COMMUNICATIONS

The President ordered the following Communications read:

TO:

SECRETARY OF STATE SENATE
STATE OF OKLAHOMA

RE: STATE SENATORIAL
DISTRICT NO. 31

PETITION OF CONTEST

Comes now, H. G. BILL DICKEY, the duly certified Democratic Nominee for State Senator, District No. 31, State of Oklahoma, and contests the results

announced in said Senatorial District from the November 2, 1954 General Election which announced results listed 36,699 votes for contestant, and contestant's opponent, ARTHUR PRICE, Republican, 36,914.

Contestant alleges and states that he, in truth and fact, received the majority of the legal votes cast in said election, and that contestant is the winner, and should be so certified as the State Senator, District No. 31, State of Oklahoma.

Contestant in support of his contest herein alleges and states the following state of facts, which are true and which would change the announced results of said election, and change the same in favor of the contestant.

That all Precincts referred to herein are within the State Senatorial District No. 31, or Tulsa County, State of Oklahoma, and in Precinct No. 10 of said County the cast results from said Precinct was 59 votes for contestant and 70 votes for contestant's opponent. Whereas, the correct tabulation in this race should read, contestant 159, and contestant's opponent 70. In support of this error is attached a photostatic copy of the Affidavit from the Inspector of said Precinct No. 10.

The Absentee Ballot box of said district which listed contestant 430 votes and contestant's opponent, 586 votes, the said announced results from said Absentee vote in said district are absolutely void, and tabulated contrary to the law, as follows:

1. The absentee ballots were issued improperly, there were illegal votes cast, the Absentee ballots were not opened according to the law or at the time specified by the law.
2. The official counters were not qualified according to the law and the supervision of the counting was contrary to the law, and the counting was not carried out according to law, nor were the tally sheets identified and certified to according to the Election laws controlling.
3. One tally sheet reflected 60 votes for contestant's opponent and none for contestant, which tally sheet does not reflect true and correct count.
4. That no part of the handling of the Absentee box was done pursuant to the Election laws set forth by statute; and that the said Absentee vote is void and should not be included in the announced results of said election.

In Precinct No. 163, wherein contestant was announced 131 votes to contestant's opponent's 230 votes, contestant alleges and states that said Precinct results could not be included in the announced results upon the grounds and for the reason that irregularities contrary to law existed and took place within the said polling place during the designated voting hours, to wit: Republican Party workers, in loud and clear voice, solicited votes for the Republican candidates, including contestant's opponent, by stating in effect: "Lets everybody vote for the Republican candidates."

In Precinct No. 102, wherein contestant received 105 votes and contestant's opponent received 266 votes, the announced result is incorrect and not properly tabulated, inasmuch as the election official and Inspector therein was unaware and misinformed as to what properly split-ballot was, and had declared properly split-ballots in favor of the contestant as "mutilated" ballots, and that the announced results are not correct, and the proper count should have been approximately 135 for contestant and 236 for contestant's opponent.

In Precinct No. 139, the counting of the ballots which listed 110 for con-

testant and 233 for contestant's opponent was not completed according to law, nor were they delivered to the County Election Board as provided for by law; that the Inspector in this Precinct who was instructed with the ballot box after the counting was completed failed to deliver said box, as according to law and as is customary herein, but left the ballot box unguarded and unsupervised, and said Inspector went to bed without carrying out the complete duties of the Election officials, and that therefore this announced returns should not be included in the total amounts.

In Precinct Lynn Lane No. 2, the announced results which were 49 for contestant and 94 for contestant's opponent, there were more votes shown on the announced returns than there were people who legally voted, and the announced results should not be included in the returns, but the returns from this Precinct should be declared void and not participating in the total.

In the following Precincts:

Precinct No.	Contestant	Contestant's Opponent
102	105	266
106	100	271
111	89	295
123	127	209
133	93	299
188	125	416
189	147	277

All of these Precinct balloting boxes were withheld from the County Election Board until 3:30 A.M., or later on November 3, 1954, some 8½ to 10 hours after the polls had closed; that this withholding and delay was unwarranted and suspicious inasmuch as practically all other ballot boxes, including those in the outlying County Precincts, had been properly delivered several hours before. That contestant was leading in all the tabulated results until said withheld boxes were delivered. That the announced results in each of these said withheld boxes of these precincts is not correct and should not be included in the total of the announced results but should be declared void.

WHEREFORE, contestant, H. G. BILL DICKEY, has stated a state of facts which changes the announced results in favor of contestant, and designates him as the winner in the Senatorial District No. 31, State of Oklahoma, to the November 2, 1954 election, and contestant respectfully prays the State Senate and seat him as the duly elected State Senator of District No. 31; or in the alternative, contestant prays and requests that the State Senate order that all ballot boxes in State Senatorial District No. 31 be impounded and that a recount of all said ballots be ordered.

Dated this 4th day of January, 1955.

H. G. BILL DICKEY.

The Constitution of the State of Oklahoma further provides that the cash surplus, if any, from the preceding fiscal year, in the hands of the State Treasurer, to the credit of any fund which has not been previously appropriated by the Legislature at the time the estimate is made, may be added to the estimate. In this connection attention is called to the provisions of House Bill No. 30, Regular Session, Twenty-first Legislature, creating the Emergency Appropriation Fund. Said bill provides in part as follows: "Upon the passage of this Act it shall be the duty

of the State Board of Equalization to make an estimate of the revenue which will accrue in the Emergency Appropriation Fund during the current biennium, by reason of transfers of revenues and surpluses to said Fund by this Act and any other laws in force at the time such estimate is made."

Your attention is respectfully directed to Senate Bill No. 43, Section 7, S. L. 1953, which reads as follows:

> "Any money accumulated to the Emergency Appropriation Fund in excess of the appropriations heretofore made, including the appropriation made by Senate Bill 15, Regular Session Twenty-fourth Legislature, is hereby appropriated to the State Department of Highways. The State Treasurer shall transfer such amounts which accumulate in excess of said appropriations to the Highway Construction and Maintenance Fund to be contracted and expended as other moneys accumulating to said fund."

It might appear, therefore, that it is unnecessary to make an estimate of revenue to accrue to the Emergency Appropriation Fund since the present legislation would ear-mark the revenue for highway purposes.

Special Funds. The Constitution, Section 23, Article 10, provides that "any department, institution or agency of the State, operating on revenues derived from any law or laws which allocate the revenues thereof to such department, institu-

tion or agency, shall not incur obligations in excess of the unencumbered balance of surplus cash on hand." This provision eliminates the necessity of making specific appropriations for earmarked revenues appropriated to special funds which operate as a continuing appropriation. The Legislature makes appropriations for certain governmental functions out of special funds which do not operate as continuing appropriations. The amount that can be appropriated from these funds is indicated in the following statements.

In accordance with law and in compliance with the terms of a Resolution duly adopted by the State Board of Equalization of the State of Oklahoma, sitting in called Session on December 17, 1954, I have the Honor to deliver to you herewith a duly authenticated duplicate original of said Resolution as adopted by said Board upon authority of Section 23, Article 10, of the Constitution of Oklahoma, as amended; and to request a signed memorandum acknowledging receipt of same, for the Minutes and Records of said Board.

Pursuant to the action of the Democratic Caucus, held on August 3, 1954, the Senate proceeded with the election of its officers.

Senator Baldwin placed in nomination the name of Senator Ray Fine as President Pro Tempore of the Senate, which motion was seconded by Senators Cook, Shoemake, Rinehart and Nix.

Senator Baldwin moved that the nominations be closed, which motion prevailed.

The vote occurring on the Baldwin motion, the roll call was as follows:

Aye: Allen, Baldwin, Ballinger, Boecher, Carrier, Cartwright, Chapman, Collins (Creek), Collins (Seminole), Cook, Coppock, Cowden, Dacus, Dendy, Easterly, Field, Frazier, Fronterhouse, Garvin, Grantham, Hamilton, Herndon, Jones, Logan, McClendon, McColgin, McSpadden, Mahan, Maltsberger, Miskovsky, Morgan, Nix, Price, Rinehart, Russell, Shoemake, Trent, Walker, Wilson (Beckham), Wilson (Greer), Young (Cleveland), Young (Haskell).—42.

Excused: Hope.—1.

Not voting: Fine.—1.

The President declared Senator Ray Fine had been elected President Pro Tempore of the Senate.

Senator Baldwin moved that a committee be appointed to escort Senator Fine to the President's desk, which motion prevailed, the President appointing Senators Chapman, Ballinger and Logan.

President Berry presented Senator Fine to the Senate, who, in accepting the office of President Pro Tempore, expressed deep appreciation and humility for the privilege of serving in this capacity, stating that he realized his great responsibility to the State of Oklahoma; that he was only an humble servant who would need and welcome the counsel and advice of every member of the Senate; that their problems would be his problems; and he especially thanked Senators Nix and Rinehart for the lovely remarks about his mother and wife, and the presentation of an orchid corsage to each of them.

Senator Baldwin, having been chosen at the Democratic Caucus held on August 3, 1954, to be the majority floor leader of the Senate, it was upon motion of Senator Fine, seconded by Senators Ballinger, Dacus and Russell, that he was declared by acclamation the Majority Floor Leader.

Senator Miskovsky, having been chosen at the Democratic Caucus held on August 3, 1954, to be Assistant Majority Floor Leader of the Senate, it was upon motion of Senator Rinehart, seconded by Senators Collins (Creek) and Cartwright, that he was declared by acclamation the Assistant Majority Floor Leader.

Senator Baldwin asked unanimous consent, which was granted, that Senator Cowden be given the privilege of the floor "for the purpose of presenting

a gift to one of the great men of Oklahoma."

Senator Cowden paid a beautiful tribute to J. Wm. (Bill) Cordell, who served as Page in the first Oklahoma State Senate and as Reading Clerk from 1915 to 1931 when he was elected Secretary of the Senate which position he has since held. He stated, among other things, that "Bill" Cordell was often referred to as the forty-fifth member, probably better known as "Mr. Senator"; that he has been loyal to its membership, had organized each session of the Senate in its first days very smoothly, and had never entered into factions. He concluded with the presentation of a gift to "Bill" Cordell as a token of the Senate's appreciation for his valuable service through the years and expressed the happiness of the Senate over his improvement in health to the extent that he was able to be present with the Senate on its opening day, and hoping that he would soon be strong enough to assume his usual place.

Senator Logan added some very complimentary remarks, particularly about "Bill" Cordell's fine philosophy of life; and that the confidence and respect that "Bill" had held for members of the Senate had always been pleasing to its members, and thereupon moved that he, again, be elected Secretary of the Senate, which motion prevailed, the roll call thereon being as follows:

Aye: Allen, Baldwin, Ballinger, Boecher, Carrier, Cartwright, Chapman, Collins (Creek), Collins, (Seminole), Cook, Coppock, Cowden, Dacus, Dendy, Easterly, Field, Fine, Frazier, Fronterhouse, Garvin, Grantham, Hamilton, Herndon, Jones, Logan, McClendon, McColgin, McSpadden, Mahan, Maltsberger, Miskovsky, Morgan, Nix, Price, Rinehart, Russell, Shoemake, Trent, Walker, Wilson (Beckham), Wilson (Greer), Young (Cleveland), Young (Haskell).—43.

Excused: Hope.—1.

The President declared J. Wm. Cordell had been elected Secretary of the Senate.

Senator Baldwin moved that Miss W. E. Shipley be elected Journal Clerk of the Senate.

Senator Mahan moved that nominations be closed, which motion prevailed.

The vote occurring on the Baldwin motion, the roll call was as follows:

Aye: Allen, Baldwin, Ballinger, Boecher, Carrier, Cartwright, Chapman, Collins (Creek), Collins (Seminole), Cook, Coppock, Cowden, Dacus, Dendy, Easterly, Field, Frazier, Fronterhouse, Garvin, Grantham, Hamilton, Herndon, Jones, Logan, McClendon, McColgin, McSpadden, Mahan, Maltsberger, Miskovsky, Morgan, Nix, Price, Rinehart, Russell, Shoemake, Trent, Walker, Wilson (Beckham), Wilson (Greer), Young (Cleveland), Young (Haskell).—42.

Excused: Fine, Hope.—2.

The President declared that Miss W. E. Shipley had been elected Journal Clerk of the Senate.

Senator Baldwin moved that Frank Truell be elected Sergeant-at-Arms of the Senate, which motion was seconded by Senators Garvin and Allen.

Upon motion of Senator Cartwright, nominations were ordered closed.

The vote occurring on the Baldwin motion, it was declared adopted and the President declared that Frank Truell had been elected Sergeant-at-Arms of the Senate.

Senator Baldwin moved that a Committee on Seating Arrangements and Office Space of the members of the Senate, be appointed, which motion prevailed, the President appointing Senators Logan, Rinehart, Walker, Shoemake and Dacus.

The Senate was declared at ease pending the report of the Committee on Seating Arrangements and Office Space.

The Senate reassembled with President Berry presiding.

A Committee from the Honorable House, headed by Representative Levergood, advised the Senate that the House was organized and ready to transact business.

The Sergeant-at-Arms announced the presence of a Committee from the Honorable House composed of Representatives McCarty, Bond and Stewart, who advised the Senate it had been appointed to confer with a like Senate Committee, for the purpose of arranging for a Joint Session.

COMMITTEE REPORT

Senator Logan, on behalf of the Committee appointed on Seating Arrangement and Office Space, reported that the seating of the majority members would be in conformity with Senate Rule 6, and that the minority members of the Senate would be assigned to the seats in the northwest corner of the Chamber, which report was adopted and the seating of members was proceeded with.

Senator Baldwin moved that the President appoint a Committee with instructions to notify the Honorable Johnston Murray, Governor of the State of Oklahoma, that the Senate is organized and ready to transact any business which might come before it, which motion prevailed, the President appointing Senators Collins (Seminole), Frazier, Trent, McSpadden, Herndon, Carrier and McColgin.

Senator Baldwin moved that a Committee be appointed to notify the Honorable House that the Senate is organized and ready to transact any business which might come before it, which motion prevailed, the President appointing Senators Easterly, Young (Cleveland), Field, Collins (Creek) and Coppock.

Senator Baldwin moved that a Committee of six be appointed to confer with a like Committee from the Honorable House to establish a time for a joint session of the Legislature on this date, which motion prevailed, the President appointing Senators Grantham, Allen, Hamilton, Collins (Seminole), Jones and Morgan.

Senator Baldwin moved that a Committee of thirteen be appointed to serve on the Rules Committee and the Committee on Committees, which motion prevailed, the President appointing Senators McClendon, Walker, Miskovsky, Cowden, Boecher, Nix, Shoemake, Russell, Dacus, Rinehart, Mahan, Fronterhouse and Hamilton.

Senator Baldwin moved that a Committee on Mileage be appointed, which motion prevailed, the President appointing Senators Garvin, Hope, Cartwright, Young (Haskell) and Maltsberger.

Senator Baldwin moved that a Committee on Employment and Printing be appointed, which motion prevailed, the President appointing Senators Dendy, Mahan and McClendon.

Senator Grantham, on behalf of the committee appointed to confer with a like committee from the Honorable House to establish a time for a Joint Session of the Legislature on this date, advised the duty performed, stating the hour of 2:45 p. m. had been agreed upon as the hour for the Joint Session.

*

The Senate, in its Chamber, reassembled with President Berry presiding.

Upon motion of Senator Baldwin, the Message of Governor Johnston Murray, delivered to the Joint Session, was ordered incorporated in the Journal, it being as follows:

TO THE HONORABLE SENATE AND HOUSE OF REPRESENTATIVES, TWENTY-FIFTH LEGISLATURE OF OKLAHOMA.

Mr. Lieutenant Governor, Mr. President Pro Tempore of the Senate, Mr. Speaker of the House of Representatives, and The Honorable Members of the Joint Session:

Time in its inexorable passage, as well as providing a beginning, brings also an end to all material things. This is as it should be, for it is by the passage of time and the advent of new methods

and new minds that an impetus is given to progress. Were this not true, we would find ourselves in a world of stagnation.

Four years ago in this same Chamber, at the beginning of my administration, I had the honor of addressing you and laying before you the hopes, the aims, and the aspirations of that administration. Again in 1953, at the beginning of the legislative session, I appeared and laid before you a communication for your consideration, pointing out both the accomplishments and the failures of the past, and expressing new hope, and outlining new aims for the future.

Today, at the end of my administration, it becomes my duty to make report to you, and to account to you and through you to the people of Oklahoma for my stewardship as the Chief Executive Officer of this State. In the brief time that I shall use, it will be my purpose to outline what I sincerely believe to have been accomplishments of merit. I shall also be compelled to outline with complete frankness some of the failures that have been made, and to express an opinion concerning the causes thereof.

In candor I confess that I have made mistakes . . . mistakes in my judgment of human character, mistakes in honest judgment as to what should be done at a given time or under given circumstances. For all of these, I am truly regretful, but I find consolation in the honest conviction that none of them were of a disastrous nature.

On the other hand, as my administration draws to its close, I take pride in noticing its major accomplishments. Many of the things which I set out to do have been done, and I have noted with special satisfaction public declarations upon the part of the new administration that it has in many particulars adopted the program that I have so often-times laid before you and urged you to enact into law.

I here and now again express the hope that in the dawning of this new day you will take inventory and be awakened to the needs and reforms that have so long been neglected and ignored by the legislative bodies of the State of Oklahoma.

It is fitting that I say here that through lack of means of acquiring a full knowledge of the basic and underlying reasons, the public often-times places the blame on the wrong department. The Chief Executive is constantly in the public eye. The Legislative and Judicial Departments are not under the white light of public scrutiny except at intervals, and we therefore note a proneness on the part of the general public to blame the Chief Executive for the faults, failures, and omissions of another branch of the Government. They overlook the fact that these faults, failures, and omissions are, in many cases, the primary cause of the failure of an administration to keep its promise or to accomplish its ends. On this subject I shall have more to say later.

In my earliest declarations, and particularly in my inaugural address, I told the people of Oklahoma that they had nothing to fear from my administration in that it would be an administration of progress, designed to do constructive things, and pledging that it would not be used to upset or destroy any of the cherished institutions or methods or practices which had stood the test of time and proven themselves good for our mutual welfare. My campaign had been based upon this promise, coupled with a promise that there would be no new tax burdens imposed upon the people of this State during that administration. These two promises have been faithfully kept. This administration has been a peaceful and constructive administration. The transition from the former administration to mine was accomplished with less turmoil and strife that has ever been witnessed before in such a transition.

Merit was recognized, and no man was removed from his office for the sheer joy of removing him, and many of the appointees of the previous administration are still serving with distinction.

Our undivided effort and attention has been given to enlighten the people of the Nation and abroad to the wondrous possibilities that lie in Oklahoma, and we have attempted constantly to carry this educational campaign on a dignified plane and in keeping with the highest standards of ethical advertisement.

I can say to you with certainty that the industrial expansion of Oklahoma during my administration has been marvelous, and this was accomplished in spite of the fact that legislative response was not given to the many requests made for legislation of the type that would offer inducement and assurance to outside industry to come into the State of Oklahoma. If such response had been given by way of revision of our tax structure and the elimination of many obsolete and archaic practices, there is no way of being able to tell how much greater the advance would have been. I have just noted in the year 1953 a study released by the Department of Commerce indicates that 600 new business firms were added in the State of Oklahoma. I am sure that 1954 will be as great if not greater. But our industrial expansion is not yet up to standard, and it never will be until reforms are accomplished. The State of Arkansas for the same period had 1,000 new firms added, Louisiana added 2,000 new firms, Texas gained 4,400 and Kansas added 700 firms. This should impress you with the fact that although our advancement has been great and the results accomplished have been good, there is yet something lacking, and let me tell you now that the "something lacking" is not in the natural resources of Oklahoma—the "something lacking" is not in the geographic location of Oklahoma—the "something lacking" is not in the citizenship of Oklahoma—it is the failure of Oklahoma to modernize its governmental structures along modern lines, and to keep pace with modern legislative development. These are the things that retard our State.

