. The Legislature may validly waive interest, penalties and costs on delinquent ad valorem taxes on real or personal property owned by a veteran, his wife or orphans.

"2. Waiver of interest, penalties and costs on property which was owned by a veteran, or his wife, or orphan, on some prior date, such as January 1, 1946, without regard to the ownership of such property at the time of the act of waiver would in many cases discriminate between persons in the same general classification and there would be considerable doubt as to the validity of such act.

"This opinion has necessarily been limited by a consideration of the express language of the proposed enactment, above quoted from your communication.

"Respectfully submitted,

"MAC Q. WILLIAMSON, Attorney General."

Senator Nevins moved that the previous question be now put, which motion was adopted.

Senators Norton and Mahan, on behalf of the Special Committee appointed to visit the State of Missouri, for the purpose of ascertaining certain information for the use of the Senate, made their Reports, part of which was, upon motion of Senator Rinehart, ordered printed in the Journal, as follows:

MISSOURI STATE HIGHWAY DEPARTMENT

Carl W. Brown
Chief Engineer

SENATOR NORTON: We would like some information relative to the Missouri State Highway Commission.

MR. BROWN: The Missouri State Highway Commission consists of four members, with a state geologist as ex officio member; he sits with the commission, but has no vote, though naturally has considerable influence.

SENATOR NORTON: Q. They appoint a Director?

A. The law calls for a Chief Engineer, appointed by the Commission, who is the administrative head. They appoint the Secretary of the Commission and the Chief Attorney. The Chief Attorney, of course, recommends his assistants, but the employment of all other employees is subject to the approval of the Commission.

Q. What is your position?

A. Chief Engineer; I am administrative head of the

Department. There is a separation of the Department and the Commission. The Commission hires the administrative head and the other officers, and the Chief Engineer appoints all assistants, with the exception of the legal assistants.

Q. Where do you get your revenue to operate on?

A. From motor vehicle registration fees, drivers' license fees, gasoline tax, and the Public Service Commission collects some fees from the common carriers, etc., that have to get their licenses through them.

Q. Do you derive any funds from an ad valorem levy or property tax?

A. No. All of these funds we have discussed are channeled directly into the road fund, and the Legislature takes out that authorized for the bond, interest and sinking fund, and all the rest, of course, goes into the highway fund, which is for construction and maintenance.

Q. You said the Public Service Commission collected some taxes; do you have a mileage tax?

A. No, it is a common carrier tax, that runs up as high as \$500 a vehicle, based on the carrying capacity, tonnage, and seating capacity of a bus; we don't have a port of entry; it is based on a flat amount the common carrier certifies to the Commission; first he gets his permit to operate, then he is given a definite route.

Q. Approximately how much revenue for the last operative or calendar year did you receive in Missouri, that is, state funds?

A. Total collections in motor vehicle license fees in 1946 were \$12,085,000, in round figures.

Q. Do you have any idea how many motor vehicles that licensed?

A. In September, 1946, we had 915,000 vehicles registered.

Q. How much gasoline tax?

A. 1946 brought in \$14,316,000; that is the gross; refunds on non-highway use of gas is taxed, but they

get a refund; it is my understanding that amounts to about \$1,000,000 a year, but that is not nearly as high as Kansas.

Q. Are all farm equipment tractors gas exempt?

A. For farm use, yes, but tractors working on the road are not exempt. Any motor equipment used on the road is not exempt. Vehicles strictly on farm operations, cleaning establishments, motor boats, and the like, they have to sign an affidavit and that goes in to the Oil Department, and if approved the tax is refunded.

Q. Is aviation gas exempt?

A. Aviation gas is exempt from all gasoline tax in Missouri; the wholesalers and dealers have to pay the tax, but they can get it back by the proper certificate of being non-highway use.

Q. Do you know whether the different cities in the state collect a gasoline tax?

A. I imagine we have some 72 cities of 5,000; practically all have from $\frac{1}{2}$ up to 1 cent gasoline tax at the present time.

Q. For local operation of municipal government?

A. Yes.

Q. Is it earmarked for streets and alleys?

A. I presume it is, and I imagine some of the cities use it for other purposes.

Q. We understand from Mr. Morris that the State of Missouri still owes a bond indebtedness of about \$57,000,000.

A. It is around \$55,000,000, I believe.

Q. What part of the 2 cent gasoline tax now goes to retire those bonds?

A. Of course, the license fees, the gas tax and all others are put in the same fund, and it is paid out of that fund. Our bond and interest retirement now is around \$8,000,000 a year. We will have finished paying off our bonds in 1957, or ten years hence. This is 1947—the bond

and interest this year will be \$8,122,500; the next year, \$7,915,000; the next, \$7,692,000; then in 1950 it goes to \$8,450,000; in 1951, \$8,140,000.

Q. What rate of interest do the bonds have?

A. The bonds ran all the way from $2\frac{1}{4}$ up to $4\frac{1}{2}$.

Q. You said the license fees amounted to around \$12,000,000 and gasoline tax \$14,000,000; that would make about \$26,000,000?

A. Yes, and the Public Service Commission collections run about \$600,000, I believe it is; chauffeur's licenses, that is relatively small, amounts to probably \$500,000 altogether.