During this administration much stress has been made upon the recreational advancement of the State. We have recognized the fact that all work and no play is not only detrimental to our own citizenship, but is a subject of inquiry by all who seek to find domicile within our borders, and so we have at all times stressed recreation, the conservation of wild life, and the development of facilities along these lines to the utmost. In the last month a seven-million dollar program was started. I am sure that it will be pursued to completion, and, when completed, we will have facilities the like of which is not to be found anywhere except in the resort states of the Nation.

By the exercise of as much economy as was permitted under the appropriations made, the State Government and all its facilities have been kept within the income and revenues provided. At the same time, no tax increases have been allowed or granted. Unfortunately, however, our revenues are not increasing, and every economic standard that we can apply at this position indicates that we cannot expect any material increases in the foreseeable future, and we can even reasonably anticipate that there will be substantial decreases. And so, whatever the reasons have been in the past for urging legislative reforms—the abolition of expendable institutions, a general tightening of our economy, and the elimination of useless and reckless spending—these reasons apply with equal and greater impact now than ever before.

At the beginning of the present administration we found it necessary to vitalize a constitutional amendment providing for death benefits under the

Workmen's Compensation Laws. This was a long step forward, and it has been accomplished satisfactorily. In this connection, too, I would like to point out the fact that during my administration there has been no serious conflict between management and labor. I claim no special credit, of course, for this, but it is most gratifying to know that we have a State in which management and labor, for the most part, live in peace and have a happy cooperation, each with the other. It is a high recommendation for both labor and management that this condition exists.

While I am dealing in generalities, I would like to point out to you that during my administration both Mrs. Murray and myself have placed major emphasis upon public relations. We have endeavored by all proper means to bring the executive family of this State in close contact with the public. We have wanted the public to feel that the Executive Office and the Executive Mansion belonged to them. The response has been sincere and spontaneous. Multiplied thousands of people have passed through the office and the mansion, and we sincerely believe that through this process we have instilled confidence into the hearts of our visitors and have removed from the Governor's Office any feeling that such an office places its holder in an inaccessible position or beyond the reach of the average citizen. In catering to the "plain folks," we have tried heartily to be "plain folks," and we leave this environment happy to return to the ranks of "just plain folks."

LEGISLATIVE PATRONAGE AND THE MERIT SYSTEM

The modern trend of legislation is toward the establishment of systems of merit under which employees with recognized ability and integrity can be given security in their positions. There is much wisdom in this trend. It is only in governmental agencies where instability exists. In all classes of private enterprise where a man shows ability and integrity he is not only kept on the job but advanced according to his merits. During past years in Oklahoma these virtues have meant but little. Every administration brought new faces. To make these changes every four years under the most favorable circumstances are hurtful for that it requires a system of training before new employees can be made efficient. Every argument that I can think of favors the adoption of a system of merit that will really accomplish the ends which it seeks to attain.

The adoption of a merit system will go a long ways toward eliminating the greatest burden of a conscientious legislator's life—the patronage burden. Some seek patronage for political expediency, but in his heart every conscientious legislator knows that in the procurement of patronage he is expected to give up something in return. That something usually amounts to a surrender of his independence of thought and action in a legislative body. Some legislators even go farther and seek to fill positions of responsibility in order to procure favors and special privileges from the holder of such office. On the whole, however, I believe that in his heart every conscientious legislator wishes that he could escape the burdens of the patronage demand. A merit system will minimize this burden.

In this connection, and in passing, I would like also to add a protest against the trend in Oklahoma toward legislative encroachment in the Executive Department of the Government. For the past quarter of a century there has been a growing trend upon the part of each legislature in the creation of positions or recreating existing positions to require legislative approval or sanction of the persons selected to fill such positions. With but few exceptions this is an arrogant and unwarranted invasion by the legislature and usurpation

of executive prerogatives. The Executive Department of the Government is held responsible for the acts and doings of subordinate appointees. In many cases, to appease the legislative demand, a Governor is compelled to accept appointees both undesirable and unfitted. The practice should be discontinued and the responsibilities of each branch of Government should be borne by that branch alone.

The adoption of the short ballot system would go a long ways toward the promotion of greater harmony and efficiency in the Executive Branch of the Government.

RECIPROCAL AGREEMENTS BETWEEN THE STATES

I have previously addressed you upon this subject, pointing out the great advantages that have been attained or kept as a result of reciprocal agreements between the states. This has proven true, particularly in the field of oil and gas conservation through the medium of the Interstate Oil Compact Commission, and in flood and water control through the various agencies created for such purpose.

I feel that greater attention should be given to this subject, and one field that we have neglected woefully is the field of regional education. In view of the recent Supreme Court opinions with relation to segregation, wherein the precedents of three-fourths of a century have been set aside, it becomes immediately necessary that this subject be completely reviewed in the hope that through regional facilities we may be able to ease somewhat the strain both from an economic and social point of view.

I most respectfully urge you to completely re-examine this field of legislation, and to seek at all times to coordinate local legislation with that of our sister-states to accomplish the ends which we seek. Such coordination and uniformity of enactment are very essential.

PUBLIC AND MENTAL HEALTH

During this administration great strides have been made in public health and in mental health, particularly in the latter. We have risen from the lower ranks in the category of states to a very high position, and the development of this field is yet in its infancy. I urge you, from an economic, a social, and a humanitarian point of view, under no circumstances to neglect or hamper this great work, and if there is any place that I could sincerely recommend a more lavish expenditure than presently being made, I would pick this department.

I know, too, that you will give earnest consideration to all of the phases involved in a general public health program. As the years progress, so has the span of human existence, something greatly desired by all of us. Not only is this true, but by reaching better standards for the care and treatment of human ailments, we have been able to increase human intelligence and human efficiency. Sick men cannot think well or work well, and as we furnish our citizenship ways and means to keep well and feel well, we increase their incentive, their love of life, and the good that we can do unto each other as we pass along life's highways.

UNIFORM PURCHASE AND CONTRACT CODE

Upon this subject I have always been persistent and will continue to be as long as I live. Four years in the Governor's Office have convinced me that the lack of uniformity in our methods of purchasing the necessary supplies and equipment for our State departments, and the lack of uniformity in the making and enforcement of contracts made by the State and its subdivisions with others, are costing us multiplied millions of dollars each biennium. These losses are occasioned by

waste, extravagance, and the payment of exorbitant prices. A well-balanced, carefully controlled system of buying should be enacted for the use of every department, from the State down to the smallest municipal division.

A complete reorganization of our Statutes pertaining to the advertisement, letting, supervision of performance and payment for the performance of public contracts should also be made. Deviation from plans and specifications, extra-charges, over-charges, extensions, and the like, are being accomplished with impunity, and the result on the public pocketbook is unconscionable. There can be no valid reason why the necessary corrections are not made, and until they are, the public will continue to suffer.

PUBLIC BUILDINGS

You will have, I apprehend, a dearth of requests for public buildings. During the last six years, we have expended the thirty-six million dollar bond issue on public buildings, besides numerous others authorized by two legislatures. I am apprehensive that public necessity has not demanded all of the expansion that has been done. I am convinced that in the interest of economy, no further expansion should be done within the foreseeable future except in exceptional cases, or as a replacement where a building has been destroyed by a fire or like catastrophe. No matter how hard we try to take a fair prospective view of the public buildings question, we find it always impressed with the demands of pressure groups who have little regard for the general public welfare, and a reckless, zealous, selfish regard for some particular department or institution.

To be very frank, I would favor some process by which a scientific survey could be made and real necessity determined before a public building would be allowed for any purpose. Such a survey, if authorized, could be done and accomplished in such manner as to provide for reasonably anticipated needs, and instead of having a multiplicity of buildings, as has been the past practice, could be so constructed that they would take care of the future needs of an institution for an indefinite period.

PUBLIC UTILITIES AND RATE FIXING

In the past year and one-half you will remember that there has been a veritable rash of applications by public utilities for increased rates, and, in almost every instance, the rates have been granted in accordance with the application. Hearings have been conducted but in most of these cases the public has been without representation. Practically all, if not all, of these increases have been based in part upon consideration of the Federal tax laws as they existed prior to 1953. We know that the Act of Congress of 1953 conferred many benefits upon corporations of this nature. We have not heard of a single instance where such tax benefits have been passed on the public by rate reductions.

Within the space of a few short months one Oklahoma utility passed from an average state in its class rates to one of the highest states in the Nation. I am not attempting to say that the rates fixed are not justified, but I am saying that I do not believe that the public interest has been adequately protected in any of this type of hearing for a good many years last past.

There was a time in our history when the Attorney General always appeared to protect the public interest. To procure this protection, I believe that an entirely new system must be evolved. I have not felt for a long time that it is proper for rate experts employed by the Corporation Commission or attorneys employed by the Corporation Commission to attempt to represent the public. Under such condition these employees, however honest, have a dual

loyalty, and become immediately a subject of political coercion. They simply cannot serve the best interests of the public under such conditions.

I am therefore suggesting that consideration be given to the establishment of a proper division in the Attorney General's Office with adequate facilities to make investigations, giving such division full inquisitorial power, and the enactment of laws sufficient to protect the public interest. Among these I would recommend a law making it the mandatory duty of the Attorney General to appear and oppose all rate increases, to file applications to reduce rates where the facts justify, and making further provision that no rate fixed shall become absolute and final until the same has been passed upon by the Supreme Court of the State of Oklahoma, and that such court be given powers to review questions both of law and fact.

This can be accomplished without any measurable increase in expense by simply transferring the certain powers of the Corporation Commission to the Attorney General's Office, and placing the rate experts and attorneys representing such division under the jurisdiction and direction of the Attorney General rather than the Corporation Commission.

I would further recommend a general investigation by this Legislature of all the rate increases granted within the last two years for the purpose of ascertaining whether or not such rate increases have been justified under the circumstances, and whether or not under the tax savings made by utility corporations by reason of recent tax enactments, applications should be made on behalf of the people of Oklahoma for rate reductions. Constant and competent vigilance is necessary to keep the public from being exploited.

ROADS AND HIGHWAYS

The roads and highways program of this administration is one in which a just pride is asserted. At the beginning of the administration no appreciable physical work had yet been done on the toll road project from Oklahoma City to Tulsa. Much of the preliminary work had been accomplished, and we were therefore enabled to start immediately on this program. It was completed with all possible dispatch, and has not only been operating efficiently and profitably, but has become an outstanding project of its kind in the Nation. It has been viewed and inspected by officers and commissions from various states, and bids fair to become a national model.

To further relieve the traffic burdens of Oklahoma, and to bring our road system to the highest standard of efficiency, three more toll road projects have been authorized, and as this administration closes, much of the preliminary work on these projects has been accomplished, and the new administration will be enabled to start construction very soon. When these projects have been completed, we will have ideal outlets to the north, east, and south, leaving only an outlet to the west yet to be accomplished, and this, I am sure, will come within a reasonable time.

A western outlet is of vast importance for the reason that Oklahoma is one of the main states in the Union through which flows the national traffic from coast to coast.

By modernized engineering processes, efficient policing and management, traffic accidents on our toll roads have been held to an almost irreducible minimum, and this factor alone adds much to the desirability of this and similar projects. A human life saved cannot be estimated in dollars.

As one who was not too well convinced in the beginning, I find myself now thoroughly sold on the benefits derived from these projects, and I hopefully predict that Oklahoma will keep abreast the trend in the years to come.

While we have been building toll roads and preparing to build others, we have not been neglectful of the State highway system, and I take great pride in producing the following table showing the great advancement made during this administration toward the ultimate completion of an up-to-date State highway system:

$123,657,648.26 in Construction and Maintenance Projects have been completed from January 1, 1951, through October 31, 1954, $29,844,060.00 in projects are under construction as of October 31, 1954, projects totaling $7,288,-433.18 were scheduled for the December 7th Letting, and $21,690,593.82 are programmed as of October 31, 1954.

1,841.4 miles of the State Highway System have been paved.

504 Bridges were let to contract in the amount of $17,894,976.88.

Bridge repairs amounted to $951,929,.65.

Bridges Cleaned and Painted $480,-406.05.

The Oklahoma Highway Commission is one of the most efficient departments in our State Government, and is made up generally of people who have made a career, as well as a profession, of this type of work, and I have noted with much satisfaction that Governor Gary has requested Mr. C. A. Stoldt to remain as Director of this great organization. He has been most efficient in the performance of his duties in my administration, and I am sure that he will show entire devotion and loyalty to the incoming Governor, as well as all of the members of the Oklahoma Highway Commission whom he may choose to keep. They are all fine, honorable gentlemen who have sacrificed much to be of service to their State and their people.

While we are on the subject of highways, traffic, and safety, let me again strongly urge that you review the laws of the various states with a view of modernizing our system of control, licensing, and taxing the commercial trucks which are using our free system of highways in ever-increasing volume. In its inception the free system of highways was not intended for such purposes. We tax the railroads to the utmost for their rights-of-way and their trackage. We should not permit them to be destroyed by a practice of furnishing free right-of-way to their competitors. This burden should be equalized and adjusted, and I am satisfied that it should be adjusted upwards.

REFORMATION OF COUNTIES

I am not unmindful of the delicate nature of this subject. I recommended it before and the legislature gave it the silent treatment—extremely silent treatment. The enactment of such a system will necessarily mean a reformation of the legislature, and there are those who are so zealous of their legis-

lative power and position that they would rather see the State suffer than to take this forward-looking step. Let me point out to you the inescapable fact that many of our counties are so poor in taxable property, and the salaries paid public officials so low, that competent public officials cannot be obtained under any circumstance. This is disgraceful. The citizen in the rural area is entitled to just as much competency and efficiency in the county offices which handle his business as is the citizen of Oklahoma or Tulsa County.

I covered this subject extensively in my message to you in 1953. I earnestly recommend that this message be dusted off and read again. The county setup in Oklahoma today is archaic and obsolete—a hangover from the horse and buggy days—all because of political expediency and the fact that an Oklahoma legislative body has had neither the courage nor the initiative to face it and solve it.

A reformation of this type will do more to make Oklahoma attractive to the industrial world and to new citizenship than any other form or medium of advertising that I can think of. We have seventy-seven systems of county government in the State of Oklahoma today — a maximum of forty would be enough. And the savings thus made would go a long ways toward taking care of many of the school problems and municipal problems that confront us at this time. No amount of pointing with pride and reviewing of legislative records would be comparable to the praise and glory that would fall upon a legislature which had enough intestinal fortitude to re-divide this State and to make it possible, by whatever legal processes are required, to reform the counties on a more equitable basis so that every county under the new setup would have adequate finances to have a respectable county government.

EDUCATION

During this administration the advances in education have been kept abreast of that of other states, and, in many instances, we have gone ahead. There is much yet to be done. I make no specific recommendation, being desirous not to encroach or seem to encroach upon the prerogatives of my successor. I would, however, point out that administrative costs in all branches of education are still excessive. There is much room left for consolidations. I have previously recommended the abolition and consolidation of expendable institutions. I think it is apparent to all of us that we have overdone ourselves in the creation of secondary institutions.

The question of where to abolish and where to consolidate is, of course, a delicate one. The legislator from each county where an institution is located will perhaps agree that these things ought to be done, but he ever insists that it ought to be some other institution—not his—that should be abolished or consolidated. Nevertheless, until such action is taken, maximum efficiency and maximum economy in the science of education will not be reached. The public would approve such a program if given an opportunity.

ELECTION LAWS

The cost of being elected to office in the State of Oklahoma has reached the state where it has become the object of national discussion—I might even say, and still be correct, national scandal.

We are not alone in this predicament, for other states are suffering from the same blight. The man who can assemble the most powerful of well-financed minorities can reach the heights of political preferment without regard to his ability for the job he seeks. We see and feel the results. To paraphrase Mark Twain, we do a lot of talking about it but never take any action. In the meantime the public confidence is on the wane and

our very institutions are weakened and threatened.

The time has come to revise the election laws of Oklahoma in a realistic fashion. No candidate for the high office of Governor, for the United States Senate, or any State office, for that matter, can make a campaign on the amounts fixed by law. On the other hand, no man should be elected to any office who undertakes to buy that preferment either directly or indirectly. A system of realistic laws, adequate to place the name of the candidate before the public, but with rigid limitations against excessive spending, coupled with the severest type of penalties for violation, should be enacted, together with such other enactments as are necessary to modernize our election machinery.

REDISTRIBUTION OF LEGISLATIVE REPRESENTATION

It is a matter of common knowledge and the subject of much discussion that the legislative apportionment now existing is inequitable and unfair. It, in fact, represents a denial of true democratic processes, and so long as such inadequate and inequitable apportionment exists, there never can be a relationship between urban and rural areas that makes for true friendship and cooperation.

The urban area of this State feels, and justly so, that they have been discriminated against. So long as this feeling exists, and so long as the subject remains neglected by the legislative branch of the government, just that long will the public have reason to feel that it is being denied its true legislative representation.

The Constitution upon this subject is mandatory. You cannot ignore it with impunity and at the same time escape the wrath of an indignant citizenship.

LOBBYING

In each of my former messages I touched upon the subject of present day methods of legislative lobbying. Four years of experience as Governor of Oklahoma have convinced me that the language I have used was entirely too mild.

Not only in Oklahoma, but throughout the Nation, the system of lobbying that has been built up by designing groups has reached the stage of a pernicious, cancerous growth on the body politic. It is disgraceful, dishonest, and corrupt. In all states the blood-sucking tentacles reach into the very legislative halls, and we find existing the abominable spectacle of legislators accepting pay under the guise of professional service and otherwise for the performance of legislative duties. As usual the public is the goat. How long it can be borne is yet a problem for everyone, but how soon it can be eliminated is your problem. It exists in Oklahoma, and everyone within the sound of my voice well knows it.

Tomorrow is too late to begin to do something about it. I earnestly recommend that you purge yourself of the influence of the professional lobbyist.

TAX EQUALIZATION AND REVENUE AND TAXATION

These subjects are so interlocked that they may well be discussed together. All of them are subjects upon which I have said much and accomplished little. By a trend of circumstances not within the realm of fair anticipation, our revenues, under the present system, have not depreciated, and by a stroke of luck and good fortune, have increased during the years of this administration.

Now, with more than half of the counties in the State on distress relief and others clamoring to get there, due to the recent drouth, there are yet those who are sanguine enough to hold out the hope that the golden eggs will continue to fall, and that we can reasonably anticipate as much revenue in the future as we have in the past. This sort of a situation is doubted wherever

sound thinking prevails, and instead of having as much revenue as we have had in the past under our system, I warn you now that you had better prepare for a belt-tightening process to bring governmental expenses within the depleted revenues that you are really going to get unless you are willing to do something about it.

What is that something? In countless communications and messages I have set out in detail the tremendous amount of personal property that is escaping the tax rolls entirely. This fact is transparent—it cannot be escaped—and yet no Oklahoma legislature to this date has had the fortitude to meet this issue and solve it.

Next, I have pointed out to you the utter futility of being able to get the county assessors of this State to place a fair assessment value on real property, the Constitution and its commands to the contrary notwithstanding. By reason of the homestead exemption, millions of dollars of homestead property are escaping the tax rolls entirely. The reason for the homestead exemption law were based upon hardship, poverty, and the era of depression and panic that existed at that time. The reasons having been removed, the exemption should have long since been taken off. But no Oklahoma legislature had the fortitude to face the problem and solve it.

We have been able to introduce bills that had for their purpose fixing a standard by which values could be measured for taxation purposes on real estate. The introduction of such legislation and a few perfunctory hearings is as far as we were able to get. Strangely, we found county assessors opposing the act, when, in truth, they should have supported it. It would have relieved them of much political pressure that is constantly exerted upon them to prevent their doing their duty under the law and in accordance therewith. If this legislation had been passed, your financial problems would have ended, no one would have been hurt badly, and everybody would have been contributing a fair share toward the upkeep of the government in all of its branches. The State system of revenue raising has, in my judgment, reached the saturation point, and I can think of no form of excise taxation that has not already preempted and being used to the utmost, either by the Federal or State Government. Where else can you look but to an equalized system of ad valorem taxation to bring you the revenues necessary for the operation of your Government?

Because of the ease with which the legislatures have been able to do it, they have constantly been shifting the burden of local Government and the local school system to the State, and expecting the State to carry this burden. As a result, many forms of taxation exist in this State which are obnoxious to outside capital, and which tend to keep investors out of the State of Oklahoma rather than to invite them in. We cannot extend the right-hand of fellowship and friendship to outside capital and invite new citizens, while at the same time we hold a tax bludgeon in our other hand to beat them over the head with as soon as they come into the State.

There are other more potent reasons why this State must move forward and modernize its tax system or else face the greatest financial problems that have ever confronted us. When and if the desegregation of our schools is made a reality, a complete overhauling of the school financing problem is necessary. Millions of dollars worth of property may have to be abandoned in its entirety and millions more be spent for new buildings in new locations. The problem is not one that can be solved by political chicanery, hypocrisy, or expediency. Real statesmanship and a fearless meeting of the issue is the only solution.

Another situation that is growing

worse by the year is the method of distributing monies collected by ad valorem taxation between the counties, schools, and cities. Instead of having these three groups fighting and at each others throats, a method should be devised through which a more equitable division can be attained. Much of this could be solved by the consolidation of schools, the reduction of administrative expenses, a reorganization of our counties and a reduction of county governments, and by the consolidation of city and county governments wherever the same is feasible and practical. I present this subject matter to you now, not indulging the hope that you will take this advice, but assuring you that I expect to live to see the day when you will be compelled to take it.

Many suggestions are being made about the creation of new forms of taxation to be applied to cities and municipalities. This I have opposed for the reason that it is my firm conviction that the burden thereof will fall upon those least able to bear it. Let me point to Oklahoma City as an example. It is surrounded by independent municipal corporations. Much of the wealth of Oklahoma City is concentrated in these outside independent municipal corporations. They have been created deliberately to prevent themselves from being taken into the City of Oklahoma City. They want all of its advantages but are unwilling to share in its financial responsibilities. Why tax the truck driver and the laboring man who lives in Oklahoma City additional sums when the banker, the doctor, the broker, and the so-called "silk stocking" crowd can have all the advantages and yet by reason of his wealth live in an area which is unaffected by the tax. The time has ceased when cities and towns live for themselves alone, if such time ever existed, and the maintenance of street repairs thoroughfares, and highways within the cities in this modern age are as much for the suburbanite and the farmer as they are for the citizens who dwell therein. Beware of taxes, the burden of which falls within the limited areas of city limits if such taxes are for the doing of a thing which is beneficial to a larger group.

In this connection, however, let me impress upon you that the placing of additional property tax upon the tax rolls, the elimination of exemptions, the equalization of values, and any other things done to modernize our system of finance, will avail nothing if for every dollar raised a new avenue of expenditure is created.

While these words are being written the press is full of headlines indicating the creation of new boards and agencies, but no where do we read of an intended consolidation or abolition of useless boards and agencies now in existence. No where do we hear a voice raised in the interest of economy and thrift. The clamor for more spending in its din drowns out the feeble voices of those who believe that government, like private business, should be operated on an efficient and business-like basis. The plain citizen sits and wonders why it is that after all of the glamorous promises he has listened to in the campaign, no voice is raised in his behalf when the time comes to split the melon and divide the cash.

For the sake of emphasis, I repeat—you will either modernize the tax structure of this State and find a method of retarding the reckless and extravagant expenditure of money, or else this State will be driven to economic bankruptcy and to a place far below her rightful position in the galaxy of stars that shine in the national makeup. The choice is yours. Each year you delay brings nearer the climax, and, I fear, the calamity.

EAR-MARKING OF REVENUES AND TAX EXEMPTIONS

These two evils we still have with us.

In previous messages I have had much to say concerning each of them. In previous legislative sessions I have been able to accomplish nothing concerning each of them, save to incite public discussion and inquiry, and it affords me some gratification to note that the press is beginning to treat these subjects with that degree of serious contemplation that they deserve. I have pointed out that tax exemption is basically and economically unsound. I have urged that a careful restudy of all exemptions be made with a view to eliminating those which are unjustified and unnecessary. Wherever tax exemption exists the beneficiaries thereof are invariably being granted a form of "special privilege." Conferring that advantage on one class makes necessary the imposition of an extra burden on some other class.

Under the present homestead exemption law in the State of Oklahoma, many thousands of people able to bear a proportionate share of the tax burden are escaping without the payment of any tax. Until this situation is met face to face and corrected, we will ever be confronted with insecurity and unpredictable revenues. The legislature is going to have to meet this issue, and every time it is evaded or ignored simply extends the time in which Oklahoma will continue to remain in a class considered by investors as unsafe for industrial expansion.

You will be confronted again with the usual new bills providing for additional tax exemptions. It is hoped that you will be able to withstand the pressure of the privilege seeking minority groups.

"Ear-marking" of funds is another irritating evil that we have with us. Sired by a stallion called "selfishness," and born of a dam called "greed," this monstrous offspring has continued to grow through the years. Each legislature, apparently distrusting its successor, seeks to perpetuate its will by undertaking to anchor revenues provided to a certain and fixed purpose. This not only defeats and evades the constitution, but tends to destroy and hamper by preferring one department or branch of the Government against another. Not only is this true, but it furnishes designing minorities a constant excuse to think up new forms of excise taxes to inflict upon some class or group, and then ear-mark it for some special purpose with utter disregard as to whether it benefits the class from whence it came.

I take pride in the fact that I have never ceased to attempt to drive home the necessity for legislative action in these connections, and I sincerely believe that we are much closer to a realization than we were when I started.

LUMP SUM APPROPRIATIONS

Again I point out to you the evil of the lump sum appropriation. It has been used in the past to prevent the exercise by the Governor of a legitimate and constitutional veto power. On the other hand, it amounts to an unwarranted surrender of legislative authority. Any appropriation worthy of being made ought to be certain and definite in its nature. Any institution or department desiring an appropriation ought to know enough about its wants and needs to be able to itemize with exactitude how much is wanted and what for. And, above all, the taxpayer who supplies the money is entitled to know with exactitude where that money is going to be used. It has nothing to recommend it, and every rule of governmental integrity condemns it. It is a relic of the past, an extravagant practice of the present, and a deterent to economic government in the future.

Forward thinking legislatures are attempting to do something about it in other states. What about Oklahoma?

SELF-LIQUIDATING BONDS

This subject is worthy of immediate and careful attention. I have noted that one distinguished member of your body

has already made a public statement in reference thereto, which I heartily commend, and urge him to pursue the thought expressed.

In the beginning the self-liquidating bond, as you know, was used to build dormitories and the like. The use is rapidly becoming extensive. It has extended to toll roads and recreational facilities. We cannot escape no matter how we may try the crystal truth that this method of financing is a constitutional evasion, and although the courts have held such an evasion to be legal and valid, we must further admit that it violates the spirit of the constitution and deprives the people of their right to speak either in approval or condemnation. If permitted to be exercised promiscuously, the privilege and use of the self-liquidating bond can result in devilish consequences. There are many fields of endeavor now looking toward it as being the means to accomplish what cannot otherwise be done.

I therefore respectfully urge you to give consideration to legislation or constitutional amendments, as the case may be, to safeguard and protect the use of the self-liquidating bond, and to prevent its being used for improper purposes. Above all things, the State and its credit should be protected to the end that it cannot be either directly or indirectly pledged to the payment of any bond supposed to be self-liquidating in its very nature. These bonds should be sold on a caveat emptor basis, and every safeguard should be taken to protect the public against any sort of an assumption of any part of this type of obligation.

I specifically recommend the repeal of all acts presently existing authorizing the issuance of self-liquidating bonds or trust certificates, and the enactment of a comprehensive, severely limited code in this connection.

OKLAHOMA CRIME STUDY COMMISSION

The Oklahoma Crime Study Commission, which I established last May, is mobilizing our social and scientific resources to help combat crime throughout the State. Working without fanfare, the Commission, which is made up of twenty outstanding men and women, has divided its tremendous task into five strategic areas of study and action.

One of the most important of these areas is the juvenile program, which has great promise of helping to correct a very critical situation affecting all Oklahomans.

Scientists, educators, physicians, religious leaders, many civic and parent groups, experts and laymen, public and private agencies are cooperating, planning and working together through the facility of the Crime Study Commission. This is a unique, pioneering effort to improve our State and the welfare of all our people.

This Commission provides an answer to the citizen's question, "Even though I **know** something must be done, what can I do?" Today he can join together with professional and scientifically trained experts to do an active job for the improvement of our community.

The Commission has proved itself the friend of the law enforcement officer. Its efforts in behalf of improved law enforcement, more effective rehabilitation work, and a statewide public educational program have been rewarding. Recommendations of the Commission are the product of all professional and civic, public and private associations and groups. Such recommendations are by-products of the continuing coordinating function the Commission performs. That function is, I believe, first in importance.

Our churches, schools, yes, even our police, must consider crime and delin-

quency **prevention** secondary to their positive functions. To overcome the growing social disease of crime, we must maintain an active, coordinated delinquency prevention program. This the Crime Study Commission is doing.

There is no single answer to the problem, success depends upon community awareness of the problem and cooperation in its cure. Time prevents me from referring to the numerous activities of the Commission, but I would like to mention the Short Course on Juvenile Conditions the Commission sponsored. Sixty communities, judges, educators, county attorneys, police officials, religious leaders, and a broad representation of civic leaders met together and have begun a long-range program. This is an inspiring effort, the people of Oklahoma are supporting it and want to continue it. In many instances assignments which I have given the members of the Commission have meant real hardship and a neglect of their personal business and professional duties. To help finance the Commission's initial operations, I allocated a small amount of money from my contingency fund. That money would not have been enough for the Commission to conduct its business had not private business and individuals contributed materials and services. Now that the Commission has proved its value, it will undoubtedly bring money for research and other purposes into the State. The Oklahoma Crime Study Commission is a proud example of the way democratic people join together to improve their well-being. I ask your consideration of this Commission, and, if you feel as I do, that it be given legislative sanction and help.

THE OKLAHOMA LONG RANGE WATER PROGRAM

On May 14, 1954, I appointed a group of outstanding Oklahoma Engineers to make preliminary studies for the development of a Long Range Water Program to serve all of the towns, cities, and communities of the State with an adequate, assured, year-round water supply for their municipal, industrial and agricultural needs. On December 3, 1954, the Committee made its report and copies are being furnished to all members of the Legislature and interested civic groups. I commend that report to your serious study. It can be the most important milestone in Oklahoma History.

The Committee made a complete and thorough survey of the water resources of the entire State, and reported that Oklahoma has enough water to meet every future need, even in periods of drouth. The only problem left is development of a storage system to hold the water until it is needed and a distribution system to take the water where it is needed. Oklahoma can do that, Oklahoma will do that, and when it does, we will have here in our beloved land the garden spot of America.

I extend my sincerest thanks to each of the individual engineers who made the Long Range Water Report. They deserve the highest commendation and gratitude of the people of Oklahoma. They worked long and hard, at considerable personal expense to themselves, activated by a desire to be of service to their State and a strong belief in the future of their State. They have here delivered to you a document which I predict will be the starting point of a new, brighter, and assured future for all of Oklahoma.

CONCLUSION

There are many other subjects upon which I am tempted to speak solely as a matter of public record. I realize, however, the general futility of a Governor's farewell message to the legislature. The old administration is passing, the new administration advancing—all eyes are turned toward the successor. I would not change the situation to the detriment of any incoming governor, but I would advise you that as a govern-

or serves his competence to speak should increase, and usually a farewell message is intended to give you the benefit of experience rather than to burden you with promises and prophecy.

The language I have used in this message has been somewhat pointed. I want you to know in this regard that I have not meant any personal disrespect for you, individually or collectively. I have attempted to point out with clarity some of the things which I believe sincerely are legislative failures and encroachments. If, in this, I can succeed only to the extend of impelling some of you to stop and think, then it is my considered judgment I shall have made the pathway of my successor a little easier for him to tread.

In leaving the office of Chief Executive of Oklahoma, both Mrs. Murray and myself are filled with gratitude and affection toward those who have given us their friendship and encouragement throughout the administration. Oklahoma has been good to us and to other Murrays before us. We feel ourselves impressed with the deep obligation to Oklahoma and its people, and we hope most fervently that we have been able through our efforts to accomplish some things beneficial. In the beginning we promised that we approached the office as "Plain Folks." We have striven to remain so, and we now join the ranks of "Plain Folks" from whence we came, to again shoulder the privileges and responsibilities of citizenship. We have no intention of retiring from such privileges or responsibilities, and will ever strive to make Oklahoma a finer and a greater State.

To my successor I extend all good wishes for a wise and successful administration as Governor. To be successful he deserves your support. I hope it will be given without stint or restraint in all of his efforts for the betterment and advancement of the State and its peoples.

And now, invoking upon you the blessing and guidance of He who can remain with you and yet go with us, for myself and Mrs. Murray we bid you goodbye.

JOHNSTON MURRAY

But pending a motion to strike out and insert, the part to be stricken out and the part to be inserted shall each be regarded for the purpose of amendment as a question; and motions to amend the part to be stricken out shall have precedence.

*

The Senate, in its Chamber, re-assembled at 2:45 p. m., with President Pro Tempore Fine presiding.

Upon motion of Senator Baldwin, the **INAUGURAL ADDRESS** of Honorable Raymond Gary is herewith incorporated:

Governor Murray,

My Fellow Oklahomans:

In assuming the responsibilities of being Governor of Oklahoma, I do so with a feeling of humility—a feeling that I alone cannot perform the duties of this office in a way that would be entirely satisfactory to a great people without the help of God in Heaven.

I want you to know, as citizens of Oklahoma, that I consider this high office, a position of sacred trust. Serving the people in a position of this kind, I consider myself obligated and morally bound to perform the duties in such a way that the people as a whole will benefit therefrom.

Oklahoma, generally speaking, has a good government but I know it can be made better. I am going to work hard and work long hours in a concentrated effort to develop a program which will lead to better living for the people of this great State. The program I believe in is the program that the majority of Oklahomans believe in—a program functioning for the benefit of everyone, not for the benefit of the privileged few.

I appreciate very much the thousands of friends I have throughout Oklahoma who rallied to my support in electing me governor. I know many of them devoted their time, money and efforts in the campaign to elect me because they believed in a governor for all the people. That is exactly what I am going to lend my very best efforts to provide for them.

The main function of Oklahoma's state

government is not to provide state jobs for a few people. Sometimes, if we are not careful, as public officials we will devote our time and our efforts to serving the interest of the minority and neglect the great program designed to serve all the people. I believe in Oklahoma. I believe in the people of Oklahoma. We have some problems we must solve and I am going to outline to the Legislature tomorrow a very positive program. It will be easily understood but I know it will be a program that will not meet the approval of all the people of Oklahoma.

I am willing as governor to take the lead, and I will, in carrying the flag for a more progressive program of government. It will be a program of government to provide a better educational system for the children of this state: a better program than we now provide for the mentally ill, the orphans and the people within our hospitals; a program providing a modern highway system which will lead to the development of a stronger economy for our state; a better program for the aged citizens and blind; a program that will be fair and progressive; a program designed to bring about a stronger economy, supported by our great agricultural industry, manufacturing, mining and petroleum industries.

As Governor, I will help lead the way in doing a better selling job of Oklahoma to Oklahomans and the people throughout the world. We have no problems that we cannot solve, if we have a mind and a will to solve them. I have the desire and the determination to see these problems solved. We will meet the problems head-on. We will not evade the issues. I know the easy way to be governor, and maybe the most popular way, would be for us to adopt the policy of dividing up the available funds we have and go home, postponing the major problems confronting the people of this state until some future date. But some of these problems have been postponed too long.

We have as one of our most pressing problems, that of providing an ample supply of water for agriculture, industry and manufacturing in a state that is growing, a state that is determined to progress. I want this legislature to adopt a long-range water program to meet the needs of the people of Oklahoma for many years to come.

I solicit the counsel and advice of the good people of this state. It is my wish to stay close to the people. By remaining close to the people, we will be able to keep our government cleaner and better and more like a true democracy.

Yes, I love Oklahoma. I love the people of this State. I have the utmost faith and confidence in the people of this State of ours. We have everything we need to develop the progressive, prosperous economy that a good people deserve. We are rich in mineral deposits, with oil reserves, coal reserves, thousands of acres of timber land. We have a state that is blessed by having one of the most beautiful scenic areas in the world. We have the mountains in the east, the beautiful streams and plains of the west: Texoma land, Hereford Heaven country and the Osage Grazing lands in the northeast: the Will Rogers area and the beautiful Wichita mountains in the southwest. All these things we have in Oklahoma. Why shouldn't we grow and progress as no other state in the union: with our 50th anniversary coming, let's adopt a new pride in Oklahoma and tell the world about our great state and its people.

We have a Christian state, a state that is blessed with hundreds of fine churches. This Christian influence is felt in the government we have in Oklahoma. As your chief executive, I consider this government a servant of God and as your governor, with the help of God, we will run this government in such a way that the Christian principles we

believe in will become more and more evident in its operation.

Thank you.

The President of the Senate declared a quorum of the Senate and Honorable House present and the Joint Session duly assembled.

Senator Baldwin moved that a Joint Committee, composed of 5 members of the Senate and 5 members of the Honorable House, be appointed by the President and Speaker, respectively, with instructions to invite and escort Honorable Raymond Gary, The Governor of the State of Oklahoma, to the Joint Session for the purpose of delivering his First Message to the 25th Legislature, the motion prevailing and the President appointed:

FOR THE SENATE: Senators Fronterhouse, Easterly, Walker, McClendon and Wilson (Greer).

The Speaker appointed:

FOR THE HOUSE: Representatives Ozmun, Andrews, Huff, Payton and Beard.

Senator Baldwin made the observation that the wife of Governor Raymond Gary was present in the House Gallery, asking her to stand, at which time the members of the Joint Session and guests in the Galleries stood in honor and respect to Oklahoma's First Lady.

The Joint Session was declared at ease.

The Joint Session was called to order by the President of the Senate.

Senator Nix moved to amend the Joint Rules, by adding at end of Joint Rule No. 21, the following, which amendment was adopted, "; provided however if said name offered as co-author shall represent a member of the other House then in that event it shall require concurrence."

The Sergeant-at-Arms announced the presence of the Joint Committee appointed to escort Governor Raymond Gary to the Joint Session.

The Joint Committee escorted Governor Raymond Gary to the Speaker's desk, where he was presented to the Joint Session by the President of the Senate, Lieutenant Governor Cowboy Pink Williams.

Governor Gary told the Joint Session that he did not wish to read his prepared Message, since it would appear in the Journals of the Senate and House, but rather preferred to talk to them in an "off the cuff" manner, hoping to better emphasize specific parts of his program and recommendations, since both the Legislature and his Administration must share responsibility.

Upon motion of Senator Baldwin, the Joint Session was ordered dissolved.

*

The Senate, in its Chambers, was called to order by its President.

Senator Baldwin moved that the First Message of Governor Raymond Gary, presented to the Joint Session today, be incorporated in the Journal, which motion was declared adopted, the message being as follows:

Mr. Lieutenant Governor
Mr. President of the Senate
Mr. Speaker of the House
of Representatives, and
Members of the Joint Session

In appearing before you today, I am carrying out one of the requirements imposed upon the Governor by the Constitution of the State of Oklahoma. In delivering this message to you, I do so with a deep feeling of humility and a feeling, too, that the Office of Governor imposes great responsibilities upon an individual.

I come before you not as one who feels he knows all the answers to the problems involving Oklahoma today. The recommendations which I will make concerning changes in the laws of our state are made because they represent the program which I outlined to the people throughout this state during my campaign for Governor. I feel that the recommendations which I set forth to you are sound and actually reflect the wishes of the majority of the people of this state.