Q. And you had to take \$8,000,000 to pay on the bonds?

A. Yes, \$8,000,000 for the bonds, and around \$2,000,000 for administrative costs, that brings it down to \$17,000,000. We are spending around \$8,000,000 for maintenance, that brings it down to \$9,000,000; then incidentals, lights, and a few other things; so for actual construction purposes in 1946, from state funds, we had around \$7,500,000.

Q. Did you build any roads during the war?

A. During the war years we didn't do any construction other than emergency stuff in connection with the war problems. We laid up during those years around \$17,000,000 that was unobligated. We could have paid off every penny we owed and everything and would have had \$17,000,000 over and above. Last year we estimated we would get about \$7,500,000. This year we figure that our income from gas that can be used for construction will be around \$8,000,000, and probably not to exceed \$8,500,000 next year. Now, that is the funds we will have to match federal funds on construction. That adds up to \$41,000,000. Now, for the years from 1946, 1947 and 1948, through our federal appropriation, we get approximately \$14,200,000 a year. We had an outlay or frozen funds of federal that during the war couldn't be expended of about \$3,000,000. There are some incidentals that would have to come from that; we have had higher maintenance this year than we expected. This is federal. There is 10

per cent of that federal that goes to grade operation that we don't put up any money for; that would take off something like \$1,000,000. The \$14,200,000 a year plus the \$3,000,000 makes \$45,600,000; so the amount we have to match is, say between \$44,000,000 and \$45,000,000. For the three years then, and this is the second year we are in, taking the \$41,000,000 from it that we estimate we have, we will have to go into the fourth year's revenue to the tune of \$4,000,000 to match the federal aid already available. That would mean then that our estimate on the fourth year, which would be a little over \$8,000,000, we would have to borrow from that year's collections to pay for matching of our federal aid. Then if federal aid is continued, why we would be short of actual money, so we are going to be in your fix in about two more years. We won't have the money to match federal funds available.

SENATOR MAHAN: I don't understand the borrowing procedure.

A. Well, that is probably a misnomer. What I mean is, you receive federal aid this year; no project is finished within a year. It would mean that when we get to 1949 we would still have contracts out on our postwar program, we would have more money obligated than we would actually have up to that time; the projects will not be completed by January 1, 1949, and we will still be paying on them, we will be using current funds that come in to meet it; it would cut us down that much on what we would normally expect to do.

SENATOR NORTON: This money that is available or that is earmarked for road maintenance and construction, that is collected by the tax collecting agencies?

A. Yes, and it goes into the road fund.

Q. Does the Legislature appropriate out of that?

A. The law reads that the money is to go into the road fund and stand appropriated, but we have always asked the Legislature to make the appropriation.

Q. What is the State of Missouri anticipating doing with reference to your farm to market projects; what have you done in that respect?

A. We are building farm to market roads. There

was a constitutional amendment passed in 1928 that authorized the Commission, in conjunction with the counties, to select supplementary roads to be built with state funds and maintained as state roads. There was considerable agitation by the proponents of the measure for and against it at the time; some of them wanted to bag the money they had to be spent, others didn't; they reached a compromise, in which the ones that didn't want it was afraid the gas tax would have to be raised. They had a gentlemen's agreement, and purely a gentlemen's agreement—nothing in the way of a contract or in the law, that the Commission would spend in the ten year period at least \$40,000,000; that more or less froze the gas tax at 2 cents for the ten years. This agreement between the Commission that then existed and the proponents of this measure was that the State would spend on the farm to market road system or supplementary system at least \$40,000,000. We had spent more than the \$40,000,000 when the federal aid came on, which was about four years ago. We already had our supplementary system planned ahead, and that is where we have been spending our money. We don't go to the counties for anything except for approval of the road in the beginning. In other words, the law requires us to agree with the county officials on the road that is most important, to let them designate the road. In the main, we let the county decide which roads and the order in which they want them constructed. Then we match the federal funds that are available and go ahead, and as far as the county knows, they don't know whether it is state or federal funds.

Q. That comes out of the approximately \$8,000,000 that you are spending on construction?

A. Yes. We have been spending on an average of about \$3,000,000 a year; in 1939 and 1940, \$2,500,000 and \$3,000,000; this year that ought to go up to \$4,500,000, because our proportion of federal aid for the supplementary system amounts to \$4,500,000, and we have to match the federal aid, making a total of about \$9,000,000 in the postwar period.

Q. Going back now to the organization, you have how many commissioners?

A. Four commissioners.

Q. Are they appointed by the Governor?

A. Yes, sir.

Q. Is there any limitation or restriction on the Governor's selection?

A. Yes, he has to appoint not more than two from each of the main political parties; in other words, two Democrats and two Republicans.

Q. Do you have large pressure groups from the cities or large towns?

A. As far as I know, the Governor has never had any pressure from the Senate as to appointments.

Q. I am not getting at that; I mean as to the construction of the roads, where they will be constructed?

A. You mean of our centennial or primary system?

Q. Yes.

A. That was set out by law. The Legislature in 1921 designated about 7600 miles. Then in 1928, by the constitutional amendment that was voted, the Commission was allowed to add 300 miles, using their own discretion, for traffic relief around Kansas City and St. Louis. When the road law went into effect, there were very few parks, there was no connection with the established roads. The designated roads didn't connect with the parks, and by the 1928 amendment the Commission was given authority to construct roads in state parks and connect same with primary or secondary highways.