As a former member of the Oklahoma State Senate, I know it is the Legislature's policy to consider seriously the recommendations of the Governor. I know, too, that members of the Legislature do not appreciate a Governor presenting a message in the form of a mandate. I want you to feel that my message today is presented to you upon its own merits. If the proposals and recommendations which I shall outline are not good enough to stand upon their own merits, then they are not good enough for you to enact into law. My job will be to sell you on this program. I feel that the majority of you are already sold on my program of government because it actually represents the thinking of the people of this state.

Many of the recommendations which have been approved by the Legislative Council have been incorporated into my message.

I feel that the twenty-fifth Oklahoma Legislature now in session will have to face head-on many major problems affecting the economic growth and development of our state down through the years to come. I, as Governor, not only want you to face these major questions head-on, but I will lead the way. I will be willing to take criticism and abuse from those who might attempt to stand in the way of progress. All of us, to-

gether, carrying the Flag of Progress, will march forward and write a progressive program of government which will mean better living for the people of Oklahoma.

Tax Structure

Generally speaking, Oklahoma has a sound tax structure. *I will recommend that you not make any general increases in taxes.* I do, however, believe it would be wise for the Revenue and Taxation Committee to take a look at our tax structure with a view toward making adjustments where you feel it would strengthen our tax structure, or make it fairer to all the people and bring about a still more favorable industrial climate.

To make a general increase in taxes at this time, in my opinion, would be very damaging to Oklahoma's economic growth and development. During the past several years we have held the line against tax increases. We have made adjustments in some of our tax laws thus placing Oklahoma in a more favorable and competitive position with other states of the Union for industrial development.

It is true that our state taxes are high, but our local taxes are very low. When the two are averaged together, Oklahoma has one of the lowest tax rates on a per capita basis in the Union. We want to keep it that way. At the same time, we are faced with the responsibility of providing adequate funds to meet the needs of the essential functions of government. I believe that our present tax structure, plus improved assessment practices on the part of the counties, will enable us to produce the revenue which is needed to carry on our government, maintain our schools, our mental institutions, construct roads, carry on an up-to-date soil conservation program, and meet all other essential needs of our state government.

Welfare Program

I know that each of you is vitally interested in our welfare program. It is a program close to your hearts and to the hearts of all the people of the State of Oklahoma. I am sure that the ordinary citizen of the State of Oklahoma desires that Oklahoma's needy be provided for in the best manner possible with funds dedicated for such purpose.

The Welfare Program is the number one cost of government in Oklahoma. This is a program of government which every Christian citizen in Oklahoma endorses. Under this division of government we provide assistance for aged citizens who qualify for the assistance program. We provide aid for widows, for orphans, and for those who are physically disabled and unable to earn a living for themselves. Under this program we would include our State Hospitals, our Mental Health Program, our Orphans Homes, our School for the Blind, and our School for the Deaf.

Oklahoma provides a better public assistance program for its citizens than any of the surrounding states. For example, Federal statistics show that the average payment for an old-age assistance recipient in Arkansas was $33.82; Colorado $82.19; Kansas $64.35; Louisiana $51.22; Missouri $50.11; New Mexico $46.42; and Texas $38.88. That was in September of 1954. The average payment for an old-age assistance recipient in Oklahoma then was $57.77. You will note that there are only two of the states named whose average payments exceed that of Oklahoma. This can be explained when it is considered that Colorado had approximately 52,500 old-age assistance recipients and Kansas had approximately 34,500. At the same time, this state had approximately 95,000 recipients.

Our basic statutes on public assistance appear to be satisfactory. They are liberal, more liberal than in the majority of states when all points of eligibility are considered. It is difficult to administer the program because our sales tax and number of recipients

fluctuate. This causes some criticism in the administration of the public assistance program. It is necessary to keep the expenditures of assistance within the income. Each time a change in budget is necessary, because of a decrease or increase in revenue, it causes some people to think there has been an inequity in administration. This cannot be helped. The Oklahoma Public Welfare Commission and I, as Governor, will try to keep the program as stable as possible. Changes in the budgets of the recipients and the payments they receive will be kept to a minimum. I assure you that I shall always have a close personal interest in the public assistance program. I am confident, too, that the Commission will cooperate with me fully in eliminating as many problems as possible in administering this program. It is my desire and, of course, the desire of the Commission that all assistance provided by the Legislature be administered in a respectful and sympathetic manner. I believe through wise administration and increased revenues that this administration, with the full approval and cooperation of the Oklahoma Public Welfare Commission, will be able to increase the budgets of our aged, blind, and disabled recipients to a very substantial degree. I am hopeful that it will be increased from the present $88 a month budget to at least $100 a month before I leave office. I believe this can be done, for I am sure that I shall receive the full cooperation of all our state employees.

I also believe the amount we are now able to pay our aid to dependent children families, although liberal in comparison with other states, can be increased. I am sure that all the law enforcement officials, administrative agents, courts, and the citizens of Oklahoma, too, will cooperate with me fully in this effort. I shall expect them to continue requiring fathers to support their children, even though they have abandoned and neglected them. It will continue to be the policy of the Welfare Department, with my full approval and cooperation, to eliminate insofar as possible aid to those parents who expect the state to bear the burden of their children's support because they themselves do not wish to assume this responsibility. Furthermore, wherever possible, I shall do all in my power to see that the homes in which aid to dependent children funds go are suitable home in which children may be reared properly,

The present policy of the Oklahoma Public Welfare Commission allows a recipient living in town to own a home with a value up to $8,000. In addition to this a single person may retain $350 in any form, whether it be cash, stock, bonds, insurance, excess land, automobiles or any other form he wishes. This amount is $500 for a couple receiving assistance for the aged, blind, or disabled, with a maximum of $600 allowed as aid to dependent children family of four or more persons. The recipient may also own a reasonable amount of household equipment, including a television set, and have a home of a value not to exceed $8,000, with an area not to exceed forty acres. This permits many people to own land up to one hundred sixty acres and still be eligible for assistance, since they place their reserve in the excess land over forty acres. This last regulation concerning people who live in the country may, at first, seem unfair since many of their homes do not have a value of $8,000. But actually it is not unfair. A recipient living in Oklahoma City, Tulsa, and many of the larger cities often cannot obtain a home reasonably livable and modern for less than $8,000. Forty acres in the country permits an aged person to retain land on which to live, have a garden, chickens, cow and so forth and in many instances this will permit him to live better on the assistance grant of the Department than a man without these facilities in town. Also, it is mandatory

for the Department to consider the applicant's financial situation at the time of application and the aged couple living in town, having no income whatever, should be entitled to assistance in order for them to remain in the home to which they have been accustomed, and for which they have a strong attachment, and not be forced to dispose of this home and move to another section of town less desirable.

It is my recommendation that no liberalization be made at this time on eligibility requirements for assistance. It is not the purpose of the assistance program to assist in the building up or retention of an estate to pass on to children. It is the purpose of the assistance program to provide the essential needs of those people whose income and resources are not sufficient to maintain a reasonable standard of living. Permitting a person in the country to own more than forty acres of land, with the state furnishing assistance, would be bad for the economy of the state. Many would refuse to sell the land and would draw assistance. The land owned by the recipient would remain untilled and would not produce anything to add to the revenue or wealth of the state.

Any broadening of the regulations would, in my opinion, defeat the very purpose of the assistance program. A slight relaxation of the eligibility requirements would add great numbers to the assistance rolls. This, because of limitation of funds, would take from those who need it most and give it to those who need assistance the least.

There are several proposals being presented before the next Congress to establish a medical care program for recipients of assistance and it is probable that they will pass some kind of legislation to provide care for medical indigents. It is my desire that Oklahoma participate in any medical care program adopted by the Federal Government on a matching-fund basis with the States. However, if Oklahoma takes advantage of this proposed Federal legislation, it will be necessary that more revenues be placed in the assistance funds of Oklahoma for those on categorical assistance and some provision made for medical insurance for those who are medically indigent. *If this needed additional revenue can be raised by broadening of the tax base of the sales tax law, without manifest injustice to any exemptions not allowed, I would suggest that this additional revenue be raised in this manner.* If this cannot be done, I would suggest that the Legislature find some new source of revenue to the extent necessary to meet this requirement, in order that those citizens of Oklahoma needing medical care can be furnished it in cooperation with any Federal legislation enacted.

Soil and Water Conservation

Oklahoma is one of the states which pioneered soil conservation by encouraging the terracing of land and other conservation practices. *I will recommend to the Legislature that it seriously consider legislation introduced pertaining to the conservation of our soils. It is my desire that the state encourage the Federal Government to make available additional appropriations for upstream flood control by building additional detention dams to retard the excessive flow of water down our streams.* If the Federal Government and the State of Oklahoma will develop this upstream flood control program to the fullest extent, it will help to insure an adequate supply of water for irrigation, municipal, and industrial uses in the years to come. In addition, it will cause our rivers and our streams to flow with clear water again practically the year around.

In addition to our soil and Water Flood Control Program, *this Legislature should give consideration to creating a Water Authority* with sufficient powers to borrow money on self-liquidating bond is-

sues, to construct reservoirs, build canals, storage basins and such other facilities as may be necessary to meet the water supply needs for industrial, municipal, and agricultural uses within the state.

In order for us to develop a strong industrial state, we must first provide an adequate supply of water. Our rainfall is sufficient to provide the water supply needed if we will construct the necessary dams and carry out proper soil and water conservation practices. I know this is a far-reaching program but in order to accomplish the things which we have in mind, it is necessary for us to look ahead and plan ahead. I believe that we have the necessary vision, intelligence and courage within the halls of this Legislature to devise the program needed today in order to insure better living conditions tomorrow.

Present and future municipal water supply requirements for Oklahoma, according to a report of the Oklahoma Water Supply Work Group on fifty Oklahoma municipal water supplies, representing a population in 1950 of 972,227, show pumpage of 121,386 acre-feet in 1950. This information, extended to the State, indicates the following yearly municipal use:

Year	Population	Gal. Per Capita	Water Pumped Acre-Feet	Water Use* Total Acre-Feet	M.G.D.	Per Capita
1950	2,233,351	83	201,303	301,303	268	123
1975	2,451,000 est	140	375,000	525,000	469	197
2000	2,799,700 est	180	350,000	950,000	848	310

*Includes evaporation and process losses from surface storage.

One acre-foot equals approximately 326,000 gallons.

Seventy per cent of the U. S. population today are users of city water supply. Assuming this rate of urban population increases, municipal water works must provide city water for 500,000 new consumers each year. Oklahoma is expected to need more than 50% more municipal water by 1975.

There is little evidence that a water shortage is necessary. Water may be obtained but at an ever-increasing cost. The longer a project is delayed, the higher these costs will be. Most of our so-called water shortages exist, as a rule, due to lack of advance planning and construction, and the intelligent distribution and use of water. If history teaches us anything, we should learn to make long-range plans—finance and construct—before shortages occur.

Other western states have been building water resource projects for many years. In Utah and Montana, a state agency has the responsibility for planning, building and operating certain projects which conserve and store water for beneficial use. Operations are financed from a revolving fund which is being built up with appropriations from the Legislature. As income is received from operations, the money goes into the revolving fund and is available for new projects. It is understood that these annual appropriations are on the order of two or three million dollars, depending on need.

There are many instances where western states have operated with the Federal Government in the development of projects, and have shared in the construction costs. Apparently they have all learned that water is one of their important resources, and that the developments must be paid for by the people who receive the benefits.

Thirty-seven million acre feet of water flows out of Oklahoma each year.

Much of this water is run-off that is not absorbed by the soil during periods of torrential rainfall. If only a small part of this runoff water could be stored and utilized on land suitable for irrigation during periods when soil moisture is a limiting factor in plant development, the average annual farm income in Oklahoma could be increased by more than fifty million dollars.

A study of irrigation possibilities in Oklahoma indicates that suitable land for irrigation farming can be found in every stream valley in which sediments from run-off water have been deposited. However, irrigation water is not available for use from natural stream flow in many of these valleys during periods when drought is a limiting factor in plant development.

There are approximately one million acres of good land on stream terraces and in bottomlands in Oklahoma that could be irrigated if an adequate supply of water were available. A lack of available water combined with high cost of storage and distribution are important factors which will affect the development and success of many irrigation projects in this region.

Oklahoma and the other states of the Southwest must recognize that as far as water supplies are concerned, planning must be adjusted to periods of famine and plenty by supplying adequate storage to collect the great volume of flood water which crosses the State, even during dry years.

Growth in population and industry makes the present drouth acute and clearly demonstrates a roadblock to our future development unless we take steps to rectify our apparent water supply deficiency.

Oklahoma now has a population of about 2,400,000 and is using approximately 475,000,000 gallons of water daily. If water can be made available, it is estimated that by 1975 we can profitably use 750,000,000 gallons daily. This demand will necessitate the expansion of facilities to provide twice our present requirements, or approximately an additional million acre-feet of reservoir storage capacity. An average of 37,000,000 acre-feet of water flows through and out of Oklahoma annually. In even the driest years, with adequate storage facilities, our every future need can be supplied.

Oklahoma, along with some of her neighbors, has been careless of man-made pollution and has thus spoiled both ground and surface water supplies which otherwise would be useable. This situation must be corrected.

Oklahoma can be proud of the progress that has been made in conserving her soil resources and providing many thousands of stock ponds. However, the program of land treatment combined with bank stabilization must be accelerated if the major structures to provide suitable water supplies are to be protected against undue siltation.

Irrigation in Oklahoma is no longer an experiment. Where water is available and not required by a use of higher priority, it should be put to work on over one-half million acres of suitable land for producing crops needed for an expanding balanced economy.

Recreation for the people of Oklahoma and the conservation of our fish and wild life are of growing importance, and these needs will be materially benefited by the structures built to satisfy the other water uses.

Oklahoma, with an average annual flow of about 37,000,000 acre-feet in her streams leaving the state, has, if she will but properly conserve it, enough water to meet every future need, even in periods of drouth. Vast natural resources, combined with other favorable factors, make possible a tremendous industrial development in this state if we can but keep the development of agricultural, municipal, industrial, and

recreational water supplies in pace. Of the two million acres of land in this state that are suitable for irrigation, half of it lies in stream terraces and bottoms. If only a small part of our run-off water were available for these lands, the annual farm income of Oklahoma could be increased by over one hundred million dollars.

To keep our economy in balance we must have more industry to provide jobs for our people. Large industries need great quantities of water. Most of the communities of Oklahoma are not able to supply industrial water needs from their present supplies. They are even short of domestic water.

I feel it is imperative that appropriate legislative action be taken as soon as possible to create an instrumentality of the state that is adequately financed, which will have authority to cooperate and make contracts with Federal, State, and local levels of government as well as corporations and individuals, and can develop supplies and distribute and sell the water for the benefit of the people of Oklahoma.

Interstate compacts between Oklahoma and her neighboring states, allocating the waters of the Red and Arkansas River Basins and regulating pollution are essential to any long range plan for development of water resources. The enabling legislation is now before Congress. Those charged with such negotiations must be familiar with our water requirements.

Agriculture

Agriculture is Oklahoma's most basic and most important industry. We all depend on it, for as agriculture prospers, so will other businesses of our state. Soil is the source of all wealth, and agricultural cash income, which has averaged approximately 600 million dollars per year for the last five years, is new wealth. This wealth which is multiplied six or eight times as it moves through our economic system is truly important to all of us, whether or not we are engaged in agriculture or closely related industries.

Agriculture must be in position to furnish food and fiber for a rapidly expanding population and the food must be of the kind and quality to insure improved diets for all of us. This can be done only if we strengthen agriculture through research and education. Through education we must take to the people, and make application of, the newer and better things in agriculture developed through research. In so doing, we will discover our greatest needs—the things on which research needs to be done—in order to best serve the agricultural needs of our state.

We must strive continuously and increasingly through research and education to meet these needs and to strengthen all segments of agriculture and related industries.

During the past 25 years the farmer's cash expenses have gone from 25% of his gross income to 75% or 80%. Business and management in farming is as necessary as management in business or industry.

Good management means successful farming; a strong agricultural economy instead of a weak one. Good management results in proper use of resources, and a balanced farming program. It means wise production, not necessarily more bushels per acre, but production at a cost which will leave a reasonable margin of profit. Good management can result only from an understanding of our capacities on each farm or ranch and in the state as a whole. This can be achieved only by a stepped-up program of research and education in this field.

Water is one of the major determining factors in both agricultural and industrial development of our state. Wise use of water for irrigation and other farm and ranch uses is a must. We need to

continue studies and research on water use to determine how greatest returns can be expected from use of available water.

If agriculture is to prosper, we must have an increasing number of trained personnel to operate our farms and ranches, to work in fields related to agriculture and to man our expanded research and educational program.

This suggests the need for continued and expanded support for activities in 4-H Club work, vocational agriculture, and college level training programs.

Fish and Game Commission

I would recommend to the Legislature that it refer to the people a Constitutional Amendment creating a constitutional Fish and Game Commission. I make this recommendation because I would like to see the Fish and Game Commission, which is financed totally by the sportsmen of Oklahoma, removed as far from political domination as is possible. This would lend more stability to the operation of the department and a long range program could be evolved which would improve fishing, hunting and wild life conditions in Oklahoma and preserve for our future generations some of the privileges which we, ourselves, have been able to enjoy.

Education

There is no need for me to dwell at length in discussing the needs for a strong educational program for the youth of Oklahoma because I know that you Members of the Legislature are just as vitally interested in a well-balanced educational program as I am.

We are faced during this Session of the Legislature with making some very important decisions which will have far-reaching effect upon Oklahoma's educational system. It will be my policy as Governor to always emphasize the importance of education upon the future growth and development of our state. With this in mind, I will always be very positive in my statements concerning the needs for finances to help make this program possible.

We may just as well be realistic and face the issues squarely. There is no way that we can provide for a progressive educational system without increasing the funds with which to finance it. I feel that the increased funds for the support of common schools in Oklahoma will have to come principally from local levels. I am not going to ask the Legislature to make any further increases in taxes upon the people of this state. *I am, however, going to recommend to you that we take a new look at the assessment laws of Oklahoma* with a view of improving our local assessments so that we can place on the rolls that property which is not now on those rolls and assess the property on a fairer basis. At the rate the wealth of Oklahoma has been increasing for the past several years, taxable evaluations should have been increasing at the rate of at least $100 million per year. In my opinion, there are millions and millions of dollars in taxable property within the borders of Oklahoma not on the tax rolls. The people who own this property also owe an obligation to Oklahoma. They should be made to carry their share of the tax load, along with the people who have properly rendered their taxes.

Our school population this year is up about 13,000 over last year. To provide the necessary teachers, supplies and transportation for this increase in our enrollment of common schools, an additional expenditure will be required of approximately $2 million per year. You can see that the cost of education is going up, principally because our school enrollments are increasing. This should not be a discouraging sign for Oklahoma. It should be a very encouraging sign. It shows that we are growing. I would much rather be challenged with the problem of finding adequate finances

for instruction and new buildings to provide for increased school enrollment than to live in a state with a decreasing school enrollment and money in the State Treasury. I would recommend that we meet this demand for increased funds for the operation of our common schools in the following way:

1. *Refer to the people a Constitutional Amendment* making the constitutional levy of 4 mills on a county-wide basis to go to the Common School Fund. This 4 mills will replace the 4 mills which will be lost when the Supreme Court's mandate goes into effect doing away with segregation.

2. *I would recommend taking a new look at the assessment laws with a view of strengthening our assessment practices* in this state in an effort to get the property assessed more in accordance with the law, and get all the property on the tax rolls.

3. *Take a new look at the present school code* to see if there is any way that expenses can be cut in the operation of our schools without crippling the efficient operation of our schools.

In some areas of Oklahoma we are faced with a very acute school building shortage because of rapidly increasing school population. In order to help relieve that acute situation, *I am recommending to the legislature that you refer to the people a Constitutional Amendment* which would provide for school districts to vote up to ten per cent of the valuation for school building purposes. I would recommend that this Amendment have a formula perfected in such a way that only those school districts which can show that they have exerted all of their present means of building additional schools, and still are under-financed, can qualify for the privilege of voting up to 10% of the valuation. If they cannot meet these requirements, then they will continue to operate on 5% of the valuation. I know that you and I will be criticized by some for making these recommendations for the benefit of the youth of our state, but I am willing not only to share the criticism with you, but I am willing to share most of it. I am willing to assume the obligation of providing a more up to-date and modern educational program for our youth as a vital part of the Administration's program.