Q. Would it be possible to get a copy of the law you spoke of which designated this mileage?

A. I think so, yes.

Q. Now how is the appropriation from the Legislature handled?

A. The Legislature makes an appropriation for what we call administration. The budget goes to the Governor, and he recommends or disapproves, whatever it might be, and it goes to the Legislature. We set out in that

certain amounts for salaries, for personal service, expense accounts, the patrol get their money out of that, supplies, electricity; it is all more or less itemized.

Q. But the Legislature makes the appropriation?

A. Yes, and in addition to that, the Legislature makes the appropriation for maintenance and construction, they are lumped together; it is left to the Commission as to how much money goes into maintenance and how much to construction. In the early days, for the first two or three years after what we call the centennial law went into effect, the Legislature made a definite appropriation for maintenance and a definite appropriation for construction; but if you have ever had any experience in road construction, you know unexpected things turn up—bridges wash out, etc. So the Legislature, I think in 1925, lumped both the maintenance and construction together, instead of an appropriation for maintenance and one for construction, and that is still being adhered to. That has been the policy and that is how it is handled.

Q. The matter of right of ways is cutting into our funds tremendously; how does that affect you in this state?

A. On our supplementary road system, which is a farm to market road, we won't build a road unless the right of way is furnished free of charge.

Q. Who furnishes that?

A. We don't care who furnishes it.

Q. Is that by statute?

A. No, that is a policy of the Commission. In the original system or our centennial system the Commission followed that same policy. At that time we had all the county; you could go anywhere in it and build a road; if they wouldn't give the right of way in one place, they would in another. Of course, after you got your city system, hard cases you always left to the last, and the Commission did have to go in and pay for a right of way. We have a right of way department, and have over the twenty years we have been operating under this law; we scrutinize the right of way as much as any other thing.

Q. Now, you take in your urban roads, your right of way requirement from the federal government is 300 feet. Naturally, you can't expect that right of way to be given.

A. Up to the present time the federal government has never paid anything on right of way, but under the postwar highway act under which we are now operating, the government will pay one-third. Our Commission has set this regulation on that; the cost of the right of way will be borne one-third by the federal government, one-third by the state, and one-third by the city or private individual. On the urban projects which we will get started we will only pay for one-third of the right of way cost.

Q. You have a general condemnation law; you go through your circuit courts and stuff like that? A. Yes.

Q. Now, we build 20 foot strip concrete slab; in round figures, what is your experience, your average cost per mile on that type of road?

A. Prior to the war, most of our pavement for several years has been a minimum of 22 feet. The slab alone on a 22 foot road, in the middle 30's, cost us around \$30,000 to \$35,000 a mile in rough figures. What little we have let this year, and part of last year, that is up about 50 to 60 per cent, I would say. The cost would probably be up to about \$70,000 a mile; of course, there are different other things that come in; we are getting a little longer side distance in our roads, doing more grading and such as that; that will be up, the actual cost, more than 50 per cent, because we are actually moving more dirt.

Q. Your grading is more expensive?

A. Yes; we are spending more in grading, culverts, and drainage than we originally did; naturally the cost has come up.

Q. What do you use for what we would call secondary construction, how much gravel base and what other material?

A. In our original centennial road system we built mainly two types of road, high type or bituminous type, which is compared very readily with concrete, just about as much per mile. Practically all of our other roads were

gravel. For several years we have been converting those old gravel roads by coating them with a surface and stabilizing the base—some of the roads have been built 15 or 20 years—shaping them up, putting a little more metal on them, working that in, and during the summer putting on an armor coat, or something like that. That is the old gravel roads. Now, as the concrete roads wear out, we will cover them with some bituminous material.

Q. Do you use a hot or cold mix?

A. Mainly, hot mix.

Q. What is your average cost per ton for hot mix?

A. I imagine around \$7. Down here on No. 66 we have done quite a little resurfacing, widening some of it; it run around \$12,000 to \$15,000 a mile; I can't give you the tonnage.

Q. That is reconstruction?

A. Well, we don't have any new construction at the present. The 7600 miles—about 8000 now with additions, was laid out by the Legislature and built, and that was mainly concrete and gravel roads. Now those roads are wearing out. We are straightening them out in the matter of alignment and grades, but it is but really a rebuilding of the road; you may get off of it and miss 100 yards, that is new construction.

Q. Do you have any kind of road construction on in Missouri?

A. You mean from year to year?

Q. I mean at the present time; do you have one going?

A. The Commission decides say along in the late summer or early fall, all about the different roads we will try to improve.

Q. I mean new construction?

A. None other than supplementary roads; our centennial system was a system laid out by the Legislature; we can't add to that; we can improve it, but can't take on any more mileage.

Q. How many miles in your state system?

A. About 8000 miles, and then we have around 8000 of supplementary roads, so we have at the present time about 16,000 miles on state maintenance that has been constructed by the state.

Q. Does the state maintain these secondary roads?

A. Yes, but we don't put out quite as much money on these; our allotments run from \$150 a mile up to \$500 or more on the most heavily used roads. There was a good deal of building up our roads on which we had let the maintenance go down, but our Commission set aside for the June 30 to July 1 period, this year, \$8,300,000 for maintenance.

Q. Mr. Brown, as I understand, the Legislature or General Assembly has already set by statute the road mileage designated in your main state system?

A. That is right.

Q. And you are prohibited by law to add to it?

A. Yes, they are all completed; many of them are being resurfaced, but the projects have been completed.

Q. And you are prohibited by law from adding new additional miles to the system?

A. Other than traffic relief roads that might be made in the cities.

Q. Mr. Brown, in the past four years, including the federal grants, about how much have you spent on construction?

A. The last four years we didn't spend anything on construction and the federal aid was cut off. They wouldn't grant any federal aid those years. The \$17,000,000 I mentioned is what we built up on account of not having new construction.

We are now in the process of constructing and are trying to qualify for this federal aid, for the state of Missouri participating in this postwar construction program.

Q. Are you participating to the extent of reconstruction?

A. To a large extent, yes. This postwar highway act brought the cities into the picture. We had never had authority to build inside the cities. In order to comply with the federal law, we do. We are spending in the cities about \$6,000,000 a year; then plus the supplementary road funds of about \$9,000,000, there is \$15,000,000 that we are putting into new construction, but the remainder of the money is spent in rehabilitating the roads we had already built.

Q. Are the counties voting bonds now and building roads themselves?

A. We have had just recently passed at the last session of the Legislature what is known as the King bill. The money to build those roads is coming out of the general revenue, not out of the state highway funds. It requires the county to match the state funds, and it is to be a low type road. The state will only participate to the amount of \$750 a mile. The Highway Department was given the job of approving the plans as these counties send them in and certify them to the auditor when proper vouchers come in to pay them. That is our connection. We will help them all we can. A few of the counties—I understand Boone County has voted bonds with the idea of taking advantage of that law.

The original bond issue was for \$60,000,000, and the second for \$75,000,000, making a total of \$135,000,000.

We have spent on our highway system for construction about \$360,000,000 since 1921. Add to that the maintenance that we have spent, and for grade separation and the like, it brings that figure up to almost \$600,000,000.

Senator Rinehart, on behalf of the Special Committee appointed to confer with Mr. Thomas H. MacDonald, Director of the Public Roads Administration, in Washington, D. C., relative to the diversion of user road tax money, made an oral report, advising the Senate that a Communication from the Director of the Public Roads Administration concerning the matter of diversion of money, was being prepared and would be available for the use of the Senate within a few days.

Senator Cowden moved that the Senate go on record as commending the efforts and report of Senator Rinehart, which motion prevailed.

Senator Price and Howell, being the Special Committee appointed to visit the State of Kansas, for the purpose of ascertaining information for the use of the Senate made their Reports, filing books and records with the Secretary of the Senate.

Senator Gary, on behalf of the Special Committee appointed to visit the State of Louisiana, for the purpose of ascertaining information for the use of the Senate, submitted the following Report and asked that it be printed in the Journal, which was the order:

Mr. President, we, your special committee that was appointed to go to Baton Rouge, Louisiana, to make a study of the State's roads and highway system, school system, tax structure, old-age pensions, and various other matters, report the following findings:

ROADS AND HIGHWAYS

We found that the State Highway Department of Louisiana has 46% of all roads in the state included in its highway system for maintenance. They have 14,000 miles of roads, of which 2500 miles are concrete, 1700 miles are blacktop, and 10,000 miles are gravel. A hard surface road runs to every parish county seat town in Louisiana with the exception of one.

This highway system was financed by a series of bond issues. At the present time the outstanding bonds against the Highway Department for road building purposes total approximately \$120,000,000. This is being retired by a \$.04 per gallon tax on gasoline. \$.04 per gallon in Louisiana will raise approximately \$18,000,000 per year. These bonds are bearing 2% interest. The last session of the legislature referred to the people the proposition of granting an additional \$19,000,000 for road building purposes. This was necessary in order for the state of Louisiana to be able to match federal funds for highway construction purposes. They have an additional \$.01 per gallon that is used for maintenance purposes. Then they have \$.01 additional if the parishes care to vote it that can be used by the County Commissioners of the various parishes for maintenance of county roads. Then another \$.01 goes to the Department of Education.

Mr. Fry, the Director of Highways, informed us that

they didn't have any trouble with the Federal Bureau of Roads because of their diversion of road users funds. This is probably due to the fact that their bonds they issue will more than replace the diversion of the gasoline tax.

Mr. Fry informed us that the cost in building concrete roads in the State of Louisiana runs from \$60,000 to \$100,000 per mile. He gave us one example of a road in southern Louisiana that was costing \$99,000 a mile. The blacktop roads were running from \$18,000 to \$27,000 per mile. He also informed us that they were financing the farm-to-market road program with a part of the \$19,000,000 bond issue.

The Highway Department is controlled by a Highway Director who is appointed by the Governor and confirmed by the State Senate. He has the assistance of five Highway Commissioners who are appointed by the Governor and confirmed by the Senate, but they only have power to act in an advisory capacity. In addition to the Director, they have a Chief Engineer. The people of Louisiana don't seem to mind floating bond issues for roads and buildings. They believe that when a system of roads needs to be built, the money should be borrowed and the roads built and then retired over a period of years.