There are other important educational measures which I will support. These are not listed here. I consider these which I have listed as absolutely essential in order to meet this challenge for a more stable school program for Oklahoma.

I will further recommend that you exert every effort possible to improve, along with our common school educational program, *a program for the physically and mentally handicapped children,* a program for vocational rehabilitation to benefit the handicapped people, a teachers' retirement program, and take a new look at our present textbook system with a view of improving administration and adoption policies relating thereto.

I further recommend that you make a study of the needs for capital improvements on the campuses of our institutions of higher learning. We have acute needs for several millions of dollars for capital improvements immediately. The enrollment in the institutions of higher learning is up 10% this year over last year. Indications are that these enrollments will gradually increase. Since we do not have sufficient funds in our budget to provide for the operational needs and the capital improvement needs, *I would recommend that we devise some kind of program based on sound business principles and perform practices to meet the needs of the institutions of higher learning for capital improvements.*

Health and Medical Assistance

A large part of the budget for health and medical assistance is expended

through the two tuberculosis sanitariums and the Oklahoma General Hospital. I have recommended a supplemental appropriation in the amount of $40,000 for the Oklahoma General Hospital and I am further recommending that the annual budget for this institution be made in an amount sufficient to have an accredited hospital and a formal nurses' training program.

The budget for the State Health Department is being reduced by a reduction in the amount of Federal funds available. I would like to recommend a general increase in the state appropriations for this most important activity. However, on the funds available, I have not been able to do so. I believe that some of this decrease may be offset by an increase in the amount of local funds available for local health services.

I would also like serious consideration on the proposition of increasing the fees charged by the Health Department for certain of their services. I believe that these services, such as the issuance of birth certificates, should be on a self-supporting basis.

For the past two years we have had a Committee made up of some of the finest members of the Oklahoma Legislature—Senators John Russell, Fred Chapman, D. L. Jones, Basil Wilson, Lawrence Irwin and Representatives Shockley Shoemake, Leland Wolfe, Charlie Long, Charles Krieger, and Porter Lee. This Committee has been making a study of how other states operated their mental institutions, hospitals, orphans homes, schools for the blind, schools for the deaf, and penal institutions. This was one of the hardest working committees that I have ever seen function. They have traveled many miles and devoted this time free. They received no more salary for doing this than they would have drawn otherwise. This committee has made definite recommendations to the Legislature. The Legislative Council has endorsed the recommendations of this committee. I know that there will be many who will oppose any change in the policies which we have been following in the operation of these institutions and I know that many will do so because they feel that our present plan of operation is better. I recommend that you make a sincere study of this proposed legislation and not bow to pressure groups on either side. Make your decision based upon the merits of the proposal, taking into consideration, of course, that the goal ahead is to enact laws which will enable the State of Oklahoma to take better care of those housed within our mental institutions, our state hospitals, our orphans homes, the deaf and blind schools, and a program to rehabilitate those housed within our penal institutions who can be rehabilitated.

General Government

We have more than twenty thousand full time employees working for the State of Oklahoma. Yet, we do not have a state personnel division. In order for us to operate the state government on a more efficient business-like basis, it is necessary for us to have a personnel division for general government.

I know that it is impossible to operate a government on the same basis a business is operated. I do believe, however, that a better job could be done of operating our government if we had a good Personnel Division functioning in the same business-like manner as that of a giant business concern. After all, Oklahoma's government is a big business organization. We should run it as much like a business organization as possible. *I will recommend that you enact into law a workable personnel and job classification act.*

I recommend that you vitalize the Constitutional amendment voted by the last general election regarding the statute pertaining to limitations of ad valorem taxes.

In connection with Oklahoma's industrial development I recommend that the Legislature amend our employment security act to reduce the qualifying period for experience rating by employers of eight or more persons from three years to one year. This reduction in qualifying period has been possible since Congress took action last August, and it will be strongly to Oklahoma's advantage to be the first state in the Southwest to take such action.

Indians

The Indian problem in Oklahoma has actually been considered the problem of the National Government because it has been the National Government which assumed the obligation of providing schools and training for the Indian people of Oklahoma. But in recent months, there have been indications coming from Washington that the Federal Government might relinquish its aid in the way of providing schools for the Indians. This obligation would be assumed by the states wherein the Indians reside. In this case, it would mean that Oklahoma would be required to assume an obligation which would run into large sums of money. *I would recommend to you that you make a study of the Indian tribal problems in Oklahoma with a view toward preparing the State of Oklahoma to take over this new obligation should it become necessary.*

Negroes

The negro citizens in Oklahoma have a vital interest in the development of Oklahoma's economy. Individually they are also interested in their own welfare as citizens of this state. To the negro citizens of Oklahoma I make this pledge, that they will at all times be extended fair treatment and consideration at the hands of the Chief Executive.

The negro institutions will be given proper consideration in the allocation of state funds for the operation and maintenance of such institutions. We will select competent personnel from the negro race to operate their own institutions as we are now doing as a state government.

Judiciary

At statehood our Supreme Court took over some 600 cases from the Oklahoma and Indian Territories Supreme Courts. Since then our trial courts have doubled and the appeal work from boards and commissions has increased many times. Cases now pending still number about 600. The laws regulating appeals and their priority force some citizens to wait two years for a final decision on appeals. The organized bar of Oklahoma, the judicial council, and the legislative council committees which studied this problem recommend the appointment of commissioners to assist in reducing the appeal time from two years to a few weeks. *I recommend that you create such commissioners and make Oklahoma a state with speedy administration of justice.*

The most basic need in state government is the enforcement of law and order. Throughout the state, citizens are faced with a serious situation in criminal prosecution. In many counties it is difficult to get a prosecuting attorney. Most of our law enforcement problems can be solved by an experienced, hard-working prosecuting officer. Much of our crime will be prevented if its breeding places are cleaned out. *I join with our leading crime studies and church groups in recommending to you the creation of criminal prosecution districts* in which a District Attorney can coordinate, supervise and prosecute our criminals. I have prepared the legislation, and urge you to pass it early enough in the session so organization can be completed well before your adjournment.

Labor

Since Oklahoma is rapidly developing into an industrial state, our industrial payrolls have been increasing. Be-

cause of this, the State Labor Department of Oklahoma needs to have an increased staff so this department can function in accordance with the Constitution and in a manner that will reflect direct benefits to the laboring men and women of our state. They are entitled to guarantees, through the Labor Department's Inspection Division, that the factories and mines and other industries in which they work in Oklahoma will adhere to safety laws and regulations provided for the benefit of Oklahoma's laboring people.

I recommend to you that you increase the appropriations to the Labor Department of government in an amount that is necessary to meet the need of this governmental service.

Veterans Affairs

I would recommend that the Constitutional Amendment voted by the people to provide loans for veterans to purchase farms be vitalized so that the deserving veterans who wish to own and operate a farm of their own will be able to purchase a farm and pay for it over a long period of years at a low interest rate.

Petroleum Industry

Another matter which I desire to call to your attention is the chaotic condition existing in the oil industry in Oklahoma.

The oil industry has given to Oklahoma much of its wealth and employment. It, more than any other factor, influences the economy of Oklahoma.

Approximately 62,500 persons are employed directly by the petroleum industry in Oklahoma. They receive, in salaries and wages, roughly $242 million each year. Considering those who are indirectly employed and those dependent upon the wage earners, approximately one quarter of the people in Oklahoma are dependent upon the oil industry for their welfare.

Figures received from the Oklahoma Employment Security Commission of December, 1954, show an overall increase of 156.25% of unemployment of oil field workers for 1954 over 1953. In certain counties of this state, unemployment of oil field workers has increased over 400% in the past year.

In 1953 the oil industry produced a gross income of $580,971,000 and paid to the State of Oklahoma a gross production tax during the fiscal year 1953-1954 of $30,732,657. During the first four months of the fiscal year 1953-1954, the gross production tax amounted to $10,314,322. During the first four months of the fiscal year 1954-1955, gross production taxes had declined to $8,834,834, showing a net decline in the four month period of $1,509,939, which, if continued for the remainder of the fiscal year, will be a decline of $4,529,817 for the fiscal year 1954-1955. The result of this loss in income to the Government of Oklahoma, through the reduction in the collections from the gross production tax, will seriously curtail the vital functions of the government if allowed to continue.

Recently certain of your leaders and I appeared at the market demand hearing of the Oklahoma Corporation Commission, requesting that the allowable production from the oil fields in Oklahoma be increased for the month of January, 1955, by 50,000 barrels. We felt this request was justified by reason of the fact that a market does exist for Oklahoma-produced crude. Figures of the U. S. Bureau of Mines for the month of September, 1954, show that over 27% of the crude oil refined in Oklahoma refineries originated outside Oklahoma. Since 1935, the daily average crude production in Oklahoma has increased approximately 10%; Texas has tripled; Louisiana has shown a five-fold increase; New Mexico has almost quadrupled; Kansas has doubled; and the Rocky Mountains have increased seven-

fold. The daily average crude production per producing well in Oklahoma is only 8 barrels, as against 18 barrels in Texas, 26 in New Mexico, 38 in the Rocky Mountains, and 59 in Louisiana. However, Oklahoma is second in the number of producing wells, and second in the number of wells completed. I specifically call your attention to the chart which you see before you. At the bottom is shown the Oklahoma marketable production, which is approximately the same as it was in 1935, as compared against an increase of approximately 2½ of Marketable production in the Mid-Continent Area, which includes the states of Texas, Louisiana, Oklahoma, Kansas, Arizona and part of Nebraska. Compare these figures also with the national marketable production of crude oil, which shows an increase of approximately three times the figure in 1935. The result of this loss of market is that independent producers and small companies of Oklahoma, who employ the greatest number of those engaged in the oil industry in our state are on the verge of financial catastrophe. And the loss in revenue to the Government of Oklahoma will be reflected in a drop in income taxes and other tax sources, in addition to the loss in gross production taxes.

A study of the problems thus presented in the oil industry indicates no easy solution.

In an effort to solve this most important problem, certain bills will be presented for your consideration. I invite your earnest study of these bills, and I feel certain that a solution can be found by this body which will again restore to Oklahoma its rightful share of the market for oil in the United States, thus keeping the oil industry in Oklahoma on a sound financial basis.

Roads and Highways

In recent years we have made great strides in improving our rural roads and state highway system but we have a long way to go before we bring our system up to the standards required by modern day travel. It is my hope and my goal that we shall modernize and build 2,500 miles of new highways during my administration as Governor. I expect our economy to be sound enough during the next four years so we will be able to spend $200 million on state highways, plus the millions of dollars which will be available to spend on toll road construction. This program will enable us to carry on the greatest highway modernization and new construction program the state has ever known.

In addition to this program for the state highway system, I want to see the county rural road program continued, with the money spent in such a way during the next four years that the County Commissioners will dust-proof, by oil-matting or some other suitable method, at least 2,500 miles of rural roads. I know these are strong challenges but they are not impossible. It will be my plan to constantly work to make these challenges a reality. The funds going to County Commissioners for road building purposes will gradually increase as our economy grows stronger. This increase in funds for rural roads must reflect more miles of dust-proof roads than we have been receiving or a new program will be recommended to the Legislature governing the rural road program for the rural people of this state.

I know that in many counties of Oklahoma much progress has been made in improving the rural road system but in some counties the progress has not been as good as it should have been.

We are going to watch expenditures of state funds, not only by the Highway Commission but by the County Commissioners of this state. We must have more miles of roads for the money spent than we have been receiving.

It is my further recommendation that the one cent per gallon gasoline tax already imposed be made a permanent tax for the benefit of rural roads.

In order to safeguard our road users taxes for roads, *I am recommending that you refer to the people a proposed Constitutional Amendment which will earmark, on a permanent basis, those road-users taxes which may be levied in the future.* If this Amendment is adopted, it will enable the Highway Department to plan a long-range highway modernization program for Oklahoma—a program which will be financed by those people who travel the highways of this state.

Building roads is a continuing process. Roads are continuing to wear out and needs arise for additional highways and highway improvement. In order for us to grow and prosper and develop the strong, well-balanced and sound economy which we are seeking, it will be necessary for us to build a system of good highways throughout the state.

Public Safety and Defense

When the Department of Public Safety was created, a driver's license fee of fifty cents per year was assessed against the driving public to finance this department. As the cost of operation went up and troopers were added, it was found that the fifty cents was not sufficient to maintain this division of government. Under the Turner Administration it was increased to $1.50. That was adequate at the time but we find ourselves in this position today: The Department of Public Safety is spending approximately $700,000 per year more than the driver's license income will provide. This $700,000 per year is coming out of the General Revenue Fund, which means' in short, that the mental hospitals, common schools, institutions of higher learning, roads, soil conservation, and other governmental programs in general are financing, through reduced appropriations for their own use, this deficit for the Department of Public Safety. *My recommendation to the Legislature is that we meet this need for the Department of Public Safety by increasing* the Driver's and Chauffeur's license fees in such an amount as is required for them to have a balanced budget.

The Department of Public Safety has been doing a good job, generally speaking. There is no way for us to estimate the value of the work that is being done by the troopers who constantly patrol our highways. There is no doubt in my mind but that the death rate on our highways would increase several hundred percent if the efficiency of this department were curtailed by forcing it to operate on its present revenue. With that reality in mind, I do not hesitate at all to recommend to you an increase because human lives are at stake.

I have recommended a reduction in the appropriation for Civil Defense. I believe that we can operate the Department on an adequate basis on much less money than we are now spending. I recognize the importance of this division of government and if the need arises for additional help, I will pay the additional help out of the appropriation that you normally give to the Governor for the extraordinary protection of the State.

I have recommended an increase in the appropriation for the Adjutant General Department in order to provide for the proper maintenance of new armory buildings.

I believe that if the recommendations I have made concerning public safety and defense are enacted into law, we will be able to provide a very sound program for these two functions of government.

Economic Development

We have made great strides in developing a better balanced economy for Oklahoma in recent years. Our industrial payrolls have increased considerably.

Our per capita income has gradually increased. Even though we have enjoyed these advancements, we haven't even scratched the surface insofar as our possibilities for agricultural and industrial advancements are concerned. We are fortunate to be living in a state that is rich in resources. We have coal reserves, oil reserves, gas reserves, thousands of acres of rich timberland, many valuable deposits such as glass sand, granite rock, gypsum, and clay. In addition to all these natural resources, we are a rich state in the field of agriculture. We have our plain lands suitable for wheat, cotton, and small grain growing. We have the hill lands good for cattle grazing and we also have our mountainous country filled with beautiful lakes and streams, which provide one of the best recreational areas in the nation.

In addition to all these resources we have a good, stable state government that we hope to improve during this Session of the Legislature. We have a good educational system and we are rapidly developing a fine highway system. But the greatest of all our assets is our people. We have the right kind of people. They are the kind of people who are willing to do a day's work for a day's pay. The government and people working together can develop a much stronger, better-balanced economy which, in turn, will mean better living for all the people of Oklahoma. With this thought in mind, *I am recommending to you to enact into law as soon as possible House Bill No. 501* which is known as a State Economic Development Act. This Act will set up a new department, under the direct supervision of the Governor, known as the Department of Commerce and Industry. This Department, under the direction of the Governor and Advisory Committee, will attempt to first acquaint the people of Oklahoma with Oklahoma. I mean by that we will let the people of this state know about our resources, our manufacturing concerns, and our agricultural and manufacturing possibilities. We will consider this as our number one job of selling Oklahoma to Oklahomans. We will constantly study ways and means of developing a program in this state which will help the business concerns already established and cause them to expand. We will also encourage business concerns who are not now established in Oklahoma to want to do business within its borders. I hope that within a few days you will lay this bill on my desk to be signed and become a law of Oklahoma.

After you have studied this message and the bills that are being introduced to carry out the contents of this message, I hope you will find that it merits your support and enact it into law at the earliest possible date.

I know that you have a hard job serving in the Legislature and carrying on your businesses and professions back home. I know from experience that on my weekends back home I was able to keep in close contact with my own business and with my constituents. It is my firm conviction that a four-day legislative week is actually better for the people in the long run than a five-day week because it gives you the opportunity over the long weekend to do the things which you need to do for yourselves and to stay close to the people. As long as public officials listen to the people and stay close to the people, we will have a government more nearly the kind of government which we believe in and which we all want to see continue—that is, a government of the people, by the people, and for the people

As your Governor, it will always be my intention and my sincere desire to work with the Legislature and the people of this state in devoloping a program. My ears will always be open to listen to words of wisdom and counsel from both the members of the Legislature as well as the people.

I do not present my legislative program to you as a program of perfection. If, within your wisdom, you see where it can be improved, I will welcome your recommendations and amendments to the program.

The Governor's office will be open to you. Feel free to consult and talk with me concerning your personal problems as well as state problems.

COMMITTEE REPORTS

The following Bill was reported by the Committee named, ordered printed and placed upon the Calendar unless otherwise indicated:

DO PASS:

SB 5—Revenue and Taxation.

SPECIAL COMMITTEE REPORT

Senator Jones, Chairman of the Committee on Privileges and Elections and as authorized under **SR 1**, submitted the following Committee Report, which was adopted upon his motion:

Mr. President, we, your Committee of Privileges and Elections, to whom was referred the petition of Mr. H. G. Bill Dickey of Tulsa, Oklahoma, contesting the election of November 2, 1954, herewith return the same with the recommendation that Arthur L. Price be seated as the duly elected Senator for the 31st Senatorial District of Tulsa, Oklahoma, as a result of November 2, 1954 election.

In this connection you are advised that the Committee made a trip to Tulsa, Oklahoma, and heard all the evidence presented by Mr. Dickey, and while we are unanimous in our conclusion that the Tulsa County election officials were very lax in conducting said election, and as a result thereof we feel that legislation should be enacted by this session of the Legislature reciting in no uncertain manner the procedure to be followed by all election board officials, yet we found nothing which would justify the Senate in sustaining this contest.

It is our desire to point out that this is the second time an election contest has developed over the senatorial seat in Tulsa County, and that shortly before we arrived in Tulsa, all ballots had again been dumped into gunny sacks, and while it was generally circulated over the State by medium of the press and radio that a contest was pending, the Secretary of the Tulsa Election Board, Mr. Lester Chambers, told your committee that he did not know of such a contest, and therefore dumped the ballots. This action prevented a recount.

Section 361, Title 26, O.S. 1951, provides the qualifications for a ballot counter on election day in the precincts. Section 325 F, Title 26, O.S. 1951, provides that the absentee ballots shall be counted by the Election Board. We heard undisputed evidence that the Election Board of Tulsa employed at least one counter who was not a qualified voter in any precinct in Tulsa County. Mr. James S. Watson, Chairman of the Tulsa County Election Board stated to your committee that in his opinion it was not necessary for the Election Board to employ the services of qualified electors as counters and we recommend that said Section 361, Title 26, 1951, be amended to require all ballots to be counted by qualified electors of the county where the votes are cast.

We believe that Senator Arthur Price was not a party to any of the shortcomings of the County Election Board of Tulsa County. The contestant admitted as much and we concur in his statements.

Appropriate legislation covering our points is expected to be introduced by your committee in the future.

Respectfully submitted,

S/ D. L. Jones, Chairman

January 31, 1955

Honorable Ray Fine,
President Pro Tempore
State Senate
Building
Dear Senator Fine:

Inasmuch as I feel that the Moratorium which I issued last week wherein we stated that, due to a backlog of work, we would not approve the licensing of any new Companies in the State, until we had examined the annual reports and licensed the 645 companies for the license year 1955, which license year begins March 1st, already doing business in the State and that we could not approve any new policy forms until we had approved the backlog of Life, Accident and Health policy forms that had already been submitted to this Department, and we will be in the process of collecting approximately seven million dollars in premium taxes between now and March 1st, and inasmuch as it was not my intention to step on anybody's toes, but I was only asking for a breathing spell until my staff and I could expedite the work that was already before us and since there seems to be some misunderstanding, therefore, will you please publicly apologize to the Senate in my behalf for any misunderstanding that I have caused and state to them my Moratorium has been withdrawn as of this date.