PUBLIC WELFARE AND HEALTH PROGRAM

We found that the State of Louisiana only pays approximately \$20 per month on the average to the aged people for pension, but they go in very heavy for charity hospitals. They have a system of hospitals that are open to any family whose net income is not in excess of \$125 per month, and it appears that they are not very strict on their investigations for admittance into these institutions. They have a total of eight charity hospitals in the State of Louisiana. Your chairman had the privilege of seeing two of these hospitals, the one at New Orleans and the one at Alexandria. They are the finest looking hospitals I have ever had the privilege of seeing, but the total cost per biennium for the maintenance and operation of these institutions runs in excess of \$13,000,000. The officials of the state government didn't care to talk about their mental hospitals or their State Penitentiary. They frankly told us that those institutions couldn't be bragged about; but we did learn that their Penitentiary is far from being self-supporting, even though they use

between 200 and 300 convicts in the place of civilians for guards.

PUBLIC SCHOOLS

We found that the State of Louisiana has advanced far in the reorganization of their school districts. At the present time there are only 67 school districts in the entire State of Louisiana. They have what we might term the "county unit system." Each county is listed as a school district and the district is controlled by a school board composed of five members who are paid a per diem, and a County Superintendent who is appointed by the school board. The County Superintendent's Office takes care of all the finances, supervision, and other matters pertaining to the schools of the county. For the year 1945-46 a total of \$36,000,000 was spent for the operation of all the schools in the State of Louisiana. Included in this \$36,000,000 was \$1,156,558.74 teacher retirement program and \$940,000 for hot lunch and scholarship fund. During this year of 1945-46 they paid their teachers an average salary of \$1746.84. This compares with an average salary in Oklahoma for the same period of \$1623, while our cost of operation in Oklahoma for that particular year was in excess of \$45,000,000 if we include the teacher retirement and hot lunch programs. So, under their system, they are paying their teachers a better salary than we are paying, and are operating their schools on approximately \$9,000,000 per year less than we are operating, while there is only 5000 pupils difference in the average daily attendance of the two states. The saving appears to have been brought about principally because they have fewer one-teacher schools than we have and fewer small highschoools; while we have 2300 one-teacher schools in Oklahoma, the State of Louisiana only has 52 one-teacher white schools and 870 one-teacher colored schools. They are also able to buy their supplies and equipment for the schools on a more competitive basis because of bigger school units which permits them to buy in larger quantities. The school system of Louisiana is financed by a 10-mill district ad valorem levy plus a 2¾ mill state ad valorem levy and a direct appropriation from the general revenue fund of the state. 46% of the schools' cost in the State of Louisiana is financed by the state. I believe we would do well to study further the Louisiana school system.

FINANCIAL DEPARTMENT

We found that the State of Louisiana has a very fine Financial Department. From what we could learn concerning it, it appears that it is operated on the same principle that our new Budget Control Bill sets forth for our own state. This new system was inaugurated after the corruptness in state government was uncovered a few years back, which was about seven years ago. They have at the present time a \$.07 per gallon gasoline tax; $5\frac{3}{4}$ mills ad valorem tax; an income tax that starts at 2% and goes to 4%; a \$.01 sales tax which goes to the general fund; $\frac{1}{4}$ c per bottle tax on soft drinks; a corporation tax of 4% and in addition to that a tax on beer; a tax on alcoholic beverages; a tobacco tax; a cigarette tax; and a severance tax levied upon all natural resources severed from the soil and water in Louisiana, including timber, turpentine, and other forest products, and minerals such as oil, gas, sulphur, salt, coal, marble, stone, gravel, sand, shells, and other natural deposits. Their total collection on this severance tax for the fiscal year 1945-46 was \$16,367,007.72. They collected \$6,857,989.71 from the alcoholic beverage tax for the years 1945-46, and \$1,723,271.20 from the beer tax. Their total collections in taxes from all sources from July 1, 1945, through June, 1946, total \$98,915,457.67. This was an increase of \$11,979,470.83 over the previous year. Their total appropriations for the next biennium amounted to \$200,543,087.64. In addition to the \$120,000,000 highway bonds outstanding, they have approximately \$65,000,000 bonds outstanding that were used for public buildings and other purposes in the State of Louisiana. The people of Louisiana are a debt-loaded, tax-ridden people. They have a total value of approximately \$1,400,000,000. In addition to their state bonded indebtedness, the school districts owe approximately \$26,000,000.

BE IT ENACTED BY THE PEOPLE OF THE STATE OF OKLAHOMA:

SECTION 1. FUNDS FOR TRAVEL EXPENSES. Officials or employees traveling on official business for the State will ordinarily provide themselves with sufficient funds for all current expenses.

SECTION 2. REIMBURSABLE EXPENSES. Traveling expenses which will be reimbursed by the State, shall be confined to the expenses essential to the transaction of official state business.

SECTION 3. AUTHORITY FOR TRAVEL. Travel vouchers or claims shall be approved for payment only by the elected or appointed head of any State department, or by the appointed head of any State institution. The chairman or secretary of State boards or commissions may approve travel claims or State boards or commissions may designate an administrative employee to approve travel claims for, and in the name of, said boards or commissions. The approval of a travel voucher or claim by the officials or employees designated herein, shall constitute authority for the travel and expenses incurred. The per diem allowance in lieu of subsistence shall be fixed by the officials or employees herein designated at the time of approving the claim for payment at a rate per day which does not exceed the rates fixed by section eight of this act. Requests for reimbursement for travel expenses should be made immediately after completion of travel, except in those cases where the employee is traveling the major portion of the time; in such case reimbursement vouchers shall be prepared at intervals provided for in the regulations of the department in which the employee is working; but, in no instance shall such departmental regulations provide for travel reimbursement at intervals in excess of a thirty-one day period. It is the intention of this section that such claim for reimbursement of travel expenses shall not cover a period longer than thirty-one days. However, officials or employees may file for subsequent periods at intervals of thirty-one days each.