Yours respectfully,

S/ Joe B. Hunt, Commissioner.

SENATE CONCURRENT RESOLUTION NO. 3—By Collins (Seminole).

A CONCURRENT RESOLUTION DECLARING THAT THE CONTINUED EXCESSIVE IMPORTATION OF FOREIGN OIL AND ITS DERIVATIVES IS INIMICAL TO THE WELL-BEING OF THE UNITED STATES OF AMERICA AND THE STATE OF OKLAHOMA.

WHEREAS, Oklahoma for many years has been a leader in the production of oil and gas and an advocate of the conservation of oil and gas; and

WHEREAS, the economy of the citizens of the State of Oklahoma is closely allied and dependent upon the production of oil and gas in this State; and

WHEREAS, by reason of continued high imports of oil and its derivatives into this country from foreign markets, Oklahoma has been forced to reduce its current production much lower than its ability to produce oil within the standards of proper conservation of oil and gas, resulting in great losses in taxes which are used for the benefit of the schools, highways and general revenues to the State of Oklahoma, and resulting in great losses to the economy of the State of Oklahoma and its citizens; and

WHEREAS, by reason thereof the incentive to discover new reserves in the State of Oklahoma has been destroyed, which reserves are vital to the defense of this Country.

NOW, THEREFORE, BE IT RESOLVED BY THE SENATE AND THE HOUSE OF REPRESENTATIVES OF THE TWENTY-FIFTH LEGISLATURE OF THE STATE OF OKLAHOMA:

THAT, the continued import of foreign oil and its derivatives into the United States is detrimental to the citizens of the United States; and

THAT, if the importation of foreign oil and its derivatives is continued, it is the opinion of the Senate and of the House of Representatives of the Twenty-fifth Legislature of the State of Oklahoma that adequate domestic petroleum reserves, which are vital to the defense of this Country, will not be discovered and will not be available for use in this Country in a time of emergency; and

BE IT FURTHER RESOLVED THAT, in addition thereto great and serious losses are resulting to the economy of the citizens of the State of Oklahoma by reason of foreign oil and its derivatives supplanting the traditional market of oil and gas that can be produced in the State of Oklahoma under sound conservation practices.

A CONCURRENT RESOLUTION RELATING TO COTTON ACREAGE CONTROL; MEMORIALIZING THE PRESIDENT AND THE CONGRESS OF THE UNITED STATES TO PASS SUITABLE LEGISLATION INCREASING PRESENT COTTON ACREAGE ALLOTMENTS AND ESTABLISHING A LONG-RANGE COTTON ACREAGE PROGRAM.

TO THE PRESIDENT AND THE CONGRESS OF THE UNITED STATES OF AMERICA:

Your memorialist respectfully represents:

WHEREAS, the exports of cotton from the United States have increased from approximately three million five hundred thousand (3,500,000) bales in 1953, to approximately five million (5,000,000) bales in the year 1954; and

WHEREAS, domestic consumption of this commodity has also greatly increased during the past year, and as a result thereof there has been an unexpected diminishing of the supply of carry-over cotton; and

WHEREAS, this situation, in the absence of proper cotton acreage allotments, may lead to unrestricted planting and possible acute overproduction in the year 1956.

THEREFORE, YOUR MEMORIALIST, THE TWENTY-FIFTH LEGISLATURE OF THE STATE OF OKLAHOMA, PRAYS:

1. That the President and Congress of the United States consider legislation which will permit increased cotton acreages for the year 1955, and develop a stabilized long-range cotton acreage program which will eliminate the uncertainties attendant to fluctuations in acreage allotments.

2. That a copy hereof be sent to each member of the Oklahoma Delegation in Congress and to The Honorable President of the United States.

A RESOLUTION, MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO ENACT NECESSARY LEGISLATION GIVING AID TO CERTAIN FARMERS OF THE STATE OF OKLAHOMA.

WHEREAS, the control of crop production or restriction placed upon the use of farm lands for certain purposes by the United States Government has created depressed financial conditions

among thousands of people who have resided upon and personally operated farm lands in the State of Oklahoma; and

WHEREAS, by reason of the conditions set forth in the first paragraph hereof, hundreds and thousands of farmers, who owned and personally operated not to exceed 160 acres of land, have been compelled to move to the cities and towns throughout the State and seek employment in industries in order that they may support and maintain themselves and their families and that such conditions have been brought about by no fault of the people of the State of Oklahoma; and

WHEREAS, the people of the State of Oklahoma are entitled to immediate legislation, having for its purpose the relief of the needy and destitute farmers of the State of Oklahoma who now own and personally operate or who formerly owned and personally operated not to exceed 160 acres of land in the State of Oklahoma for agricultural purposes.

NOW, THEREFORE, BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES OF THE STATE OF OKLAHOMA, THE SENATE OF THE STATE OF OKLAHOMA CONCURRING THEREIN:

That the Congress of the United States be and is hereby requested to enact necessary laws which will provide for the immediate relief of farmers throughout the State of Oklahoma, who own, reside upon and personally operate or who may hereafter own, reside upon and personally operate not to exceed 160 acres of land for agricultural purposes, by removing all restrictions, conditions and limitations governing the number of acres of land which each of such farmers may operate and the kind or amount of agricultural products which they may produce; that in so doing, the cities and towns of the State of Oklahoma will be greatly relieved of congested population for which there is insufficient housing; that the standard of living of such farmers will be greatly improved and industries, other than farming, may then absorb the vast number of unemployed.

HCR 503 — By Goodfellow, Long (Caddo), Allard, Bailey (Kay), Beard, Berry, Cartwright, Evans, Folsom, Long (Seminole), Munson, Shibley (Creek), Staats and Taylor, of the House, and Baldwin, of the Senate.

A RESOLUTION RELATING TO THE IMPORTING OF CRUDE OIL FROM FOREIGN COUNTRIES, MEMORIALIZING THE PRESIDENT AND

THE CONGRESS OF THE UNITED STATES TO ENACT SUITABLE LEGISLATION TO CURB THE IMPORTS OF CRUDE OIL FROM FOREIGN COUNTRIES.

TO THE PRESIDENT AND THE CONGRESS OF THE UNITED STATES OF AMERICA:

Your memorialist respectfully represents:

That crude oil and petroleum products are among Oklahoma's greatest natural resources; that the State of Oklahoma has taken every precaution to properly conserve its crude oil reserves by limiting production to conform with local demands;

That competition from foreign imports have a tendency to nullify the efforts of the State of Oklahoma and of other states to properly conserve their oil reserves and that such imports should, therefore, be controlled in proportion to domestic production and demand;

That when drastic curtailment in oil production was imposed within the United States during the year of 1954 to the extent that the economy of the State of Oklahoma was on the verge of economic chaos, imports of foreign oil to the United States were being increased.

NOW, THEREFORE, BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES OF THE STATE OF OKLAHOMA, THE SENATE CONCURRING THEREIN:

1. That the President and Congress of the United States enact legislation curtailing and controlling the imports of foreign crude oil and petroleum products to the United States, in such a manner that the present rate of imports be reduced fifty (50) per cent and in the future that such imports be permitted only in direct ratio to domestic demand and production of such products within the boundaries of the United States.

2. That copies hereof be transmitted to The Honorable President of the United States and to the Oklahoma Delegation in Congress.

Senator Young (Cleveland), was recognized on a point of personal privilege and asked unanimous consent, which was granted, to have the following article from the Norman Transcript dated February 13, 1955, incorporated in the Journal:

SOME UNANSWERED QUESTIONS

Reasons given by Dr. H. B. Witten for his resignation as superintendent of Central State Hospital leave some questions unanswered.

Aside from the doctor's expressed fear that a change in the state mental health law will disrupt the mental health program as now carried on, Dr. Witten says he has been handicapped by "local political interference" with the hospital operations. He also says a state senator asked for permission to collect donations from hospital employes to meet a deficit in a political campaign fund.

Dr. Witten did not name either the senator who wanted to solicit funds or the individuals who he blames for "local political interference."

The state senator from this district and one of Cleveland County's representatives have denied on the floor of the Legislature that they have attempted to interfere with hospital operations. The senator says that he asked the hospital administration to increase pay of lower paid employes, but that he did not regard that as political activity. The other representative is scheduled to state his position on the floor of the House of Representatives Monday.

The matter of solicitation of contributions to a political fund is purely one of fact. Who did it? Governor Gary can easily find out about that when he makes his own investigation of the situation.

Every state institution should be free of political interference in its management and operations. However with regard to Dr. Witten's charge of "local political interference," a check should be made to see if Dr. Witten's ideas about what constitutes political interference differ substantially with those of legislators and state officials.

It is possible that Dr. Witten concentrated so completely on the professional part of his job, to heal mental patients that he has given little or no consideration to the need for good public relations.

Sometimes heads of such institutions believe they should be given plenty of money to operate and then be permitted to erect a tight wall around their operations, shutting out legislators and the public alike.

That just can't be done. If for example, employes complain to legislators about their pay, working conditions or other matters, the legislators naturally feel an obligation to confer with the institution head about such things, regardless of whether they want to have a voice in the selection of employes. That can be done without bordering on political interference, though it is true in past years that some legislators have gone much further and really tried to dictate to the management.

Also the hospital management should always be ready to give an accounting to the public of its stewardship.

For several months after Dr. Witten took charge here, this newspaper found it extremely difficult to get news stories about hospital activities, even though most of the information sought was favorable to the hospital and would have helped improve its standing with the public.

No one but the superintendent was permitted to give out information, and many times it was not possible to reach him. Conditions have improved in the past few months, but there is still lacking the friendly relationship that a newspaper tries to maintain with news sources.

Getting back to the charge of political interference, Governor Gary's In-

quiry should bring out whether things have happened which have not been brought to light or whether it is just a question of conflicting views on what constitutes normal relations between an institution and legislators.

Senator Young (Cleveland), among other things, made a public request that Dr. H. B. Witten give to the Senate and to the Governor the name of the Senator who had asked for permission to collect donations from hospital employees to meet a deficit in a political campaign fund.

Senator Fronterhouse asked unanimous consent, which was granted, that the following article, entitled, "New School Revenue—10% Franchise Sales Tax," be incorporated in the Journal:

THE NEW PROPOSED SCHOOL REVENUE

By Harlan Croley

A few of the out of state manufacturers who are operating the franchise system in Oklahoma are the auto makers, camera makers, typewriter makers, farm machinery makers, electrical appliance makers, office equipment makers, pen makers, auto supply stores and, drug stores are just a start on the long list which should contribute to the support of Oklahoma schools for operating the monopolistic franchise system in Oklahoma. The franchise system is monopolistic because it closes the markets and sales forces to the would be small competitors and contenders for the markets. I understand there are cases where the franchise system has forced Oklahoma citizens out of business. The franchise system denies your fellow Oklahomans in many cases the right to go into business. The school administrators from the small districts must realize people being denied the right to go into business is costing schools billions of dollars in assessed valuation, which causes reduced taxes, unemployment, and poor education for Oklahoma's future citizens.

The proposed franchise sales tax should be no less than 10% of the gross sales of the manufacturer, or distributor, operating under the franchise system in Oklahoma.

Every manufacturer, or distributor who does not furnish the Oklahoma Corporation Commission, printed qualifications for retailers, wholesalers, or distributors to buy their products shall be considered a franchise operator and pay the ten percent gross sales tax on their sales to retailers, wholesalers or distributors. They should have their price structure placed under the control of the Oklahoma Corporation Commission the same as the public utility companies. Every manufacturer who furnishes the printed qualifications for retailers, wholesalers, and distributors shall post performance bond, agree to fines and seizure for failure to sell anyone meeting the printed qualifications without regard to how many are already selling

their products in a certain area. These same bonds, fines and seizure agreements would apply in cases where the manufacturer, distributor, or wholesaler sold to persons not meeting their printed qualifications filed with the Oklahoma Corporation Commission. All who fail to furnish the printed qualifications to the Oklahoma Corporation Commission shall pay the ten percent gross franchise sales tax. The 10% franchise sales tax should apply to merchandise consigned or leased the same as merchandise purchased.

It stands to reason there would be more business to tax for school purposes, there would be more middle class, fewer rich, and more people employed in the retail business in Oklahoma without the franchise system.

I am sure you have read in the want ads of Oklahoma newspapers, where the manufacturers have nothing for sale, but they have valuable franchises to offer. It is printed they have a valuable franchise to offer. How much should this valuable franchise be assessed for taxes. I think a 10% gross franchise sales tax is fair.

Many of these same manufacturers have caused the State of Oklahoma to price fix the articles they sell. They have masqueraded price fixing under the name of Fair Trade. To the best of my knowledge most of these manufacturers contribute nothing to the support of Oklahoma schools. They still want to use your tax dollars to police the people of Oklahoma, so they can not buy in a competitive market, thus destroying our way of life, free trade free enterprise, and competition. These manufacturers want to tell the people of Oklahoma what may, or may not be a fair price for their products at the retail level. I understand the Russian government also tells the working people what is a fair price.

If such practice is to continue in Oklahoma there should be a license fee of not less than $5,000.00 per article or model for price fixing, or fair trading, which goes to the support of Oklahoma schools. This is in addition to the ten percent gross franchise sales tax.

I am sure at this point most educators will agree it would be foolish to attempt this tax against the nations high and mighty corporations who operate the franchise system, without placing their price structure under the Oklahoma Corporation Commission along with the utility companies. This makes it necessary to give the Oklahoma Corporation Commission a percentage to police these high and mighty corporations who elect to operate under the franchise system, price fixing, or fair trade.

Many of these corporations are famous for extracting the last full measure from the poor, hard working Oklahoma citizens who labor. Without the Oklahoma Corporation Commission approving the price structures it is possible the poor Oklahoma citizen would pay this proposed school tax in full, plus 100% interest, or a profit to these high and mighty corporations.

This is food for thought for those with the ability to think. May I suggest you call a teachers meeting today to pass this proposal along. If you approve of this proposal you should see how many letters you can get in to the Oklahoma Educational Association calling for immediate action.

The passing of this proposal into law is a challenge to your profession. Did you ever hear of the "Lobbies of the Rich" in government? Do you dare to ask the high and mighty corporations to pay their fair share, or do you want to increase the state sales tax on the bread and clothing of the poor to three percent to support your school? Perhaps your demand for a ten percent gross franchise sales tax and $5,000.00 license fee for price fixing, or fair trade will turn the spotlight on the State Senators and Representatives whose judgments are easily swayed by

the high and mighty corporations, and those who would prefer to tax the bread and clothing of the poor at a higher percentage.

To a great many peoples way of thinking, the high and mighty corporations which operate the monopolistic franchise system and price fixing under Fair Trade, have not kept pace with the pricing structure of the telephone companies, electric companies, gas companies, and railroads, which operate under the control of the Oklahoma Corporation Commission.

These same utility companies pay taxes on a high assessed valuation. In some counties I understand they pay twenty to twenty-five percent of the total taxes to support the schools. These companies in addition to doing their fair share toward the support of the schools have a price structure which is pleasing to most people. Many people think they get a dollar value for a dollar spent. Many of these same people are not satisfied with what their dollar will buy from the operator of the monopolistic franchise system and the price fixing or fair trade manufacturers.

The marketing divisions of the oil companies give the school free trade, free enterprise, and competition to tax. They will establish a service station on one corner and sell the independent competitor who builds a service station across the street their products and be grateful for the business he gives them. Which proves we can survive in America under competition, free trade, and free enterprise without the oppression of the monopolistic franchise system and the reduced revenue it produces for the schools by keeping the would be competitor out of the market places. Is this still a free country when people are denied the right to go into business?

Perhaps it is fitting and proper that the Oklahoma Sooners should be the first to ride herd on the high and mighty corporation franchisers, and price fixers, bringing them to justice under the control of the Oklahoma Corporation Commission and having them pay their fair share to support Oklahoma schools along with the utility companies.

Should someone else be selected above the sons and grandsons of the Oklahoma Sooner to ride ahead of the potential stampede of the other forty-seven states for this school revenue.

It is unfortunate that it is not within my power to give you this multi-billion dollar revenue. I can only point this revenue out to you. You personally, with the help of the Oklahoma Educational Association, will have to make the same type of struggle which has brought you from the one-room school, trying to teach eight grades for thirty dollars a month.

I am sure you will find more support than opposition to this multi-billion dollar proposal. Many of you can look up and down the street of your town and see empty buildings. In most cases the owners would like to rent these buildings. The owners are paying taxes to your school district and getting no return on their investment. Many people think the franchise system is keeping them from getting this return. The 10% Gross Franchise Sales Tax has the potential of renting these buildings. The windows would make an excellent place for a sign which glows in the dark.

Support the School

10% Gross Franchise Sales Tax

This Building Is For Rent

Every school teacher and administrator should have a sign glowing in the dark on their automobile.

10% Gross Franchise Sales Tax

Support the School

I have no doubt you will receive much support from the manufacturers who resent the demands of the large department stores for exclusive sales of the product in their trade territory

or no order. Many a manufacturer has submitted to these exclusive franchise demands of the large department stores against their better judgment.

In the event you meet with a heavy lobby, from the lobby of the rich, against your goal, and it is necessary to get tough, then the signs on your automobiles should be changed to read,

No More Franchise Imperialism
Enforce Anti-Trust

These signs should be printed to read, NO MORE FRANCHISE IMPERIALISM, ENFORCE ANTI-TRUST. Those among you with the courage of your convictions can display them to the lobbyist with the soft spoken request, "We must have the revenue in full, no compromise, let us come to terms promptly and with the least possible conflict."

It was indeed a great American who said. "Speak softly, and carry a big stick."

No school administrator should neglect keeping the school patrons well informed. It is their schools and their children's education for which you have made the long years of struggle and progress. No one should overlook the patrons contributions to the schools progress.

You may produce as many copies of this proposal for school revenue as you wish. The more requests you make for this multi-billion dollar revenue, the better your chances will be of securing the revenue for your school. If you know a school administrator in another state, do not fail to send him a copy.

A JOINT RESOLUTION DIRECTING THE SECRETARY OF STATE TO REFER TO THE PEOPLE, FOR THEIR APPROVAL OR REJECTION, A PROPOSED AMENDMENT TO ARTICLE X, OKLAHOMA CONSTITUTION, BY AMENDING SECTIONS 9, 10, AND 26 THEREOF AND ADDING TWO NEW SECTIONS THERETO; RELATING TO FINANCING OF PUBLIC EDUCATION; AND ORDERING A SPECIAL ELECTION.

BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES AND THE SENATE OF THE TWENTY-FIFTH LEGISLATURE OF THE STATE OF OKLAHOMA:

SECTION 1. The Secretary of State shall refer to the people for their approval or rejection, as and in the manner provided by law, the following proposed amendment to Article X of the Constitution of Oklahoma consisting of changes, as hereafter shown, in Sections 9, 10 and 26 of said Article X, and two new Sections to be added to said Article X and to be known as Sections 32 and 33 of said Article X, as hereafter indicated;

§ 9. *(a)* Except as herein otherwise provided, the total taxes for all purposes, on an ad valorem basis, shall not exceed, in any taxable year, fifteen (15) mills on the dollar, *no less than five (5) mills of which is hereby apportioned for school district purposes, the remainder* to be apportioned between county, city, town and school district, by the County Excise Board, until such time as *a* regular apportionment *thereof* is otherwise provided for by the Legislature.