SECTION 4. MODE OF TRAVEL. Travel by a public conveyance where authorized, shall include all necessary official travel on railroads, airplanes, steamboats, buses, street cars, taxicabs, and other usual means of public conveyance. When any method of travel is used for which the expenses incurred thereby exceeds that of another first-class method available, the necessity therefor shall be fully explained on the travel claim. Accommodations on trains and steamboats, shall be one standard lower berth for each person and the lowest first-class stateroom accommodations on steamer where same is not included in the cost of passenger ticket. Only one seat per person in a sleeping car, or chair car, shall be paid. Travel on extra fare trains shall not be allowed, except where official necessity requires such means of travel and a satisfactory explanation is submitted therefor.

SECTION 5. TRAVEL BY PERSONALLY OWNED AUTOMOBILE. When it is economical or advantageous to the State, the traveler may use his personally owned automobile in lieu of public conveyance. The traveler may be allowed reimbursement for the use of his personally owned automobile for official State business at a rate not exceeding six cents (6c) per mile. Travel claims for reimbursement on a mileage basis, shall be accompanied by a detailed statement showing adequate basis for computing miles of travel. Not more than one person may charge mileage for the use of a personally owned automobile. The traveler may, in any instance, if he so chooses, be reimbursed on a total mileage basis, or a partial mileage basis, not to exceed the equivalent of first-class transportation by railroad, whichever amount is smaller.

SECTION 6. Reimbursement for automobiles leased or rented from so-called car rental agencies or private parties, to be used on official business for the State, shall not exceed the rate charged for the use of a personally owned automobile.

SECTION 7. Travel by privately owned or chartered airplane on official business for the State, may be reimbursed in an amount which, when added to subsistence or per diem reimbursement for that trip, does not exceed the equivalent of automobile mileage plus subsistence or per diem had privately owned automobile been used for the trip. Conditions of Section five of this act apply to calculation of automobile mileage equivalent in this section.

SECTION 8. PER DIEM ALLOWANCE IN LIEU OF SUBSISTENCE. Effective with the passage of this act, a per diem allowance in lieu of subsistence, may be authorized by a travel claim issued in accordance with section three of this act, which shall include all charges for meals and lodging. Not to exceed six dollars (\$6.00) per diem may be authorized on the travel claim for the performance of travel within the State of Oklahoma, and not to exceed ten dollars (\$10.00) per diem may be authorized for the performance of travel outside the State of Oklahoma. Provided, however, that per diem payments may not exceed sixty (60) days on any travel voucher or claim while any employee or official of the State remains in the same city, town, or county while traveling on an authorized travel voucher or claim.

SECTION 9. METHOD OF COMPUTING PER DIEM. In computing the per diem in lieu of subsistence, a calendar day shall be from midnight to midnight. At the commencing and ending of travel, one-fourth of the rate for a calendar day shall be allowed for each period of six hours, or fraction thereof. Per diem shall commence at the time the traveler enters a travel status, and shall end at the time of his return to a non-travel status. The exact time of departure and return to the point in the State from which travel was authorized, must be stated on the travel claim. Where a public conveyance is authorized, the time of departure and return of the public conveyance shall determine the beginning and end of the travel status.

SECTION 10. ADDITIONAL EXPENSES. The following expenses shall be allowed in addition to the stipulated per diem allowance, provided that such expenses are necessary to the proper conduct of official State business: (a) Transportation fares and accommodations by public conveyance as provided in section four of this act, or mileage on personally owned automobiles or airplanes; (b) taxi, bus and street car fares; (c) telephone and telegraph charges.

SECTION 11. SUBSISTENCE EXPENSES WITHIN THE STATE IN LIEU OF PER DIEM. Subsistence expenses incurred by officials or employees of the State while traveling within the State of Oklahoma, may be authorized as provided in section three of this act on an actual expense basis, in lieu of the per diem rate authorized in section eight of this act. However, the actual expense basis authorized by this section shall not exceed six dollars (\$6.00) per day for subsistence expenses. Subsistence expenses authorized under this section may be paid for meals by showing on the travel claim the amount paid for each such meal. Expenses for hotel rooms, may be reimbursed on an actual expense basis by showing on the travel claim the amount paid for each such room, accompanied by receipts therefor.

SECTION 12. CLAIMS. All claims for reimbursement of travel expenses shall be submitted on the regular authorized form of travel expense claim, and shall be signed by the official or employee performing the travel, and approved by the official or employee designated in section

three of this act for the agency in which the employee works.

SECTION 13. BLANK FORMS. Standard blank forms of travel claims to be used to carry out the purposes of this act, shall be prescribed by the State Budget Director.

SECTION 14. The provisions of this act shall be mandatory as to all officials and employees of all departments, boards, commissions and institutions, regardless of the provisions of any other prior act of the Legislature.

SECTION 15. COMMUNICATION

Senator Rogers asked unanimous consent, which was granted, to have the following Communication read:

March 12, 1947
Oklahoma City, Oklahoma

To the Lieutenant Governor and, through Him,
To the Honorable Senate of the State of Oklahoma:

Gentlemen:

The people of Oklahoma must rely largely on the legislative branch of our state government for the pro-

tection and husbandry of our natural resources through the enactment of farsighted laws. The Izaak Walton League, as a statewide organization of conservationists deeply interested in the subject, is appreciative of the interest which has been displayed in conservation legislation by the Honorable Members of this Senate. We believe that the purity of our waters through the prevention of pollution, the retention of top soil on the land through improved agricultural methods and the prevention of burning, and the protection of our natural resources, including wildlife, by informed legislation and efficient administration, are of fundamental importance to the future welfare of the people of Oklahoma.

In appreciation for the interest of past members, in token of esteem for the Honorable Members of this Senate, and with the sincere desire that such interest in conservation matters be continued in future sessions, the Oklahoma Division of the Izaak Walton League is pleased to present to the Honorable Senate an original print of "Flood Victims" by Alexandre Hogue, head of the University of Tulsa's Art Department and one of the leading painters of the world.

A work of art may have different meanings to various persons viewing it, depending upon their previous personal experiences. "Flood Victims," to us, concerns an area similar to much of our own state where the fields have been widely burned. Burning destroys the wildlife food, cover and habitat, and results in eventual destruction of the wildlife itself. It lessens crop yield by eliminating humus necessary to the soil and plant life which holds the top soil in place. Instead of staying on the land to provide springs and prevent later droughts, the rain water runs off, carrying with it the precious top soil and causing floods. Turbid water kills the plant and animal life in the lakes and streams below, thus also destroying recreational values of the water. Not the least harm from the burning of fields and the resulting flood, is to the wildlife itself, two unhappy examples of which are portrayed as "Flood Victims." There is nothing sinister about the rattlesnake in the picture, who has a part of his own in the wildlife cycle and here must be as badly frightened as the poor squirrel. "Flood Victims" may to others mean that most of the wildlife and a great part of the top soil

have already gone. To the Honorable Senate this picture may mean contemplation of increased appropriation for flood sufferers, the necessity of prevention of erosion damage to the soil, or the desirability of good game and fish laws and efficient wildlife administration. All will agree that "Flood Victims" is a great work of art.

Newly moved to Oklahoma, the artist, Mr. Hogue, has an international reputation in artistic circles for his sympathetic and brilliant paintings of the conservation problems of farmers and ranchers in our section of the country. He spent his boyhood on a ranch. His conservation painting, "Drought Survivors," has been acquired by the Republic of France and is on display in that section of the Louvre which is reserved for the works of foreign artists.

We trust that the Honorable Senate will arrange for "Flood Victims" to be hung where it may be enjoyed by all of the members during sessions and at other times be displayed for the pleasure of the general public visiting the Capitol.

Respectfully yours,

OKLAHOMA DIVISION

IZAAK WALTON LEAGUE OF AMERICA

By W. J. Rea, President.

Following the introduction to the Senate by Senator Rogers of Mr. W. J. Rea and Mr. Kelly Brown, of Muskogee, presentation of an original print of "Flood Victims" and the introduction of the Artist, Alexandre Hogue, was made by Mr. Kelly Brown.

Upon motion of Senator Porter, the Senate expressed its appreciation for the print and President Pro Tempore Nance, on behalf of the Senate, ordered it hung in the Senate.

COMMUNICATIONS

The following Communications were read and herewith incorporated, upon request of Senator Porter:

Honorable James C. Nance,
President Pro Tempore,
Oklahoma State Senate.

Dear Mr. President:

There are enclosed extensions of time in which to file

income tax returns for the calendar year 1946 for each member of the State Senate of the Twenty-first Legislature.

Respectfully yours,
(Signed) H. C. JONES,
Collector of Internal Revenue.

Hon. J. C. Nance,
President Pro Tempore
State Senate

Dear Senator:

This is to advise that Seampruf Company of New York, manufacturers of lingerie, has informed Mr. Schene, Chairman of the Industrial Committee of the McAlester Chamber of Commerce, and Mr. Pat Perkins, President of the McAlester Chamber of Commerce, that a lingerie factory will be erected and operated at McAlester, Oklahoma. Construction will start immediately. The company will employ a minimum of 100 persons at first, with a gradual increase up to 500 in the lingerie factory alone.

The Company further advises that later it expects to erect another factory, in addition to the lingerie factory, for the processing of materials used in the manufacturing plant, which will employ as many or more people than the original factory.

The Company has informed the McAlester Chamber of Commerce that it has been watching the action of the Oklahoma Legislature in its tax program, and that the actions and program of the Legislature has had a great deal to do with their locating in Oklahoma, and that if the Legislature had not passed the income tax reduction bill this company would have gone to some other state.

I also want to call your attention to the fact that the government mines, formerly operated under Mr. Puterbaugh of the McAlester Fuel Company, which furnished coal coke to the Dangerfield Steel Plant of Dangerfield, Texas, will go into operation immediately. The two mines in Pittsburg County and one in Haskell County will employ between 400 and 600 miners. A new private concern has taken over these government mines, as well as the steel plant in Texas, for a consideration of 7½ Million Dollars. They, too, have been watching the new program of government for Oklahoma.

Respectfully submitted,
M. O. COUNTS, State Senator

RESOLUTION

The following Resolution was introduced and by unanimous consent taken up for immediate consideration, being read at length:

SENATE RESOLUTION NO. 11—By Nance and Porter.