(b) A tax of four (4) mills on the dollar valuation of all taxable property in the county shall be levied annually in each county of the State for school purposes and the proceeds thereof shall be apportioned to the school districts, and separate schools if any, of the county by the County Treasurer on a legal school enumeration per capita distribution basis (in grades one to twelve, inclusive), as certified by the State Department of Education, until otherwise prescribed by the Legislature. Provided, that in case a school district lies in more than one county, such district shall be deemed a school district of the county having the greater part of the area comprising such district, unless otherwise provided by law, and shall be entitled to participate in the proceeds of such tax on the same basis as districts lying wholly within such county, regardless of the residence of pupils counted in its enumeration; but revenue from such tax on assessed valuation of the district in other counties shall, when collected, be transmitted to the County Treasurer of such county having the greater part of the area comprising the district, unless otherwise provided by law, and be apportioned as hereinbefore provided for the proceeds of such tax on the assessed valuation of such county. Not to exceed seventy-five per centum (75%) of the amount received by a school district from the proceeds of such county levy in any year shall be required to finance the State-minimum program of such district. No ad valorem tax shall be levied

for State purposes, nor shall any part of the proceeds of any ad valorem tax levy upon any kind of property in this State be used for State purposes.

(c) Upon certification of a need therefor by the board of education of any school district, an additional tax of not to exceed fifteen (15) mills on the dollar valuation of all taxable property in the district shall be levied for the benefit of the schools of such districts.

(d) In addition to the levies hereinbefore authorized, school districts may make an emergency levy in an amount not to exceed five (5) mills on the dollar valuation of the taxable property in such district when approved by a majority of the electors of the district voting on the question at an election for such purpose. This emergency levy shall provide only sufficient additional revenue to meet the need for the district each fiscal year. Need shall be the average daily attendance of all pupils for the preceding year, plus the average annual increase, if any, for the preceding three (3) years, multiplied by the per capita cost index minus the per capita current expense in the school district for the preceding year. The per capita cost index is set at Two Hundred Fifty Dollars ($250.00) for the fiscal year ending June 30, 1956, and thereafter shall be increased or decreased by the State Board of Education in proportion to the increase or decrease in the per capita income of Oklahoma citizens, unless otherwise provided by law.

§ 10. For the purpose of erecting public buildings in counties or cities, *or for the purpose of raising money for a building fund for a school district which may be used for erecting, remodeling or repairing school buildings, and for purchasing furniture,* the rates of taxation herein limited may be increased, when the rate of such increase and the purpose for which it is intended shall have been submitted to a vote of the people, and a majority of the qualified voters of such county, city, or school district, voting at such election, shall vote therefor: Provided, that such increase shall not exceed five mills on the dollar of the assessed value of the taxable property in such county, city, or school district.

§ 26. *Except as herein otherwise provided,* no county, city, town, township, school district, or other political corporation, subdivision of the State, shall be allowed to become indebted, in any manner, or for any purpose, to an amount exceeding, in any year, the income and revenue provided for such year, without the assent of three-fifths of the voters thereof, voting at an election, to be held for that purpose, nor in cases requiring such assent, shall any indebtedness be allowed to be incurred to an amount, including existing indebtedness, in the aggregate exceeding five per centum of the valuation of the taxable property therein, to be ascertained from the last assessment for State and county purposes previous to the incurring of such indebtedness: *Provided, that if a school district has an absolute need therefor, such district may, with the assent of three-fifths of the voters thereof voting at an election to be held for that p u r p o s e, incur indebtedness to an amount, including existing indebtedness, in the aggregate exceeding five per centum but not exceeding ten per centum of the valuation of the taxable property therein, to be ascertained from the last assessment for State and county purposes previous to the incurring of such indebtedness, for the purpose of acquiring or improving school sites, constructing, repairing, remodeling or equipping buildings, or acquiring school furniture, fixtures or equipment; and such assent to such indebtedness shall be deemed to be a sufficient showing of such absolute need, unless otherwise provided by law.* Provided, *further,* that any county, city, town, school district, or other political corporation, or subdivis-

ion of the State, incurring any indebtedness requiring the assent of the voters as aforesaid, shall, before or at the time of doing so, provide for the collection of an annual tax sufficient to pay the interest on such indebtedness as it falls due, and also to constitute a sinking fund for the payment of the principal thereof within twenty-five years from the time of contracting the same, *and provided further that nothing in this Section shall prevent any school district from contracting with certificated personnel for periods extending beyond the current fiscal year, under such conditions and limitations as shall be prescribed by law.*

§ 32. For the purpose of providing buildings for school districts, there is hereby established a State Public Common School Building Equalization Fund in which shall be deposited (1) such monies as may be designated or provided for such purpose by the Legislature, other than ad valorem taxes, and (2) any royalties, bonuses, rentals, or other monies derived from oil and gas leases on lands that have been or may be granted by the United States to the State for the use and benefit of the common schools, or lands that are or may be under the control of the Commissioners of the Land Office, the proceeds of the sale of easements, improvements and sand and gravel or any such lands, the proceeds of all property that shall fall to the State by escheat, penalties for unlawful holding of real estate by corporations, and capital gains on assets of the permanent school fund; provided, that if such disposition and use of money from any such sources shall be declared invalid, the validity of other provisions of this Section shall not be affected thereby. The State Public Common School Building Equalization Fund shall be administered by the State Board of Education, until otherwise provided by the Legislature. Such Fund shall be used to aid school districts in acquiring buildings, under such regulations as may be prescribed by the Administering Board or the Legislature, but the amount paid therefrom to or for any school district during any twenty-year period shall not be more than the amount by which Four Hundred Dollars ($400.00) per pupil in average daily attendance during the immediately preceding fiscal year exceeds ten per centum (10%) of the district's then existing net assessed valuation. The administering agency is authorized to accept grants-in-aid from the Federal Government for building purposes.

§ 33. The Legislature of the State of Oklahoma is hereby authorized to enact a law whereby the State may become indebted in an amount not to exceed Fifteen Million Dollars ($15,000,000.00) for the purpose of constructing new buildings and other capital improvements and for equipping, remodeling, modernizing and repairing any and all existing buildings and capital improvements at the constituent institutions of the Oklahoma State System of Higher Education and other State institutions. No part of any of said monies shall be, directly or indirectly, allocated to or used by the Oklahoma Educational Television Authority for any purpose whatsoever. Such law shall provide for the payment and discharge of the principal of such debt within twenty-seven (27) years and shall further provide for the payment and discharge of the principal and interest on such indebtedness from one or more of the following sources of State income as follows:

(1) Any remainder available from the two cents (2c) of the tax on each package of cigarettes as heretofore provided and defined in Article X, § 31 of the Constitution of the State of Oklahoma, after the annual requirements for principal and interest on the indebtedness created pursuant to said Section have been fully met, until such indebtedness created by said Section has been fully paid and retired, and thereafter, the full amount of said two cents (2c)

of the cigarette tax so provided, or so much thereof as may be required, until the indebtedness herein authorized to be created is fully paid and retired; (2) An additional three cents (3c) of the tax now imposed, or which may hereafter be imposed, on each package of cigarettes containing more than twenty cigarettes, or so much of said additional three cents (3c) as may be necessary; (3) Any funds available in the Public Building Fund of the State, not otherwise encumbered, or funds available in other Funds of the State not created or realized from ad valorem tax sources; (4) The proceeds of any tax which the Legislature may impose and collect for the purpose of paying the principal and interest on the indebtedness herein authorized to be created, if the funds available for use and pledge under (1), (2), and (3) above should be insufficient; provided that the Legislature shall never impose or collect an ad valorem tax for the purpose of paying any part of the principal or interest on the indebtedness herein authorized to be incurred.

MESSAGE FROM MULDROW

By Fisher Muldrow

Two things have I learned since the first of the year.

First:—Despite the opinion of a few cynical and suspicious citizens, the Oklahoma Legislature is composed of an excellent cross-section of good Oklahomans. Having spent a good many hours on the 4th floor of Oklahoma's Capitol Building and having worked with these men, both Senators and House members, I sincerely feel qualified to make this statement. Composed of business and professional men; farmers and school teachers; laborers and skilled workmen, its personnel is a composite of this great state. Aren't all Oklahomans from one of the above categories and aren't all our people entitled to representation? I think so.

I have personally contacted most of these officials. Not once have I had anything but an attentive and respectful audience;—not always have they agreed but always they have been courteous. Not once has there been any indication of prejudice. Not once, despite the cynic, has there been the remotest indication or suggestion of corruption, of pay-off or of bribe. If I were so depraved as to be inclined to offer a bribe, I would not know with whom to start and, knowing them, as I do, I doubt that any one inclined to stoop to attempted bribery would escape without physical injury.

These men have a tough job. They are working for all of us. Let's help them.

Second:—Too many people "turn up their nose" at the mention of "Lobbyist." Don't kid yourself. The men who work on the 4th floor, with and against me, are reputable and honest men. They are, generally speaking, experts in the field in which they work. Because of their experience and the nature of their work, they are well informed in many other phases of business. They understand the functions of government. Believe me, I know. I am happy to be a Registered Lobbyist and am proud to represent a grand Industy such as ours.

By unanimous consent, upon request of Senator Jones, Larry Derryberry of Altus, a Page in the Senate, and a

member of the 4-H Clubs, which organization is celebrating National 4-H Club Week, expressed deep appreciation of the seventy-five thousand (75,000) boys and girls in Oklahoma for the faith the legislature had always shown in them "to make the best better."

By unanimous consent, upon request of Senator Hope, Clara Lee Steiber of Lindsay, former Poultry Queen in Grady County, and an outstanding 4-H Club member, spoke to the Senate on "My State of Oklahoma."

Oklahoma was also represented by Governor Gary, a committee of four members from the Honorable House, and a number of state organizations interested in the importation of oil and gas. Senator Rinehart informed the Senate that Governor Gary had his facts well in order, and that his presentation was well received. He stated that the members of the Senate and Honorable House delegated to represent Oklahoma worked together and presented a written document showing the conditions that exist in Oklahoma relating to the oil and gas industry. They learned that there are no importers of foreign oil and gas in Oklahoma of any consequence; that most of the

oil is imported by two foreign companies, and that because of the cheap cost of labor and development and the absence of conservation laws that these concerns can put the oil in tankers and get it across to America for twenty cents (20c) a barrel and that the same quality of oil costs the American producer Two Dollars and Twenty-five cents ($2.25) per barrel. He stated that these foreign companies own ninety (90) per cent of all known oil and gas in the free world; that there is no Point Four (4) money involvel in this; and that the skirts of the Oklahoma producers of oil and gas are clean insofar as they could find.

SENATE CONCURRENT RESOLUTION NO. 18 — By Wilson (Greer), Walker, Coppock, Allen and Young (Cleveland).

A CONCURRENT RESOLUTION MEMORIALIZING THE PRESIDENT OF THE UNITED STATES AND HIS COMMISSION ON INTERGOVERNMENTAL RELATIONS NOT TO APPROVE THE REPORTED RECOMMENDATIONS OF THE COMMITTEE ON FEDERAL AID TO AGRICULTURE RELATIVE TO TRANSFER OF THE FUNCTION OF SOIL CONSERVATION TECHNICAL ASSISTANCE TO THE VARIOUS STATES.

WHEREAS, the Committee on Federal Aid to Agriculture, a sub-committee of the President's Commission on Intergovernmental Relations, has reportedly

recommended to the Commission the transfer of the function of soil conservation technical assistance to the various states; and

WHEREAS, the National Association of Soil Conservation Districts, representing more than two thousand six hundred (2,600) soil conservation districts in the United States, and the Oklahoma Association of Soil Conservation Districts, representing eighty-six (86) soil conservation districts in this state, along with other individuals, groups, and organizations who are vitally interested in the program, are opposed to the reported recommendations; and

WHEREAS, if the reported recommendation is approved it would place an inordinately heavy financial burden upon the State of Oklahoma, since the contemplated state appropriation each biennium would amount to a sum in excess of four million dollars ($4,000,000.) in addition to sums now being appropriated if assistance to local soil conservation districts is to be maintained at current levels; and

WHEREAS, such program would greatly retard, if not eventually destroy, the national program of soil and water conservation now being carried on, and since the problem is national in scope, it should be dealt with accordingly;

NOW, THEREFORE, BE IT RESOLVED BY THE SENATE OF THE TWENTY-FIFTH OKLAHOMA LEGISLATURE, THE HOUSE OF REPRESENTATIVES CONCURRING THEREIN:

That the President of the United States and the President's Commission on Intergovernmental Relations are hereby respectfully memorialized and urged not to approve the reported recommendations of the Committee on Federal Aid to Agriculture, relative to gradual transfer of soil conservation technical assistance functions from the national authority to the various states.

BE IT FURTHER RESOLVED that copies of this resolution be forwarded forthwith to the President of the United States, to the Chairman of the President's Commission on Intergovernmental Relations, and to the senators and representatives of the State of Oklahoma in the nation's capitol.

HOUSE CONCURRENT RESOLUTION MEMORIALIZING THE PRESIDENT AND CONGRESS OF THE UNITED STATES RELATING TO LEGISLATION DESIGNED TO LIMIT IMPORTS OF GLASS, LEAD, ZINC AND OIL.

TO THE PRESIDENT AND THE CONGRESS OF THE UNITED STATES OF AMERICA

Your memorialist respectfully represents:

(1) That imports of glass, lead, zinc

and oil have forced a curtailment of production of these products within the State of Oklahoma;

(2) That said curtailed production has caused material unemployment within the State of Oklahoma with great damage to the economy of our State because of losses in income to employees in the several industries mentioned;

(3) That the foreign products so imported are manufactured with substandard labor, are of inferior quality, and, therefore should not be permitted to compete with domestic products to the detriment of both labor and management in the industries mentioned;

WHEREFORE, your memorialist, the Twenty-Fifth Legislature of the State of Oklahoma, prays:

That the President and Congress of the United States enact such legislation as will curtail the imports of glass, lead, zinc and oil to the end that full-scale domestic production may be restored.

MESSAGE FROM THE GOVERNOR

TO THE PRESIDENT AND MEMBERS OF THE HONORABLE SENATE TWENTY-FIFTH OKLAHOMA LEGISLATURE
Gentlemen:

This is to advise you that the Governor's Economic Development Commission in its meeting this afternoon in the Blue Room has adopted a Resolution respectfully calling your attention to the importance of the enactment of **HB 706**, which is now on the Senate Calendar, to Oklahoma's Industrial Development.

This measure, the Economic Development Commission points out, would vitalize the Constitutional Amendment adopted July 6, 1954, modifying the escheat provisions of the Constitution so as to permit such limited corporation ownership of real estate outside the corporate limit of cities and towns as is necessary and desirable to attract investment capital to Oklahoma for construction of buildings and facilities to be leased to industrial concerns which we are seeking to attract to our State.

Your serious consideration is respectfully urged on this matter.

BY THE GOVERNOR OF THE STATE OF OKLAHOMA
Raymond Gary

MEMBERS OF THE HOUSE OF REPRESENTATIVES, MEMBERS OF THE SENATE, LADIES and GENTLEMEN:

As you know, this makes the second time I have come before you this session of the legislature. I want to tell you at the beginning that I appreciate very much the cooperation I have had from the members of the Oklahoma Legislature. You have been very kind to me. You have been very kind to the people of Oklahoma. The people have been very kind to the legislature. In fact, I believe I have heard more complimentary remarks made about the Oklahoma Legislature now in session than any legislature since I have been keeping up with the legislatures. I have observed that one of the papers in the state which sometimes takes pretty strong digs at the legislature has been kind to this legislature. Do you know why I believe they have? because this legislature has been a very progressive one and a very fair legislature. You have not side-tracked any of the major problems. It is true, in your wisdom, that you have decided to make a longer study, or further study of some of the major problems of government and you are probably right in doing so. But if you didn't pass another bill, another administration measure, I would be willing to say and be happy to say that you have been very kind to me. You have already passed the major portion of the program that I recommended on January 11th. And after all, the program I recommended on January 11th is a four-year program. I actually didn't expect the legislature to have time during this session to give consideration to the entire program that I recommended. I want to say in the beginning, "thank you" for the help that you have already given me as Governor. No Governor could ask for any better, more cooperative spirit on the part of the legislature.

I know that all of you, members of the legislature and the people as a whole, were very much shocked, very greatly shocked when the story that appeared in the Saturday Evening Post was made available to the reading public. On the front page, the cover page: "Oklahoma Is In A Mess," by the former Governor. We have spent hundreds of thousands of dollars of tax money in recent years buying advertising space in national publications, in an effort to point out the good things about Oklahoma, and to acquaint the people of this nation about Oklahoma in a favorable way. And in addition to the hundreds of thousands of dollars that have been spent of the taxpayers' money by appropriations from the legislature, private citizens and organizations have spent hundreds of thousands of dollars sending delegations to the east, and

to all sections of this nation, to tell them about what a great state Oklahoma is and the greater state that it will be in the years to come. This one little cheap story will do more damage than a million dollars worth of favorable advertising can do for Oklahoma. Why a story like this was written, I can't answer. I don't know. The people of the state are wondering why. Why is it? We know in Oklahoma that we have some shortcomings, sure. We have some bills before the legislature now to correct our shortcomings and to make this a better government; to make this state a better state. But it is certainly no advantage to Oklahoma for us to say to people throughout the nation that we have made mistakes. We are trying to correct the mistakes. There is no advantage in the people of this state pointing out our shortcomings. I want to tell you, for each shortcoming we have in Oklahoma I can point out several good things about Oklahoma.

I know it was mentioned in this article to the effect that our county commissioners wasted huge sums of the taxpayers' money. I want to say this; that it's probably true that there have been some county commissioners in the past, and probably now, that are not spending the money wisely. But I want to tell you this, too, that the great majority of county commissioners of Oklahoma are honest, conscientious public servants.

It just isn't fair to condemn all of them because of the shortcomings of a few. I know that it is true that we have some roads in Oklahoma that are not up to standard specifications. But I know that every other State in the Union has some bad roads, too. And I don't believe there is a single State in the Union, based upon the per capita wealth, area and population, which can boast of more miles of roads that have been constructed in the last four or five years, and are now under construction, than the State of Oklahoma. From 1918 until 1946, we spent an average of Ten Million Dollars per year, or a little less, for new construction. It wasn't nearly enough. That is about the amount we spent. Now, this year we will spend, counting the money that we will spend on the new toll roads, which won't be a lot this year; counting that , plus the State Highway contracts, we will award in round numbers around forty-eight million dollars for new roads in Oklahoma.

Since January 1st, including next week's contractual letting, we will have awarded road contracts enough to build more than two hundred miles of new roads in Oklahoma since January 1st of this year. And by the end of this year, we will have awarded enough contracts to build more than seven hundred miles of new highways in Oklahoma during this calendar year.

That doesn't sound like "Oklahoma is in a mess." We are progressing. Next year, counting the toll road construction, we will be able to award, in round numbers, approximately ninety million dollars for new highway construction. What other State in the Union, of comparable size, area and capital wealth, can boast of that kind of a road program? This road program, which is one of the most progressive in the Nation and certainly by far the best that Oklahoma has ever had, is largely "Thanks" to a progressive-minded legislature. You made it possible.

In addition to that road program, you members of the Legislature submitted to the people a constitutional amendment which will enable the State of Oklahoma to have one of the most progressive school programs, all the way from kindergarten, clear on through the higher institutions of learning, of any State in the Nation. What happened? The people of Oklahoma adopted that program by more than a three-to-one

vote, which indicates to the people of the Nation that our citizens are progressive-minded. We are not a stalemate state. We have faith in Oklahoma. We look to the future with a strong feeling of confidence, because we have the right kind of people in Oklahoma. We know that the citizens of this state will face head-on all the major problems we have and solve them in a satisfactory manner.

So this legislative session, with the help of the people, has already provided for the most progressive road-building program in history and the best school program the state has ever had, and one of the best in the Nation. And I want to tell you something else, too, while I am talking about schools. We already have one of the best school systems of any State in the Nation. Did you know that Oklahoma has more degree school teachers than any State in the Union, with the exception of one? In order to have a good school system, it's necessary that we have well-trained and well-educated school teachers. We have them in Oklahoma. And we have one of the best systems of higher institutions of learning of any State in the Nation. I want to tell you something else. We have provided for this progressive program of government roads, education, and I might say that we have one of the most liberal welfare programs of any State in the Nation. Since you have been in session we have been able to increase the average payment to the aged citizens in this State by four dollars per month. We have all of this progressive program of government; yet, in spite of what my predecessor might have said, thirty-three states in the Union have a higher per capita tax rate than the State of Oklahoma. Thirty-three states collect more from the individual, local and state combined, than the people of Oklahoma pay. Actually, we are ten dollars below the national average. What does that indicate to you. It indicates to me, it indicates to you, and it's sufficient proof to those thinking citizens with venture capital to invest, that Oklahoma's government is sound. That Oklahoma's government is stable. That Oklahoma's school system is sound and progressive. Actually, we are providing for a better school program than the average state in the Union with less cost per child than the average state in the Union.

In the field of mental health we have progressed considerably. We have one of the best mental hospital systems in the Nation. It's been made that way because of the far-reaching, liberal-minded legislatures in the past and today. Just last week many of you were with me, down just south of Norman, where we were dedicating a new bridge, a new bridge that was made possible by the last legislature; a new bridge that cost approximately three millions of dollars. One of the most modern bridges in the entire Nation. And in my speech down there . . . I have always felt like I should give credit where credit is due . . . I complimented the legislature, the last legislature, for making it possible to have this new bridge. I complimented the Governor of Oklahoma, because I thought he had something to do with the building of that bridge. But then I pick up the Saturday Evening Post and I notice over here on Page 20 where he has furnished this paper, or magazine, a picture of the bridge. But he didn't furnish a picture of the one that we dedicated. He furnished a picture of the old bridge that was built in 1913. So, I feel that I made an error last week when I gave my predecessor part of the credit for building this bridge. Because, undoubtedly, this bridge was built without any knowledge by Johnston Murray.

I am sure, if he had known this three million dollar bridge was under construction down there and was practically completed before he went out

of office, he would have sent a picture of a new bridge instead of the old bridge.

I was over at Henryetta yesterday. I was over there at the invitation of the citizens of that fine city. They were celebrating the Twenty-Fifth Anniversary of the Pittsburgh Plate Glass Company. At the speaker's table they had the vice-president of this great company and he made a speech. I want to quote a part of his speech to you. He said, "We have enjoyed our twenty-five years in Oklahoma. You have a great state," he said, "you have a great school system that we are proud of. You have a stable state government." This is by the vice-president of the Pittsburgh Plate Glass Company. "You have a stable state government. We have a lot of confidence in the future of Oklahoma."

What does that indicate? It indicates to me—it proves to me and you—that those people who have invested their venture capital in Oklahoma are proud of their investments in Oklahoma. They have expanded that plant and they will probably expand it in the future. He told me that they were running at full capacity, and they are proud of the people that work for them in the vicinity of Henryetta. This executive said, "We get along fine with the people that work for us." He didn't advocate the "right-to-work" law. I noticed the former governor had something to say about that. Actually, I don't remember him recommending it to the legislature. Do you? And I noticed, too, that he took a crack at the United Drys. Now, to the best of my knowledge, when he was running for governor he pledged his support to their program. That is what they told me. What has gone wrong, anyway? Why? Why would a man change his mind. Last night, I read some of the speeches of the former governor that he made two years ago. They were very good speeches, boosting Oklahoma. All of a sudden he begins to find things wrong with the great State of Oklahoma. You know, it makes me feel better on the inside to be able to say something good about a state or about an individual than it does to say something that is damaging. And I want to devote my time as Governor to saying something g o o d about Oklahoma and about the people of Oklahoma.

When my tenure of Governor is over, even though I know now that I will have many disappointments in my public life as Governor, just like you have disappointments in your public life as a member of the legislature . . . I know that I will, but I am going to still be for Oklahoma when my term of office is over.

And I will always be grateful to the people of this great state for hiring me, for electing me to this Number One office the people have to give to a man in this state. I will be happier by doing it and I will feel that I am doing better, will live better, and be contributing something to the people of Oklahoma. And I know there is something else in this that I do not think is becoming to the former governor. They said he had to leave the state in order to find a job. Well, you know most of the governors we have had in this state . . . well, all in fact, I believe, with the exception of about two, have had a job or profession before they were elected governor, which they went back to.

There are still some Murrays on the state payroll.

I want to say this about one of them. Clive Murray down at Tishomingo, in my opinion, is one of our outstanding public servants in Oklahoma.

I am proud he is one of our citizens; that he is on our state payroll. And I know that he will never—knowing him as I do—will never say or do anything to bring discredit on Oklahoma.

But you know the Russian press will be very happy to show the picture of this old bridge, which we have abandoned down across the Canadian River.

They will be very happy to show the picture of this empty, almost empty, lake here at Oklahoma City, because that is the kind of propaganda they can use to good advantage in turning the people against our great American Way of Life. I would much rather show the pictures of lakes in this state that are full of water than pick out one practically empty to show them.

We know that lake is almost empty. But we know, too, that this legislature has already passed through this House, and now pending in the Senate, a water study commission; a bill creating a water study commission. We recognize the importance of solving our water problems and we are going to solve them in Oklahoma.

But I want to tell you . . . you can go to nearly any state in the Union right now, where the municipalities are growing like Oklahoma City, and you can take pictures of lakes that are empty. I was in Denver, Colorado just a few days ago. The headline on the paper concerned Denver's supply of water. They are already rationing water in the City of Denver. Why, just a few years ago—two years ago—Dallas was practically out of water. We don't have a corner on the shortage of water. Every state in the Union has a water problem. In my opinion, it's the Number One problem in this Nation today, finding the proper solution to the water problem so we can have an ample supply of water. We are going to find that solution in Oklahoma. I am going to predict that when the next session of the legislature convenes, a water program will be submitted to this legislature which the legislature can and will adopt. We are going out to the grass roots. We are going out to the people and work this program out from the grass roots up.

And the farmers and ranchers will not be fighting the people in the cities and towns in this state. We are all going to work it out together; a program that will enable us to have the water we need, in order to develop this economy like we have dreamed.

Yes, we are a growing and progressive state. If we weren't growing and progressive, Oklahoma City would not be short of water today. But this city, along with Tulsa and some of the other cities of this state, has shown a very rapid growth. Just drive over this city or the City of Tulsa and you can see hundreds of new homes being built. You can see new industrial buildings going up. We are a growing, progressive state. We are progressive-minded people. And we are looking to the future with a feeling of confidence; with a feeling that one of these days we are going to reach that standard of living we have been dreaming of, working toward. We are one of the youngest states in the Union. Just forty-eight years ago we were a strictly agricultural state, dependent upon farming and tilling the soil and grazing cattle for our livelihood. Forty-eight years ago we didn't have the highway system we have now. We didn't have the school system we have now. We didn't have great industries like we have in Oklahoma today.

It was my privilege on the 22nd of this month, last week, to fly to Altus with Senator Jones, and to participate in the program of receiving the first B-47 bomber at that installation. Do you know where that B-47 bomber was made? In Tulsa. In Tulsa; one of the greatest, most modern flying machines made in the world, made by Oklahoma labor in the City of Tulsa; giving employment to more than twenty-thousand people. At this new installation in Altus, they are very proud of that plane. They are proud of it . . . the people at Altus are proud of it . . . out there in an area where just a few years ago buffalo and cattle roamed. Now there is a great military installation.

Oklahoma is one of the great centers of the Nation for aviation. Tinker Field out here; General Senter tells me it is the biggest of its kind in the world. And then say that we are "in a mess." We are growing. We are progressive. Statistics will show you that during the last five years Oklahoma has increased its per capita income of the people a hundred and ninety-two per cent. The National average is 151 per cent. That should be sufficient proof to any citizen of average intelligence that we are progressing and not standing still in Oklahoma. And we do it sometimes in spite of some of the leadership we have had.

Today, I was invited to appear on the program, briefly, of the Farmers Union National Executive Committee meeting in Oklahoma. I was informed that Oklahoma was the Number One State in the Nation in Farmers Union members. What does that indicate? It indicates the farmers of this state are very progressive-minded and they realize that, by banding themselves together, they can be stronger and be able to have their voices heard louder and stronger in Oklahoma. One of the youngest states in the Union, yet one of the most progressive states in the Union. Tulsa is recognized, generally speaking, as the Oil Capitol of the World. Lindsey, the Broom-Corn Capitol of the World. A great state, and we are proud of it. Right now, in the field of Four-H Club work, Oklahoma has the outstanding Four-H Club girls in the Nation from up in Kingfisher County. Oklahoma has produced the outstanding Four-H Club member more times than any other state in the Nation.

In the field of FHA, we rank up toward the top, and certainly, one thing our former governor did compliment, that was our football team. We always come out at the top of the list in the field of football. Actually, we produce more star baseball players than most of the states in the Union. And something else I want to tell you that you probably didn't know, because some of you are not rodeo fans . . . you rodeo fans will know what I am talking about. You know, a few days ago when we were out at Denver, we were out there for the purpose of trying to convince the Board of Trustees for the seventeen western states that Oklahoma is the proper state to locate the Cowboy Hall of Fame. We presented the Oklahoma story. We pointed out to that group of delegates that Oklahoma was a great cattle state; that Oklahoma, during the past five years, had produced more outstanding cowboys than any other state in the Union.

Last year up in Nowata County, in the little town of Lenapah, they produced the World's Champion Cowboy, Buck Rutherford. Down at Henryetta, Jim Shoulders was second. We not only got the first place, but we had the second place. We didn't stop at that. In the high ten, we had another Oklahoman, Cog Wadley from Hugo.

In the high ten, we had three National Champions. We didn't stop at that. In the bareback and bronc-riding, we had Eddie Eck of Beaver, Oklahoma.

Then, we had second place, Buck Rutherford, and then Jim Shoulders again. I could go on . . . I notice some other contests here in steer-roping. Out of the five high winners in the Nation, Oklahoma had four. And there was one other fellow there who won fourth place, from the State of California. We checked his record and we found he moved from Oklahoma to California about two years ago.

Now, these are statistics. They are not Chamber of Commerce figures. I wish the former governor had read these. We were first, and the great State of Texas was second—probably where they should be in a contest of this kind, and we didn't fail to

point out to them that, even though we were producing the outstanding cowboys in the nation today, that we, of Oklahoma, this great state, produced the greatest cowboy of them all . . . Will Rogers. We didn't stop and just point out to them that we were producers of outstanding cowboys and that we were a great cattle country. But we had a film showing them the new highway that is already constructed, that goes by this proposed site of the Cowboy Hall of Fame. I don't know who took the picture—this might have been a Chamber of Commerce picture—but the cars were really whizzing by. But I don't think it was exaggerated much. I did notice that there were tags from practically every state in the Union going by. We showed them all the new construction up and down that highway so they could see Oklahoma was growing: progressing. When we got through with them, they awarded the site to Oklahoma on the first ballot.

Of course, somebody is accusing us of throwing a half-a-million dollars at the , right at the last, but I think the other states offered to underwrite this, too. That is a mighty poor alibi. The State of Oklahoma did not offer to underwrite this. I told them that the state would not underwrite it, but that the public-spirited citizens of this state would underwrite a program of this kind, because we feel this will be one of the greatest tourist attractions in the Nation. In the years to come, Oklahoma is the proper place for this to be located.

Now, I would like to say a few words about the legislative program, the balance of it. I could go on here all evening and would be happy to do so, but I am not going to infringe upon your time in telling the good things about Oklahoma. I will mention this one other thing—I can't keep from it. One governor got up and presented the program to them over there at Denver, a letter in writing, and he said more than three and a half million tourists visited his state last year. I couldn't keep from telling about Oklahoma then. And when it came my time, I said, "That's a lot of people; sure, but we had more than five million visiting the Texoma area alone last year, not counting Lake Murray, Beaver Park, Grand River Lake, Tenkiller, the Platt National Park, the Will Rogers Memorial, the Quartz State Park, and all the other fine parks and recreational areas that we have in this state . . . no telling how many millions it would run." That helped us.

Now, back to this legislative session. We have a few major bills that we must act upon before we can adjourn, in my opinion. I know that one of them, in particular, is a bill that many of you don't like the idea of supporting. I didn't like the idea of having to recommend it; but I know, in the beginning, that many of you didn't like the idea of the school bill. You were afraid the people might rebel against it. But they didn't. If you can show the people of this state the need for our program, they are willing to pay for that program. That is the reason they adopted the school amendment by an overwhelming majority, because they could see the need for it. And they adopted it.

Now, I have recommended an increase in the drivers licenses. Some of you have talked to me and told me you hated to vote for it; that you did not want to vote for it. Now, I want to tell you, I don't believe you are on any dangerous ground at all in voting for a little increase in drivers license, because there is a need for it. If there were not any need for it, certainly I would not have recommended it and you should have voted against it if I had recommended it. Why is there a need for it? I would like to go back to 1937, when the Department of Public Safety was first organized. A fifty-cent drivers license was levied to finance that divi-

sion. At that time it was sufficient. But we have increased the number of Troopers, of necessity, because the number of vehicles on our highways has increased. I don't know what per cent, but probably two or three hundred per cent, since 1937. In 1947, I believe it was, Governor Turner recommended an increase of One Dollar; from fifty cents to a dollar and a-half, because the cost of that department had increased. Now, we find that that department is running short about seven hundred thousand dollars a year. Where will they get the money? Where have we been getting the money? We have been piecing a little of it from highways and roads, and a little of it from mental hospitals; a little of it from education, soil conservation and other essential functions of government.

Now, I feel that we should do one of two things. We should either pass the drivers license increase, so we can have sufficient funds to make that department self-supporting, or cut the appropriation down to the amount of money they now have. In my opinion, if it is the second, it would not be very popular. If you don't do one of those two things, then your conference committee will have to pinch off seven hundred thousand dollars from the other appropriations we are already short on. We already have an insufficient amount of revenue. I hope you will pass this bill. I am willing to take all of the blame for it the Governor can carry, because I am convinced it is the best way to finance that department.

Now, the House has already passed the Water Study Commission and it is over in the Senate. I hope the Senate will act on that. And I hope you will pass the Gasoline Tax Bill this week, along with the Drivers License Bill, so it can be laid on the Governor's desk next week, if the Senate can act on it that fast. If you will do that, it will be possible for us to close this legislature out by two weeks from day after tomorrow . . . two weeks after this week.

And we won't have to crowd ourselves any more than we have had to crowd ourselves in past sessions. I will say that we won't have to crowd ourselves much, because you have a very efficient appropriations committee, and have been sending down to the Governor's office those non-controversial appropriation bills ever since early in the days of the session, and many of them are already enacted into law. So they are not going to have a big log-jam on appropriation measures the last part of this session, and that is usually the thing which always delays adjournment of the legislature. If you can do that; if you can wind up this program within two weeks after this week, I will make this prediction: You will go away from here as the most popular legislature in the history of the state. I say that because you have had many major problems. We have submitted the Constitutional Amendment and had to take a recess for that, then go ahead and wind up in a shorter length of time than the average session in this state; That is the best platform I know of that a man can seek to be re-elected on. You came up here and you did your work well. You didn't fool around about it. You enacted a progressive program; provided a better program of government, in order for us to be able to grow and prosper in this state, and then went home. The people like that. I know, from talking with you folks, that the majority of you want to close it just as soon as you can. And I want to help you. I will be willing to work at night, or any time to help you. There are a few other measures that are important, certainly. I want to say this to you who have bills on the calendar that you would like to pass. When the time comes to strike the calendar, the measures the Governor is interested in, the admini-

stration measures that have not been enacted into law, can come off the calendar at the same time yours do. We will all just drop them together and postpone the balance of the work until the next session of the legislature. But we must pass these essential measures. There are not very many. The bond issue needs to be vitalized and appropriations made so we can start construction of building soon after next July 1st. Now, as I said, there are a lot of those things that I would like to talk to you about. In fact, it is always a pleasure to visit with members of the legislature; that I always feel close to, and I do with you folks. And as I said in the beginning, all of you didn't support me for Governor, and I want to say this; some of the best friends that I have in the legislature t o d a y are folks who didn't support me for Governor. And I am proud to make those new friends, because I feel that it will prove for the benefit of the State of Oklahoma for the Governor to be on good terms with the legislature, and the legislature on good terms with the Governor.

I feel that anytime I can do something to help the legislature, to make the legislature a better legislature, that looks better in the eyes of the people. It helps the entire State of Oklahoma. The legislature is the key to good government in Oklahoma. I appreciate you. I know that some of you have been disappointed in me and some of my decisions, but you have been very kind to me, and I will never forget it. We will keep working together. I have not vetoed a single bill. My predecessor set a record on vetoes. I hope we can keep working close together, in close teamwork; so I can feel that I could sign every bill and wind this session up. By setting another record and not having to veto a single bill.

By working together, we will solve our problems. Stay close to the people, and we will come back two years from now and pick up where we left off, and will solve the balance of the major problems which we have at this time.

Thank you for your very kind attention. You have always been nice to me. I want to say "thank you," and let's keep working.

GENERAL ORDER

SB 289, by Chapman, was read and considered.

Senator Grantham asked unanimous consent, which was granted, that the following article by Sylvia Porter, appearing in the Daily Oklahoman on April 27, 1955, be read, and incorporated in the Journal:

STATES TIGHTENING HOLD ON TAXPAYER

In Idaho, taxpayers this year will pay a sharply higher income tax, and beginning July 1 at least part of what they owe the state will be withheld from their paychecks.

In the state of Washington, the sales tax has just been hiked to 3 1/3 percent, the steepest in the entire country, and so far this year six other states have increased their sales tax rates or narrowed the tax exemptions.

In Alabama, the gasoline tax has been boosted to 7 cents a gallon, and in eight additional states millions of automobile drivers will share the dubious pleasure of paying higher gasoline taxes.

And Utah has raised its property tax . . . Indiana has slapped an extra $30 fee on alcoholic beverage permits . . . South Dakota has advanced the cigarette tax . . . Nevada has lifted the gambling tax . . . Mississippi has increased the corporation franchise tax rate . . . New Hampshire has extended the special $5 head tax. . . .

This year, you and I will hand our state tax collectors the biggest haul in all history.

The state tax take in the year to end this June 30 is slated to soar well above $12 billions, more than double the total in 1946, a full 40-45 percent above the take of as recent a year as 1950.

While the federal government has been easing its grip, our state and local governments have been tightening their hold on our pocketbooks.

The legislatures of 46 states already have met in 1955 or are meeting now. Only Kentucky and Virginia have not called sessions.

New taxes have been recommended by the governors of 12 of these states and hikes in present taxes have been asked by the executives of 29, the Tax Foundation has just revealed.

What's more, the proposals cover "about every major revenue source now in use," the Foundation reports, adding that it expects "the heaviest volume of state tax legislation since 1949 to emerge."

And we haven't seen the worst yet, judging from the Tax Foundation's study—which is impressively appalling just because it is so unemotional and objective. For the study emphasizes that:

The cash nest-eggs the states built up during the war years have dwindled to next to nothing or have completely vanished;

The "tax yield from present revenue sources seems to be at its maximum or saturation point," while spending continues to rise;

The upsurge in population all over our country has caught both state and local governments utterly unprepared;

The states are being badgered for new and improved services, some of which simply cannot be turned down or postponed;

Price increases up and down the line have boosted government costs, and many public works programs cannot be delayed any longer.

The alternatives? The politicians and their financial experts may turn and squirm, but there are only three:

Slash spending. That's easy to suggest, but the facts are overwhelming. For instance, schools take 30 percent of the states' general expenditures and spending for highways represents the second biggest item. How can a state cut down its spending on schools or highways in this era of desperate need!

Go deeper and deeper into debt, borrow the money and let the future "take care of itself." That's the out many are taking.

Slap on new taxes and boost the haul from present levies. That's the top story of the state legislative sessions this year.

Upon motion of Senator Chapman, **SB 289** was advanced to engrossment and third reading.

Upon motion of Senator Chapman, the rules of the Senate were suspended and **SB 289** was considered engrossed and placed upon third reading and final passage.