A RESOLUTION COMMENDING A PROPOSED OKLAHOMA INDUSTRIAL TOUR OF THE NATION, AND EXTENDING THE ASSISTANCE OF STATE AGENCIES THERETO.

WHEREAS, the 21st Oklahoma Legislature has responded to the requests of chambers of commerce and other business associations and organizations by the enactment of certain tax reductions and adjustments of the tax laws of the State of Oklahoma, for the purpose of placing this state more on a parity with surrounding states and enabling Oklahoma to secure its share of new industrial establishments being located in the Southwest, and

WHEREAS, such tax program has laid the groundwork for an accelerated promotional effort to sell the many industrial advantages of this state, among which are excellent labor conditions, an abundance of low cost fuels, cheap electric energy, and unsurpassed reserves of natural resources, about which the rest of the nation is probably not fully informed or aware, and

WHEREAS, following enactment of the aforesaid tax program, there is now being organized by the business leaders of the State of Oklahoma, and backed by the chambers of commerce of the major cities of the state, a great "Industrial Tour" of the principal cities of the nation, by chartering a special train and taking along suitable exhibits depicting Oklahoma's numerous resources, products made therefrom, and opportunities afforded by this State in many fields of industrial activity; all of which is to be privately financed by public spirited citizens of Oklahoma, and

WHEREAS, assistance of the Oklahoma Geological Survey, the Oklahoma Planning and Resources Board, the University of Oklahoma, the Oklahoma A. and M. College, and perhaps other state agencies, has been requested and will be needed in the preparation of suitable exhibits de-

picting Oklahoma's many resources and advantages most effectively, NOW THEREFORE,

BE IT RESOLVED BY THE SENATE OF THE TWENTY-FIRST LEGISLATURE:

1. That such a state-wide cooperative effort to tell Oklahoma's story to the nation is to be commended, and is deserving of the full support of the State of Oklahoma and its citizens; and if adequately prepared and executed can, in the judgment of the Legislature, result in much publicity value and great tangible benefits to the State;

2. That the technical assistance of the Oklahoma Geological Survey, the Oklahoma Planning and Resources Board, the University of Oklahoma, the Oklahoma A. and M. College, and other state agencies if needed, should be made available, and are hereby pledged to this worthwhile endeavor; and

BE IT FURTHER RESOLVED, that those business organizations, chambers of commerce, and public spirited citizens who have conceived of and are sponsoring such Industrial Tour on behalf of the State, are particularly to be commended and congratulated for following up the new tax revision program of the 21st Legislature with a program of action, such as that described herein, which can be of incalculable value and benefit to the State of Oklahoma.

Upon motion of Senator Porter, Senate Resolution No. 11 was adopted and ordered referred for enrollment.

COMMUNICATION

Senator Rinehart asked unanimous consent, which was granted, to have the following Communication, addressed to the Governor, read and incorporated in the Journal:

March 5, 1947.

Honorable Roy J. Turner
Governor of Oklahoma
Oklahoma City, Oklahoma

Dear Governor Turner:

Mr. Bailey delivered to me yesterday your letter of March 1 relative to the problem with which the State is confronted in trying to find a solution to the diversion of road user revenues in Oklahoma, contrary to the provisions of section 12 of the act of June 18, 1934 (48 Stat. 993).

The Committee referred to in your letter, accompanied by Congressman Albert, Johnson, Monroney, Rizley, and Stigler, came in to see me yesterday and the situation was thoroughly canvassed. We were very glad of the opportunity to confer with these gentlemen concerning the matter and to discuss with them its various phases.

Your letter mentions the one-cent per gallon tax on gasoline which goes to the general revenue fund and indicates that the proceeds of this tax are a part of the diverted funds. However, as we advised the Attorney General of Oklahoma in our letter of March 13, 1945, we concurred with him in the opinion which he rendered to the Speaker of the Oklahoma House of Representatives that the payment of the proceeds of this tax to the general fund did not constitute diversion, since the tax was imposed subsequent to June 18, 1934. It actually was imposed by an act passed in 1941, Chap. 18c, Ti. 68, p. 353, Session Laws of 1941. In our discussions, therefore, the Committee which was delegated by you and the Oklahoma Senate and House of Representatives to take the matter up here seemed to feel that a revision of the law imposing this tax of one cent per gallon on gasoline to go to the general revenue fund to require the proceeds of said tax to be paid into the highway fund and not the general revenue fund might meet the problem, and we agreed that such action might provide one solution. We expressed the further view that any provision which the Legislature may see fit to make that will restore to the highway fund approximately the amount that otherwise will be diverted under the Oklahoma laws as they now stand will be acceptable to us; provided an adjust-

ment of any deficiency will be made after collections are completed, and provided, of course, that revenues designated for highway purposes by the Oklahoma statutes in force June 18, 1934, are not used to make such restitution.

It is encouraging to note your statement that you came into office with the full determination to eliminate the diversion problem and that it is your belief that the State will not attain the greatest efficiency in its road program, either financially or otherwise, until this has been accomplished. I heartily endorse your views in this respect and hope that you may be successful in the efforts which you state will be made throughout your administration to require all road user revenues to be placed in the highway fund.

Very truly yours,
Thomas H. MacDonald /s/
Commissioner of Public Roads.

The Presiding Officer announced the appointment of Senators Gary, Finney, Gooldy, Ritzhaupt and Rogers, as the Senate Conferees under ENGROSSED SENATE BILL NO. 27.
